EPISODES OF PIRACY IN THE EASTERN SEAS, 1519 TO 1851

By S CHARLES HILL

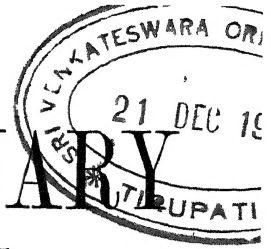

(Continued from Vol XLVIII, p 226)

XV

## THREE ACCOUNTS OF THE FIGHT BETWEEN THE *DORRILL* AND THE *MOCHA*, 1697

IN the year 1696 the East India Company's ship *Mocha* (Captain Leonard Edgcumbe) sailed from Bombay for China. The Captain was disliked by his crew and, apparently, was forced to take whatever men he could get to fill up vacancies. At any rate sixteen of the new hands were old pirates, who had been trapped by the natives, but had made their escape. Whilst in captivity they had unsuccessfully appealed to the President to effect their release and, being received on board a Company's ship, they saw an opportunity for revenge. When off Achin, on the 18th June, at their instigation the crew mutinied, murdered Captain Edgcumbe and set the loyal members of the crew adrift in a boat, in which after much difficulty they got to shore. The pirates renamed the ship the *Resolution* and elected Ralph Stout their Captain. Touching at the Nicobars, they picked up one Robert Culliford and his associates. Culliford had run away with another Company's ship, the *Josiah Ketch*, and going ashore to plunder the natives, the Armourer and other loyal members of the crew had recovered the ship and made off. When the pirates reached the Maldives, Stout attempted to desert, was caught by his comrades and murdered. His successor was Culliford. In July 1697 Culliford came up with the Company's ship *Dorrill* (Captain Samuel Hyde). We have three accounts of the fight: one by Captain William Willock, a prisoner on board the pirate, which is interesting as showing the absence of discipline on board a pirate ship, and the difficulty their captains had in persuading the men to fight when they met with a tough customer; another by William Soame, apparently the Company's Agent at Achin, which is probably Captain Hyde's account, and a third by Messrs Solomon Lloyd and William Reynolds, who appear to have been Supercargoes on the *Dorrill*.

Captain Hyde had his colours nailed to the mast. It will be remembered that Captain Wright, when the *Caesar* was attacked, had his ensign seized to the ensign staff (see *ante*, Vol XLVIII, p 205). The distribution of money amongst his crew during the fight, and not the tot of rum of which one reads in piratical and naval romance, was the ordinary method of encouragement adopted by the captain of a Company's ship.

The pirates hoisted a broad *red* pendant, *i.e.*, a Commodore's flag, the day before the engagement. This must not be confused with the *bloody flag*, for it signified merely that the Captain of the *Mocha* claimed superiority to the Captain of the *Dorrill*, either as his senior or as commanding a ship-of-war, and was therefore a ruse to get the Captain of the *Dorrill* to go on board him. The use of pieces of glass, broken teapots, chains, stones, etc. by the pirates to load their guns was probably due to want of shot. They suffered very slightly in the fight, but were frightened of losing a mast and being disabled, and so drew off.

THREE ACCOUNTS OF THE FIGHT BETWEEN THE SHIP *DORRILL*, CAPTAIN SAMUEL HYDE,  
AND THE PIRATE SHIP *MOCHA*, CAPTAIN ROBERT CULLIFORD, ON THE 9TH JULY 1697,  
IN THE STRAITS OF MALACCA

1

*A narrative about the Mocha Frigatt, written by William Willock,<sup>71</sup> a prisoner aboard them eleven months*

"About the latter end of June [July] they [the pirates] mett with an Europe ship near to Pullo Verero <sup>72</sup> They came up with her and hailed her, the ship's name I do not remember. They said her Commander was Captain Hyde newly come from Europe. Hell was never in greater confusion than was then aboard, some for hoysing French colours, some for fighting under no colours, some for not fighting att all, some for running him aboard without firing a gunn. The Captain laid down his charge because of the confusion, then about ship they must goe to chuse another Captain. All this while they were within speech of one another, soe that the other ship might hear what they said, but about they went and the English ship made the best of her way from them, but at length they concluded to fight and the Captain resumed his place againe. Then about they went after her againe.

The day before they had layd close by one another within gunn shott, so they saw what they were and provided accordingly. In the morning about 9 o'clock they came up with her againe. They came close up to her on her weather quarter so that they could call to them and asked them what they would have. They answered Money they wanted and Money they would have. Its well, said they, for you may come and take it. So they gave a cheer and went all hands, I suppose, to their quarters. The Pirate first fired his two fore-chase gunns into her, but before they had fired another they had received both his broadsides, for he took care to work his ship to the best advantage, and had then, I think, about 30 guns mounted and they were as good as the Pirate's gunns. They had not passed above three or four broadsides, I could see the pirates disheartened. Said they, We shall gett nothmge here but broaken boanes, and if we lose a mast where shall we gett others. They had then received a shott in their foremast, a six-pounder, which had gone right through the heart of it. Says the Captain, We have enough of it to fetch to windward of him. Lett us goe about ship for he lyes by for us, and soe he did. Says one, You may put her about yourself and you will, for I'll fight no more. Nor I, says another, Nor I, Nor I, was the

*Letter from William Soame to the Honble Nath Higginson Esq and Council at Fort St George dated Achm 11 August 1697*

Since my accompanying of the 31st July arrived here [Achm] Capt Samuel Hyde in ship *Dorrill* the 8th instant, giving account that the 7th of July, the day after having been forced to ride fifteen days off of Dyamond Point [N Sumatra] he spied a saile to windward, bearing down upon him, which coming up under his quarter and giving a Levitt <sup>73</sup> with the Musick of trumpets, hoboyes and drum, dropt asteine without haling or anything of parley, but keeping company all the night, next day seem d inclined to withdraw (by baring away sometime before the wind) till July the 9th in sight of Pulla Vaiera, springing then Lufft [banging their ship's head closer to the wind] and haling each other, said their ships name was the *Resolution*,<sup>74</sup> Capt Robert Collifer Commander, bound also for China after which the Boatswain of the *Dorrill* demanding the reason of their suspicious working, they answered, Don't you know us to be the *Mocha*? Wee want neither you nor your ship, but your money we will have, whereunto Capt Hyde replied that if they had it [it] should be out of the mussels of his guns, and bid them come up fairly alongside and take it

Thereupon the engagement began and lasted from about 11 o'clock till past 2 afternoone, when the *Mocha* wheeled off and left them Those who have since dyed of their wounds at sea were James Smith, Capt Hyde's Cheife Mate, Andrew Miller, Barber, George Mopp, Servant to the Gunner, and Thomas Matthews, Servant to the Boatswaine Those who continue dangerously wounded are John Amos, who lost one of his legs, and 'tis feared one of John Blake's must be cutt off Their volleys of small shott were small and thick, and allmost incessant, as being extraordinarily manned, and keeping one constantly at topmast head, looking out as supposed in expectation of their associates

The damages Capt Hyde's ship received were loss of her sprit sail and yard, severall shott between Decks, breaking one of her main Beames, a shott into her Bread Roome, damaging most of her Bread, and one or two between wind and water, and most of her rigging cutt The Dogge [<sup>?</sup> Dogs or Day] before engagement they put out the King's Jack, a broad red pennant and Merchant Colours,<sup>75</sup> but fought under none

After the engagement Capt Hyde try'de ten days for Malacca, but contrary winds and currents carried him over to the Sumbelon [Sembilan] Islands on the Eastern Shoare, from whence, whilst taking in a longboat load of water, which they stood in great need of, a sail to windward appeared making towards them, probably the *Mocha's* Associate, but night coming on and steering their course that way, happily lost sight before morning

<sup>73</sup> A flourish

<sup>74</sup> See Deposition of Adam Baldridge for another *Resolution* It appears from Kidd's trial that the *Mocha* was renamed *Resolution* by the Pirates (*State Trials* XIV, 153)

<sup>75</sup> The red ensign

I am of opinion that Capt Hyde is forced to relinquish all thought of proceeding for China, and if can reasonably accommodate business of the cargo here, will proceed no farther, being with [<sup>2</sup> what] offers at present from

Your Honours &c obedient Servant

WILLIAM SOAME

*Letter from Solomon Lloyd<sup>76</sup> and William Reynolds to his Excellency Sir John Gayer &c  
Freighters of ship Donmill, dated Achin, 28 August 1697*

“ Right Honourable Sir and most respected Sirs,

These truly representeth a scheem of what misfortune has befall us as we were going through the streights of Malacca, in persuance to our pretended voyage, vizt, Wednesday the 7th July, 5 o'clock morning we espied a ship to windward, as soon as was well light perceived her to bare down upon us Wee thought at first she had been a Dutchman bound for Atcheen or Bengall, when perceived she had no Gallerys,<sup>77</sup> did then suppose her to be what after, to our dreadful sorrow, found her Wee gott our ship in the best posture of defence that suddain emergent necessity would permitt Wee kept good looking out, expecting to see an Island called Pullo Verello [Pulo Barahla], but as then saw it not

About 8 of the clock the ship came up fanelly within shott Saw in room of our Gallerys there was large sally ports, in each of which was a large gunn, seemed to be brass Her tafferill was likewise taken downe Wee having done what possibly could to prepare ourselves, fearing might be suddenly sett on, ordered our people to their respective stations for action Wee now hoisted our colours The Captam commanded to make our Ensigne to the staff in sight of the enemie, which was immediately done As they perceived wee hoisted our colours they hoisted theirs, with the Union Jack, and let fly a broad red Pendant at their mantopmast head

The Pirate being now in little more than half Pistoll shott from us, wee could disceerne abundance of men who went aft to the Quarter Deck, which as wee suppose was to consult They stood as we stood, but wee spoke neither to other Att noone it fell calme, so that [wee] were affraid should by the sea have been hove on one another Att 1 a clock sprang up a gale The Pirate kept as wee kept Att 3 a clock the villain backt her sailes and they went from us Wee kept close halled, having a contrary wind for Mallacca. When the Pirate was about 7 miles distant tackt and stood after us Att 6 that evening saw the lookt for island, and the Pirate came up with us on our starboardside within shott Wee see he kept a man at each topmast head, looking out till it was darke, then he halled a little from us, but kept us company all night

At 8 in the morning he drew near us, but wee had time to mount our other four gunns that were in hold, and now wee were in the best posture of defence could desire. He

<sup>76</sup> Lloyd was at Pulo Condore in 1705 when the Macassar soldiers, who had been detained after their three years' agreement was ended, by the Agent, Allan Catchpole, mutined and murdered all the English they could get hold of

<sup>77</sup> These had, no doubt, been removed, in order to facilitate the working of the big guns on the poop, so that it was easy to see she was a fighting ship of some kind or other

drawing near us and seeing that if [wee] would, [wee] could not gett from him, he far out-sailing us by or large [in one direction or another], the Captam resolved to see what the rogue would doe, soe ordered to hand [furl] all our small sailes and furl'd our mamesaile. He, seeing this, did the like, and as [he] drew near us beat a drum and sounded trumpets, and then hailed us four times before wee answered him.

At last it was thought fitt to know what he would say, soe the Boatswaine spoke to him as was ordered, which was that wee came from London. Then he enquired whether peace or war with France. Our answer, there was an universall peace through Europe, att which they paused and then said, 'That's well'. He further enquired if had touched at Attcheen. Wee said a boat came off to us, but [wee] came not near itt by severall leagues. Further he enquired our Captain's name and whither wee were bound. Wee answered to Mallacca. They too and [would have] had the Captain gone aboard to drink a glass of wine. Wee said that would see one another at Mallacca. Then he called to lye by and he would come aboard us. Our answer was as before, saying it was late.<sup>78</sup> He said, true, it was for China, and enquired whether should touch at the Water Islands [Pulo Ondan, off Malacca]. Wee said should. Then said he, So shall wee. After he had asked us all these questions wee desired to know from whence he was. He said from London, their Captain name Collyford, the ship named the *Resolution*, bound for China. This Collyford had been Gunners Mate at Bombay, and after run away with the Ketch.<sup>79</sup>

Thus past the 8th July. Friday the 9th do, he being some distance from us, About  $\frac{1}{2}$  an hour after 10 came up with us. Then it grew calme. Wee could discerne a fellow on the Quater Deck wearing a sword. As he drew near, this Hellish Imp cried, Strike you doggs, which [wee] perceived was not by a general consent for he was called away. Our Boatswaine in a fury run upon the poop, unknown to the Captain, and answered that wee would strike to noe such doggs as he, telling him the rogue Every<sup>80</sup> and his accomplices were all hanged. The Captain was angry that he spake without order, then ordered to haile him and askt what was his reason to dogg us. One stept forward on the forecastle, beckoned with his hand and said, Gentlemen, wee want not your ship nor men, but money. Wee told them had none for them but bid them come up alongside and take it as could gett it. Then a parcell of bloodhound rogues clasht then cutlases and said they would have itt or our hearts blood, saying, 'What doe you not know us to be the *Moca*?' Our answer was Yes, Yes. Thereon they gave a great shout and so they all went out of sight and wee to our quarters. They were going to hoist colours but the ensigne halliards broke, which our people perceiving gave a great shout, so they lett them alone.

As soon as they could bring their chase gunns to bear, fired upon us and soe kept on our quarter. Our gunns would not bear in a small space,<sup>81</sup> but as soon as did hap, gave them better than [the pirates] did like. His second shott carried away our spritt saile yard. About  $\frac{1}{2}$  an hour after or more he came up alongside and soe wee powered in upon him and continued, some time broadsides and sometimes three or four gunns as opportunity presented and could bring them to doe best service. He was going to lay us athwart the hawse, but

<sup>78</sup> That is, they were late in making the China voyage and therefore could not afford any delay.

<sup>79</sup> The *Joshiah* ketch.

<sup>80</sup> The notorious pirate Henry Every.

<sup>81</sup> "In a small space" means "for a short space of time."

by God's providence Captam Hide frustrated his intent by pouring a broadside into him, which made him give back and goe asterne, where he lay and paused without firing, then in a small space fired one gunn. The shott came in at our round house window without damage to any person, after which he filled and bore away, and when was about  $\frac{1}{4}$  mile off fired a gunn to leeward, which wee answered by another to windward. About an hour after he tackt and came up with us againe. Wee made noe saile, but lay by to receive him, but he kept aloof off. The distance att most in all our firing was never more than two ships length, the time of our engagement was from  $\frac{1}{2}$  an hour after 11 till about 3 afternoon.

When [wee] came to see what damage [wee] had sustained found our Chiefe Mate, Mr Smith, wounded in the legg, close by the knee, with a splinter or piece of chaine, which cannot well be told, our Barber had two of his fingers shott off as was spunging one of our gunns, the Gunner's boy had his legg shott off in the waste. John Amos, Quartermaster, had his leg shott off [while] at the helme the Boatswaine's boy (a lad of 13 years old) was shott in the thigh, which went through and splintered his bone, the Armorer Jos Osbourne in the round house wounded by a splinter just in the temple the Captains boy on the Quarter Deck a small shott raised his scull through his cap and was the first person wounded and att the first onsett Wm Reynolds's boy had the brim of his hatt  $\frac{1}{2}$  shott off and his forefinger splintered very sorely. John Blake turner, the flesh of his legg and calfe a great part shott away.

Our ships damage is the Mizentopmast shott close by the cap and it was a miracle stood soe long and did not fall in the rogues sight. Our rigging shott that had but one running rope left clear, our mainshrouds three on one side, two on the other cutt in two. Our maineyard ten feet from the mast by a shott cutt 8 inches deep, our foretopmast backstays shott away, a great shott in the roundhouse, one on the Quarter Deck and two of the roundhouse shott came on the said deck, severall in the stearidge betwixt decks and in the forecastle, two in the bread room which caused us to make much water and damaged the greatest part of our bread. They dismounted one of our gunns in the roundhouse, two in the stearidge, two in the waste, one in the forecastle with abundance more damage which may seem tedious to rehearse.

Their small shott were most Tim and Tuthenage [*tutenaga*, speller]. They fired pieces of glass-bottles, do teapots, chains, stones and what not, which were found on our decks. We could observe abundance of great shott to have passed through the rogues foresaile, and our hope is have done that to him which [will] make him shunn having to do with any Europe<sup>82</sup> ship againe. Att night wee perceived kept close then lights, Wee did the like and lay by. In the morning they were as far off as [wee] could discern upon deck. Wee sent up to see how they stood, which was right with us. In the night wee knotted our rigging and in the morning made all haist to repaire our carnages.

Our men, seeing they stood after us, [wee] could perceive their countnances to be dejected. Wee cheared them what wee could, and, for their encouragement the Captam and wee of our proper money did give them, to every man and boy, three dollars each, which animated them, and promised to give them as much more if engaged againe, and did in your Excellency's name assure them that if [wee] took the ship, for

<sup>82</sup> As distinguished from a 'country' or coasting vessel of the East.—Fb

every prisoner five pounds and besides a gratuity from the Gentlemen Employers. Wee read the King's Proclamation<sup>83</sup> about Every &c and the Right Honble Company's.<sup>84</sup>

About 9 o'clock the 10th July wee perceived the rogue made from us, soe wee gave the Almighty our most condigne thanks for his mercy that delivered us not to the worst of our enemies, for truly he [the pirate] was very strong, having at least an hundred Europeans on board, 34 gunns mounted, besides 10 pattererers<sup>85</sup> and 2 small mortars in the head, his lower tier, some of them, as wee judged, sixteen and eighteen pounders Wee lay as near our course as could, and next day saw land on our starboard side which was the Maine [Land] Kept on our way

The 12th July dyed the Boatswaine's boy, George Mopp, in the morning Friday the 16th do in the evening dyed the Gunner's boy Thomas Matthews Sunday the 18th at anchor two leagues from the Pillo Sumbelong [Pulo Sembilan] Islands dyed the Barber Andrew Miller Do the 31st dyed the Chefe Mate Mr John Smith The other two are yet in a very deplorable condition and wee are ashore here to refresh them . The Chinese further report the *Mocco* was at the Maldives and creaned [careened], there they gave an end to the life of their commanding rogue Stout, who they murdered for attempting to run away "

### CAPTAIN KIDD'S FIGHT WITH TWO PORTUGUESE SHIPS PORTUGUESE REPULSED BY ARABS, 1697

When the English Government decided to assist the East India Company in the suppression of piracy, it had no ships-of-war to spare and was glad to accept the offer of Lord Bellamont, Governor of New York, to send out one equipped by a kind of private company As most of the pirates to be dealt with were equipped from New England, it was supposed that Lord Bellamont would be able to find a captain who would have means of obtaining much useful information to assist him in his task, and so, if not to set a thief to catch thieves, at any rate to send a man well informed as to the ways of the thieves The fact that such a man might turn thief himself was either ignored or supposed to be discounted by giving him forty shares in the undertaking

Lord Bellamont chose Captain William Kidd, a man who, as far as is known, had a previous good reputation He received two commissions from the Crown, one dated 11th December 1695 as a privateer against the French, the other dated 26th January 1695-6 enabling him to take pirates wherever he found them He left England early in 1696 and, after strengthening his crew in New England, sailed for the Cape What his original

<sup>83</sup> Dated 17th July 1696

<sup>84</sup> Dated 22nd July 1696 [ *N B* —The King's Proclamation offered £500, and the Company's Rs 4,000, to whoever should seize Every *Home Misc*, vol 36, pp 191, 193 ]

<sup>85</sup> Pattararo, pechero, a small gun —Ed

intentions were is unknown, but before he reached the Cape he fell in with a squadron under Commodore Thomas Warren, his behaviour to whom was sufficiently truculent to excite suspicion, though his commission prevented that officer from interfering with him. In April 1697 he arrived at the Island of Johanna, one of the Comoro group, which was a well-known halting place for the Company's ships. There he fell in with some of the latter and behaved in such a way that they expected him to attack them and took all necessary precautions. Apparently he was afraid to do this and they went on their way unmolested. From Madagascar he went to the Red Sea with the intention of attacking the pilgrim ships, and in August came up with the fleet, but was frightened off by the convoy. Next, sailing down the Indian Coast, he took various native vessels, some of which were commanded by Englishmen, one of whom—Captain Parker—he kept on board for some time as a kind of pilot. Being attacked by two Portuguese ships-of-war, he crippled the smaller and better sailer and showed his heels to the other. This does not look like courage on his part, but it does not prove cowardice, for, even if he had fought and beaten the bigger ship, he must have suffered some loss without any prospect of booty which was contrary to pirate custom.

After eluding the Company's cruisers which were now on the look out for him, and refitting his ship, he renewed his watch on the coast for a rich native vessel, and, early in 1698, took the *Quedah Merchant*, commanded by Captain John Wright, with a cargo worth £20,000. He gave back to Captain Wright all his personal property as it was thought, a reward for making no resistance. With this capture Kidd appears to have been satisfied. He sailed to Madagascar, where he arrived in May. There he met the pirate Culliford, to whom some ninety of his men deserted. At last, thinking his own ship, the *Adventure Galley*, unfit for the homeward journey he transferred to the *Quedah Merchant* and sailed for America.

Arriving in Boston in 1699 he assumed all the airs of innocence, but the outcry against him was too strong. He was arrested and sent to England, tried for piracy and murder, and being convicted was, on the 24th May 1701, hanged at Execution Dock.

So far as is known he had never actually attacked English or European ships and never flown any kind of piratical flag, though of course his commission entitled him to fly the broad red pendant. He justified his attacks on native vessels on the ground that they carried French passes. Sir Cornelius Neale Dalton maintains that he had been set an impossible task in which he naturally failed, that the alleged murder of his quartermaster was probably an act necessitated by the requirements of discipline and that no conclusive evidence of piracy was produced at his trial. It is certain that his defence was badly conducted, that evidence in his favour was wilfully suppressed, and that the witnesses against him were absolutely untrustworthy, but I doubt whether there was any actual miscarriage of justice. He appears to have been an excellent seaman and a rigid disciplinarian. His biggest capture, the *Quedah Merchant*, was not one that would have satisfied a pirate like Every, and the fact that it was his biggest suggests that the stories of his buried treasures have absolutely no foundation.

The concluding portion of the letter describing Kidd's fight with the Portuguese "deals with a fight between the Portuguese and the Arabs. It shows that whilst individual Portuguese may have maintained the national reputation, the Portuguese seamen had, as a body, fallen beneath contempt.

*Letter from Thomas Pattile*<sup>86</sup> *to the Council at Surat, dated Carwar, 22 September 1697*

"Honble Sir,

"These are to acquaint you what lately happened here The 3rd instant came into this Cove Captain William Kidd in the *Adventure Galley* He has on board 140 well men and 36 guns 'Tis the same man-of-war that the Honble Company's ships<sup>87</sup> met coming out He says he hath been at the Mohelas,<sup>88</sup> Madagascar and several other places to look for pirates, but yet hath not met with any, and now is come on the Coast for the same purpose Since which came to the Factory two of his men, who inform us they have taken an English vessel off of Bombay and that they have got the Commander<sup>89</sup> on board a prisoner They took out of her about 100 lbs of gold, some rice and raisins They're [sic] going to Mocho was with full intent to take the Surat ships, had not the Convoys prevented them They intend to take Abdull Gophore's<sup>90</sup> ship, either in the Cove or watch for her as she goes out If they do 'twill cause abundance of trouble [with the Muhammadan Government]

The men say the ship is very leaky and rotten, so that they intend to take for then use the first good ship they meet with We believe he intends to lie off here and watch for Abdull Gophore's ship He sailed hence the 13th instant without doing any harm, neither did we let him know we were come to the knowledge of his evil actions, for fear when he found himself discovered, [he] should do as bad here We several times sent Captains Perrin<sup>91</sup> and Mason on board of him to pry into what they had done and what intended for the future to do, who we must needs say proved very faithful and true to us They<sup>92</sup> could never come to a sight of Thomas Parker, being kept close prisoner in hold, nor certainly know where they intend to go, sometimes talking of one way, sometimes of another, but yet we very much fear he will cruize off this place to meet with Abdull Gophore's ship We are informed at St Mary's [Madagascar] is settled abundance of these villainous people with their families, and are yearly supplied from New York with all sorts of Liquors, Provisions and Stores, so that when any ship wants men they go thither and get as many as they please

He showed his Commission under the Broad Seal of England to Captains Perrin and Mason, wherein he has liberty to range all seas and destroy pirates wherever he meets them The Captain is very severe and cruel to his people, which causes them to be much disaffected to him They attempted Captain Mason to take the command of the ship, which he honestly refused They are a very distracted Company, continually quarrelling and fighting among themselves, so that it is likely in a short time they may destroy one another, neither have they provisions on board to keep the sea a month

Three of the men run to Goa and, acquainted the Viceroy that there was a pirate in Carwar Road, upon which he presently fitted out two ships full of men, one 44 guns and the

<sup>86</sup> Chief of the Company's factory at Carwar (Kārwar)

<sup>88</sup> The Comoro Islands, one of which is called Mohilla — ED

<sup>89</sup> Captain Parker See below Capt Parker commanded a Muhammadan ship and was taken between the Red Sea and Carwar *State Trials*, XIV, 155

<sup>90</sup> Abdull Ghafur, a very wealthy Indian merchant

<sup>91</sup> Capt Charles Perrin of the *Thankfull*

<sup>92</sup> In the *State Trials*, XIV, 165, it is stated that Harvey and Mason at Carwar tried to get Parker released

other 20 guns, with orders to take him wherever they met him. They imagined to find him in the Road, but he saved them the labour of coming so far and met them half way between here and Goa. He presently perceived what they were and pretended to run from them. The smallest ship, sailing best, followed him with all the sail they could make. The biggest ship lagged astern, and as soon as Kidd perceived he had got the least a good distance from the biggest, he tacked and made to him. When they came near, the Portuguese very valiantly fired into him as fast as they were able, but Kidd's hardy rogues soon gave them enough of it and miserably mauled them before the great ship could come to their help, but as soon as she came near Kidd set his sails and run from them.<sup>93</sup> The smallest ship was very much damaged and abundance of men wounded and killed and so much disabled that she was forced to make her way to Goa again.

The greatest ship came hither to convoy a small ship of theirs that wintered here belonging to the Portuguese Company, and came to an anchor in the Road the 18th instant evening where they had soon information of an Arab ship that was in the River. They presently filled three boats full of soldiers and came into the River to destroy the Arab ship. About 3 in the morning began the fight in sight of our Factory. They took the Arabs unawares most of the men being ashore, not above ten Arabs and fifteen lascars on board and them all sleeping unprepared, but, instead of boarding her, they kept at a small distance firing their muskets and bocomortesses<sup>94</sup> and flinging granadoes. The people aboard soon waked and began to make resistance, firing some great guns and small shot at them. This continued above two hours till by an accident, nobody knows how, the powder in one of the Portuguese biggest boats took fire, blew up and burnt most of their people, sunk their boat. Then own granadoes, muskets and bocomortesses all went off, wounded and killed several men, upon which they forbore further attempt and was glad to withdraw. About 14 men were killed outright and as many more cruelly burnt. Upon this the country people were all up in arms, so that with one trouble following the heel of another all business has been hitherto impeded. I am &c, &c, THOMAS PATTLE."

*Extract of a letter from the Bombay Council to the Surat Council, dated 30 September 1697*

"Kidd carries a very different command from what other pirates used to do his Commission having heretofore procured respect and awe, and this being added to his own strength, being a very lusty man, fighting with his men on any little occasion, often calling for his pistols and threatening any one that durst speak of anything contrary to his mind and to knock out their brains, causes them to dread him and withall are very desirous to put off their yoke."

*Extract of a letter from the Bombay Council to the Surat Council, dated 11 April 1698*

"Kidd has taken the *Quedah Merchant* on which was laden, as is reported, a rich cargo of about 200000 rupees by the Armenians and a Moorman."

## THE NURSERY TALES OF KÂTHIÂWÂR

*(Literally Rendered)*

By G B BADHEKA, BHAVNAGAR

## I

A Parrot and a Kâbar<sup>1</sup>

THERE was a king He had a parrot brought from Africa The bird was of noble birth and gentle mien He sang so very sweetly that the king loved him dearly and looked after his comforts keenly For him he made a golden cage, a diamond rock and two bowls of pure silver The richest fruit that the country produced formed the everyday diet of the lucky bird The king visited the parrot every morning, opened the cage himself, and seated the bird on his lap The parrot then sang sweetly, so that the king felt greatly pleased and much satisfied.

Now there lived a *kâbar* on a big *nîm* (*Azadirachta indica*) tree opposite the king's palace in a snug little nest of shreds of cloth and tiny sticks of wood Every day she saw the golden cage, the diamond rock and silver bowls of water, the king coming to the parrot, opening the cage himself and seating the parrot on his lap, and every day she thought herself very miserable

At last she grew envious of the parrot of the golden cage Once she murmured, 'I wish, oh! I wish I were that singing bird yonder that I might enjoy the proud company of the king and taste the comforts of that priceless cage'

She thought, then, of entering into the cage and enjoying the pleasures thereof, if ever chance favoured her, and she was always on the look out for the desired moment.

Once, fortunately for the *kâbar*, it so happened that the king after his usual visit to the enchanting songster went about his business without closing the doors of the cage Just then the parrot took a fancy to go out and enjoy his natural freedom, and away he flew into the vast blue sky

There was the cage left empty and there was the envious *kâbar* waiting for her chance Down she flew to the golden cage, entered it and settled herself in her new home While she was heartily enjoying the pleasures of the cage, she proudly thought, 'Queen as I am of this golden cage now, there is no happier bird under the sun than mine own self' The day she passed there merrily and happily and she stayed overnight in the cage

Early the next morning the king came there as usual and calling the parrot by his name *Kasuku*,<sup>2</sup> wanted him to sing and please him But there was no *kasuku* inside, the songster was gone and the *kâbar* was there in his stead No bird sang to the king

The king did not know what had happened and as it was then too dark to see that the *kâbar* was inside the cage, he got a little vexed at the indifference of his supposed parrot friend He took up a little stick and began in his anger to thrust at the poor little *kâbar*. The queen of the golden cage now realised her true situation, and just to save herself from the approaching misfortune, she thought she should no longer keep silence and said —

"Thrust at me not, oh angry king,  
No thrust can make me sweetly sing,  
The bird that sweetly sang, has left the cage,  
And if *twe* pleases you, *twe-twe* I can make"

<sup>1</sup> A speckled bird in Gujarât, very often disliked by the people for her rather unpleasant voice It is always spoken of as female A woman who is very noisy and over talkative is often called a *kâbar* The *kâbar* is a conspicuous character in many a nursery tale of Kâthiâwâr

<sup>2</sup> A name given to a parrot of Africa, in the Swahili language prevalent amongst the people living on the coast of East Africa The African parrot is known to be a very good singer and is prized very highly in India

At once the king knew to his surprise that the bird inside was a *kabar*. In his rage he flung open the doors of the cage, caught the *kabar* by her wings, and threw her out on to the hard pavement where she lay dead and was gone for ever.

The couplets in Gujarâtî are as under —

“ Ghonkâ Ghonki ma kar Râjâ,  
Ghonké amé marié,  
Saravâ sâdavâlô tô ûdi gayô,  
Kétô kal-bal, kal-bal karié ”

### A BRIEF SKETCH OF MALAYAN HISTORY

By SIR RICHARD TEMPLE

( *Continued from Vol XLVIII, p 231* )

Borneo and the Philippines have each a considerable history of European occupation. Borneo was the scene at Brunei of a long trade connection, Portuguese from 1522 and Spanish from 1580, until the Dutch appeared in 1604 and the British in 1609. Mismanagement by both Dutch and British ended in the loss of all influence in 1775 and 1809 respectively. This gave an opportunity to organised piracy on a large scale by the natives, which continued until Sir James Brooke put it down in 1844, after having obtained the sovereignty of Sarawak from the Sultan of Brunei, and became the first Raja Brooke (1841–1868). Meanwhile in 1823 the Dutch had received about half of Bangermâsin (South Borneo) from its Sultan, taking the whole of it later by ‘ succession ’ in 1860. But in 1847 the British gained permanent ascendancy in North Borneo, forcing the Dutch to consolidate their authority in the South. Since 1882 British North Borneo has been administered by a chartered company, and lately, since 1888, North Borneo, Brunei and Sarawak have been British Protectorates.

The Philippines were first entered by the Spaniards in 1521, came under Spanish influence in 1529, and were acquired for Spain by the tact and capacity of Miguel Lopez de Legaspi (1524–1572) as Las Islas Filipinas, so named after Philip II (1555–1598). All this effort was the result of avowedly missionary enterprise. Manila was founded in 1571, and the administration was conducted uneventfully on proselytising lines till 1762, when the whole country fell to the British for two years as an incident in the Spanish War of Charles III with England (1761–1764). Then ensued ecclesiastical rule of the narrowest description, which gradually caused a continually growing dissatisfaction, as contact with the outer world increased, till in 1825 there commenced an era of discontent, which ended in a rebellion (1886) under a highly educated leader, José Rizal (1861–1896), and an insurrection under Emilio Aguinaldo (1896–1901). In both of these the friars and clergy played an unenviable and retrogressive part. In 1898 the Spanish-American War broke out, and in the same year the Philippines passed to the United States’ flag. Aguinaldo now became a rebel against the Americans, but since his capture in 1901, the whole area has been governed by them on a republican model.

The Malays have long lost all independence, and at the present moment are under the domination of the British, Dutch and Americans, and also to a small extent of the Siamese, despite German intervention in places between 1884 and 1914.

## DATES OF MALAYAN HISTORY.

All Malayan dates are still controversial

Dynasties and Suzerainties	Date	Chief Events
EARLY TRADE	1000 B C — A D 100	{ Successive occupation of Malaysia by Negritos, Melanesians, Polynesians and Malays Coasting Trade between South (Dravidian) India and China (1000 B C — 400) with Persia, Greece, and Rome (400 B C — A D 100)
	306-298	Megasthenes reports spice trade from South India (Malay Peninsula) Rise of the Alexander genealogical myth in the Archipelago
	A D 43-85	Pomponius Mela mentions Chryse (Peninsula), 43 c 85 Josephus knows of the Aurea Chersonesus (Peninsula)
	78-417	Establishment of Javan (Saka) era (78) 78-417 Spread of Saiva Hinduism in Java, Sumatra and Borneo Hindu kingdom at Tanah Datar (Menangkabau) in Sumatra
	79	Hippalus discovers the use of the monsoons (trade winds) Oversea trade commences
	127-166	Ptolemy mentions Straits of Malacca (Sinus Sabaricus) and Sumatra (Sabadius)
	250	Introduction of Mahāyāna Buddhism from India into Java and Sumatra
JAVAN TRADITION — Hindu Dynasties Astina, 384-662, Malawa Patī, 662-672, Mendaung Kamulan (Brambanan), 672-892, Jangala (and Koripan), 892-1158, Pajararan, 1158-1295, Tumpel, 1232-1275 after wards Majapahit, 1295-1477	285 384 412-550 656 662-688 672-892 774-830 892-1158 1160 1184-1195 1293 1293-1345 1295-1477 1350 1455-1474	Traditional earliest Hindu temple in Java (Chandi Maling) Foundation of the Astina Dynasty of Java Fa Hian in Java (412-414) c 530-550 Cosmas Indicopleustes, traveller Adityavarma of Astina (Parikshit, 607-649 Udiana, 649-662) builds Boro Budur Malawa Patī Dynasty (662-672) I Tsing in Sumatra (671 & 688) Brambanan Dynasty c 800 Temples at Brambanan and Chandi Sewu Aji Jaya Bayu of Brambanan (Tekiri Daha) 774 and 787 Attacks on Cochim China (Champa) Jangala Koripan Dynasty 1130-1158 Panji, national hero c 1150 Introduction of Islam Menangkabau of Sumatra, a general Hindu ruling dynasty Munding Sari of Pajararan (Haji Purva) 1193 Converted to Islam Kublai Khan's expedition to the Archipelago Medieval travellers 1293 Marco Polo 1325 Odoric of Pordenone 1345 Ibn Batuta Majapahit, great Hindu kingdom in Java Gradual rise of Muhammadan influence Menangkabau Dynasty adopts Islam in Sumatra. Angka Vijaya of Majapahit, last great Hindu king c 1460 Marries a Champa (Cochim China) Princess
MUHAMMADAN DYNASTIES — Demak, 1477-1577, Pajang, 1577-1606, Mataram, 1606-1624, and nominally onward European Intervention Portuguese, 1511, Spanish, 1529, Dutch, 1611 English, 1620	1477 1508-1511 1514 1519-1529 1522-1809	Majapahit Dynasty overthrown by Raden Patah of Demak (1477-1519) Portuguese in Archipelago and Peninsula 1508 Diego Lopez de Sequeira in Achm 1511 d'Albuquerque takes Malacca Francisco Serrão discovers Mindanao (Philippines) Portuguese in Ternate (Moluccas) Spanish expedition to Moluccas and Borneo 1529 Spain and Portugal divide the Archipelago 1521-1529 Spanish influence in the Philippines Trade with Borneo 1522-1580 Portuguese 1580-1680 Spanish 1604-1775 Dutch 1609-1809 English

DATES OF MALAYAN HISTORY—*continued*

Dynasties and Suzerainties	Date	Chief Events
MUHAMMADAN DYNASTIES—( <i>contd</i> )	1524-1572	Miguel Lopez de Legaspi acquires Philippines for Spain 1571 Founds Manila

## EPISODES OF PIRACY IN THE EASTERN SEAS, 1519 TO 1851

By S CHARLES HILL

*(Continued from p 10 )*

## XVII

FIGHT BETWEEN THE *THANKFUL* AND MARĀTHA PIRATES, 1697

The fight between Captain Perrin and the "Seevajees" illustrates the purely business character of Indian Piracy. The Indian pirates were not broken men and outcasts like European pirates, though many such men found refuge in the towns along the coast, but were simply a sea-faring population, sometimes engaged in agriculture but making a living chiefly by trading, fishing *and* piracy on foreigners. When the Marāthas made themselves masters of the west coast of the Indian Peninsula they made use of these men, nominally to protect trade, but really to attack that of other nations, in much the same way as Queen Elizabeth employed her seamen. Under the Marātha *régime* the English called these people "Seevajees" after the great Marātha leader Sivaji. In many documents the name is converted into the English word "Savages"

---

*Declaration from Charles Perrin, Master of the ship Thankful, 24 December 1697*

"December the 6th In sight of Batticola [Bhatkal] saw 12 sayle of Sevajees [Marātha] Grabs and boates, whom at 7 in the morning was close by us. One boat hailed us, we told them we were of Bombay. He went to the rest who presently fired a shott at us. We spread our colours, handed our small sailes and mainsayle, they still fireng both great and small guns. We fired at them. The fight lasted till one in the afternoon, at which time they retreated about half an hour, and then it was calme. They sounded their trumpets and came on againe, at which time I called to them againe, bid them send one boat on board, look on the ship and then if [they] thought [they] could take her to fight againe. They came and demanded 2000 rupees, without which they would take the ship. I told them I knew of no wars between the English and the Sevajees, but if [there] was we were ready to fight againe, and would not fire againe at them before they came on board. They went with this answer to their Admiral and came againe and askt one hundred rupees and some rice. I told them I would give nothing. They had seen the ship, if they thought [they] could take her, come away for we was ready. They rowed a little towards us and then went away to the Southward, which is all the remarkable hath been seen by

Your Honours humble Servt

CHARLES PERRIN "

## A "MOOR" (MUHAMMADAN) SHIP MISTAKEN FOR A PIRATE, 1700

The colours ordinarily used by the "Moors," *i e* Indian Muhammadans, were a *plain red flag* <sup>95</sup> Since all Europeans used the *red or bloody flag* as both a signal for attack

---

<sup>95</sup> "We spread our colours and fired a gun to leeward, upon which they spread a Moores ensign all red &c"—Log of the *Charles the Second* (Capt John Dorrill), 31st Oct 1697.

and also as a sign of "No Quarter" or "No Surrender", in which signification it was also used as an emblem of Piracy, the Muhammadan flag was liable to be misunderstood by the Company's cruisers, especially when a ship carrying it refused to submit to examination. Captain White, being on the look out for pirates, considered it his duty to examine all suspicious vessels, and had, of course, to explain his conduct when regrettable incidents occurred.

*Declaration of Captain Richard White and officers regarding a fight with a Muhammadan ship*

"The 23rd day of February 1700 in the latitude of 21 degrees and 26 minutes North and Meridian Dist West from St John's<sup>96</sup> 2 degrees 39 minutes, att two of the clock in the afternoone, see a saile to windward of us with his larboard tacks on board, the wind att N Wt Wee stood towards him with our starboard tacks, and at four having gained allmost up with him, hoisted our colours, and hee not having satisfied us with a return of his, fired a shott, wide of his forefoot,<sup>97</sup> for him to bear downe and acquaint us what hee was. Hee then hoisted red colours for a little time and hauled them down again, but would not bare downe, so wee tackt and weather'd up with him, and shortned saile under his lee, calling to him by one William Thornburye our Pilott, in the Moors language, to brace too and inform us what hee was. I assured him wee were friends and that if hee was an Indian Trading Shipp or upon any honest account,<sup>98</sup> wee were the King of England's shippes and would doe him noe manner of damage, that wee came to protect them by endeavouring to apprehend the Pirates, and told them if they had noe boate on board wee would send ours to satisfy him what wee was and hee informed what they were, but I had noe other answer than two or three shott one after another and without any colours, which entered the mainsayle and foresayle, and immediately thereupon in Moors language (as our Pilate informed us) cald out and bid us, "Goe to Hell! Goe to Hell! Wee wont acquaint you nor trust you. Goe to Hell!"

I bid him have a care what hee did except hee designed to have his shipp sunk, butt making the same return of words again and still firing att us, I gave him my larboard broadside and doe suppose itt did some damage, after that backt astern and hauled up to windward of him, and gave him my starboard broadside, which did him noe less damage. I plyed him in this manner till two of the clock this morning, having received severall shot from him in my sayles and rigging, but I thought it in vain, seeing him so resolute, to fire any more till brake of day, having disabled him and therefore [being] sure of him.

I must confess at last I took him for a Pirate or an Arab, who are very insolent in these parts, and firing without his colours, as well as before the evening was sett in as after, did confirm me in the same opinion. I could not conceive him to be a Moors<sup>99</sup> ship, because they generally love peace and quietness att sea, and the next morning when I came up with him fir'd severall shott att me without colours. His rashness has caused his shipp to bee disabled, tho I endeavoured what I could to hinder itt if he would have

### HOW THE DUTCH WERE FRIENDS OF THE PIRATES, 1703

Madagascar as a base for European piracy in the Red and Indian Seas had the advantage of its great security from attack and the facility with which stores could be replenished and crews recruited, but it was not a good market for booty Thus the pirates considered themselves fortunate when they found that the Dutch Settlements on the Malabar Coast were quite ready to trade with them, of course *sub rosa*, taking their spoil in return for cash, stores, wine and provisions To the Dutch this trade had a double advantage It furnished them with proofs that the chief pirates belonged to the nation of their hated rivals, the English, and this information they handed on in such a way as to lead the native Government to believe that the pirates were really the ships of the English Company On the other hand, what they bought cheap from the pirates they could sell again at good prices to their native customers or, if suitable, send to Europe It was trade made easy as well as lucrative <sup>100</sup>

Some assistance also the pirates obtained from the French islands of Bourbon (Mascarin or Don Mascarenhas)<sup>1</sup> and Mauritius<sup>2</sup> Here, however, the motive for their reception was the inability of the French Governors to offer any resistance

*Extract of a letter from Captain George Wesley<sup>3</sup> to Mr Pennyng, Chief at Calcut*  
Dated [Râjâpur] 7 November 1703

"Three years past one Captain Merrino, a Frenchman and French Company, took a ship belonging to Surat off or near Cape Aden and made a prize of her, wherein was considerable riches, and . sailed for the island of Mascarenha [Bourbon], a general rendezvous for pirates, where the said Merrino is now settled and actually become an inhabitant This relation I had from some of his own ship's Company, which are Frenchmen and belonged to the ship I was imprisoned in The same year was taken, off St John's [Sanjân], a Surat ship by the ship *Speaker*, whose Company consisted of all nations to my certain knowledge, the major part being now in the Pirates on the Coast, and the same

<sup>100</sup> See also Episode XX, *infra*

<sup>1</sup> "The first inhabitants were pirates who settled here about 1657 bringing with them negro" (i.e. native Malagasy) women from Madagascar Bernardin de St Pierre, *Voyage to the Isle of France*, p 192

<sup>2</sup> Abandoned by the Dutch about 1712 and settled by the French from Bourbon See Bernardin de St Pierre, *Voyage to the Isle of France*, p 54

<sup>3</sup> Commander of the *Pembroke*, taken by Bowen at Mayotta (Comoros) 10 March 1703 (*Madras Consultations*, 31 May 1703)

Commander, John Bowen, here near Callequilon they took Captain Conaway<sup>4</sup> from Bengal, selling ship and goods in shares, *i.e.*, one third part to a merchant of Callequilon,<sup>5</sup> another third to a merchant of Porca,<sup>6</sup> the other third to Malpa [<sup>7</sup> Tam Mallappan] the Dutch broker of this place, which relation I had from Captain Bowen and several of his Company, then left the Coast and sailed for the Island of Madagascar but in the way was lost on the Island of Mauritius, on St Thomas' Reef,<sup>7</sup> where they were most courteously received and feasted, their sick carried into their fort and cured by their doctor, and a new sloop sold them and supplied with all sorts of necessities for their cutting her and making her a brigantine, which they performed by the middle of March, and took their leave of the Governor, giving him 2,000 pieces of eight their vessels and necessities, leaving their lascars with him to be conveyed for Surat, and being invited to make it a place for refreshment, sailed for the Island of Madagascar, where at a place on the east coast called Maritan,<sup>8</sup> the Captain with a gang settled themselves till two Scotch ships or vessels falling in the port were both surprised and taken by them<sup>9</sup>

"By another gang which was settled at St Augustine [St Augustine's Bay] the ship *Prosperous* [Captain Hillard] was taken. The remainder went for New Mathelago,<sup>10</sup> where they gave the King their brigantine, where I saw her and left her when the pirates sailed from thence. The pirates, having these three in their possession, in searching after one another, lost one of the Scotch vessels, but at last two met at Mayotta [Comoros], where it was my misfortune to fall into their hands and detained by them after they had slain my chief mate and another European and plundered what they pleased let the ship go and sailed for Methelago, from thence to the islands of Mayotta and Johanna from thence to the highlands of St John's, off which and at Surat's river mouth they took two sail of Surat ships from Moca, she at the rivers mouth was taken by Thomas Howard in the *Prosperous*, the other by John Bowen in the *Speedy Return*, a Scotch ship, having taken the following sums out of each ship, *viz.*, out of her taken at the rivers mouth 168,000 pieces of eight, counting each piece of gold two pieces of eight. In the other ship was taken 88,000 pieces of eight, at the same reckoning. One ship they left adrift at Daman<sup>11</sup> without anchor or cable, the other they carried to Rajapore<sup>12</sup>

"Thus by the help of our friends' [*i.e.*, the Dutch of Mauritius] brigantine have been taken six sail of ships and hundreds [of people] ruined. Here in Rajapore was both the pirates ships burnt and both Companies transported on board the Surat ship, detaining about 70 lascars, mounting 56 guns and 164 fighting men, of which part

<sup>11</sup> Daman, on the coast of Gūjarāt

<sup>12</sup> Rājāpur, Ratnagiri District, Bombay.

are 43 English, the better part of the Company French, the rest Negroes, Dutch &c nations that cries 'yaw'<sup>13</sup>, from where they sailed to the Coast of Mallabar, and about three leagues to the northward of Cochin they anchored and fired several guns, but no boat coming off, the quartermaster went near the shore and had conference by boat with the people, who supplied them next day with hogs &c refreshments And from Malpa [Mallappan] the Dutch broker came a messenger, who advised of the ship *Rhimae*,<sup>14</sup> her being in Mud Bay,<sup>15</sup> and that if the pirates would take her he would buy her of them, this I heard myself, and that they should be supplied with pitch, tar and other necessaries

"I took an opportunity to ask the messenger, Who sends the things on board? Not knowing but that I was one of the pirates, [he] told me, The Dutch, but he should be sent off with them But before he brought them on board I got clear of the pirates There had been several Dutch on board before I got ashore, and since my abode here for my health I have seen no difference, [in their treatment] between a pirate and a merchant ship, both black and white flocking off with all sorts of merchandizes and refreshments, jewels, plate and what not, returning with coffers of money And Malpa, the broker, has been so impudent as to offer them to sail [ 'sell ] a small ship, which they want and asked one Thomas Punt<sup>16</sup> to carry her off to them, who denied him, telling him, now he was not ashamed to show his face, but should he be guilty of so base an action, he must never see the face of his countrymen [again], which made the gentleman change his countenance

"Thus are these villains encouraged by our pretended friends, which Auga Rhimae [Aghâ Rahmân] cannot chuse but see, and, if at his arrival at Surat [he] will speak the truth, must declare the same I would have waited on him to that purpose, but so feared of being taken notice of and lose the benefit of the physician, which at present I am in great need of, I dare not do it

"These being the heads of what I remember and what I heard and had from their mouths in discourse at several times from the reports of the pirates on board them in my seven months imprisonment, having omitted nothing but the many hazards of life and abuses received from these villains &c &c

GEORGE WESLEY "

## THE MUNDESVARĪ INSCRIPTION OF THE TIME OF UDAYASENA · THE YEAR 30

By N G MAJUMDAR, B A CALCUTTA

THIS inscription was discovered near the temple of Mundesvarī on a hill close to the village of Rāmgāh, seven miles south-west of Bhabuā in the Bhabuā sub-division of the district of Shāhābād, Bihar One part of the stone bearing the inscription was found about twenty-eight years ago, and it was in 1903 that the removal of the *débris* around the temple

<sup>13</sup> People, (Germans and Scandinavians) who say *ja* ('yaw') for yes

<sup>14</sup> *I e*, the ship belonging to Aghâ Rahmân See *infra* — Ed

<sup>15</sup> Probably the inlet of Machhakundi (the Fishpond) off Rājāpur — Ed

<sup>16</sup> As Captain of the *Essex* he was captured by the pirate John Halsey in August 1707 Halsey plundered the ship and let her go *Surat Factory Records* Letter from Robt Adams, 17 Sept 1707

led to the discovery of the other part. The two pieces were sent to the Indian Museum, Calcutta, at different dates. They were afterwards joined together by an iron band, and are now to be found in the Inscription Gallery of the Museum. A summary of its contents appeared in the late Dr Bloch's *Annual Report of the Archaeological Survey, Bengal Circle*, for the year 1904, pp 9-10.<sup>1</sup> It was subsequently edited by Mr R D Banerji in the *Epigraphia Indica*, Vol IX, p 289f and Plate. As Mr Banerji's transcript and translation of the epigraph can be amended in more than one place and as his conclusions about the age of the record are in my opinion open to some doubt, no excuse, I think, is needed for re-editing the inscription.

The stone consists of four faces. The inscription is on one face only, and above that is sculptured a half five-leaved water-lily, there are traces of bold lettering at the back and also on one of the sides. The inscription consists of 18 lines of well-executed writing covering a space of about 2' high by 1'- $\frac{1}{2}$ " broad. Some of the letters between the two halves of the stone, now pieced together, have been broken away and lost. The lower part of the first half containing the last two lines has been destroyed, and the letters of even the preceding line are greatly damaged. Otherwise, the writing is in a perfect state of preservation and is generally legible throughout. The size of the letters in line 1 (which records the date) is larger than those in the rest of the inscription, roughly it varies from  $\frac{4}{5}$ " to  $\frac{2}{5}$ ". The characters belong to the northern class of alphabets. They are, speaking generally, similar to those of the Allâhâbâd pillar-inscription of Samudragupta,<sup>2</sup> with some differences in details, e.g. the formation of *p*, *s*, *l*, medial *f* and *e* and subscript *r*. They also bear a family likeness to those of the Meherauli pillar-inscription of Chandra,<sup>3</sup> the Mathurâ inscription of Chandragupta II,<sup>4</sup> and the Barâbar and Nâgârjuni cave-inscriptions of Anantavarman.<sup>5</sup> It is a fact worthy of notice that almost all the characters of the Muncēvari inscription are Early Gupta in type and traceable to the records of that period. The palæography of the inscription will be discussed later, meanwhile, in regard to the form of some of the individual letters the following points may be worth noting, most of which appear to have been overlooked by Mr Banerji. The first line contains no less than six box-shaped superscript *v*-s, but in the following lines it is of the usual cursive type, in *viditvâ*, l. 12 we have to note the later type of *v-kâra* (in *di*) which is, however, the only instance of the type that the record contains. An exact parallel of the promiscuous use of box shaped and cursive *v* s is to be found in the Meherauli pillar-inscription of Chandra.<sup>6</sup> Interesting also is the form of *f* (e.g. in *kâlîyam*, l. 8) which from about the middle of the fourth century A.D. begins to appear in the Northern alphabet, e.g. in parts IV and V of the *Bower MS* (ed. Hoernle, Table II) and the Karamdândâ inscription of Kumâragupta, dated G.E. 117.<sup>7</sup> The medial *u* is formed by a hook as in the Allâhâbâd pillar-inscription as well as by thickening the lower end of the stem (e.g. in *rupâlanam*, l. 8). The medial *û* is of the regular Early Gupta type as in the Gadhwâ inscriptions of Chandragupta II and Kumâragupta<sup>8</sup> (e.g. in *pûrvvâdyam*, ll. 12 and 13 of the two inscriptions respectively). The *ai* consists of two superscribed strokes (e.g. in *-taria*, l. 9) as in the Meherauli pillar-inscription. The characters include the very rare final *t* in l. 15 and final *m* in l. 18, and

<sup>7</sup> *Ep. Ind.*, Vol. X, Pl. opposite p. 71.

<sup>8</sup> *F.G.I.*, Pl. IV, B and C.

the rather rare *n* and *ñ* in ll 1 and 16 respectively. As regards *n* which occurs twice in conjunct groups, it resembles exactly the same letter *eg* in the Barâbar cave-inscription of Anantavarman<sup>9</sup> (in *śārnga*, l 6) and varies in position as it stands (cf *trīṣa*° and *dvāviṣa*°, l 1). The *y* is invariably tripartite. The superscript *r* is shown above the vertical, but in the case of *y* only it is written on the line. The *ā* is added on to a superscribed *r*<sup>10</sup>. Particularly interesting is the rare sign of interpunction which occurs four times in the inscription (in ll 6 and 11). This sign is similar to the one occurring in the *Bower MS* which dates from about the middle of the fourth century A D according to Hoernle (cf Table V). The symbol *om* is of the dextrorsal form having much resemblance to those occurring in the same MS<sup>11</sup> and the Barâbar cave-inscription of Anantavarman<sup>12</sup>.

The language is Sanskrit prose throughout, excepting the last two lines containing an imprecatory verse of which a portion only is now extant. It is, however, not always grammatically correct and contains at least four solecisms<sup>13</sup> *eg* the wrong use of the affix *ktvāch* in *prārthaytvā*, l 4, the violation of the rule of euphony in *may* = *etat*, l 6, the irregular case-ending in *tandula prastha-dvaya* n, l 8, and the use of masculine (or neuter) for feminine in *asmin*, l 2, and neuter for masculine in *etat*, l 6. In *kāntaka*, l 6, we have to note the addition of the affix *ka*. Cf *Gupta Inscrs*, p 69 and Kielhorn, *Ep Ind*, Vol VII, p 159, n 7. In respect of orthography, the only points that call for notice are the following: the use of a guttural nasal instead of an *anusvāra* before the palatal *ś*<sup>14</sup> in *trīṣaṭi[me]* and *dvāviṣaṭime*, l 1, the use of a labial nasal instead of an *anusvāra* twice in the word *sambatsara*, ll 1 and 2, where we have also to note the use of *b* for *v*, the doubling of *t* in conjunction with a following *r* in *pittrōh*, l 5 and of a letter except *y* after a superscript *r* in *pūrvvāyām*, l 2, *ā-chandrārka*°, l 7, and *r* = *vvā*, l 13, *th* becomes *tth* after a superscript *r* in *prārthaytvā*, l 4 and *navedy-ārtham*, l 8, final *t* and *m* are written somewhat lower than the line (*eg* in *vaset*, l 15 and *pūrvvāyām*, l 2), the medial *ā* stroke varies in length (cf *yathākālā*°, l 12 and *mahāsāmanta*, l 2), the absence of an *avagraha* before °*nupālanam*, l 18, the change of an *anusvāra* to a palatal nasal in *uktañ* = *cha*, l 16, final *m* has been retained, where *anusvāra* should have taken its place, in *pūrvvāyām*, l 2 and *nikāyam*, l 11, and the *dh* of the conjunct *dhy* is doubled in *āddhyāsi*°, l 12. As regards lexicography, the words *koshthikā*, l 7 *yathākāl-āddhyāsin*, l 12 and *tāpovanika*, l 13 deserve to be noted. The first word, viz *koshthikā* is found probably in a Gadhwā stone inscription (Fleet's *Gupta Inscrs*, p 268, l 3) and certainly in a Dāmodarpur copper-plate of the reign of Budhagupta<sup>15</sup>. There is no doubt that the *koshthikā* of our inscription clearly means 'store-room', inasmuch as provision is made for the supply of oil and rice therefrom. The word *kotthaka* (=Sk *koshthaka*) which is found in the Pāli literature, in connection with *vihāra*, appears also to have the same sense<sup>16</sup>. Mr Banerji, however, renders the word *koshthikā*

<sup>9</sup> FGI, Pl XXX B, l 6 and cf *Bower MS*, Table I

<sup>10</sup> This is an archaic sign. Cf, *eg* the Nāsik cave inscription of Ushabhadāta, *Ep Ind*, Vol VIII, Pl IV, opposite p 78

<sup>11</sup> *Bower MS*, *Intro* (Bombay, 1914), p 22, fig 8

<sup>12</sup> FGI, Pl XXXB, l 3

<sup>13</sup> Such violations of the rules of Sanskrit grammar are characteristic of the documents of the Early Gupta period—cf Hoernle's remarks, *op cit*, pp 73–5

<sup>14</sup> Cf Buhler's remarks, *Indian Palaeography* (Eng Trans), p 47

<sup>15</sup> A transcript of this inscription, which will be shortly published in the *Epigraphia*, was kindly placed at my disposal by Mr Radhagovinda Basak. For the Gadhwā inscription, cf *infra*, p 23, n 48

<sup>16</sup> It has been translated by Jacob and Rhys Davids as 'store room'—See *Vinayapitaka*, SBE, Vol XX, pp 109, n 1 and 177, n 1. Cf also the Sanskrit words *koshtha* and *koshthagāra* and Marāṭhī *koṭhī* (Molesworth's Marāṭhī-English Dict, s v) which are all used in this sense

by 'treasury' But this interpretation is controvertible as rice and oil are surely not things which may be expected to be hoarded up in treasuries The next word, viz *yathākāl-ādhyāsin* has been rendered by him as 'who arrive at the proper time', and Professor Sten Konow suggests 'those who come and worship from time to time' (*Ep Ind*, Vol IX, p 290 and n 4) Even previous to this the expression was known from a number of epigraphic documents, e.g. the Deobaranark inscription of Jivitagupta,<sup>17</sup> the Khālimpur copper-plate of Dharmapāla,<sup>18</sup> the Lucknow Museum copper-plate of Balavarmadeva<sup>19</sup> and some Orissa inscriptions, such as the Katak copper-plates of Mahābhavagupta<sup>20</sup> It occurs again in the recently published copper-plates of Kulastambha<sup>21</sup> Fleet translated it as 'those who presided at different times' (*Gupta Inscr*, p 218), and Kielhorn as 'as they may be present from time to time' (*Ep Ind*, Vol IV, p 250), and also as 'present and future' (*ante*, 1891, p. 123) The editor of the grants of Kulastambha, M M Haraprasād Śāstrī, most conveniently omits the expression in his translation I am afraid, however, that its proper sense has not yet been properly understood, and the interpretations proposed are open to criticism The clue to its real meaning is, in my opinion, furnished by the Faridpur grants (ed Pargiter, *ante*, 1910, pp 195, 200 and 204) which have *adhyāsanakāle* in the sense of 'during the administration (of)' Again, whenever in inscriptions the expression *yathākāl-ādhyāsin* is used as an adjective, it is invariably found to qualify certain administrative functionaries For instance, in the Lucknow Museum copper-plate it is an adjective of *rājakulas* or 'royal dynasties', and in the Katak copper-plate of Mahābhavagupta, of certain officers like *samāhartin*, *sannidhātṛin*, *niryuktaka* and so forth The only natural conclusion that suggests itself to me is, therefore, that when it is used adjectively it means, 'those who administer from time to time', and when substantively, 'the successive administrative officers'<sup>22</sup> In the present record the allusion is most probably to the officers who had to superintend the various affairs of the *maṭha* The next word that deserves our attention is *tāpovanika* Mr Banerji wrongly read it as *r=āpovanika* and took it in the sense of 'the merchants who trade on the waters (?)' The word should, however, be read as *tāpvanika* and derived from *tapovana* It would naturally mean the inhabitants of the *tapovana*, i.e. the ascetics, who are in all likelihood the *mahants* or pontiffs of the *maṭha*

The inscription refers itself to the reign of the *Mahāsāmanta Mahāpratihāra Mahārāja Udayasena*, and is dated, in words, the 22nd of Kārttika of the year 30 of an unspecified era. Its object is to record the erection of a *maṭha* of the god Vinīteśvara, the daily provision of two *prasthas* of rice and one *pala* of oil for the offering and lamp respectively, as well as certain other gifts of the value of 50 *dīnāras* by the *dandanāyaka* Gomibhata

But what is the age of the inscription? This question has been discussed by Mr Banerji (*op cit*, p 285f) who is of opinion that the record belongs to the first part of the seventh century A.D. This theory is apparently traceable to the remarks of the late Dr Bloch in his *Annual Report*, p 9 According to him, the date of the inscription, viz the year 30, 'from the shape of the characters must be referred to the Harsha era' of A.D. 606 This surmise on the part of Dr Bloch has, however, not been substantiated.

<sup>17</sup> *FGI*, pp 216, 218

<sup>18</sup> *Ep Ind*, Vol IV, pp 250, 245, n 3

<sup>19</sup> *Ante*, 1891, p 123.

<sup>20</sup> *Ep Ind*, Vol III, p 347, ll 5-6

<sup>21</sup> *JBORS*, Vol II, pp 402, l 21 and 406, l. 10.

<sup>22</sup> The word *yathākāl-ādhyāsin* which occurs in the Sonpur plates of Someśvaradeva (*Ep. Ind.*, Vol. XII, p 240) is evidently a mistake

by subsequent research, so far as I know, and I cannot bring myself to accept it. But to prove my point it is necessary to go into details. Our inscription is on stone and comes from Bihar. To study its palæography, therefore, it is but natural to take into cognizance other lithic records discovered in the same province. And if the characters of our inscription are found to be essentially similar to those of any other Bihar inscription, whose date is known, we may very well rest assured that the former cannot be far removed in date from the latter. Now, if it be assumed by scholars that the Mundesvarī inscription belongs to the seventh century A D, as no doubt Mr Banerji has done, it is to be expected that the alphabetic characteristics of that epigraph should be found to prevail in other seventh century Bihar inscriptions also. Roughly speaking, they must be found in such stone records as were incised in Bihar at least between A D 600 and 800. And such inscriptions are the Bodhgayā inscription of Mahānāman dated 588-89 A D <sup>23</sup> and the Āphsāḍ inscription of Ādityasena <sup>24</sup> whose date must fall in the latter half of the seventh century A D. The question therefore arises whether the characters of the Mundesvarī inscription, if it is to be assigned to this period, are similar to those of the above two records. A comparison of the letters *k*, *r*, *ś*, *h*, *y*, the medials *ṛ* and *ṛ̣* and so forth of the Mundesvarī inscription with those of the Āphsāḍ inscription is enough to show that these two records can never be relegated to the same period. The latter, as Fleet rightly says, "really differs but little from the modern Devanāgarī" (*Gupta Inscrs*, p 202), while the former as I have already stated, presents alphabetic forms which are traceable to epigraphs of the Early Gupta period (*supra*, p 22). For instance, in the former the letter *k* consists of a plain curved line intersecting a straight upright, whereas in the latter the right part of the curve develops into a loop. The letter *r* in the former is a mere straight upright without any appendage, while in the latter not only does its lower end develop into a wedge but the right extremity of even that wedge is elongated. The most interesting letter, however, is *y* which is tripartite in the former, but a 'fully developed Devanāgarī' in the latter. Again, the tails of the curves of medial *ṛ* and *ṛ̣* are in the latter regularly drawn down low and fully expressed, but they are in all cases but one absent in the former <sup>25</sup>. Even setting aside these and other differences in alphabetic forms which it is useless to enumerate, the great fact remains that the Mundesvarī inscription contains 'right-angled' whereas the Āphsāḍ 'acute-angled', forms of letters. It is, therefore, but reasonable to place the former considerably earlier than the latter. But we may go even one step further and say that it is earlier than even the Bodhgayā inscription of Mahānāman which is also in acute-angled characters like the Āphsāḍ inscription, and likewise presents some modern Nāgarī forms. The palæography of the Mundesvarī inscription, therefore, leaves no doubt that it is to be placed earlier than at least the latter half of the sixth century A D. The year 30 of the record cannot be, therefore, referred to the Harsha era of A D 606, and as such there remains no other known era to which it may be assigned except the Gupta era of A D 318-19. The date of the record thus becomes equivalent to A D 348-49.

It seems to me that by not following the above method of settling the date of the inscription Mr Banerji has placed himself in serious difficulties. In his paper on the Patiakella grant of the Mahārāja Śivaiṇṇa, dated [G F] 283 = A D 602 he makes

<sup>23</sup> *FGI*, p 274<sup>24</sup> *Ibid*, p 200<sup>25</sup> For these details see *Ind Pal*, pp 54-6

the following remark about its palæography "The characters belong to the northern class of alphabets and are in every respect similar to those of the Mundesvarî inscription of Udayasena, from the Shâhâbâd district" (*Ep Ind*, Vol IX, p 285) This general remark he has illustrated *in extenso* by definite examples, but they are, I am compelled to say, far from being of a convincing nature For, he himself admits, for instance, that the letters *y* (which is tripartite) and *n* of the Mundesvarî inscription are of 'the Early Gupta type'—a point of great importance which seems to have been missed when he assigns the record to the Harsha era and refers it to A D 636 This conclusion is based by him on a consideration of the affinity of characters existing between this inscription with those of the years 34 and 39 (of the Harsha era) from Nepal (*op cit*, p 289) But I submit, this comparison, and consequently the conclusion that it leads to, are incorrect First, because, inscriptions of the same provenance, although they are available, have not been brought together for comparison which is a mistake in any palæographic examination of a scientific nature There is no paucity of stone inscriptions, which date from the Harsha period and are not distant from the place whence our record comes, such *eg* as the Bodhgayâ inscription of Mahânâman and the Âphsal inscription of Âdityasena referred to above Secondly, mere similarity of character between any two inscriptions is not enough to show that they necessarily belong to the same period, especially when they are separated by long distances This important point is undoubtedly admitted by Buhler, who points out that the eastern variety of the epigraphic Gupta alphabet of the fourth and fifth centuries A D represented *eg* by the Allâhâbâd pillar-inscription of Samudragupta is to be found even in Pandit Bhagvanlal's inscriptions from Nepal<sup>26</sup> which belong to the seventh century A D But if we follow Mr Banerji's line of argument we shall be compelled to assign the Allâhâbâd pillar-inscription to the age of the Nepal inscriptions—a conclusion which I am afraid, no palæographist can ever bring himself to accept The Mundesvarî inscription cannot, therefore, precisely for the same reason, be brought in a line with the Nepal inscriptions, a fact which is in opposition to the remark of Mr Banerji that "The palæography of the epoch beginning with the last half of the sixth and ending with the first half of the seventh century A D can nowhere be studied with greater advantage than in Nepal" (*Ep Ind*, Vol. IX, p 286)

It has been stated above that the inscription is throughout in right-angled characters, but the inscriptions with which it has been chronologically grouped by Mr. Banerji, *viz* the Bodhgayâ and Âphsal inscriptions, are in acute-angled characters This fact is rather interesting as it has an important bearing on the chronology of the records in question Acute-angled form of letters has been accepted by Buhler as a prominent characteristic of the North Indian epigraphs from the sixth century A D onwards<sup>27</sup> And Mr Banerji too, does not seem to have disputed it<sup>28</sup> It is difficult to reconcile this with the fact that the Mundesvarî inscription, which is assigned by him to the seventh century A D, is entirely in right-angled instead of acute-angled characters, In discussing the palæography of the four Faridpur grants<sup>29</sup> which he calls spurious, Mr Banerji explains

<sup>26</sup> *Ind Pal*, p 46

<sup>27</sup> *Ibid*, p 49

<sup>28</sup> "The presence of the acute angle," he admits, "is also another important feature in the determination of the characteristics of the alphabet"—*JASB*, N S, Vol VII, p 295

<sup>29</sup> *The Evidence of the Faridpur grants—Ibid*

it by asserting that "In the Eastern variety of the Northern alphabet the latest use of the right-angled characters seems to be in the Mundēśvarī inscription" But to my mind this statement has not been proved and should therefore be treated as a personal opinion only As I have already said, just because this record presents right-angled characters it must be taken to be of an earlier age than the Bodhgayā inscription of Mahānāman which shows the acute-angled form of letters And does not Buhler in formulating his theory about acute-angled inscriptions, refer to this record as the *earliest* example? <sup>30</sup> Mr Banerji no doubt anticipates this palæographic difficulty and in his second paper on the alleged spuriousness of the Faridpur grants,<sup>31</sup> meets it, to my mind unconvincingly, by saying that the Bodhgayā inscription "should never be taken to be the prototype of the Eastern variety of the Northern Indian epigraphs of the sixth century A D," because, "it cannot be said that the characters represent the ordinary epigraphic alphabet of the North-eastern India of the sixth century" But what is this specimen of 'the ordinary epigraphic alphabet of the North-eastern India of the sixth century?' This obviously is the Mundēśvarī inscription, and the Bodhgayā inscription, therefore, can only become extraordinary because, it presents 'much more advanced forms' than those of the former In my judgment this is putting the cart before the horse Instead of regarding the Mundēśvarī inscription as prior to the Bodhgayā record, as logical reasoning would require us, it becomes necessary to maintain that the former is posterior to the latter The Bodhgayā inscription becomes the ordinary epigraphic alphabet of the North-eastern India of the sixth century if it be but regarded as of a later period *En passant* it may be remarked that Mr Banerji has used the palæography of this record which he places in the seventh century A D as one of the evidences to show that the Faridpur grants are forgeries But if my contention is proved to be right his arguments would lose much of their force And there seems no objection to taking the documents as original, as Mr. Pargiter has done This question, however, I leave aside for discussion in a subsequent paper

<sup>48</sup> Śrî-Mandaleśvarasvâmpâdâya koshthikâta—Mr Banerji. Restore padâya koshthikâta and cf. *Chitra* [k]âtasvâmpâdâya koshthikâta in *Gupta Insers*, p 268, l 3 Fleet, however, reads the passage as *Chitra*[k]âtasvâmi pâdâya koshthe(?)ta and translates it as 'belonging to the entrance of which belongs to the feet of the divine (god) Chitrakutasvâmi'. The inscription, which is partially damaged, says (l 2) that an image of Anantasvâmpâda was installed and that an endowment made 'for the purpose of providing perfumes, incense, garlands, &c, and of executing repairs' (ll 2-4). And in connection with the gift occurs the expression *bhaga[va]ch-Chitra*[k]âtasvâmpâdâya koshthe(?)ta. In all these particulars the inscription resembles so much the Mundēśvari inscription that I am led to think that we would not at all be wide of the mark if the above correction be adopted. Moreover it is also very likely that the expression *dattā dvādasa*, between which and the above expression there is a lacuna, means that twelve *dināras* were the value of the grant (cf other Gadhwā inscriptions where we find mention of similar gifts made). I do not think Fleet is right in his conjecture that the gift 'consisted of some land at a village' which belonged to the god Chitrakutasvâmi and that this was the same god Anantasvâmi under a different name. From *Mandalesvara svâmi* I believe was derived the name of the hill which was probably called *Mandalesvara*, and it is just possible that we have an echo of this word in the modern name *Mundēśvari*. Similarly, we have in the Gadhwā inscription the name *Chitrakutasvâmi* which means the lord of the Chitrakuta hill (op cit, p 268 and n 1).

<sup>49</sup> Restore *pratinidhi*

Brahmins)' For its use in the above technical sense see now *Talesvara* copper plates, *Ep Ind*, Vol XIII, pp 115, 119<sup>68</sup> *upamibandha* This is a technical word and is probably the same as *nibandha* which means an 'arrangement' or 'assignment' The word *abhi-grâvita*, l 14, is also, I presume, technically used Cf *śrâvita* and *nibaddha*, Kârle and Nâsik cave inscriptions, *Ep Ind*, Vol VII, p 68 and Vol VIII, p 84, see also *Gupta Insers*, p 71, l 11<sup>69</sup> This would be the earliest reference to the coin in Indian inscriptions For other references see *Gupta Insers*, pp 31-2, 38, 40, 41, 261, 265, the Faridpur grants, ante, 1910, pp 195, 200 and 204, the five Dâmodarpur grants to be published by Mr Basak in *Ep Ind*, and a Bodhgayâ inscription ed Bloch, *ASR*, 1908-9, p 153<sup>70</sup> *yath âvadhâranayâ* The word *avadhâra*, I find, is similarly used in Mr Pargiter's Faridpur copper-plates e.g. ante, 1910, p 195, l 10 and Mr Basak's copper-plates from Dâmodarpur

## DEKKAN OF THE ŚĀTAVĀHANA PERIOD

BY PROF D R BHANDARKAR, M A , CALCUTTA

*(Continued from Vol XLVIII, p 83)*

## APPENDIX A

## The approximate date of the rise of the Śātavāhana Power

No account of the Dekkan of the Śātavāhana period is complete without a consideration of the most probable date of the rise of the Śātavāhana power, regarding which two theories have been propounded. The one accepted by me in this article agrees with that of Sir Ramkrishna Bhandarkar, and is based upon certain chronological statements of the Purāṇas. These I intend to consider here with a view to show how far they agree with facts taken as established.

The duration assigned by the Purāṇas to the Maurya dynasty is 137 years, and if we take 322 B C as the date of its foundation, its overthrow and the foundation of the Śunga family must have occurred in 185 B C. The Śungas are generally stated in the Purāṇas to have reigned for 112 years, and the Kānvas 45. But as both ruled simultaneously, we have to deduct only 112 from 185 to get 73 B C as the date when the Andhras came to power. This is the view of Sir Ramkrishna, and no argument of any importance has yet been adduced to contradict it. I am not unaware that the inscription of Khāravela, king of Kaṅga, in the Hāthigumphā in the Udaygiri Hills near Cuttack in Orissa speaks of a king called Śātakarṇi, protector of the West, who has been identified with the third king of the Śātavāhana dynasty described above. Its date is 165th year of the Maurya era corresponding to c 157 B C, and it may, therefore, be argued that the date 73 B.C. assigned to the foundation of the Śātavāhana dynasty is impossible when the third ruler of that family, viz Śātakarṇi, has to be placed about 157 B C. But then it must be borne in mind that it is now-a-days being questioned whether Khāravela's inscription contains any date at all,<sup>1</sup> and that Prof Luders, who has recently carefully read the record with the help of excellent estampages prepared by the Archaeological Department, emphatically declares that it contains no date at all.<sup>2</sup> So the opposition to our theory based upon the date of the Khāravela epigraph has no solid grounds to stand upon. I am also aware of the palaeographic difficulty that has been urged against the date 73 B C for the rise of the Śātavāhana power. But then if the question is properly considered, it will be seen that the difficulty does not arise at all. Such an illustrious palaeographer as Buhler has told us that the Nānāghāt and Sāñchi inscriptions of the Śātakarṇi and the Hāthigumphā inscription of Khāravela are exactly of the same period. He has also told us that "the differences between the characters of Gotamīputa Satakarni's and those of the Nanaghat documents are such that it is not possible to place them, as Pandit Bhagwanlal has also seen, at a distance of more than about 100 years."<sup>3</sup> This quotation is from Buhler's article on the Nānāghāt inscriptions, but when he wrote it, Buhler was of opinion that Gautamīputa Śātakarṇi lived shortly before the middle of the first century B C, and accordingly he assigned these records to

<sup>1</sup> JRAS., 1910, 242 ff and 824 ff

<sup>2</sup> *List of Brāhma Inscriptions*, No 1345. An attempt has recently been made by Mr. K. P. Jayaswal and Mr. R. D. Banerji to revive the theory that the inscription contains a date (JBOES., 1917, 449 ff and 488 ff.) But see also Dr. R. C. Majumdar's criticism on it, *Ante*, 1918, 223-4.

<sup>3</sup> ASWI., V, 73.

200—150 B C What is strange is that when this opinion of Buhler's about the age of the inscriptions is now quoted, the date he then ascribed to Gautamîputra Śātakarni is entirely lost sight of. Subsequently, however, Buhler changed his mind, and came round to the view of Sir Ramkrishna Bhandarkar that Gautamîputra Śātakarni flourished about A D 124.<sup>4</sup> If we now subtract 100 from this 124 to account for the difference of character as proposed by Buhler, we get A D 24 as the approximate date for the Nânâghât, Sâñchi and Hâthigumphâ inscriptions. If A D 24 can thus be the date of the third king of the Śātavāhana dynasty, this cannot but confirm the date, viz A D 73, we have assigned to its foundation.

#### APPENDIX B

##### Vilivayakura and Sivalakura of the Kolhapur coins

Nearly forty-two years ago, certain coins were discovered in Kolhâpur near the hill of Brahmapurî, north-west of the town. Pandit Bhagwanlal Indraji was the first to give an account of them in the *Journal of the Bombay Branch of the Royal Asiatic Society*, Vol XIII, p 303ff, and identify the names occurring on these legends with those of the Śātavāhana dynasty—an inference which has been more or less adopted by all the scholars that have subsequently written on the subject. The legends on these coins have been read as follows —

Raño Vāsithîputasa Vilivâyakurasa

Raño Mâdharîputasa Sivalakurasa

Raño Gotamîputasa Vilivâyakurasa

With regard to the reading of these legends no doubt has been or can be raised. It is, however, when the question of identifying these princes turns up that a divergence of views is perceptible. Pandit Bhagwanlal took Vilivâyakura and Sivalakura to be mere titles, identified the first with Vāsishthîputra Pulumâvi, the second with Mâdharîputra Śakasena and the third with Gautamîputra Śrî Yajña Śātakarni, and further deduced the conclusion that as Mâdharîputra of the Kolhâpur coins re-struck the coins of Vāsishthîputra, whereas those of the former were in turn re-struck by Gautamîputra, Vāsishthîputra, Mâdharîputra and Gautamîputra succeeded to the Ândhrabhritya throne in that order. His views were endorsed by the late Dr Buhler.<sup>5</sup> In the *Early History of the Dekkan*,<sup>6</sup> however, Vilivâyakura and Sivalakura are taken to be the names of viceroys and identified, the former with the Baleokouros of Ptolemy, Vāsishthîputra with Vāsishthîputra Pulumâvi and Gautamîputra with Gautamîputra Śrî Yajña Śātakarni and not with the father of Pulumavi, Gautamîputra Śātakarni, who never reigned in the Dekkan. And as Vilivâyakura was the viceroy of two kings, viz Vāsishthîputra and Gautamîputra, it is argued that one of these was the immediate successor of the other, and Śrî Yajña, being the later, must be considered to be Pulumâvi's immediate successor. Mâdharîputra has been therein identified with Mâdharîputra Śakasena, who is taken to be a successor, but not the immediate one, of Śrî Yajña. Dr V A Smith also regards the princes of the Kolhâpur coins as belonging to the Ândhrabhritya dynasty, but identifies Gautamîputra Vilivâyakura, who is styled Vilivâyakura II, by him, with Gautamîputra Śātakarni, and considers the other Vilivâyakura (i.e. Vilivâyakura I) and Sivalakura to be the same as Chakora and Śiva-Svâtî

<sup>4</sup> Above, 1913, 230

<sup>5</sup> Above, XII, 273

<sup>6</sup> Pp. 20-1

(Śātakarni) mentioned in the Purāṇas as Gautamīputra's predecessors.<sup>7</sup> It will thus be seen that Vīlvāyakura and Sivalakura are taken by Dr. Smith as personal names and of kings pertaining to the Śātavāhana dynasty. But Prof. E. J. Rapson, whose is considered to be the most important view expressed on this subject, supposes them to be local titles, and identifies Mādharīputra Sivalakura with Mādharīputra Śakasena and Gautamīputra Vīlvāyakura with Gautamīputra Śātakarni.<sup>8</sup> With regard to the third name, he says the following — "The identification of No. 1, Vāsīthīputra Vīlvāyakura, must remain doubtful. The evidence of the re-struck coins shows that he cannot possibly be identified with the best known Vāsīthīputra, viz. Puṣumāyi, who was the son of Gautamīputra, but this metronymic was common in the dynasty, and there is no difficulty in supposing that it was borne by the predecessor of Mādharīputra in the Kolhāpur District."

Such are the views expressed by various scholars of repute with regard to the names occurring in the legends on the Kolhāpur coins. I will now put forth my own view of the matter, in order that it might be taken for what it is worth by the antiquarians. In the first place, Vīlvāyakura and Sivalakura cannot possibly be regarded as viceroys of any kings, if the legends on the coins actually are as they have been read. For what this view comes to is just this, viz. that *raño Vāsīthīputasa*, *raño Mādharīputasa* and *raño Gotamīputasa*, the first halves of the legend, are to be supposed as containing the names of sovereigns, and *Vīlvāyakurasa* and *Sivalakurasa*, the second halves, as giving the names of their viceroys. Such a division of the legends is arbitrary and unknown to Indian numismatics, so far as my knowledge goes. Whenever coins of any viceroys or feudatories are found, their names are, as a rule, specified on the reverse and those of their sovereigns on the obverse. Sometimes, no doubt, but very rarely, the names of the former alone occur without those of the latter being engraved. But not a single instance can be pointed out wherein the names of both the sovereign and the viceroy are specified in one single line in one and the same legend without the introduction of any word indicative of the subordinate rank of the latter. The numismatic evidence is, therefore, against Gautamīputra, etc., being considered as names of sovereigns and Vīlvāyakura and Sivalakura as those of their viceroys.

Secondly, this view involves the supposition that Vāsīthīputra, Mādharīputra and Gautamīputra can be used by themselves to denote any individuals, and here, in particular, the Śātavāhana princes themselves. But not a single inscription has been found in which any one of these metronyms is used by itself to denote a Śātavāhana. If it is Puṣumāvi that is spoken of, he is called in inscriptions not simply Vāsīthīputra, but Vāsīthīputra Puṣumāvi, if it is his father, he is referred to not simply as Gautamīputra, but as Gautamīputra Śātakarni. Similarly, Śakasena (Śrī-Sāta) is never called simply Mādharīputra, but Mādharīputra Śakasena (Śrī-Sāta). Gautamīputra, Vāsīthīputra, and Mādharīputra of the Kolhāpur coins cannot thus, by separating them from what follows and taking them by themselves, be regarded as denoting any Śātavāhana rulers. Nor can it be maintained that, although the terms Gautamīputra, etc., are not used by themselves to denote the Śātavāhana princes, they, especially the metronymic Mādharīputra, were about this period conjoined to their names only. For it was a custom of this period with

<sup>7</sup> *EHI*, 217 and chart facing p. 218.

<sup>8</sup> *CIC — AMk*, intro, XL and LXXXVII.

personages of the warrior class to state the names of their mothers,<sup>9</sup> and names of the latter such as Vāsishthī, Gautamī, Kausikī, Hāritī, and so forth are met with in many old inscriptions, not as mothers of the Śātavāhana kings only, but also of princes of other families and tribes, such as Mahārathi, Mahābhoja and so forth.<sup>10</sup> The name Mādhari also is not unknown to Indian epigraphy of this period. Jaggayyapeta *stūpa*, *eg*, has an inscription of the third century A D, and referring itself to the reign of Virapurushadatta of the Ikshvāku family.<sup>11</sup> This king is therein called Mādhariputra. Similarly, the Ābhīna prince Īsvarasena is called Mādhariputra in a Nāsik inscription of about the same date.<sup>12</sup> The view, therefore, that the terms Gautamīputra, Vāsishthīputra and Mādhariputra must denote, by themselves in inscriptions of the early period, the kings of the Śātavāhana dynasty only, has no grounds to stand upon.

I shall now proceed to consider the second view which regards Vilivāyakura and Sivalakura as local titles, and Gautamīputra, etc., as metronymics,—both belonging to the Śātavāhana kings. This view was first started by Pandit Bhagwanlal Indraji, and has been adopted, as we have seen, by Prof. Rapson. But to look upon Vilivāyakura and Sivalakura as local titles is a mere gratuitous supposition without the least foundation in fact. Again, if they had been titles, some explanation would have been offered of them, but, as Prof. Rapson himself admits, “no satisfactory explanation has yet been given of the forms Vilivāyakura and Sivalakura.” Next, a sort of inconsistency is, I am afraid, perceptible in his identification of Vāsishthīputra Vilivāyakura. At one place, he says, as we have seen above, that the evidence of the re-struck coins shows that he cannot possibly be identified with Vāsishthīputra Pulumāvi but with the predecessor of Mādhariputra in the Kolhāpur District, implying that this Vilivāyakura was somewhere between Pulumāvi and Śakasena (Śrī-Śāta). But at another place he says that “two of Pulumavi’s predecessors seem to have borne the title ‘Vilivāyakura’ in the district of Kolhāpur only,”<sup>13</sup> clearly mentioning here that the Vilivāyakura in question was prior to Pulumāvi and not posterior to him as implied at first. But what is most inexplicable is that while commenting on the passage of Ptolemy where Pulumāvi and Vilivāyakura are mentioned, he says that both “might well be one and the same person,” and adds in support of his statement that “a foreigner might be excused for not knowing that in our country, the Prince of Wales, the Earl of Chester and the Duke of Cornwall were the same person.”<sup>14</sup> This means in unmistakeable terms that according to Prof. Rapson, Pulumāvi and Vilivāyakura were one and the same person, and how this is to be reconciled with his previous statement that “the evidence of the re-struck coins shows that he cannot possibly be identified with the best known Vāsishthīputra, *viz* Pulumāvi,” is not quite clear to me.

This theory, again, is open precisely to the same objection to which, as we have said, the view first discussed was open. For, if Vilivāyakura and Sivalakura are mere titles why are they to be taken as referring to the Śātavāhana kings, unless we suppose that the metronymics Gautamīputra, etc., can, even though standing by themselves, denote these princes only? This supposition has been discussed above and shown to be untenable. These metronymics, as stated above, were at this period used in the case of the persons belonging to the Kshatriya class generally and were never employed by themselves without the addition of personal names, not even in the case of the Śātavāhanas, as shown by their numerous inscriptions.

<sup>9</sup> Above, 81<sup>12</sup> *Ibid*, No 1137<sup>10</sup> Luders’ *List*, Nos 1058, 1100, etc<sup>13</sup> *CIC* — 4 *Mk*, v1<sup>11</sup> *Ibid*, Nos 1202-4<sup>14</sup> *Ibid*, v1 and n 1

All these objections are applicable even to the identifications proposed by Mr Smith. In fact, no evidence whatever can be adduced to show that there was any connection between the princes named in the legends on the Kolhâpur coins and the Śâtavâhana dynasty. Now, it is to be remembered that Ptolemy, the Greek geographer, while describing the cities and villages of inland Ariake, speaks of Baithana as the royal seat of Siro Polemaios and Hippokoura as the royal seat of Baleokouros. Baithana is, of course, Paithan and Siro-Polemaios, Śri-Pulumâvi of the Śâtavâhana dynasty. Hippokoura has not yet been satisfactorily identified. But Sir Ramkrishna Bhandarkar was the first to identify Baleokouros with Viḷivâyakura of the Kolhâpur coins, and this identification is universally accepted.<sup>15</sup> It is to be noted that Ptolemy speaks of two different places and of two different kings as reigning there. The two kings, therefore—Pulumâvi and Viḷivâyakura—must be taken to be different persons. And to argue that Pulumâvi and Viḷivâyakura are the same person, on the analogy that the Prince of Wales, the Earl of Chester and the Duke of Cornwall denoted one individual, is to argue that Pulumâvi is identical not only with Baleokouros (Viḷivâyakura) of Hippokoura, but also with Tiastenes (Chashtana) of Ozene (Ujjain) and Kerobothros (Keralaputra) of Karoura (Karur), the two other kings mentioned by Ptolemy.<sup>16</sup> Tiastenes and Kerobothros might also be thus taken to be local titles of the Śâtavâhana sovereign, and not personal names of different kings.

We thus find that Viḷivâyakura and Sivalakura cannot possibly be identified with any princes of the Śâtavâhana dynasty, but must be taken to be princes belonging to a different line and ruling separately round about Kolhâpur. Now, Pandit Bhagwanlal Indraji has shown that coins of Vâsishthîputra Viḷivâyakura have been re-struck by Mâdharîputra Sivalakura, while those of the latter have been re-struck by Gautamîputra Viḷivâyakura. The following is, therefore, the order of their succession —

Vâsishthîputra Viḷivâyakura or Viḷivâyakura I

|  
Mâdharîputra-Sivalakura

|  
Gautamîputra-Viḷivâyakura or Viḷivâyakura II

It will thus be seen that there were two kings of this line bearing the name Viḷivâyakura, and one of these was a contemporary of Pulumâvi. Who that was we have at present no means to determine.

#### THE SURROSH K R CAMA MEMORIAL PRIZE

The Committee of the K R Cama Oriental Institute invite competitive Essays for "The Surrosh K R Cama Prize" of the value of Rs 225 on the following subject —

"Life of Zoroaster in Pahlvi Dinkard as contrasted or compared with the Persian metrical Zarathushtnama"

The Essays should be typewritten or written in a neat, legible hand and should

reach the Honorary Secretaries, the K R Cama Oriental Institute, Hornby Road, Fort, Bombay, on or before the 15th July 1920. Each Essay should be designated by a motto instead of the writer's name and should be accompanied by a sealed cover containing the name of the competitor and his Post Office address. The competition is open to both Zoroastrians and non-Zoroastrians.

## MISCELLANEA

## TOWN MAJOR

Extract of a letter from Elihu Yale and Council at Fort St George to Sir John Child and Council at Bombay, dated 29th September 1688 *Letters from Fort St George*, (Madras Records), 1688, p 60

"This day according to the Right Honble Companys order and appoyntment in their Charter, the [Town] Major, oldeimen and burgesses met at the Fort in due sollemnitye, where the Charter was read and delivered to them by the President, as alsoe the Maceese [maces of office], &ca, after which they were duely sworne to their severall charges and handsomely entertained with a good dinner and all requisite to it, after which they marcht in theu gownds with great gravety and decorum to the towne hall to Confirme their new establishment and Consult the good of the Cittye, which God grant it may redound to, and that all the Right Honble Companys Settlement[s] and affaiers may be more auspicious and prosperous then forme[r]ly "

The above letter is of some interest in reference to the duties at that date (1688) of the well known official called a Town Major The *Oxford English Dictionary* defines the meaning of the term under three heads —

- (a) The major of a town guard, as formerly at Edinburgh
- (b) The chief executive officer in a garrison town or fortress
- (c) Applied vaguely to the chief magistrate or administrative officer of a foreign town

For the first the *Dictionary* gives two quotations in the seventeenth century with regard to the city of Edinburgh

For the second it has a series of quotations from 1702 to 1876, giving instances of the Town Majors of various fortresses in England and abroad, including India That for 1702 is worth quoting in full here —

*Mt Dict*, Town Major, the thrd Officer in order in a Garrison, and next to the Deputy Governor He ought to understand the Fortification, and has a particular Charge of the Guards, Rounds, Patrouilles, and Sentinels

For the third meaning there is another series of quotations from 1748 to 1864, the last of which is also worth quoting in full —

The Town Major finding them without credentials or passports, ordered them to be carried to prison

The interest in the letter under reference, however, is that it shows clearly that in the seventeenth century a Town Major in India was both the chief executive officer of a garrison town and fortress and also the chief magistrate and administrative officer

In this connection there is no doubt that, up to quite recently at any rate, this was the view taken by Eurasians and Europeans who had not been in England of the office of Town Major, for in the nineties of the last century there was a story going about in Northern India of a certain lady, the wife of an official of position, who was going to England with her family for the first time and was asked how she intended to get about when she reached London She replied that she would have no difficulty because she would go straight to the Town Major for information

The Town Major as the administrative officer of a garrison town, is still in existence whenever the necessity for his services arises vide the following quotation from the *Daily Graphic*, London, for the 11th November 1919 —

*"How British Ladies Live in the Garrison Towns in Germany"*

"Not only are there wives of officers and 'other ranks' living with their husbands in France and Belgium, but the privilege has recently been extended to members of the Rhine Army as well

"The concession is a highly popular one, and every day there is a marked increase in the number of those taking advantage of it Of course the majority are to be found in Cologne, Bonn, Duren and Godesburg, where it is easier to secure accommodation, but a fair proportion will also be met with in the other districts and villages garrisoned by British troops

"The matter of securing suitable house room, however, is not too easy, for Germany seems to be as overcrowded as England If the wife arrives before lodgings have been settled, she and her husband will have to start by putting up at an hotel as a temporary measure The Town Major arranges this There is no charge for the husband, but he will have to pay a fixed tariff of 15 marks a day for his wife This is not so much as it sounds, since it really represents less than three shillings "

In the following instance, too (extracted from the *Times* of the 14th November 1919), the Town-Major during the European War comes out as a civil as well as a military administrator of a garrison town

*"Ypres and the Vandals Town Major's Appeal for a Vast Cemetery"*

"Lieutenant Colonel Beckles Wilson, late Town Major of Ypres, whose efforts to safeguard the ruined city from desecration are well known returned to Ypres yesterday To a Press representative Colonel Wilson gave some particulars of the present condition of the place "

R C TEMPLE

## BOOK-NOTICE

CORPORATE LIFE IN ANCIENT INDIA, by RAMESH CHANDRA MAJUMDAR, M A, Calcutta 1918

This is the title of a new book, (pp viii+176, Demy), brought out by Dr Ramesh Chandra Majumdar, of the Calcutta University. The book consists of five chapters, (1) Corporate Activities in Economic Life, (2-3) Corporate Activities in Political Life, (4) Corporate Activities in Religious Life, and (5) Corporate Activities in Social Life. The author has taken great pains to collect evidence, literary (Vedic and post Vedic), epigraphic and numismatic, to prove the existence of self governing institutions both under monarchical and republican forms of government, that existed side by side in Ancient India. The cooperative guilds of artisans, traders and merchants with power to elect their own Mukhya or president or presidents, to enact their own laws and rules to regulate the work and conduct of their members, to admit new members or to expel members for misconduct and to appeal to the king to restore order in a guild that is likely to degenerate owing to factious spirit of some of its members the political assembly of the people with power to elect, expel, or restore kings, the self-governing villages, the Buddhist Sanghas, the Caste system are some of the ancient Indian Institutions that are noticed in detail with regard to their relations to the supreme Government. Accordingly "Self governing Institutions in Ancient India"

would have been a more suggestive and attractive title.

Excellent as is the work as a collection of reliable facts and figures, the author's translation of some of the Sanskrit passages quoted in the book seems to be wrong (pp 16-17, 22, 89 Vanajya). In other places his inferences seem to be wrong (pp 42, 45). Here 'Visâṃ pati' does not at all imply "the importance of the popular element in the government" as inferred by the author, nor is there any reference in the Gôv hymn quoted in page 45 to any assembly, as stated by him. Again the word 'sabhâ' (pp 17, 55, 56) was in many places used in the sense of a gambling, rather than a political meeting. Similarly, the word 'Vairâjya' means foreign rule as stated in the Arthasâstra (text p 323) and never a non-monarchical form of government.

In noticing the corporate activities in Religious life, the author has confined his attention only to the Buddhistic and omitted the Brahmanic and other communities.

In the last chapter, his description of the evolution of caste is somewhat confused for want of a clear chronological analysis of the subject.

On the whole the book is an excellent and valuable treatise on ancient Indian social and political institutions and deserves to be seriously studied by all that are interested in the history of India.

R. SHAMASASTRY

## NOTES AND QUERIES

## NOTES FROM OLD FACTORY RECORDS

16 The Chief Watchman discharged for incapacity

7 July 1718 Consultation at Fort St George

The President reports to the Board that Peddanaigue [Pedda Nâyak] the Chief watchman of the Town has forfeited his cowle [qaul, agreement] by open and notorious transgressions of every part thereof, that he is become utterly incapable of discharging the duty of that post, having by his extravagance rendered himself unable either to maintain a sufficient number of Talliers [talayars, watchmen] to watch the city or to make good any Losses that shall happen, as by the Cowle he is oblig'd to do, that thro' his incapacity as a Watchman to discharge his duty, frequent Robberys have happen'd of late, and one instance of what is unusuall in these

parts, of a Merchant and his Servant murdered in their own house by Robbers, The President added that if a Speedy stop was not put to this mischief it would increase upon Us till it came past remedy. The Cowle was then read, and the violation of every part thereof by Peddanaigue was notorious to the whole Board.

Peddanaigue being call'd in and acquainted with the sentiments of the Board on his conduct, was asked if he had any thing to say in his own defence. He only reply'd that he was not able to do better and left himself to the Judgment of the Board. Agreed that Peddanaigue, Chief Watchman of the City, having forfeited his Cowle and being incapable of performing the duty of his Office be dismissed the Honble Company's Service. (*Madras Public Consultations*, vol 87)

R C T

**Ananta-Padmanābha**—Anantapur, in Trivandrum, the capital of Travancore, containing the celebrated temple of Padmanābha, which was visited by Chaitanya and Nityānanda (*Chaitanya-Bhāgavata*). It is also called Padmanābhapur (Prof. H. H. Wilson's *Mackenzie Collection*, p. 129). See **Ananta-sayana**.

**Ananta-sayana**—Padmanābhapur, in Travancore, containing the celebrated temple of Vishnu sleeping on the serpent (*Padma P*, Uttara, ch. 74; Prof. H. H. Wilson's *Mackenzie Collection*, p. 129). See **Ananta-Padmanābha**.

**Ānartta**—1 Gujarat and part of Malwa its capital was Kuśasthali or modern Dwārka (*Bhāgavata P*, ch. X, p. 67). 2 Northern Gujarat its capital was Ānarttapura (*Skanda P. Nāgara Kh*, ch. 65), afterwards called Ānandapura, the modern Vadnagar (*Bom Gaz*, vol. I, Pt. 1, p. 6, note 2).

**Ānarttapura**—Same as Ānandapura. See **Ānartta**.

**Anavatapta**—Same as Anotatta.

**Andha**—The river Andhilā or Chāndan,—the Andomatis of Arrian. see **Chandrāvati** (*Devī-Bhāgavata*, Bk. 8, ch. 11).

**Andhanada**—The river Brahmaputra (*Bhāgavata P.*, ch. 5, śloka 9).

**Andhra**—1 The country between the Godāvarī and the Krishna including the district of Kistna. Its capital was Dhanakataka or Amarāvati at the mouth of the Krishna. Vengi, five miles to the north of Ellur, was according to Hsuen Tsiang, its ancient capital (*Garuda Purāna*, ch. 55). 2 Telungana, south of Hyderabad. According to the *Anargharāghava* (Act vii, 103), the Sapta Godāvarī passes through the country of Andhra, and its principal deity is the Mahādeva Bhīmesvara. The Pallava kings of Vengi were overthrown by the Chalukya kings of Kalyānapura, and succeeded by the Chola kings who, in their turn, were conquered by the Jaina kings of Dharaṇikota. The Andhra dynasty was also called Sātavāhana or Sātakarni dynasty, their ancient capital was at Śrī Kākulum now diluviated by the Krishna.

**Anga**—The country about Bhagalpur including Mongyr. It was one of the sixteen political divisions of India (*Anguttara I*, 4, *Vinaya Texts*, ii, 146, *Govinda Sutta* in *Dīgha-nikāya*, xix, 36). Its capital was Champā or Champāpuri. The western limit of its northern boundary at one time was the junction of the Ganges and the Sarajū. It was the kingdom of Romapāda of the *Rāmāyana* and Karna of the *Mahābhārata*. It is said in the *Rāmāyana* that Madana, the god of love, was burnt to ashes by Mahādeva at this place, and hence the country is called Anga, Madana being thenceforth called Ananga (*Bālakānda*, Canto 23, vs. 13, 14). See **Kāma-āsrama**. According to Sir George Birdwood, Anga included also the districts of Birbhum and Murshidabad. According to some authorities, it also included the Santal Parganas. It was annexed to Magadha by Bimbisāra in the sixth century B.C. (Spence Hardy's *Manual of Buddhism*, p. 166). His son Kunika or Ajātaśatru became its viceroy, his head-quarters being at Champā Mahana, the maternal grand-father of Kumāradevī, wife of king Govindachandra of Kanauj (1114–1154), was king Rāmapāla's viceroy in Anga (*Journal of the Asiatic Society of Bengal*, 1908), the country having come under the sway of Gopāla, the founder of the Pāla dynasty, in the eighth century A.D. The celebrated places of antiquity and interest in the province of ancient Anga are—Rishyaśunga-āsrama at Rishikund, four

miles to the south-west of Banarpur, one of the stations of the East India Railway, the Karnagad or the fort of Karna, four miles from Bhagalpur, Champâ or Champâpuri, the ancient capital of Anga and the birth-place of Vâsupujya, the twelfth Tîrthankara of the Jainas, Jahanu-âsrama at Sultanganj, Modâgiri or Mongyr, the Buddhist caves at Pâtharghâtâ (ancient Silâ-sangama or Vikramasilâ-sanghârâma) in the Kahalgâon sub-division, referred to by Huen Tsiang and by Chola Kavi in the *Chora-pañchâśikâ*, and the Mandara Hill at Bansi, thirty-two miles to the south of Bhagalpur (see **Champa-puri** and **Sumha**) The name of Anga first appears in the *Atharva-samhitâ* (Kânda V, Anuvâka 14) For the history of Anga, see my "Notes on Ancient Anga or the District of Bhagalpur" in *JASB*, 1914, p. 317

**Angalaukika**—The country of the Angalaukikas who were most probably the Agalassians of Alexander's historians (see McCrindle's *Invasion of India*, p. 285) and neighbours of the Sîvis, was situated below the junction of the Hydaspes and Akesines (*Brahmânda*, P. 149).

**Añjana-Giri**—The Suleiman range in the Panjab (*Varâha P.*, ch. 80)

**Anomâ**—The river Aumi, in the district of Gorakhpur (Cunningham's *Ancient Geography of India*, p. 423) It was crossed by Buddha after he left his father's palace at a place now called Chandauli on the eastern bank of the river, whence Chhandaka returned with Buddha's horse Kanthaka to Kapilâvastu (Âsvaghosha's *Buddha-Charita*, Bk. V) But Carlleyle identifies the river Anomâ with the Kudawa Nadî in the Basti district of Oudh (*Arch. S. Rep.*, vol. XXII, p. 224 and Fuhrer's *MAI*) Carlleyle identifies the stûpa of Chhandaka's return with the Mahâ-thân Dih, four miles to the north east of Tameswar or Maneya, and the Cut-Hair Stûpa with the Sirasarao mound on the east bank of the Anomâ river in the Gorakhpur district (*Arch. S. Rep.*, Vol. XXII, pp. 11, 15)

**Anotatta**—It is generally supposed that Anotatta or Anavatapta lake is the same as Râwan-hrad or Langa But Spence Hardy considers it to be an imaginary lake (*Beal's Legend and Theories of the Buddhists*, p. 129).

**Antaragiri**—The Râjmahal hills in the district of Santal Pargana in the province of Bengal (*Matsya P.*, ch. 113, v. 44, Pargiter's *Mârkanḍeya P.*, p. 325, note)

**Antaraveda**—The Doab between the Ganges and the Yamunâ (*Hemakosha*; *Bhaviṣhya Purâna*, Pt. III, ch. 2, *Ep. Ind.*, p. 197)

**Anumakundapattana**—Same as **Anumakundapura**.

**Anumakundapura**—Warrangal, the ancient capital of Telingana (Rudradeva inscription in *JASB*, 1838, p. 903, but see Prof. Wilson's *Mackenzie Collection*, p. 76) It was the capital of Râjâ Rudradeva identified with Churang or Choragaigâ The town was also called Anumakundapattana (*JASB*, 1838, p. 901) The Kâkatîyas reigned here from A.D. 1110 to 1323 According to General Cunningham, Warrangal is the Korunkola of Ptolemy's *Geography*. Another name of Warrangal, according to the same authority, is Akshalinagara, which in the opinion of Mr. Cousens is the same as Yeksilanagara (*List of the Antiquarian Remains in the Nizam's Territories*) See **Benakataka**

**Anupadesa**—South Malwa The country on the Nerbuda about Nimar Same as **Haihaya**, **Mahisha** and **Mâhishaka** (*Śiva Purâna*, *Dharma-samhitâ*, ch. 56, *Harivamśa*, chs. 5, 33, 112, 114) Its capital was Mâhishmatî (*Raghuvamśa*, canto VI, v. 43).

**Anurâdhapura**—The ancient capital of Ceylon. The branch of the celebrated Bo-tree (Pipal-tree) of Buddha-Gayâ was brought and planted here by Mahinda and his sister Sanghamittâ, who were sent by their father Âsoka to introduce Buddhism into Ceylon. The tree still exists in the Mahâ-vihâra. The left canine tooth of Buddha which was removed from Dantapura (Pun) in the fourth century to Anurâdhapura, existed in a building erected on one of the angles of Thuparamaye (Thupârâma) Dagoba (a corruption of Dhâtugarbha), which was built by Devânâmpiyatissa about 250 B C, as a relic shrine of either the right jaw-bone or the right collar-bone of Buddha. See **Dantapura**. The town contains also the ‘Loṣa Maha Paya’ or Great Brazen Monastery and the ‘Ruanwelli’ Dagoba described in the *Mahâvamsâ*. The latter was built by the king Dutthagâmini in the second century of the Christian era. The Isibhumanganan was the site of Mahinda’s funeral pile, and in the Ghantâkara-vihâra the *Attha-kathâ* (the commentary of the *Tripitaka*) was translated from Singhalese into Pâli by Buddhaghosha (A D 410—432) a Brahmin who came from a village named Ghosha in the neighbourhood of Buddha-Gayâ during the reign of Mahânâma or Mahâmuni (Gray’s *Buddhaghosuppatti*) he was converted into Buddhism by Revata (Turnour’s *Mahâvamsâ*, ch. 37).

**Aornos**—Ranigat, sixteen miles north-west of Ohind in the Peshawar district of the Panjab (Cunningham’s *Ancient Geography of India*, p. 58), but according to Captain James Abbot, Shah Kote on Mount Mahaban, situated on the western bank of the Indus, about 70 miles to the north-east of Peshawar. modern researches have proved the correctness of Abbot’s identification (Smith’s *Early History of India*, p. 68). It is perhaps a corruption of Varana of Pânni. there is still a town called **Barana** (qv) on the western bank of the Indus opposite to Attok (*Ind Ant*, I, 22).

**Apaga**—Afghanistan (*Brahmânda P*, ch. 49).

**Âpaga**—1. The Ayuk-nadi to the west of the Ravi in the Panjab. 2. A river in Kurukshetra (*Vâmana P*, ch. 36, *Padma P*, *Svarga*, ch. 12). See, however, **Oghavatî**. It still bears its ancient name. It is evidently the Âpayâ of the *Rig-Veda* (III, 23, 4) frequently mentioned with the Sarasvatî and the Dîshadvatî.

**Âpâpaurî**—Same as *Pâpâ* [*Śabdakalpadruma*—see *Tîthâṅkara*, Prof. Wilson’s *Hindu Religion* (Life of Mahāvira)] See **Pâpâ**.

**Aparanandâ**—Same as *Alakânandâ* see **Nandâ** (*Mahâbh*, Vana, ch. 109, *Brahmânda P*, ch. 43).

**Aparânta**—Same as **Aparântaka**.

**Aparântaka**—Konkan and Malabar (*Mârkandeya Purâna*, ch. 58), it is the Ariake of Ptolemy, according to whom it extended southward from the Nerbuda. In the *Raghuvamśa* (IV, v. 53) Aparânta is said to be on the south of the Mualâ. According to the *Periplus of the Erythraean Sea*, Ariake extended southwards from the gulf of Cambay to the north of Âbhîra. Ptolemy’s Ariake is the contraction of Aparântaka, but that of the *Periplus* is the contraction of Âranyaka. According to Sir R. G. Bhandarkar, Aparânta was the northern Konkan, the capital of which was Surpâraka (modern Supara) near Bassein. Âsoka sent here a Buddhist missionary named Yona-Dhammarakkhita in 245 B C. According to Bhagvanlal Indraji, the western seaboard of India was called Aparântika or Aparântaka (*Ind Ant*, vol. VII, pp. 259, 263). Bhatta Svâmi in his commentary on Kautilya’s *Arthasâstra* (Koshâdhyaksha, Bk. II) identifies it with Koukana.

See also *Bṛahma Purāna* (ch 27, vol 58) which includes Surpātaka in Aparānta-desa. According to Kālidāsa, it was situated between the Sahya (Western Ghats) and the sea (*Raghuvamśa*). It extended from the river Mahī to Goa (*Bomb Gaz*, vol I, Pt I, p 36, note 8).

**Apara-Videha**—Rungpui and Dinajpui (*Lalita-vistara*, Dr R L Mitra's trans., p 52, note)

**Āpayā**—Same as **Apagā** (*q v*)

**Āptanetravana**—It has been identified with the ruins near Ikauna in the Bahraich district in Oudh (Fuhren's *MAI*) It was visited by Hiuen Tsiang

**Āraba**—Arabia See **Banāyu**

**Ārāmanagara**—Ariah in the district of Shahabad Dr Hoey however, supposes that the ancient name of Ariah was Arāda, and Arāda Kalāma, the teacher of Buddha, was a native of this place (*JASB*, vol LXIX, p 77), but see *Arch S Rep*, vol III p 70

**Arianya**—1 The nine sacred Arianyas or forests are —Sandhaya, Dandakaranya, Naimisha, Kurujāngala, Upalāvita (Utpalāranya?), Aranya, Jambunuga, Pushkara and Himālaya (*Devī Purāna*, ch 74) 2 See **Āranyaka** 3 Same as **Bana**

**Āranyaka**—A kingdom situated on the south of Ujjain and Vidarbha (*Mahabharata*, Sabhā, ch 31) It is called Aranya in the *Devī Purāna*, ch 46 It is the Ariaka of the *Penplus* According to DaCunha, Ariaka (Ārya-kshetṛa) comprised a great part of Aurangabad and southern Konkana Its capital was Tagara, modern Daulatabad (DaCunha's *History of Chaul and Bassem*, p 127)

**Āratṭa**—The Panjab, which is watered by the five rivers (*Mahabharata*, Drona Parva, chs 40—45 *Kama P*, ch 45, Kautilya's *Arthasāstra*, Pt II, ch 30) It was celebrated for its fine breed of horses Its Sanskritized form is Arāṣṭra

**Aravālo**—The Wulur or Volur lake in Kasmīra (Turnour's *Mahāvamsa*, p 72) The Nāga king of Aravālo was converted into Buddhism by Majjhantika (Madhyantika), the missionary, who was sent by Aśoka to Kasmīra and Gāndhāra It is the largest lake in the valley of Kasmīra, and produces water-nuts (*ingūdā*) in abundance, supporting considerable portion of the population, the nuts being the roots of the plant *trapa bispinosa* (Thornton's *Gazetteer*)

**Arbuda**—Mount Abu in the Aravali range in the Sirohi State of Rajputana It was the hermitage of Rishi Vasiṣṭha (*Mbh*, Vana, ch 82, *Padma P*, Svarga, ch 11) The Rishi is said to have created out of his fire-pit in the mountain a hero named Paramāra to oppose Viśvāmitra while he was carrying away his celebrated cow Kāma dhenu. Paramāra became the progenitor of the Paramāra clan of Rajputs (*Ep Ind*, vol I, p 224) Mount Abu contains the celebrated shrine of Ambā Bhavānī. It contains the celebrated Jama temples dedicated to Rūhābha Deva and Neminātha it is one of the five sacred hills of the Jamas, which are Satruñjaya, Samet Sikhar, Arbuda, Gūnai, Chandragiri (*Ind Ant*, II, 354) For the names of the twenty-four Tirthankaras, see **Śrāvastī**.

**Arđbhagangā**—The river Kāverī (*Hemakosha*, *Harvamśa*, I, ch 27)

**Ariana**—That portion of Central Asia (mentioned by Strabo) which was the original abode of the Aryan race and which is called Aryan-vejo (Ārya-vīja) in the *Avista*. From its description as a very cold country and its situation on the north of India as it appears from the *Vedas*, it is considered to have been situated to the west of Belurtagh and Mustagh (or Snowy Mountain) and near the source of the Amu and Syhun, including the Pamir. Sections of the Aryan race migrated to the west and settled themselves in Europe at different periods. Those that remained behind migrated subsequently to the south and settled themselves in Iran and the Punjab. Differences of opinion about agricultural and religious reforms, especially the introduction of the worship of Indra as a principal god to the lowering of Varuna, who always held the highest position in the hierarchy of the gods even from the time when they all resided in Central Asia, split up the early Aryan settlers of the Punjab into two parties, and led to the dissension which brought about a permanent separation between them. The party which opposed this innovation migrated to the north-west, and after residing for some time at Balkh and other places, finally settled themselves in Iran. They were the followers of Zarathasthura and were called Zoroastrians, the ancestors of the modern Parsis. The other party, the ancestors of the Hindus, gradually spread their dominion from the Punjab and the bank of the Sarasvatī to the east and south by their conquest of the aboriginal races (Max Muller's *Science of Language*).

**Arishtapura**—The Sanskritized form of Ariththapura, the capital of the country of Śivi (qv). It has not yet been identified. Perhaps it is the same as Anistobathra of Ptolemy on the north of the Punjab.

**Aristhala**—Same as **Kusasthala**: see **Pāṇiprastha**.

**Arjikiya**—The river Bias (Vipāśā) [*Rig-Veda*].

**Arjunī**—The river Bâhudâ or Dhabalâ (*Hemakosha*).

**Arkakshetra**—Same as Padmakshetra. Konâiak, or Black Pagoda, 19 miles north-west of Puri in Orissa, containing the temple of the Sun called Konâditya. It is also called Sūrya-kshetra (*Brahma Purāna*, ch 27). See **Konârka**.

**Aruna**—One of the Seven Kosis (*Mahābhārata*, Vana, ch 84). See **Mahākautika**.

**Arunā**—A branch of the Sarasvatī in Kurukshetra (*Mahābhārata*, Salya, ch. 44). It has been identified by General Cunningham with the Māikanda. Its junction with the Sarasvatī three miles to the north-east of Pehoa (Prithūdaka) is called the Aruna-sangama (*Arch S Rep*, vol XIV, p 102).

**Arunâchala**—1 Same as **Arunagiri**. See **Chidambaram**. It contains the *tej* or fire image of Mahâdeva. 2 A mountain on the west of the Kailâs range (*Brahmânda P*, ch 51).

**Arunagiri**—Tiruvannamalai or Timomali in the South Arcot district in the province of Madras (*Ep Ind*, Vol III, p 240). It is called Arunâchala in the *Skanda P* (Arunâ Mâhât, Uttara, ch 4). It contains the temples of Arunâchalesvara and Arddha-nârîśvara Mahâdeva (Wilson's *Mackenzie Collection*, p 191).

**Arunoda**—Garwal, the country through which the Alakânandâ flows (*Skanda P*, Avantī Kh, Chaturaśītīluga, ch 42). Its capital is Śrīnagar.

**Âryaka**—Ariake of Ptolemy who wrote his *Geography* about A.D. 150 (*Bṛhat Samhitâ* ch. 14). See **Aparântaka** and **Âranyaka**

**Âryapura**—Ahiole, the western capital of the Chalukyas in the seventh and eighth centuries A.D., in the Badami Taluka of the Bijapur district. It is the Aṇvâhole of the old inscriptions (*Arch. S. Rep.*, 1907-8, p. 189)

**Âryavartta**—The northern part of India which lies between the Himalayas and the Vindhya range (*Manu-Samhitâ* ch. 2, v. 22). At the time of Patañjali, Âryavartta was bounded on the north by the Himalayas, on the south by the Pârivâtiaka, on the west by Âdaisâvali (Vinasana according to the *Tâsistha Samhitâ*, I, 8), and on the east by Kâlakavana (Rajmahal hills). See **Kâlakavana**. According to Râjasekhara, the river Nerbuda was the boundary between Âryavartta and Dakṣiṇapatha (*Balarâmāyana*, Act VI, Apte's *Râjasekhara his Life and Writings*, p. 21)

**Âsâpalli**—Ahmedabad, same as *Yessabal* or *Âsawal* (Alberuni's *India*, p. 102)

**Âser**—Asirgarh, eleven miles north of Buhampur in the Central Provinces (*Prithvirâj Râso*). Âser is a contraction of Aśvatthamâ-giri (*Arch. S. Rep.*, vol. IX)

**Ashâtâvakra-Âsrama**—Râhugrâma (now called Raia), about four miles from Hardwar, near which flows the Ashâtâvakianadi, a small river, perhaps the ancient Samangâ. The hermitage of Rishi Ashâtâvakra is also pointed out at Pauri near Simagar in Garwal, the mountain near which is called Ashâtâvakia-parivata

**Ashtâpâda**—See **Kailâsa**

**Ashta-Vinayaka**—The eight Vinayaka (Ganapati) temples are situated at Ranjangâon at the junction of the Bhimâ and Mûtha-mûla. Mângâon, Theur, Lenâdi and Ojhar in the Poona district, at Pâli in the Pant Sachiv's territory, at Madh in the Thana district and at Siddhatek in the Ahmednagar district in the Bombay Presidency (*Antiquarian Remains in the Bombay Presidency*, vol. 3). See **Vinayaka-tīrthas**.

**Âshṭigrama**—Râval in the district of Mathurâ, where Radhikâ was born at the house of her maternal grandfather Subhânu and passed the first year of her infancy before her father Brishabhânu who dwelt at this place removed to Varshana (*Adi Purâṇa*, ch. 12 and Growse's "Country of Braja" in *JASB*, 1871 and 1874, p. 352). See **Barshâna**

**Asi**—A river in Benares. See **Barâṇasî** (*Mahâbhârata*, Bhîshma, ch. 9)

**Asikni**—The river Chenab (Chandrabhâgâ) [*Rig-Veda*, x, 75]

**Asiladurga**—Junagar (Tod's *Râjasthân*)

**Âsmaka**—According to the *Brahmânda Purâṇa* (Pūrva, ch. 48) Âsmaka is one of the countries of Southern India (Dâkṣiṇâtya), but the *Kârma Purâṇa* mentions it in connection with the countries of the Punjab, the *Bṛhat-Samhitâ* (ch. 14) also places it in the north-west of India. Auxoamis which has been identified by Saint Martin with Sumi (McCrindle's *Ptolemy*) lying a little to the east of the Sarasvatî and at a distance of about 25 miles from the sea, was considered to be the ancient Âsmaka. According to Prof. Rhys Davids, Âsmaka was the Assaka of the Buddhist period, and was situated immediately to the north-west of Arantî. The Assakas had a settlement on the banks of the Godâvar at the time of Buddha, and their capital was Potana (*Govinda Sûta* in *Digha-*

*Nikāya*, xix, 36) It appears, however, from the "History of Bâvarî" in Spence Hardy's *Manual of Buddhism, Suttanipāta*, and *Pârâyanavagga* (SBE, X, 188) that Assaka (Asmaka) was situated between the Godâvarî and Mâhissatî (Mâhishmatî) on the Nerbuda. It was also called Alaka or Mûlaka and its capital was Pratishthâna (Paudanya (qv) of the *Mahâbhârata*) on the north bank of the Godâvarî (see *Pratishthâna*,) called Potalî and Potana by the Buddhists (*Jâtakas*, Cam Ed, vol III, p 2) It became a part of the Mahârâshtra country at the time of Âsoka The *Daśakumâracharita* written in the sixth century A D, by Dandin, describes it as a dependant kingdom of Vîdarbha It is also mentioned in the *Harshacharita* It should be remarked that in the *Purânas*, Mûlaka is said to be the son of a king of Asmaka Bhatta Swâmî, the commentator of Kautilya's *Arthasâstra*, identifies Âsmaka with Mahârâshtra It is the Asvaka of the *Mahâbhârata* (Bhîshma P, ch 9)

**Âsmanvati**—The river Oxus It is mentioned in the *Rig-Veda*, x, 53, 8

**Assaka**—See **Âsmaka** (*Dîgha Nikāya*, xix, 36)

**"Astacampra"**—Same as **Hastakavapra**, but see **Stambhapura**

**Astakapra**—Same as **"Astacampra"**

**Asvaka**—See **Âsmaka**

**Asva-kachchha**—Cutch (*Rudradâman Inscription*)

**Asva-tîrtha**—1 The confluence of the Ganges and the Kâlnadi in the district of Kanouj (*Mbh*, Anusâsana, ch 4, Vana P, ch 114, and *Vâmana P*, ch 83) 2 The Asva-krântâ mountain in Kâmakhyâ near Gauhati in Assam (*Yoginî Tantra*, Uttara Kh, ch 3)

**Âttahâsa**—On the eastern part of Lâbhapur in the district of Bîrbhum in Bengal It is one of the Pithas (*Kubjikâ Tantra*, ch 7, *Padma P*, Sûkshî Kh, ch 11) Sati's lips are said to have fallen at this place and the name of the goddess is Phullarâ It is seven miles from the Amodpur Station of the E I Railway

**Âtreyî**—The river Atrai which flows through the district of Dinajpur (*Kâmakhyâ Tantra*, ch VII) it is a branch of the Tistâ

**Audumvara**—1 Cutch, its ancient capital was Kotesvara or Kachchhesvara (*Mahâbhârata*, Sabhâ P, ch 52 and Cunningham's *Arch S Rep*, v, p 155) the country of the Odomboeræ of Ptolemy 2 The district of Nurpur (or rather Gurudâspur) which was anciently called Dahmeri or Dehmbeori, the capital of which is Pathankot (Pratishthâna) on the Ravi in the Punjab, was also called Udumvara (*Bṛhat-Samhitâ*, ch 14 and *Arch S Rep*, vol xiv, p 116, Rapson's *Ancient India*, p 155) There was another Udumbara to the east of Kanouj (*Chullavagga*, pt xii, chs 1 and 2)

**Aupaga**—Same as *Kamboja* (*Mârkandeya P*, ch 57)

**Âvagâna**—Afghanistan (*Bṛhat-Samhitâ*, ch 16) See **Kamboja**.

**Avantî**—1 Ujin (*Pânini*, iv, 176, *Skanda P*, Avantî Khanda, ch 40) it was the capital of Mâlava (*Brahma P*, ch. 43) 2 The country of which Ujin was the capital (*Anargharâghava*, Act vii, 109) It was the kingdom of Vikramâditya (see **Ujjayinî**). In the *Govinda Sutta* (*Dîgha-Nikāya*, xix, 36), its capital is said to be *Mâhishmatî* It is the ancient name of Malwa (*Kathâsarit-sâgara*, ch xix) Avantî has been called Mâlava since the seventh or eighth century A D (Rhys Davids' *Buddhist India*, p. 28)

**Avāntika-Kshetra**—Avani, a sacred place in the district of Kolar in Mysore, where Rāmachandra is said to have halted on his way from Lanka to Ayodhyā.

**Avantī-Nadī**—The Sipra Ujīn stands on this river.

**Ayodhana**—Pāk-Pattana, five miles west of the Ravi and eight miles from Mamoke Ghat in the Montgomery district of the Panjab (Rennell's *Memoir of a Map of Hindoostan* (1785), p 62, Thornton's *Gazetteer of the Countries adjacent to India*, JASB, vi, 190). It was formerly a renowned city referred to by the historians of Alexander the Great. The town is built on a hillock 40 or 50 feet above the surrounding plain. Its old walls and bastions are now crumbling into ruins. It is celebrated for the tomb of the Mahomedan Saint Farid-ud-din Shaheb Shakar Ganj.

**Āyodhyā**—Oudh, the kingdom of Rāma. At the time of the Rāmāyana (I, chs 49, 50,) the southern boundary of Kośala was the river Syandikā or Sai between the Gumti and the Ganges. During the Buddhist period, Ayodhyā was divided into Uttara (Northern) Kośala and Dakshina (Southern) Kośala. The river Sarayū divided the two provinces. The capital of the former was Śrāvastī on the Rapti, and that of the latter was Ayodhyā on the Sarayū. At the time of Buddha, the kingdom of Kośala under Prasenajit's father Mahākośala extended from the Himalayas to the Ganges and from the Rāngaṅgā to the Gandak. The ancient capital of the kingdom was also called Ayodhyā, the birth-place of Rāmachandra. At a place in the town called Janmasthanā he was born, at Chirodaka, called also Chirasāgara, Daśaratha performed the sacrifice for obtaining a son with the help of Rishyaśiṅga Rishi, at a place called Tretā ki-Thākur, Rāmachandra performed the horse-sacrifice by setting up the image of Sītā, at Ratnamandapa, he held his council (*Muktikopamshad*, ch 1), at Swargadwāram in Fyzabad, his body was burned. At Lakshmana-kunda, Lakshmana disappeared in the river Sarayū. Daśaratha accidentally killed Saravana, the blind Rishi's son, at Majhaurā in the district of Fyzabad. Ādinātha, a Jaina Tirthankara, was born at Ayodhyā (Fuhrer's *MAI*). Cunningham has identified the Sugriva Parvata with the Kālākārāma or Pūrvārāma monastery of the *Mahāvamśa*, the Mani Parvata with Aśoka's Stūpa mentioned by Hiuen Tsiang, the Kubera Parvata with the Stūpa containing the hair and nails of Buddha (*Arch S Rep.*, vol. i). The Mani Parvata is said to be a fragment of the Gandhamādāna mountain which Hanumāna carried on his head on his way to Lankā. The sacred places at Ayodhyā were restored by Vikramāditya (evidently a Gupta king), who was an adherent of the Brahmanical faith, in the second century A.D., or according to some, in the fifth century A.D., as the sacred places at Brindāban were restored by Rūpa and Sanātana in the sixteenth century A.D. Ayodhyā is the Sāketa of the Buddhists and Sagada of Ptolemy (see *Sāketa*).

**Āyudha**—The country lying between the Vitastā (Jhelum) and the Sindhū (Indus). Same as Yaudheya.

## EPISODES OF PIRACY IN THE EASTERN SEAS, 1519 TO 1851

By S CHARLES HILL

(Continued from p 21 )

## XX

THE STORY OF THE *CASSANDRA*, 1720—1723

The story of the *Cassandra*, which was captured by the Pirate Jasper Seager, is famous in the history of the East India Company's shipping. Her Captain, James Macrae, was an Irishman and, it is said, had been a school-fellow of his captor, who, on turning pirate in order to prey on English commerce, had impudently taken the name of Edward England. James Macrae, in reward for the courage with which he had defended his ship, was made Governor of Malias. Seager was kind to him on his capture, a kindness which caused his own deposition and ruin, so that he died in a state of great misery in Madagascar. Taylor, Captain of the *Victoria*, a brother pirate, present on the occasion of the attack on the *Cassandra*, got away safely to America and, possibly in return for an act of generosity, committed whilst drunk, in favour of a distinguished Portuguese nobleman, was received into the Spanish service.

An account of the action by Richard Lazenby, second mate of the *Cassandra*, affords a good description of the way in which the European pirates used to treat their prisoners, and also of their infamous cruelty towards Asiatics. It also discloses the fact (which one finds it difficult to believe) that the Dutch maintained regular communications with such wretches, but there is too much evidence for any doubt to exist. It further discloses the cowardly behaviour on the part of Captain Kirby of the *Greenwich* in deserting Macrae during the fight with Seager and the equally disgraceful flight of Captain Upton in command of the Bombay fleet, which incidents prove that all the Company's Captains were not of the same metal as Macrae, whose reputation is heightened by the tenor and rage shown by the pirates as soon as they heard that he was to be put, by the Governor of Bombay, in charge of the operations against them. It is, perhaps, amusing to observe that they considered him guilty of ingratitude to men who, whilst robbing him, had spared his life and given him the means of escaping from Madagascar, but nothing is more certain than that the pirates of this period looked upon seamen that remained faithful to their employers as a kind of blacklegs who supported those rascally capitalists, the merchants, against honest sailors. The pirates were, in short, extremists of a very red dye.

Jasper Seager flew the Black Flag, and, as far as I know, was the first pirate to do so in Eastern waters, the only other recorded instances with which I have met are those of Malay pirates one hundred years later. The first instance which I have found of its use anywhere is by a French pirate from Dominica named Emmanuel Wynne in 1700, who fought Captain John Cranby, R.N., off Santiago in the Cape Verde Islands, but the skull and cross bones usually borne on it appear in the picture of *Death and the Young Lady* in Hulderich Frolich's *Beschreibung des Todtentanzes Basels und Berns*, published in the year 1607, in which the flag, attached to a trumpet which Death is blowing, bears this emblem. Whether Frolich invented it or actually found it on the walls of the convent he is describing cannot be known, for the Dances of Death there depicted have been destroyed, but it appears likely that the emblem was originally ecclesiastical and not piratical. Its use at sea is shown by the fact that many of the commanders of the East India Company placed it as a marginal sign in their Logs to indicate the record of a death. Probably other sea-captains did the same, and so, possibly, it became known to seamen and was by them chosen as an emblem to show that those who had turned pirates were, being dead in law, serving under the banner of King Death. This I believe to have been the case rather

than that they used it as threatening death, for as late as 1723 Captain Hawkins, when a prisoner in the hands of pirates, ascertained that they used it as a sign only of their occupation, and that they hoisted the *Red Flag* when they intended to give no quarter. It is true that they called it the *Jolly Roger*, a name of which no satisfactory derivation has yet been given, but if one supposes that that name was originally applied to the *Red Flag* there is not much difficulty in supposing it to be an English or American perversion of the French ' *Joli Rouge* ' (a name which French seamen may well have ascribed to it) which became transferred by English seamen to the *Black Flag* in ignorance of its exact meaning. There is, however, no documentary evidence which I can produce to prove that this supposition is correct, and there are at least half a dozen other possible derivations which I will not trouble to enumerate.

## 1.

*The Cassandra taken by Pirates, 7 August 1720*

"The account<sup>17</sup> which the Captain of the *Cassandra* gives to the India Company of the loss of his ship is in substance as follows. That about the latter end of July last (1720) he with the *Greenwich* and an Ostender<sup>18</sup> went to water off the river of Johanna near the Coast of Madagascar, where they had intelligence that some pirates were at work to fit out a small pirate ship at Annotta [? Mowata] another kind about three leagues off, which they resolved to go and destroy. That on the 7th of August in the morning about 8 o'clock they discovered a sail standing into the Bay of Johanna upon which they immediately unmoored and made clear ships, both Captains having mutually agreed to stand by each other, not doubting but to give a good account of them. The *Cassandra* weighed and got under sail. The *Greenwich* cut and did the like. The Pirates then within a mile of them. The *Cassandra* being under the high land had but a broken wind but the *Greenwich*, being open to the valley, had a true breeze and made the best of his way from the *Cassandra*. They had an Ostender in their company of 22 oars, whose Captain promised heartily to engage with them, and 'tis believed would, had he not seen the *Greenwich* make the best of his way from them, which he seeing, did the same leaving the *Cassandra* engaged with both Pirates, who called several times to the *Greenwich* to bear down to his assistance and fired two guns at him, but all to no purpose, but when he got about a league from the *Cassandra*, he brought to and looked on.

"The largest of the Pirates had but 34 guns, and the lesser 30, which encouraged the *Cassandra's* men to see them of so small force, not doubting but if the *Greenwich* would have fought to have taken both the Pirates, who having taken just before two rich prizes from Judea [? Jeddah], which had the value of £200,000 on board, but the *Cassandra* having no assistance was left to the fury of both the Pirates from whom no quarter was to be expected, then black and bloody flags being all the time displayed; who notwithstanding their superiority engaged them both above three hours during which the largest of them received some shot between wind and water, which made him keep at a little distance to stop his leaks, the other endeavoured to board him by the help of his oars, but by good fortune the *Cassandra* shot his on to pieces and prevented him, and by consequence saved all their lives.

"About 4 o'clock all the officers and men placed on the Quarter Deck and Poop being killed or wounded and none left there but the Captain, the other Pirate made up

<sup>17</sup> Macrae's own account is given in Johnson's *General History of the Pirates*, I, 119. The account adds one or two details.

<sup>18</sup> A ship of the Ostend Company, which was not, however, formally incorporated until 1722. For a note on its history, see C. R. Wilson, *Old Fort William in Bengal*, II, 178 n. Pp.

<sup>19</sup> Apparently the crew of the pirate ship *Indian Queen* (Captain Oliver de la Bouche or Levasseur), which had been wrecked.

to the *Cassandra* again having lain all the time within a cable's length and given her several broadsides, in order to clapt her aboard, when, no hopes remaining, she elapt her helm a-weather in order to run the ship ashore, and, notwithstanding she drew four foot more than the Pirate, yet, by good Providence, the latter stuck fast on the higher ground, her boltsprit reaching almost to the *Cassandra's* mizzen shrouds, by which they were disappointed a second time from boarding her, when a more furious engagement ensued than ever, and the *Cassandra* having the advantage of showing his broadside to the Pirate's bow and gauled him very much, and had Captain Kirby come in even then, 'tis verily believed they had taken both the Pirates, for the *Cassandra* had one of them sure but the other Pirate, who was still firing at her, seeing the *Greenwich* did not offer to come near, supplid his consort with three boats full of fresh men. At which time, being then about half an hour past four, the *Greenwich* made sail and stood quite away to sea, whereupon Captain Macrae, seeing himself totally deserted, ordered all that could to get into the longboat, under the smook of his guns, and save themselves, and himself went into the yawl, very sorely wounded in the head by a musket ball, so that, some by boats and some by swimming, most of the crew that were able [i.e., unwounded] got ashore. When the pirates came aboard they cut three of the wounded men to pieces, whilst the Captain and a few of his people made the best of their way to Kingstown<sup>20</sup> about 25 miles up the country, where he heard that the pirates had offered 10,000 dollars to the country people to bring him in, which they would certainly have done, but that they knew the King and his chief people were in the English interest, who in the interim gave out that he was dead of his wounds, which somewhat abated the fury of the pirates, but after ten days when he was pretty well recovered, beginning to consider the dismal condition they were in and the little hopes they had of ever getting a passage from thence, he desired Mr Cowan, a passenger with him,<sup>21</sup> to go down to the pirates and try if he could obtain their promise for his safety if he came down to them, which they readily granted, some of them having formerly sailed with him, which proved of great advantage to him and was the means of preserving all their lives, for, notwithstanding their promise, they were going to cut them to pieces unless they would enter with them, had it not been for the authority that the chief Captain, Edward England or English, and some others that knew Captain Macrae, had over the rest, and in the end he managed it so that they made him a present of the lesser Pirate Dutch built ship of about 300 tons, called the *Fancy*, and 129 bales of the Company's cloath, though they refused him a suit of his own cloaths or a shirt.

"On the 31d of September the Pirates sailed from Johanna, and five days after Captain Macrae with 55 of his men, including 2 passengers, with jury-masts and such odd sails as the pirates had been pleased to leave him, sailed for Bombay, where they arrived after a passage of 48 days, almost naked and half starved, having been reduced to a pint of water a day, and almost in despair of ever seeing any land through the long and continued calms they met with between the Coasts of Arabia and Malabar. At Bombay they found the *London* and *Chandors*. By these accounts it appears that Captain Macrae killed the pirates between 90 and 100 men, and lost himself 13 men and 24 wounded. The pirates had on board both ships when they sailed 300 white men and 80 blacks.

---

<sup>20</sup> The two chief villages of Johanna (Comoro islands) were known as King's Town and Queen's Town in the 17th and 18th centuries —Ed

<sup>21</sup> The *Weekly Journal* for the 13th July 1723 notices that the East India Company had made provision for the families of Captains Benjamin Loveday and Francis Randel who were killed fighting pirates on the *Cassandra*, and who were also probably passengers in the ship.

" We hear the owners of the *Cassandra* have resolved to send the Captain a present to Bombay for his singular gallant behaviour in engaging the Pirates "

[ *Weekly Journal or British Gazetteer*, 22 April, 1721 ]

## 2.

*Extract of the Log of the Greenwich, Captain Richard Kirby Commander.*

" *Sunday, August 7th 1720* At 7 this morning saw two ships standing in for the Road [of Johanna] At 11 following unmoored, at 12 the *Cassandra* being under sail cut bower-cable in the hawse and then the Ostender weighed, at which time discovered the two ships to be pirates, the one a French built ship of 46 guns, by name the *Victory*, Captain England. The other Dutch built of 36 guns by name the *Fancy*, Captain [Jasper]<sup>22</sup> Seager Got all things in readiness for our defence

" *Monday August 8th 1720* At 1 p m the *Cassandra*, being the leewardmost ship, was engaged by the small ship They fought under the black flag at the main-topmast (with death's head in itt), the red flag at the foretopmast head, and St George's colours<sup>23</sup> at the Ensigne staff We tacked and stood in for to assist him, when perceiving the *Cassandra* aground, tacked and stood off, making the best of our way for Bombay. About 8 following spy'd one of the Pirates in chase after us, she having the land breeze first got almost within gunshot of us before we had the breeze, then we cut away our longboat and lost our yawl, the main giving way, with two sailors in her, by name James Tate and William Prescott Night approaching, soon lost sight of the Pirate and proceeded without any further attempt We were not fully satisfied whether the *Cassandra* was taken or not The last time we saw her perceived them hotly engaged, but could not come to her assistance "

[ *India Office Marine Records* ]

*Narratives of Richard Lazenby of London, Second Mate of the Cassandra, Captain James Macrae, Commander, taken by two pirates, Captain Seager of the Fancy and Captain Taylor of the Victoria*

## No 97 Letter from Richard Lazenby

" I omit the particulars of our engagement and being taken, because do not doubt but your Honours have had a satisfactory account of that from Capt Macrae, and likewise in what manner I was taken from him The first night I came aboard [the pirate ship] and the time came for these people to sleep, there was a watch ordered on my account, which made some of them so angry as to say that if they saw me out on the deck on any account soever they would knock my brains out, which did not a little concern me Some who were in the cabin bade me be of good cheer, but not to venture on deck for fear of the worst. The Chief Surgeon in particular, who took care to lay me down on the cabin floor by him, more to prevent my escape than any good nature in the villain, which I found afterwards when I rose in the night by his following me into the gallery and telling me if I offered at escaping they would oblige Captain Macrae to find me or else take all from him again and burn the ship

" The next morning they unmoored and hove short for sailing Captain Macrae came on board and interceded much for me, but to no purpose He left me and soon after they got under sail designing to proceed for India, where they arrived some time in October [1720]. The day before they made the land saw two ships to the eastward, whom at first sight took

<sup>22</sup> See Log of the *London* (Captain Wilham Upton) under date 4 Nov 1720

<sup>23</sup> The White Ensign

to be English, whereupon the Captam called for me and threatened to cut me in pieces if I did not immediately tell him the signals<sup>24</sup> between us and our consorts from England. I made him answer I knew of none, or ever had occasion to make any during our company together. He then abused me, calling me scurrilous names, shook his broad sword at me, saying he would plague me like a dog as I was and I [had] better tell him. Then came up with the ships soon after, which proved to be two small Moor ships which came from Muscat with horses, which they took by firing a gun or two. They brought on board their Captain and Merchant, putting them to torture to make them confess of their money, believing they were come from Muscat. They continued all night, rifling and tormenting the people and the next morning made the land. At the same time a fleet<sup>25</sup> in shore plying to the northward, they instantly held a Council what to do with the fore mentioned ships. Some were for sinking them, men and horses in them, others for throwing their sails overboard, others again for cutting away their masts, and all was, they said, for fear of being discovered on the Coast. After then debates were over, they brought them to an anchor in thirty-five fathom water, throwed all their sails overboard and cut one of the ship's masts half through.

"When at anchor one of the fore mentioned fleet bore away to them. They made them and hoisted English colours, the pirates answering with red<sup>26</sup>. The rest of the day they employed in taking all their water from them and at night weighed with the sea-wind, and left the two Moor ships to stand to the northward after the fleet, which they came up with about four the next morning, just as they got under sail with the land-wind, making no stop but ran through them, firing<sup>27</sup> their small arms and great guns on both sides as fast as they could load and fire till day light, then saw their mistake, having all along taken them for Angria's fleet. They were in great consternation, not knowing what to do, whether to run from them or pursue, being so much inferior to them in strength, having no more than 300 men in both ships and 40 of them negroes, besides the *Victory* at that time had four pumps at work and must inevitably have perished some time before had it not been for the hand pumps and several pair of standards they took out of the *Cassandra*.

"Observing the indifference of the fleet, they took courage to chase rather than run, which they did when the sea-wind came in, but were to leeward about a gunshot, some ahead (especially the great ships) and some astern, which were afraid to tack upon believing them to be fire vessels. The great ships began to gam upon them towards sunset. They continued the same course all night. Do see several boats pass they had cut away. The next morning were all out of sight, only some few Gallevats and a small Ketch to leeward, which they bore away after. The Ketch perceiving it embarked their people on board a Gallevat and set fire to her. They then left off chasing, the Gallevats being too nimble for them. About an hour after they see a Gallevat to the north which they chased and took, being come from Gogo<sup>28</sup> and bound for Calicut, loaded with cotton.

<sup>24</sup> When the Company's ships left England together, the senior Captam drew up a set of signals for recognising each other at a distance, if they happened to be parted, and for certain other occasions. These appear to have varied from time to time, as, if they had always been the same, the capture of any one ship by an enemy would have made them not only useless but even dangerous.

<sup>25</sup> This was the Bombay fleet under Captain Upton of the *London*, sent against Angria. His cowardly behaviour in presence of the pirates is referred to by Hamilton.

<sup>26</sup> Muhammadan colours, which were plain red.

<sup>27</sup> "21 October 1720 Capt Harvey came aboard and reported they were the *Cassandra* and Great French ship [i.e., the *Victory*]. The other two they took to be their prizes. Upon the *Antelope's* coming near them, she fired a shot to leeward, they did the same and immediately after hoisted their bloody flag at mast head and fired two shot at her"—Log of the *London*.

<sup>28</sup> Gogha in the peninsula of Kāthiāwār, Gulf of Cambay.—Ed

"They asked them after the fleet, believing they were in it, but the fellows told them they had not seen a ship or boat before that day since they left Gogo, and notwithstanding the poor fellows' pleading, they threw all their cargo overboard, tormenting them by squeezing their joints in the vice to make them confess of the fleet. They kept the boat with them all that night and part of the next day, but blowing fresh eventually they split the Gallevat's sail, so that they could not keep company with the ship. They then put the people into their boat, having nothing but a small try-sail, no provisions and about four gallons of water half salt, and then out of sight of the land.

"They then resolved on cruising southward. The next day were between Goa and Carwar. At noon heard guns fire at Carwar. They instantly came to an anchor and at night sent their boat to discover what ships there was in the Road, who returned about two in the morning, giving an account of two Grabs at an anchor there. They then weighed and ran nearer to the Bay and anchored again at daylight. The Grabs having sight of them ran out to get under India Diva [Anjdiv] Castle, which they did with much difficulty. The pirates were so much displeased at it, wanting water, that they had a Council whether they should make a descent that night and take the island. They could not agree on it, so proceeded to the southward. The next morning see a small ship at an anchor in Onnore [Onore, Honâvar], which in the evening they took, having no one on board but a Dutchman and two Portuguese, the Captain and his officers being gone on shore. The next morning they sent on shore to acquaint the Captain that if he would supply them with some water and fresh provisions he should have the ship again. At night he sent on board his mate, Frank Harmless, with a letter to them that if they would deliver the ship into his possession over the Bar he would supply them with what water and provisions they wanted and not before. They not liking his proposals the Mate said he would carry them where they should get what they wanted. They not liking to trust him being a stranger, resolved of seeking water at the Lacker Diva [Laccadive] Islands, which they put for directly, where they arrived in three days after. The same day of their arrival they took a small Monchew<sup>29</sup> with the Governor of Carwar's pass on board, who gave them an account that there was no anchor ground among the islands<sup>30</sup>. They then being near the Island of Melmdra [<sup>2</sup>Amendivi] sent their boat on shore to see if there was any water or whether the island was inhabited. They returned giving an account of there being good water and abundance of houses, but that the inhabitants at the sight of the ships were fled off in boats to the adjacent islands, only abundance of women and children, which they found a day or two afterwards hid in the bushes, and forced them in barbarous manner to their lascivious inclinations, destroying their cocoa-trees and everything they met with setting fire to several of their houses and churches. Had fresh gales of wind whilst there, which occasioned their losing three or four anchors there, the ground being so rocky, and lastly with a hard gale of wind were forced from the island where they left about 70 people, black and white, and most of their water casks. In about ten days they made shift to find the island again, where they filled their water, took their people on board. Provision being very scarce among them, they now resolved of proceeding to Cochin and see what they could get from their good friends the Dutch, who, they said, they were confident would not fail of supplying any of their profession.

## THE HÂTHIGUMPHÂ CAVE INSCRIPTION OF KHÂRAVELA

BY K G ŚANKARA AIYAR, B A B L , TRIVANDRUM

THE Hâthigumphâ cave inscription of Khâravêla in the Udayagiri hill (Orissa), edited and translated by Mr K P Jayaswal in the *Journal of Bihar and Orissa Research Society*, 3 425-504, 4 364-403, deserves careful study, because it throws light on early Indian history, and because Mr Jayaswal claims that it compels us to revise our dates for Buddha and the Śaśunaka kings of Magadha.

The inscription opens with a salutation to the Aihats and the Siddhas, thereby indicating its Jama origin. It then introduces us in line 1 to Khâravêla, the emperor (अधिपति) of Kalînga, whom it calls a lunar king (Ara=Aila), Mahâmeghavâhana (=Mahendra), Mahârâja, and the increaser of the dynasty of King Cheta (चेतराजवशवर्धन). The *Purânas* mention, among post Ândhra kings, nine very powerful and wise kings called Meghas in Kosala (F E Pargiter *Purâna Text of the Dynasties of the Kali Age*, 73). These Meghas must be the Meghavâhanas of Kalînga who were therefore emigrants from Kosala. This is confirmed by an Oriya MS of the 16th century A D preserved in the Indian Museum which states that the Ara kings of Utkala, i.e., Kalînga, had come to Khandagiri (Udayagiri) having abandoned Kosala (औसलानगर त्यक्त्वा खण्डमलसमीपे तु). And Khâravêla, too, is called an Ara. This MS also informs us that Kalînga was first conquered by Nanda, the famous Magadhan king (नन्दस्य गान्धितो युद्धे ऐरो जितवान् भवेत्, नन्दराज सुविख्यात मगधे विजय तदा), that it was later on recovered by another Ara king, the destroyer in Kalînga of Nanda's Vedic faith (नन्द वेदधर्मराक्षण, गेरो जयसामोति उत्कले खयाति । वदधर्मविनाशक and that it was again conquered by Aśoka (अशोकस्य महामित्र गेर् उत्कलेश्वर). These are confirmed by Megasthenes' statements that the last Nanda who was ruling when Alexander arrived at the Hyphasis (Bias) in September 326 B C (V A Smith *Early History of India*, 114) was king of the Prasii (Magadha) and the Gangaridæ (Kalînga) also, and that in his own time Kalînga was a free kingdom (McCindle's *Translation*, pp 135, 155), and by Aśoka's claim to have conquered Kalînga hitherto unconquered (अविजित) by the Mauryas (*Rock Edict 13*).

Târanâtha says (pp 34, 38, 41 ch 6) that Kâmâśoka conquered the country on the south-eastern ocean (Kalînga) and was converted by Yasas who held a council at the Kusumparivihâra in Vesâlî under King Nandin. The *Dipavansa* (4 44, 47), and the *Mahâvamsa* (4 8) place this Vesâlî council of Yasas in Kâlâśoka's eleventh year. Therefore Kâmâśoka=Kâlâśoka=Nandin, and Nandavardhana, who, as we will show elsewhere, ruled from 401 to 361 B C, conquered Kalînga before his eleventh year, i.e., 401-10=391 B C.

Since the last Nanda held Kalînga till September 326 B C, it must have recovered its independence between that date and the date of accession of Chandragupta Maurya to whom it was not subject.

In the time of Megasthenes, it was a powerful kingdom. But eight years after his anointing (*Rock Edict 13*), Aśoka conquered Kalînga, and the suffering which his conquest had caused through slaughter, captivity, famine and pestilence stung Aśoka with remorse, and made him forswear for the future all military ambition. Twelve years after his anointing, Aśoka, in addition to his fourteen rock edicts at Dhauî (Cuttack district) and Jaugaḍa (Ganjam district) in Kalînga, issued two edicts special to Kalînga enjoining its just government and insisting upon sympathetic and tactful treatment of its wild tribes. In the same year he gave two cave-dwellings, and, eighteen years after his anointing, he gave a third cave dwelling in the Barabar hills (Gayâ district) to the Âjîvikas, a sect of naked ascetics. So Kalînga probably continued to be under Aśoka's rule till his death, and only thereafter became free once more.

The Hâthigumphâ inscription then gives a brief and sober account of Khâravela's doings from year to year. When he had completed fifteen years of his age, he was anointed crown prince ( युवराज ) and ruled as such for nine years. He had already thoroughly learnt royal correspondence ( लेख ), currency ( रूप ), state accounting ( गणना ), municipal law ( व्यवहार ), *dharma* injunctions ( विधि ), and all the arts ( विद्या ). These facts are related in l 2 of the inscription. Mr. Jayaswal infers from them that it was then usual to postpone the formal anointing as king to the twenty-fifth year of age, even though the predecessor die long before that time. But the inference is not a necessary one. Khâravela's anointment at that age might have been due to his predecessor having died only then. Mr. Jayaswal argues that his inference would account for the four years' interval between the accession and the coronation of Asoka ( III, p. 21 ). But the interval might have equally well been due to the struggles between Asoka and his brothers for the succession to the throne, which are dimly reflected in the Buddhist legends about Asoka's destruction of *all* his brothers before his conversion to Buddhism.

When Khâravela had completed twenty-four years, he was anointed Mahârāja in the third Kalinga dynasty for one generation ( पुरुषयुग ) ( insc. l 3 ). The reference to Chikta's dynasty as the third, confirms the conquests of Kalinga by Nandavaradhana and Asoka. The first dynasty ruled down to the time of Nandavaradhana, the second from after the time of the last Nanda to the ninth year after the anointing of Asoka, and the third after Asoka's death. The reference to the anointing for *one generation* indicates that the people were in theory free to choose their kings for a limited number of generations, or for the whole duration of that dynasty, just as they liked.

In the first year of his rule, soon after his anointment, Khâravela repaired the towers, city walls, buildings, and embankments of reservoirs in the Kalinganagara which had been damaged by a storm ( l 3 ), and pleased his subjects, reckoned at three and a half millions. Then in the second year, disregarding Sâtakarni, he sent a large army to the west, and, by his army which had reached the Kanhabena, he burnt the Mûshikanagara ( l 4 ). We will show elsewhere that the Sâtakarni here referred to must be identified with Śrī Sâtakarni ( 170—160 B.C. ), the third Āndhra king of the *Purāṇa Text* ( p. 71 ). The Kanhabena is doubtless the river formed by the junction at Bhandara ( Central Provinces ) of the Kanhan and the Wainganga which in its turn joins the Wardha. The Mûshikanagara, therefore, was situated in the Central Provinces. This inference is confirmed by Khâravela having sent his army to the west ( of Ussai ). But the Mûshika kingdom is placed by the *Keralolpatti* in South Travancore, and its capital was, according to the *Mûshikavamsā*, Kolam, the modern Quilon ( *Travancore Archaeological Series* 2 106-7 ). So the Mûshikas of South Travancore were emigrants from the Central Provinces after A.D. 825, the starting point of the Kollam era which marks the foundation of that city ( “கொல்லம் தோன்றி தூற்று நாற்பத்தொன்பதாண்டுகளாக” Sivalayankodari's insc., *Ep. Ind.*, Vol. 8 ), since it was the capital of even the first Mûshika king Karanigata. In sending an army to the west and burning Mûshikanagara, Khâravela is said to have *disregarded* Sâtakarni, because apparently the latter's sway extended as far east as the Central Provinces.

In the third year, Khâravela entertained the people of Kalinganagara with dances, music and feasts ( l 5 ). In the fourth year, he subdues the leaders of the Rashtrakas and Bhojakas, apparently Central Indian republican tribes. In the fifth year, he brings into the capital city from the Tanasulhya Road the canal excavated by King Nanda ( विवर्धन ( l 6 ). Mr. Jayaswal translates the last term by ‘300 years before’, and argues that, since this inscription places Khâravela's fourteenth year in the

Mauryan year 164, Nandarâja must have ruled over Kalinga in 325 (Chandragupta's acc.)— $164 + 300 + 14 - 5 = 470$  B C and that this fact is consistent only with his chronological scheme, and the date 544 B C not c 480 B C, for Buddha's death. But, in his scheme, even the earliest Nanda, Nandavardhana, ascended the throne only in 449 B C, twenty-one years later than the date arrived at for him on Mr Jayaswal's interpretation of the inscription. And, since Mr Jayaswal's scheme professes to be not merely an approximation, but exact, being arrived at by taking into account even fractions of years, this fact alone is fatal to his interpretation. Moreover, even allowing the maximum figures for each king, Nandavardhana's accession cannot be dated before  $325 + 12 + 28 + 43 + 42 = 450$  B C (Pargiter *Purâna Text*, 69). On the other hand, it is impossible to take the 300 years to be an approximation, because there is no term to express the meaning 'about'. There is nothing in the term to express the meaning 'before' (पूर्व) either. On the contrary, the use of the accusative singular can only be consistent with the interpretation 'in such and such year'. The interposition, moreover, of वर्ष between त्रि and शत is intentional, to prevent our taking त्रि to qualify शत. So the term should be translated by 'in the year 103'. The use of वर्ष here between त्रि and शत is parallel to the use of अत्र in l 17 between चतु षष्टि and शतिक, and to the use of वर्ष itself between पञ्चातरित षष्टि and शते in Mr Jayaswal's original reading of the dated portion of the inscription. His interpretation of the former term as  $64 + 100 = 164$ , and not  $64 \times 100 = 6,400$  years, and the latter term as  $65 + 100 = 165$ , and not  $65 \times 100 = 6,500$  years, is inconsistent with his principles of numerical interpretation. If the engraver had meant '300 years' he would have inscribed त्रिषु वर्षशतेषु or त्रिशतवर्षेषु with त्रिषु completely separated from वर्षशतेषु or with वर्षेषु in the end, and with शतेषु or वर्षेषु in the plural on the analogy of पञ्चत्रिंशै शतसहस्रै (=35,00,000 l 4), नवतानि वृषशतानि (=90,00 bulls—original reading of l 14), शतसहस्रै (100,000 l 7), पञ्चसप्तत्या शतसहस्रै (=75,00,000, l 16). And even if the term meant '300', the proper translation would only be 'in the year 300', not '300 years before'. The year 103 should be counted in the same era as the year 164 in the same inscription (l 16), since no other era is here referred to. And that era is the Mauryan (मुरियकाल). Mr Jayaswal objects that King Nanda, who preceded Chandragupta, could not have lived in the year 103 of an era which must have started from the date of accession of the latter, because he was the first Mauryan king. But there is no reason to identify the King Nanda of this inscription with any King Nanda of Magadha. There might have been a later king of that name in Kalinga itself. There is nothing unusual in kings of different lands and dynasties having the same name. In fact, much of the confusion in Indian chronology arises from different kings bearing the same name. Finally it is more probable that the canal was extended into the capital city within  $164 - 14 + 5 - 103 = 52$  years of its excavation by King Nanda, than that the people took 300 years to realise the advantages of such extension, even if after all these years, the canal was in existence and in proper repair. This passage of the inscription should therefore be translated by "In the fifth year Khâravêla extended into the capital city, from its former terminus in the Tanasulîya Road, a canal excavated by King Nanda (of Kalinga) in the Mauryan year 103."

In the sixth year, Khâravêla performed Râjasûya (a sacrifice asserting imperial claims), and, in honour of the occasion, remitted all tax money (करपण) and bestowed many privileges on civic and village corporations (ll 6-7). The reference to करपण shows that taxes were paid in money also. The reference to civic privileges shows that the imperial government did not interfere with the internal administration of cities and villages, but left it to local corporations. It is usually assumed that Khâravêla was a Jaina, but there is

apparently nothing in this inscription to support that view. If he is referred to in l 12 as paying respect to the Jaina image of Kalunga, and in ll 14-5 as granting maintenances to Jaina professors, and caves for learned Śramanas to meet in assembly, he is, on the other hand, also referred to as performing Râjasûya (ll 6-7), and, for the success of his expedition to Bhâratavarsha, Vedic sacrifices (l 10), and as granting gifts of golden *Kalpa* trees, horses, elephants, and houses with *fire-altars*, and, to make them accepted lands to the caste assembly of the Brahmans (l 9). It is more likely that a Hindu might also have worshipped Jaina images and patronized Jaina professors and Śramanas, than that a Jaina might have performed Râjasûya and other Vedic sacrifices, as Jainism and Buddhism were primarily revolts against Vedic sacrifices. He therefore seems to have been a liberal Hindu, like King Harshavardhana of Kanauj. This is confirmed by the references to him in l 17 as a restorer of every temple (देवायतन), perhaps mere wooden structures in his time, as a respecter of every sect (सर्वपाषण्डपूजक), and as one born in a family of Kshatriya Vedic seers (राजर्षिवंशकुलविनि सृत), and is not really inconsistent with his respecting forms and acts of lay observance (l 14), because worship and ritual are common to all religions, though the particular forms may differ.

In the seventh year, his wife Dhusi of the house of Vajra gave birth to a son (l 7). Mr. Jayaswal identifies Vajra with Alexander's Bazira, west of the Indus (*Arian* 4 27), because in l 15 Dhusi is called the queen of Simhaprastha (=Simhapura) and Simhapura is placed near Kashmir in the *Mahâbhârata* (*Sabhâ Par* 17-20). But it is unusual to call a queen as the queen of her parental instead of her marital home, though she might be spoken of as the Vajra 'princess'. So Simhapura must be the capital city of her husband's Kalunga country itself, though Mr. Jayaswal thought it impossible to identify the Kalanganagara. And we should expect her parents' country Vajra to be nearer Kalunga. The Tamil epics *Śilappadhikâram* and *Manimekhalam* of the second century A.D. confirm these inferences by saying that Simhapura was a capital city of Kalunga ("கலிங்க நன்னாடு, வடிவேற்றடக்கை வசவுங்குமானூர், தீமபுன்றபழனச் சிவகபுரமுற்று, நாமபெழு கானக கபிலபுரத்தினு, மாசாள செவவத்து நீரைதார வேந்தர்" *Śilap* 23 138 12, "கலிங்க நன்னாடுத், தாயமன்னவா வசவுங்குமானூரு, சிவகபுரமுற்று செழுநீரக்கபிலபுரம், மனகாள கின்றோரடற் செறுவுறு காள"—*Manim* 26 15-8), and that the king of the Vajra country 'bounded by the holy expanse of water' gave tribute to the Chôla king Karikâlâ ("மாரீர் வேலி வச்சிர நன்னாடுக், கோனிறை கொடுத்த கொற்றப் பந்தரும" *Śilap* 5 99 100). Adiyârkunallâr (twelfth century A.D.), who commented on the former work, remarks that the Vajra country lay about the banks of the river Son (வச்சிர நாடு-சீசாநேரக்கரை-) which passes through eastern Bundelkhand and that part of Bihar which lies between Benares and Gaya, and effects a junction with the Ganges (the 'holy expanse of water'), which bounds them on the north, near Patna. So we must identify Vajra with the Vajra country, i.e., South-West Bihar and East Bundelkhand. Adiyârkunallâr interpreted 'மாரீர் வேலி' to mean 'கடல் வேலி' i.e., 'bounded by the sea'. But this is a mistake due to his ignorance of the geography of North India, because neither Bazira nor Vajra was bounded by the sea, and because it is impossible that, in Khâravêla's time when the whole of North India and Deccan was practically partitioned between the three powerful sovereigns Śrî Satakarnî who ruled from the west coast to the Kanhabena, Pushyamitra who ruled from the Indus to the Barabar hills, and Khâravêla who ruled from the east coast to the Barabar hills and the Kanhabena, the Vajra country could have extended its sway to the limits of the eastern or the western sea. But Vajra is not to be confused with Magadha, since the Magadhan king is separately mentioned as having also given presents to Karikâlâ after defeat "மகத நன்னாடு வாள் வாய் வேந்தன், பகைப்புறத்துக் கொடுத்த படர்

मण्डलपुरम्"—*Śūlap* 5 101-2) As regards the site of Simhapura, Mr Jayaswal has already shown that the capital city of Kalinga could not have been far from the Udayagiri hill and this is confirmed by the Oriya MS already referred to which says that the Aira kings of Kalinga had their capital city near Khanlagiri (Udayagiri) (खण्डवैलसमीपतु)

In the eighth year, having with a large army stormed the Gorathagiri barrier (Barabar hills), Khâravêla besieged Râjagriha, which had again become the capital of Magadha apparently after Aśoka's death, and caused its king to retreat in haste to Mathurâ, abandoning his army to its fate, but, owing to a gap in the inscription, the result is unknown (ll 7-8) The fact that the then Magadhan king, Pushyamitra (as we learn in l 12) retreated to Mathurâ shows that he was not merely, as is usually supposed, a local ruler, but an emperor whose power extended in the west not merely as far as Mathurâ, but, if Kâlidâsa who refers to Vasumitra's victory over the Yavanas, in defence of his grandfather Pushyamitra's sacrificial horse, on the banks of the Indus (सिंधु) (*Mâlavikâgnimitra*, Act 5 'Pushyamitra's letter to Agnumitra'), and Patañjali, the contemporary of Pushyamitra (Smith *EHI*, 214), who refers to the expulsion of Yavanas and Sakas beyond the borders of India (*Mahâbhâshya* on शुद्धाणामनिरवसिताना. 2 4 10) are to be believed, as far as even the Indus

In the ninth year, Khâravêla grants gifts of golden *Kalpa* trees with sprouts, horses, elephants, and houses with *fire-altars*, and, to make them accepted, he gives lands to the caste assembly of the Brahmans (l 9) This shows the unwillingness in his time of Brahmans to accept gifts at the hands of non-Brahmans, although they were kings, and also the esteem in which they were held In the tenth year, after performing Vedic sacrifices, he sends a successful expedition to *Bhâratavarsha* which must, in his time, have been restricted in its application to the Gangetic valley (l 10) In the eleventh year, he leads out in procession, in a wooden car, the *nim* wood statue of त्रयोदशवर्षशतकेतुभद्र (l 11) As before, Mr Jayaswal takes this term to mean 'Ketubhadra who lived 1300 years before' and identifies Ketubhadra with Ketumân, the eldest son of the Kalinga king, who, as the commander of the Kalinga forces in the Bhârata war, died on the field of battle (*Mahâbhârata Bhishma Par*, chs 17 and 54) But, for reasons already given, this passage also should mean 'Ketubhadra who lived in the Mauryan year 113', and the epithet *Bhadra* indicates that Ketu was a king of Kalinga It is more probable that the people of Kalinga honoured the statue of a king who lived  $164-14+11-113=48$  years only before their time, than that they honoured a prince who died 1300 years before and that his statue came down to them intact through all that long period, even if the art of making statues was known as early as the time of the Bhârata war

In the twelfth year, frightening the Northern kings (उत्तरापथ) and the people of Magadha, Khâravêla crossed the Ganges from its northern side on his elephants standing end to end across the river, and made the Magadhan king Bahasatimitra bow at his feet (ll 11-2) 'Bahasati' is Prâkrita for 'Brihaspati', the deity presiding over the Pushya Nakshatra (*Sâmkhyadyana Grihya-Sûtra*, l 26 6) Therefore, Mr Jayaswal argues, 'Bahasatimitra' is identical with Pushyamitra, the first Sunga king, and he establishes the identity convincingly by citing the *Mitra* coins of Oudh, Gorakhpur, etc (*JASB*, 1880, pt 1, pp 21-8, 87-90, Cunningham *Coins of Anc Ind*, 69, 74, 79, 93, *Catalogue of Coins in the Indian Museum*, vol 1 184) which refer to Pushyamitra by that name The twelfth year of Khâravêla corresponds to the Mauryan year  $164-14+12=162$  Pushyamitra was therefore living in that year Since the Purânas place him in the Mauryan years 137-173 (Pargiter *Purâna Text*, 70), this inscription confirms the Purânic chronology for the Mauryan and Sunga kings of Magadha

Then occurs the following passage as edited by Mr. Jayaswal — नदराजनीतच कालिंगजिनसनिवेश । गहरतनान पडिहारेहि अगमागधवसु च नेयाति (l 12) The plate clearly reads नदराजनीत, not नदराजनीत. The central line is distinctly lengthened to mark the long vowel and the very small gap between shows the lengthening is intentional. The lengthening is material, because नदराजनीत would mean 'brought by King Nanda', while नदराजनीत *may* mean 'taken away by King Nanda'. In the one case, Nanda would be the king of Kalīṅga, and, in the other, he *may* be the king of a foreign country like Magadha. It may be argued that the inscription mentions only acts of peace or of war in alternate years and that, the twelfth year being a war year, the events referred to in this passage should also be war events, and that, therefore, the correct reading should be नदराजनीत. But the very next event of the same year, his building towers with carved interiors is an act, not of war, but of peace. And, in the sixth year, which ought to be a war year, no act of war is mentioned or even hinted at. The 'च' after 'नीत' connects वदापयति (immediately before नदराजनीत) with another predicate which is missing after 'सनिवेश' perhaps something like 'serves'. The 'च' after 'वसु' connects this predicate with 'नेयाति'. Pandit Bhagavanlal reads 'गहरतनपडिहारेहि,' and his reading would mean 'by doors set with family gems', while Mr. Jayaswal's reading would be meaningless, unless, like him, we take प्रतिहार in the unusual and unauthorised sense of 'recaptures'. Even then, how are we to construe the instrumental plural पडिहारेहि with the accusative singular सनिवेश and वसु च, what are we to supply in the gap, and how are we to construe the whole passage consistently? On the other hand, with our reading राजानीत and Pandit Bhagavanlal's reading गहरतनपडिहारेहि we may translate it by "And he serves the Jaina image of Kalīṅga brought by King Nanda (of Kalīṅga) with doors set with family gems, and brings the wealth of Anga and Magadha." Finally, even if the reading be नदराजनीत, 'नीत' in this term might have the same sense as 'नेयाति' = 'brings' instead of 'takes away', and in that case too, Nanda would be a king of Kalīṅga.

In the same year, Khāravela built towers with carved interiors, and received presents of elephant ships, precious stones like rubies, pearls, etc. from the Pāṇḍya king ( पांड्यराजा ). The Pāṇḍya country was famous for its pearls (l 13). Then, in the thirteenth year, he grants maintenances to Jaina professors of philanthropy ( दाय ) who resided on the Kumāri hill (Udayagiri), and he respects forms and acts of lay observance like Śrī Jivadeva, apparently Khāravela's father, of whom he might have been deemed a worthy successor, by continuing his pious observances (l 14). He also makes the present cave for learned ascetics ( श्रमणा ) to meet in assembly, and near their residences he builds a palace with beryl inlaid columns for Dhūsi, the queen of Simhaprastha, to halt in while on a visit to this place (l 15). When this inscription was engraved, Khāravela had completed ( अयत्नचलुञ्ज ) the Mauryan time ( मुरियकाल ) of a  $64+100=164$  years' interval, i.e., the Mauryan year 164 (l 16). Then the inscription calls Khāravela by the names 'king of prosperity' ( स्वमराज ), 'king of increase' ( वधराज ), 'king of ascetics' ( भिक्षुराज ), and 'king of Dharma' ( धर्मराज ), and refers to him by the favourite idea of kingship, i.e., as rolling his wheel of Dharma ( पवतचक्र ), (ll 16-7). With this the inscription comes to a close.

To fix the chronology of this inscription, it is necessary to determine the date of Chandragupta's accession. A passage from Justinus' *Epitoma Pompei Trogi* (15. 4) relevant in this connection is translated by Dr. Hultzsch as follows — "Seleucus carried on many wars in the east . . . First seizing Babylon, and then reducing the Bactrians . . . Thereafter he passed into India which had, since Alexander's death, killed his prefects, thinking that the yoke of slavery had been shaken off from its neck. The author of its freedom had been

Sandrokottos, but, when victory was gained, he had changed the name of freedom to that of bondage. For, after he had ascended the throne (*siquidem occupato regno*), he himself oppressed with servitude the very people whom he had rescued from foreign dominion. Though of humble birth, he was impelled by innate majesty to assume royal power. When King Nanda (Nandos) whom he had offended by his boldness, ordered him to be killed, he had resorted to speedy flight. Sandrokottos, having thus gained the crown, held India at the time when Seleucus was laying the foundations of his future greatness" (*JRAS*, 1914, 948-9). Since Dr Hultzsch has omitted in his translation some relevant passages after 'he had resorted to speedy flight', we will supply them from McCrindle's translation in his *Invasion of India by Alexander the Great*. "It was this prodigy (of a lion licking him) that first inspired him with the hope of winning the throne, and so, having collected a band of robbers, he instigated the Indians to overthrow the existing government. When he was thereafter preparing to attack Alexander's prefects, a wild elephant approached him and, receiving him on its back, fought vigorously in front of the army Sandrokottos, having thus, etc." The course of events mentioned in these passages may be arranged as follows —

(1) When King Nanda ordered Sandrokottos (Chandragupta) to be killed, the latter had resorted to speedy flight,

(2) While a fugitive, he met Alexander when the latter was preparing to retreat from the Hyphasis (Bias). Plutarch (first century A.D.) writes in his *Life of Alexander* (ch. 62) — "Androkottus himself, who was then but a youth, saw Alexander himself and afterwards used to declare that Alexander could easily have taken possession of the whole country, since the king was hated and despised by his subjects for the wickedness of his disposition, and the meanness of his origin",

(3) The prodigy of a lion licking him first inspired him with the hope of winning the throne,

(4) He then collected a band of robbers and *instigated* the Indians to overthrow the existing government (obviously of Magadha),

(5) He was thereafter *preparing* to attack Alexander's prefects when a wild elephant, taking him on its back, fought vigorously,

(6) Sandrokottos thus *gained* the crown,

(7) India *killed* Alexander's prefects *shortly* after his death, because if the killing had occurred long after Alexander's death, the latter event alone could not be said to have made India *think* that the yoke of slavery had been shaken off from its neck,

(8) Sandrokottos, by taking advantage of the confusion caused by killing the prefects to raise a revolt, was the author of India's freedom,

(9) But after Sandrokottos *ascended* the throne, he oppressed the very people whom he had freed from foreign control,

(10) Sandrokottos *held* India, when Seleucus was *laying the foundations* of his future greatness

It is thus clear that, soon after he heard, *i.e.*, in about two months of Alexander's death at Babylon in June 323 B.C. (Smith *EHI*, 114), Chandragupta was *preparing* to attack

Alexander's prefects Then he fought with and killed Nanda and thus *gained* the crown The Indians regulated their military movements strictly by precedent So serious fighting could not have been begun before Kârttika in the cold season of 323 B C The military operations themselves would take about six months, *i e*, till about April 322 B C Then only could he have helped the people of the Punjab who had killed Alexander's prefects to revolt successfully This again would take many months, about a year, if we remember that it took even Alexander nearly two years, from January 326 to October 325 B C to conquer the Punjab and the Indus valley So the accession of Chandragupta, who ascended the throne only after he had freed the Punjab and the Indus valley, could not be dated before 321 B C Neither could it have taken place after that year, since, in that same year, in consideration of the changed conditions and the diminished territory, Antipater had to divide the satrapies anew and practically recognise the independence of India by giving the Indus valley, which had been under Peithon in Alexander's lifetime, and the Punjab, as a matter of form, to the Indian kings Porus and Ambhi of Taxila "for, it was impossible to remove them without royal troops under the command of some distinguished general" (*Diodorus*, 18-39)

That the accession of Chandragupta must be dated after Alexander's death is also clear from the course of events in the Punjab When Chandragupta met Alexander as the latter was preparing to retreat in September 326 B C, the former was still a fugitive Alexander stayed in India till the beginning of October 325 B C, when he began his march through Gedrosia While he was marching through Karmania in February-March 324 B C, Alexander heard that Philippos, one of his Indian satraps, had been murdered by his mercenary troops who, however, had been slain at once by his Macedonian bodyguard, and directed Ambhi, king of Taxila, and Eudemos, commandant of a contingent on the Upper Indus (*Curtius*, 10-11) to assume temporary administration of the province The murder of Philippos must not be confused with that of Alexander's prefects referred to by Justinus, because the former occurred *before*, and the latter *after*, Alexander's death, and since the former involved no loss of territory to the Greeks, like the latter Nothing more happened till Alexander's death (Smith *EHI*, 109-10, 113-4) So Chandragupta's accession must be dated after Alexander's death, and in 321 B C.

The *Purânas* (Pargiter *Purâna Text*, 70) assign Chandragupta 24, his son Bindusâra 25, and his son Asoka 36 years Buddhist works assign them 24, 28 and 37 years (*Dīpavaṃśa*, 5-73, 100, 101, 11-5, 12, 13, *Mahāvamsā*, 5-18, 19, 20-6, Buddhaghosha's *Samantapasādikā*, *Vṃyapīṭaka*, Oldenberg 3-321, Bigandet's *Life of Gautama* 2-128), and say Asoka was anointed four years after his accession (*DV*, 6-1-20, 21, *MV*, 5-21, *Sp* 299, Bigandet, 2-128) The total for the Maurya rulers was 137 years (Pargiter *Purâna Text*, 70), but, by adding the figures of individual reigns, we get only 133 years (*Vāyu*, and *Brahmānda purânas*) To get the 137 years, we must add the four years' interval between the accession and the coronation of Asoka On the other hand, the Buddhist works, by adding three years for Bindusâra, and one year for Asoka, count the period twice over So we should give these kings 24, 25, and 4+36=40 years Târanâtha, by giving Bindusâra thirty-five years, confirms the unit figure of the *Purânas*, and probably misread *त्रिंशत्* for *विंशत्* in the decade figures We may also note that Asoka commenced publishing his 'rescripts on morality' twelve years after his anointing (*Pillar Edict* 6, *Rock Edict* 4).

We now give the following Chronological Table to illustrate this inscription —

- c 400 B C —Kalinga conquered by Nandavardhana (401—361 B C )
- 333—321 B C —Sumâlya Nanda of Magadha
- 326—321 B C —Kalinga freed by an Aira king
- 321—297 B C —Chandragupta Maurya of Magadha destroyed Nandas, and freed Punjab and the Indus valley from the Greeks before his accession Kalinga a powerful and independent kingdom;
- 297—272 B C —Bindusâra of Magadha
- 272 B C —Accession of Aśoka, and struggle between him and his brothers for the throne
- 268 B.C —Anointing of Aśoka
- 260 B C —Aśoka conquered Kalinga, and was converted
- 256 B C —Aśoka's Kalinga edicts He presents two caves in Barabar hills to the Âjivikas
- 249 B C —He presents another cave in the same hills to the same
- 232 B C —Aśoka died Probably Kalinga freed under Megha king Cheta of Kosala
- 218 B C —Nanda of Kalinga excavated a canal with terminus in Tanasuliya Road He also brought the Jama image of Kalinga Succeeded by Ketubhadra (208 B C )
- 184—48 B C —Pushyamitra Sunga of Râjagriha expelled Yavanas and Śakas, and ruled all North India as far west as the Indus
- 194 B C —Khâravêla (son of Jivadeva ?) born
- 179 B C —Khâravêla *yuvarâja* after studying लेख, रूप, गणन, व्यवहार, धर्म, and विद्या
- 170 B C —His father's death Anointed king for a पुरुषयुग Repaired storm-damaged Simhapura His subjects counted 3,500,000 Accession of Śrî Śâtakarnî, Ândhra king
- 169 B C —Disregarding Śâtakarnî, Khâravêla sent an army to the west and burnt Mâshikanagara on the Kanhabena (Central Provinces) †
- 167 B C —Khâravêla subdues the Râshtrika and Bhojaka leaders
- 166 B C —He extended Nanda's canal into Simhapura
- 165 B C —He performs Râjasûya, remits tax-money, and bestows privileges on civic and village corporations
- 164 B C —His queen Dhusî of Vajra house (East Bundelkhand and South-West Bihar) bears a son
- 163 B C —Stormed Gorathagiri (Barabar hills) and besieged Râjagriha Its king retreats in haste to Mathurâ, abandoning his army
- 162 B C —Grants gifts to Brahmans, and, to make the gifts accepted, lands to their assembly
- 161 B C —After performing Vedic sacrifices, he sends a successful expedition to Bhâratavarsha (the Gangetic valley)

- 160 B C —He leads out in procession, on a wooden car, the statue of Kṛtubhadra of Kalinga-acc in Mauryan year 113 =208 B C , Śātakarni dies
- 159 B C —Frightening the उत्तराक्ष kings, and the Magadha people, Khāravela crossed the Ganges from its northern side on elephants, and bowed Pushyamitra of Magadha. He presented jewelled doors to Nanda's Jaina image of Kalunga. Brings wealth of Anga and Magadha. Built towers with carved interiors. Received presents of elephant-ships, rubies, pearls etc from the Pandya king.
- 158 B C —He grants maintenances to अर्थ professors on the Udayagiri hill and makes the Hāthigumphā cave as an assembly room for learned Śramanas. Near their dwellings, he builds a halting-place with beryl inlaid columns for Dhūsi, queen of Simhapura.
- 157 B C —The Hāthigumphā cave inscription engraved in Muriya year 164

### MORE ABOUT NICOLAO MANUCCI

By L. M. ANSTREY

IN his Introduction to the translation of Nicolao Manucci's *Storia del Mogol*, 1653—1708 (*Indian Texts Series*, 4 vols., 1907-08), the late Mr. William Irvine writes (vol. I, pp. lxxvi-lxxvii) "On January 14, 1712, the president [of Madras] informed the Board that a special order had come to Pondicherry calling for Manucci's attendance at Shāh' Ālam's court [then at Lāhor]. However, the emperor Shāh' Ālam' died at Lāhor on February 27, and the report thereof reached Madras in April 1712, thus, no doubt, Manucci did not start for the court. I have failed to trace Manucci farther at Madras or Pondicherry."

Since these lines were written three additional references to Manucci have come to light, two of them being later than April 1712.

(1) *Extract of Minutes of Mayor's Court Proceedings* ("Records of Fort St. George," p. 7)<sup>1</sup>

2 September 1689 Nicola Manuche complains against Manuel Gonsalves de Liversa for one hundred pagodas

(2) *Extract of a letter from John Scattergood at Madras* ("Scattergood Papers, communicated" by Mr. Bernard P. Scattergood, F. S. A.)

8 October 1712 I have sold my garden house to Maunutehe, designing to send my wife home the next year

(3) *Extract of Minutes of Mayor's Court Proceedings* ("Records of Fort St. George," pp. 72-73)"

3 December 1718 Doctor Manuch Enters an Action against Cojee Bauba [Khwāja Bâbâ] for 400 Pagodas

Warrant return'd and Served

Bail'd by Cojee Gregory

26 December Petition read

Ordered that Cojee Bauba be summoned the next Court day.

<sup>1</sup> Abbreviations in the documents quoted have been extended

6 January 1718-19 Answer read, and Petition read

Doctor Manuch produces Certificates under Sevrall Persons hands declaring that Cojee Bauba desired them to send for the said Doctor Manuch to make up the matter between them on Account of what he was indebted by playing at Back Gammon

The said Manuch likewise produces two Witnesses that declare they severall times carried Physick to Cojee Bauba from Doctor Manuch

Ordered that Doctor Manuch give in next Court day a particular Account of what money he won of Cojee Bauba, and likewise of what physick he gave him and that he take his oath to the same if the Bench require it

20 January Doctor Manuch delivers in an Account of what Cojee Bauba is indebted to him at Gaming, but it not proving satisfactory, and it being difficult to get a true light into the matter,

Agreed that the affair of the Gaming be thrown out of Court

Doctor Manuch likewise gives in his bill for what Physick he gave Cojee Bauba, which the Bench are of opinion ought to be wrote in a more ample manner and do not approve of the same

Order'd that Doctor Manuch deliver in next Court day an Account of what Physick he gave Cojee Bauba drawn up in a proper form when the Bench will consider of the reasonableness of his demand

30 January Doctor Manuch delivers in a reply to Bauba[']s answer to the Petition

The bench having thorowly Examind this affair, do give Judgment for the Defendant to pay the plaintiff 50 pagodas as likewise the Cost of suit

The second of the above references confirms Mr Irvine's supposition that, on receipt of the news of the death of Shâh 'Âlam, Manucci gave up the idea of going to Lâhor, and it shows, moreover, that he returned to Madras as a resident

The third reference finds him still at Madras, six years later, and proves, as Mr H D Dodwell remarks in his Preface to the Minutes of the *Mayor's Court Proceedings*, that the period of Manucci's death must be later than 1717, the date tentatively assigned to it by Mr Irvine (*op cit*, vol I, p lxvii).

## THE WORDS *VACHA* AND *VINITA* IN THE AŚOKA EDICT

BY VIDHUSHEKHARA BHATTACHARYA SASTRI, SANTINIKETAN.

IN Aśoka's Rock Edict VI there are two words, *vacha* and *vinita*, about the true meaning of which some controversy has been started Mr Jayaswal (*Ante*, Vol. XLVII, February, 1918, pp 53 54) has attempted to interpret them in the light of *Arthaśâstra*, but as regards the second word, *v e*, *vinita*, Prof Radha Govinda Basak has satisfactorily proved (*ibid*, Vol XLVIII, February, 1919) that the interpretation suggested by Mr Jayaswal is not correct I have also a few remarks to offer in this connection which I believe deserve attention

I am afraid, Mr Jayaswal has laid too much stress on the Royal Time Table given in the *Arthaśâstra* (pp 37—39) assuming that it was strictly followed by Aśoka It is quite true, as he says, the chapter of the *Arthaśâstra* in which the Time Table is given emphasises *utthâna*, 'the quality of energy' and also in the Aśoka Edict VI it finds prominence. But

there is no proof whatever that the same daily routine was carried out in practice by him. The fact, as has been related by Megasthenes, that Chandragupta used to receive petitions when he was being shampooed is no evidence that he was in the habit of acting upon the time table enjoined in the *Arthasāstra*. Nor can we agree with Mr. Jayaswal when he says that this "shampooing" naturally refers to the hours *before bath*. On the contrary, it may safely be said that it refers rather to the hours following not only the bathing time, but also the meal time, *i.e.*, the time fixed for *svavaravāhāra* or *mantra* in the *Arthasāstra*. We find our support in *Kādambarī* where it describes the king Śūdraka enjoying his shampoo.<sup>1</sup>

Following this, we may reasonably infer that Aśoka was willing to extend the time for receiving reports even to the hours spent in his inner apartment or private room (*gabhā gālasī*, Skt. *garbhāgāre*)<sup>2</sup> in taking rest or consultation with ministers "षष्ठे स्वैरविहार सेवते" — *Arthasāstra*, p. 38). It is well known that it was the custom of other kings to employ for this purpose the second part of the day, say between 7-30 a.m. and 9 a.m., (*Is*, p. 37). But all the same there are reasons to think that the daily routine of duties according to the *Arthasāstra* has no connection with the words used in the Edict VI. Prof. Basak has convinced us that the word *vinīta* cannot mean "military exercise," as suggested by Mr. Jayaswal. Buhler has taken the word in the sense of a 'carriage', but he did not give any particulars about it. According to Prof. Basak *vinīta* or *vinīta* might mean either a well-trained (*sādhuvāhī*) horse (*Amara*, II, 8, 44, *Medinī*, *Tāntavarga*, 158) or a vehicle which is called *varnītaka* in *Amara* (II, 8, 58) and *vinītaka* in some other Sanskrit lexicons.<sup>3</sup> But the question occurs to us why the word 'well-trained horse' should be mentioned here in place of the general term for a horse, *aśva*, or why elephants should be excluded which were equally important as a means of conveyance. I, therefore, incline to accept the second meaning proposed by Prof. Basak, *i.e.*, 'a vehicle'.

But there can be no doubt that some special kind of vehicle is meant by the words *varnītaka* and *vinītaka*. Following *Amara* (II, 8, 58), Prof. Basak rightly calls it a *param-parāvāhana* which he explains by saying (perhaps relying upon Monier Williams' *Sanskrit-English Dictionary*) that it is "a porter carrying a litter or a horse dragging a carriage." This explanation is far from being satisfactory. *Paramparāvāhana* literally means a *vāhana* 'vehicle' dragged in *paramparā* 'succession' by animals, or in other words, a vehicle dragged by a relay of horses, etc. It is needless to say that this sort of conveyance was necessary in those days for a long journey.

Now, the word *vinīta* or *vinīta* (= *varnītaka*, *vinītaka*), being a common term denoting a particular mode of conveyance, has to be coupled for the definiteness, with some other

<sup>1</sup> मुक्ता अस्थानमण्डपमयासात् । तत्र च खड्गवाहिन्या करसंस्पृष्टेन स वा ह्य मानचरण तत्कालोचितदर्शनैरवनिपातिभिः अनाद्यैर्मित्रैश्च सह तास्ता कथा कुर्वन् मुहूर्तमिव असाञ्जकः ।" *Kādambarī*, *Pūrvabhāga*, ed. Girsachandra Vidyālaṅkāra, Cal. 1885, p. 33. This passage is important as it agrees with what is prescribed in the *Arthasāstra* (p. 38) "षष्ठे स्वैरविहार मन्त्र वा सेवते ।" It is to be noted that in this extract the king is described as being attended here with his *amātyas*, 'ministers', friends, and only those chiefs who could be allowed to meet him at that time. Mark also the significance of the phrase "मुहूर्तमिव" 'for a very short space of time'.

<sup>2</sup> Mr. Jayaswal has not offered any proof for his supposition that the *garbhāgāra* in the Edict 'was most likely an underground cool room for स्वैरविहार in summer.' The underground room भूमिगृह (*Arthasāstra*, p. 40) seems to be more for safety on particular occasion than for ordinary rest.

<sup>3</sup> Prof. Basak did not give any particular name. But see Monier Williams' *Sanskrit-English Dictionary*, s. v. विनीत.

word that describes the special kind of carriage meant by the speaker, as for instance, *rathavinita*, which means a *ratha* 'chariot' drawn in the aforesaid manner. This view will be supported by a Pali passage which is quoted below from the *Rathavinitasutta* of the *Majjhimanikāya*, 24 (I, 3,4 P T S, Vol I, pp 148-149, *Rajwade*, Vol I, pp 106-107) —

“Seyyathāpi āvuso rañño Pasenadissa Kosalassa Sāvathiyam pativasantassa Sāketē kiñchid-eva achchāyikam karāṇiyam uppajjeyya, tassa antarā cha Sāvattim antarā cha Sāketam satta ratha vinītāni upatthapeyyum Atha kho āvuso rājā Pasenadi Kosalo Sāvattiyā nikkhamitvā antepuradvārā pathamam rathavinītam abhirūheyya, pathamena rathavinītena dutiyam rathavinītam pāpuneyya, pathamam rathavinītam vissajjeyya dutiyam rathavinītam abhirūheyya, dutiyena rathavinītena tatiyam rathavinītam pāpuneyya, - - - sattamam rathavinītam abhirūheyya, sattamena rathavinītena Sāketam anupāpuneyya antepuradvārām ”

In the above quotation it is stated that in case the king Pasenadi of Kosala owing to some urgent business had to go to Sāketa, there would be arranged for him seven *rathavinitas* between Sāvattihī and Sāketa. Here it is evident that the *rathavinita*, 'a *vinīta* in the form of a *ratha*' is a *paramparādvāhana*. It should be noted that the gender of the word is neuter. According to Amara (II, 8, 58) this word must be used either in masculine or neuter gender. And therefore the word *vinīta* in *rathavinita* being used in neuter gender cannot mean anything else but a *paramparādvāhana*.

Buddhaghosa explains the word *rathavinitāni* by *vinīta-assaṇṇiya-yutte rathe*, 'the chariots to which are yoked the horses that are well trained and of good race'. But strictly speaking, this explanation does not seem to be quite accurate. For in that case the *ratha vinīta* in the original text could not be employed in the neuter gender.

One thing deserves to be pointed out here, and it is this. It is clear from the use of the word in the *Majjhimanikāya* that the seven vehicles arranged for the king between Sāvattihī and Sāketa were separate and that each of them was drawn by a different set of horses. It, therefore, is not unlikely that either a succession of vehicles is meant by Amara in his describing *vinītaka* as *paramparādvāhana*, or the same vehicle dragged in succession by a supply of fresh animals, or both, according to necessity or convenience. But such distinction is immaterial, the important point being the particular manner of conveyance.

We have clearly seen in the above extract of the *Majjhimanikāya* that the vehicle named *vinīta* is employed in a long journey. And therefore Aśoka's meaning is evident in the Edict whereby he proclaims that when travelling a long distance in a vehicle drawn by a relay of horses he will expect his men to report the people's business to him. This interpretation will be strengthened by what I am going to say about the second word of the Edict, *ve*, *vacha*, which has hitherto generally been taken to mean a 'latrine'.

It cannot be disputed that the Sanskrit equivalent of the word *vacha* in the Edict is nothing but *vraja*. For the Pali word *vacca* literally means *excrement* and not a 'latrine', and to denote the latter, the word *vachchakutī* is constantly used in Pāli literature. Furthermore, as Mr. Jayaswal rightly observes, "No king in his senses would ask officers to announce the business of suitors in his latrine."

Through the influence of Paisāchi Prākṛit, according to Prākṛit grammarian (*Hem*, VIII, 4 325, *Trivikrama*, III, 2 65) Skt *vraja*, Pāli or Pkt *vaja* becomes *vacha*. But what is the meaning of it? Mr. Jayaswal takes it to mean "the royal stables for horses, mules,

bullocks etc , and their breeding farms ” Here he himself has gone against the royal business routine fixed in the *Arthaśāstra* on which he has laid so much stress The *Arthaśāstra* nowhere enjoins that a king himself should look through the affairs in the *vraja* Moreover, this word in the *Arthaśāstra* does not necessarily mean a ‘ royal ’ *vraja*, but it refers rather to a common *vraja* from which the Collector-General is to collect revenue Then again, we ask why, should Aśoka particularly mention the *vraja*, i.e., the stables for “ cows, buffaloes, goats, sheep, asses, camels, horses, and mules ” (*Arthaśāstra*, p 60), and not the stalls where his elephants were kept which were undoubtedly not less important This leads me to think that a road, which is one of the meanings of *vraja* according to Sanskrit lexicons,<sup>4</sup> exactly fits in with the context If we read it now together with what I have already said about the word *vinita*, the sense of these two words, *vacha* and *vinita*, becomes clear And I have no doubt in my mind that Aśoka in his declaration means to say that whether the king is on the road for a short walk or journey or being carried to a long distance by the help of successive arrangements of carriages the reporters should report the people’s business to him. <sup>5</sup>

### MISCELLANEA

#### AN EARLY REFERENCE TO PORT CORN WALLIS, IN THE NORTH ANDAMAN ISLAND

( *Madras Courier*, 22 Dec 1790 )

The Honorable Commodore Cornwallis was at the Andamans, on board the *Crown*, when the *Atlanta* came away, and it appears by the account she has brought, that a new Harbour had been discovered in one of the small Islands to the North East, extremely capacious and commodious, much more so than even the former one which has been hitherto occupied and known by the name of Port Cornwallis [ now Port Blair ] The name therefore will probably be now transferred where it is best deserved, and the new Harbour established [ now known as Port Cornwallis ]

The natives of the Andaman Islands appear unfortunately to be of an untractable disposition,

not easily made sensible either to benefits and the kindest treatment or to the superiority of Force On the boat of the *Crown* landing on the little Islands mentioned above a small number of them appeared, and notwithstanding every friendly demonstration, attempted a determined resistance, and actually wounded with their Bow and Arrows some of the Seamen <sup>1</sup> A few of them, however, who were taken, being treated with all possible lenity and dismissed with friendly assurances, it is hoped they may acquire a disposition more favorable both to themselves and us and that there may be no inconvenience whatever from a contrary spirit to the establishment of so good a Harbour in a situation so eligible

## EPISODES OF PIRACY IN THE EASTERN SEAS, 1519 TO 1851

By S CHARLES HILL

## XX

THE STORY OF THE *CASSANDRA*, 1720—1723No 97. *Letter from Richard Lazimby*

(Continued from p 42 )

“Three days after they left the island they arrived off from Tellicherry where they took a small vessel belonging to Governor Adams,<sup>31</sup> John Fawke Master, whom they brought on board very drunk. He having heard of my misfortune, enquired for me, having been acquainted with him in my former voyage to Bengal in the *Duke of Cambridge*. He began presently to tell me that my old Captain Macrae was fitting out after them, at which news the Quarter-Master told me to prepare, for the next day, he swore, he would hang me like a dog as I was, not doubting, he said, but if I was cleared from them, I would take the first opportunity to come and fight against them as Captain Macrae had, who, they said, like a villain as he was, they had used so civilly in giving him a ship to carry him from Johanna, and swore for the future, if in his power, he would carry the Masters and Officers of all ships they ever overpowered, to plague them like dogs as they were to abuse civility. They then proceeded to Calcut, where they endeavoured to take a large Moor ship out of the Road, but were intercepted by some guns that were mounted on shore. I was down below as usual, thinking the story Captain Fawke told them was forgot, but, unknown to me, the Captain and Quarter-Master were so malicious to order me to the Braces on the Booms in hopes I should be shot. When they got clear of the Road they called me up to know the reason why I was not on deck according to their order. I replied I had no business there at the time, entreating to be put on shore. The Quarter-Master answered that if ever he knew me off the deck in time of action, he would shoot me through the head. I told him ’twas better directly to do it than keep me in misery there, at which he begged the Captain to correct me for my impudence, he being lame of his hands. According to his desire, he fetched his cane and began to belabour me unmercifully, which some of their people seeing came to hinder him and said he might be ashamed to abuse me in such manner for nothing, saying they would do their endeavour to have me put on shore at Cochin with Captain Fawke. The next day in their passage down, came up with a Dutch galliot bound for that place with limestone. They sent their boat on board with Captain Fawke, which the forementioned people seeing, came to the Captain, and told him he might as well then let me go as not, and pressed it very hard, but the Captain’s answer was that if they had a mind to overset their proceedings by letting a dog go, who had heard their designs and resolutions for the ensuing year, they might, but he would never consent to it. Abundance of the Captain’s party also objected against it, which occasioned a strong debate, and so far enraged the Captain that he swore if I went he would have a limb of me first to his share. He likewise added that my going there might be a hindrance of their having a supply from the Dutch.

“Captain Fawke was sent away in the Galliot. The next day they arrived off Cochin, where by a fishing canoe they sent a letter on shore, and, in the afternoon with the sea-breeze ran into the Road, where they anchored, saluting the Fort with eleven guns each ship, the Fort returning their salute, gun for gun. At night there came on board a large

---

<sup>31</sup> Robert Adams, Chief of the Company’s factory at Calcut, and later of Tellicherry.

boat laden with fresh provisions and liquors with the servant of an inhabitant of that place, vulgarly called John Trumpet<sup>32</sup> who told them they must immediately weigh and run further to the southward, where they should have a supply of all things they wanted, as well Naval stores as provisions. They had not been long at an anchor before they had several canoes on board with Inhabitants as well white as black which never ceased more or less during their stay there. At night came on board the forementioned John Trumpet, bringing with him a large boat with Arrack which they received with abundance of joy, asking if they could have any more. He said that he had procured all on the place for them which was about 90 Leagues [leaguers] and 60 bales [?] of sugar [?] canes], which they should have off before he left them, which they did in about three days the boat going and coming as fast as it could. The second day they went on shore a fine Table Clock which was taken in our ship [the *Cassandra*], a present to the Governor, also a large gold watch to his daughter, who, in return sent them ten bales of sugar.

"When they had all on board, they paid Mr Trumpet in money gave him three cheers [or huzzahs]<sup>33</sup> and eleven guns each ship, throwing handful of duetoons into his boat as he put off from the ship. That night being little wind they did not weigh, and the next morning John Trumpet returned with more Arrack and two large chests of piece-goods and ready made clothes, bringing with him the Fiscal [tax rate] of the place. At noon they saw a sail to the southward which they immediately weighed after and chased, but she, having so good an offing, got to the northward of them and that night anchored a small distance from Cochun Fort, which in the morning, they had sight of and gave her chase, she standing into Cochun Road and they after her being assured by the forementioned Gentlemen that they might take her from under the Castle without any molestation, begging withall not to carry her away, for they would purchase her and give as good a price as anyone. The Captain begged them to go into their boats and he would talk with them after he had taken the ship. They stood in boldly to board her but when they were within about a cable length or two of her, the Fort fired two small guns at them, the shot falling close almost to their muzzles, at which they instantly bore out of the Road and made easy sail to the southward, where [?] they arrived [?] at night and in their former berth, at night a great boat was sent by John Trumpet to get them water and to let them know if they would stay there some days longer there would be a very rich ship pass by commanded by the General of Bombay's brother.

"That night they spent in getting of water, and in the morning weighed to continue their cruise southward, having disbursed for Liquor, Provisions &c between six and seven thousand pounds. After finishing their affairs with the Dutch some were for proceeding to Madagascar forthwith, others to stay and cruise for a store-ship for them, the latter at last agreed on, they plied to the southward, where sometime after they see a ship in shore, but she having the wind of them they could not get near her till the sea-wind set in, which was very faint. Night coming on they separated, one ship to the northward and the other to the southward, thinking in the morning to have her between them, but, contrary to their expectation, when day broke, instead of their chase, [they] were very near five sail, who immediately made them signals to bear to them, which put them in great confusion, their consort being three leagues to the southward of them. They immediately stood to

<sup>32</sup> In his Deposition, Lazinby says this was an assumed name, but does not give the real one.

<sup>33</sup> See Lazinby's Deposition, *infra*.

their consort and joined him, the fleet chasing them. Being at first very much dejected, believing it to be the forementioned fleet commanded by Captain Macrae, they made all sail from them possible, and, after three hours found none of the fleet came up with them, only one Grab, who came very near half way between them and the fleet, they began to take courage and rejoice. It presently after fell calm and so continued till night. When the land-wind came they ran directly off shore and in the morning finding the fleet out of sight, were extremely satisfied, not desiring any of Captain Macrae's company. They now thinking themselves out of danger, proposed to carouse and keep their Christmas before they would stir any further, which they did in a most riotous manner, destroying all their fresh provisions they had, and two thirds in waste I believe.

"This lasted near three days, when they then proposed to go to the island Mauritius, there to repair, their leaky ship [the *Victoria*] being in a very bad condition. That being agreed on made the best of their way there. In their passage expected the leaky ship to sink every day. They were going several times to quit her and I believe had done so, were it not for the scarcity of provisions and water, another thing being there a great quantity of Arrack. The allowance among them at that time was one bottle of water per man a day, and not above two pound of Beef and a small quantity of rice for ten men per day, which, had it not been for the Arrack and Sugar, must the greater part of them have perished.

"In this condition they arrived at the Island of Mauritius about the middle of February [1721], where they found very good refreshment, refitted and sheathed their leaky ship, and the 5th of April they sailed in order for the Island Mascarene. They arrived on the 8th ditto in the morning, where they found lying there a large 70 gun Portuguese, whom they immediately took with very little resistance, she having lost all her masts and likewise guns save 21 in a storm they had met with in 13° South Latitude. She had on board, when they took her, the Viceroy of Goa,<sup>34</sup> and several other gentlemen that were Passengers, who came on board that morning believing they were English ships. Having an account of another ship, an Ostender, that lay to the leeward of the island, they made the best of their way to it and took her. She was formerly the *Greyhound Galley* belonging to London.

"There happened a great Cabal among the pirates on the Viceroy's account,<sup>35</sup> some being for carrying him to Mozambique and make him ransom [himself], others saying they did believe this rich prize they had taken might partly belong to him, and said it was better to take a small ransom there than be troubled with him, which was at last agreed on for 2,000 dollars. I then begged to be set on shore, which was granted. Accordingly was [set on shore] on the 10th with His Excellency and the rest of the prisoners. The Governor of the place interceded, as also the Viceroy, very much to leave a ship [either the Portuguese or the *Greyhound*]<sup>36</sup> to carry the prisoners away, alleging that the island was not in a condition to maintain so many people. They with smooth promises said they would call a Council about it to see what might be done, but contrary to that in the night sailed away, carrying with them the best of the men that they had taken in the two ships, besides 200 of Mozambique negroes in the Portuguese, designing for Madagascar, there to

<sup>34</sup> The Count de Roceira.

<sup>35</sup> See below for the traditional story of this affair which became current in the island.

<sup>36</sup> See Deposition.

clean the *Cassandra* and from thence to the Red Sea where, if they met with no success, they would to their old friends at Cochm and sell their diamonds they had taken in the Portuguese ship (which since as the Viceroy told me, were to the value of between three and four millions of dollars) and thence to make the best of their way into the China Seas, believing there might be men-of-war or other ships fitted out in pursuit of them

"During my stay on the island there arrived in May two ships from France bound to Madagascar for slaves and from thence to Mississippi. The beginning of June arrived another from St Malo for China, and in her way to settle the Island of Pule condore [Pulo Condore], having on board her a Governor, two Engineers and about one hundred soldiers and officers. They made but very little stay. When they sailed I took care to write to China to acquaint your Honours of what is herein mentioned.

"On the first of November last arrived the *Triton*, French ship from Mocha, last from the Island of Mauritius, where had stayed forty days, during which time had taken possession of the said island by erecting a large Cross and leaving a French flag flying."<sup>37</sup>

"The Governor of this place had some time before been in expectation of ships from France for that purpose, but none coming had begun to build a small vessel to send up there with people to settle it, much fearing that the Ostenders would do it before them, which he had an account they intended.

"Having now an opportunity, I embarked with the Viceroy and several others for France, but luckily touching at the Isle of St Helena met Captain [William] Hutchinson [of the *Sunderland*], who was so obliging to take me on board, being almost starved in the French ship.

RICHARD LAZINBY "

3 A.

No 99 *Deposition of Richard Lazinby* (Extract)

"And this deponent further saith that during his stay at the said island Don Mascarenhas he saw and discoursed with Captain Condon and about forty of his people, who had been a pyrating, that they told him they had taken a rich India ship, which they brought to Madagascar and sunk her at or near Port St Mary's,<sup>38</sup> and from thence came to Don Mascarenhas on the encouragement of the French King's Act of Grace, that about fifteen of them came from thence taking passage on a French ship called the *Triton*, bound for Europe, on which this deponent also took passage in November last, that Captain Condon and about eighteen more continued on the island and the rest were dead. That this deponent understood from the French Directore there that the French East India Company's orders were that, if any of the pirates on the island died leaving a wife, his widow should enjoy

<sup>37</sup> Bernardin de St Pierre says the French took possession after the Dutch abandoned it in 1712.

<sup>38</sup> Commodore Matthews in 1721/2 found at St Mary's the wreck of a fine Jeddah ship which had been taken by Capt Condon of the *Flying Dragon* with 13 lakhs of treasure on board. The pirates, in ignorance of or careless of their value, had left all the rest of the cargo, spices, drugs, cloth and guns, lying on the shore (Biddulph, *Pirates of Malabar*, p 186). According to Johnson, *History of the Pirates* (II, 140, 143), the *Flying Dragon* was a former privateer which Condon (or Condent) took from the Dutch off the island of St Jago. Johnson says that he assisted in the capture of the Viceroy of Goa (which seems unlikely from Lazinby's account) and that he retired to St Malo where he became a merchant. Condon was in Madagascar in 1720 (see *Miscellaneous Letters Received*, Vol 12, No 256).

the effects belonging to the deceased, but, if not, then such pirates were not allowed to give away any of their effects at their death. This deponent saw the Directore take into his possession the effects of two of the said pirates immediately after notice of their decease. And lastly this deponent saith that the ship *Triton*, in her homeward bound passage, touching at St Helena, found there the ship *Sunderland*, belonging to the United English Company aforementioned, on which this deponent came to England.

## 4

*Account of Bourbon*

"It is well known that the first inhabitants [of Bourbon or Mascarenhas] were pirates, who co-habited with negro [native] women from Madagascar. They fixed here first about the year 1657. The [French] India Company had also at Bourbon a Factory and a Governor who lived with them [i.e. the pirates] in great circumspection. The Viceroy of Goa came one day to anchor in the Road of St Denis and was to dine with the Governor. He had scarcely set his foot on shore before a pirate ship of fifty guns anchored alongside his vessel and took her. The Captain landed forthwith and demanded to dine at the Governor's. He seated himself at table between him and the Portuguese Viceroy, to whom he declared that he was his prisoner. Wine and good cheer having put the seaman in good humour, Monsieur Desforges (the Governor) asked him at how much he rated the Viceroy's ransom. 'I must have,' said the pirate, 'a thousand piastres.'<sup>39</sup> 'That's too little,' said Monsieur Desforges, 'for a brave fellow like you to receive from a great Lord like him—ask enough or ask nothing.' 'Well, well, then I ask nothing,' replied the generous corsair, 'let him be free.' The Viceroy embarked instantly and set sail, happy at having escaped on such good terms. This piece of service of the Governor was recompensed shortly after by the Court of Portugal, who presented his son with the order of Christ.

"The pirate<sup>40</sup> afterwards settled on the island and was hanged a considerable time after an amnesty had been published in favour of his companions, and in which he had failed to get himself included. This injustice was the work of a Judge who was desirous of appropriating his spoils to his own use. But this last villain, a little while after, came to nearly as wretched an end, although the justice of men did not reach him.

"It is not long [written 21 December 1770] since the last of these pirates, whose name was Adam, died aged 104 years."

[J. H. Bernardin de St Pierre, *Voyage to the Isle of France*, p 192]

## 5

*The end of the "Cassandra"*

On the—March 1723 John Freeman, Second Mate of the *Ostend Galley*<sup>41</sup> deposed that he was taken by the *Cassandra* at Don Mascarenhas in April 1721. The *Ostend Galley* was taken thence to St Mary's in Madagascar, but having been sent down the coast for a mast, the Dutchmen and Portuguese on board, finding themselves with only two pirates, put

<sup>39</sup> This would be at the most one quarter of the sum mentioned by Lazmby.

<sup>40</sup> It is a pity St. Pierre does not give us the pirate's name. It may have been Condent or more probably Labouche who was a Frenchman. Again, if it was Taylor, it would account for his good treatment when he surrendered to the Spaniards.

<sup>41</sup> I.e., the old *Greyhound*. See above, p 59.

the latter ashore and escaped with the ship. Freeman said that no less than eighty of the pirates died at St Mary's. In December they sailed thence, the *Victoria* with 64 guns and 100 men and the *Cassandra* with 40 guns and 100 men. At Tullear Bay on the west coast of Madagascar<sup>42</sup> they took a French ship of 200 tons and burnt her. Thence they went to St John's<sup>43</sup> and Dillego [Delagoa Bay] then to Mozambique and to Massaledge,<sup>44</sup> where they parted company, the *Victoria*, now carrying 220 men, with a small sloop of 20 guns going to St Mary's and the *Cassandra*, *via* the Cape, St Helena the Assiento [Ascension Island] Fernando Po, and the Island Rube,<sup>45</sup> to the Shamblan Keys<sup>46</sup> (?) in the West Indies.

[ *India Office Miscellaneous Letters Received*, Vol. 14, No. 162 ]

5 A.

*Letter from Jamaica to Humphrey Morrice Esq., 12 May 1723*

"We have received an account from Portobello by a vessel just arrived from thence that a pirate ship of 40 guns and 140 men was lying about thirty leagues to the windward of Portobello. The ship was the *Cassandra* formerly taken from Captain Mackray in the East Indies. The last place they came from was the Island of Madagascar, having been from thence five months and halfe. The present Captain of the Pirate ship is named Taylor and he has sent down by a small turtle fishing sloop to Portobello, the Doctor of the Pirate ship desiring a pardon. This letter was delivered to the Commander [Captain Laws] of the *Mermard* man-of-war, whom he, the Doctor, informed that the Captain of the Pirate ship was not above twelve leagues distance, and he believed if the Captain of the man-of-war would send up an hostage that the Captain of the Pirate would come down aboard the man-of-war, which was readily consented to and the Captain of the man of war sent down his brother. Two days after the Captain of the Pirate ship came down aboard the man of-war and was very solicitous for a pardon. The Captain of the man of war treated the Captain of the Pirate very civilly and persuaded him to bring down his ship and go with him to Jamaica and he would not molest him. After two days' stay the Captain of the Pirate ship went to his Concerts to prevail with them to surrender to the Captain of the *Mermard* man-of-war. The pirates have got the ship *Cassandra* into so crooked a place that all the Navy of England cannot hurt her. They have lighted [sic] their ship three foot to get her over the shoals and were six days hauling her in between the rocks [so] that it is impossible for any vessel to come near her. They give out that they can divide in silver and gold £1,200 a man, and to have a great value aboard in diamonds besides a great many rich goods."

5-B

*Letter from James Pearce to Humphrey Morrice, 4 July 1723*

"Captain David Greenhill in one of the South Sea Company's *Snows* arrived from Portobello two days before we sailed from Jamaica and brings account that the *Cassandra* Pirate was come into Portobello and the people had a free pardon for themselves and goods [i.e. were allowed to keep their booty], only paying the King's duty, and they were selling their diamonds and India goods there when he came away. They have taken the ship for the King of Spain and christened her with great ceremony."

### ENGAGEMENT BETWEEN THE *REVENGE* AND *BOMBAY GRAB* AND A MARATHA FLEET, 1775

Technically I suppose the Marâthas engaged in this fight were not pirates, as their commander was a Marâtha officer but practically the whole Marâtha fleet engaged in piracy in peace time, and became respectable like the old Elizabethan privateersmen, when war broke out. The fight described below was altogether one sided, as the Marâthas were no match for the English in gunnery, though they were quite as heavily armed as the English ships. In the circumstances attending the encounter now reported one can, therefore, only admire the courage of the Marâtha commander who sacrificed his ship to save the rest of his fleet.

*A Narrative of the Engagement between the Revenge and the Bombay Grab*<sup>18</sup> *with the Moratta fleet off Cape Dobbs*<sup>19</sup> [1st and 2nd February 1775, by a Passenger on the *Bombay Grab*]

The enemy were seen in the morning of the 1st instant, consisting of five large ships and two ketches with some gallivats. At one in the afternoon the two ketches with three gallivats bore away to the eastward. At four the Commodore [John Moore] made the *Grab*'s signal to chase to the south-west. At  $\frac{1}{2}$  past five the ships separated, two departing to the eastward and two to the westward with the remainder of the gallivats. The fifth ship stood on to the south east, which the *Revenge* and the [*Bombay*] *Grab* pursued.

About  $\frac{1}{2}$  past seven in the evening the [*Bombay*] *Grab* had the good fortune to get up alongside within pistol shot of the Moratta ship (since found to have been the *Sensare Jung* [*Shamsher Jung*] of forty guns and 350 men), when she began a brisk firing both with great guns and small arms. Some few of both were returned by the enemy, but far short of what might have been reasonably expected from a vessel of her force. The *Revenge* was at this time far astern nor could she come up till about ten o'clock, when a brisk firing commenced from her also.

The evening being dark, it was impossible to see the damage she must have received from the *Bombay Grab*'s cannonading the shots were heard to strike very forcibly against

<sup>17</sup> Probably at the Gulf of San Blas

<sup>18</sup> Two of the Company's cruisers

<sup>19</sup> By Cape "Dobbs" the writer apparently means the southern point of the mouth of the Vâshishtî river, from which Dâbhol, in Ratnagiri district, is six miles distant.—ED

her sides, and as the *Revenge* had joined us to destroy her, it was reasonably expected she would speedily become a prize to our superior force, and though repeatedly desired not to make any further resistance, yet they [the enemy] refused, preferring to receive a most smart cannonading from both vessels than strike. On her part a very slow fire was returned.

From her keeping so much to the eastward we were of opinion the enemy meant to run their vessel on shore (since we have been informed that was their design), though the [Bombay] *Grab* followed her into  $4\frac{1}{2}$  fathoms rocky ground and anchored, but the Commodore, knowing the *Revenge* drew less water, he directed the boat from each vessel to tow him up alongside the Moratta ship. It was about  $\frac{1}{4}$  before eleven o'clock when the [Bombay] *Grab* anchored. At  $\frac{1}{2}$  past she again weighed and the land wind all the vessels out, prevented the enemy running on shore. At  $\frac{1}{4}$  past she blew up and was continually in a flame from head to stern. The cause of this accident cannot be determined but is reasonably supposed to have happened from the careless manner in which they have their powder or by a hand grenade. Perhaps a shot from one of the vessels struck a bolt in her Magazine, but how it happened is merely conjecture. Sufficient to say that she is totally destroyed.

It is impossible to describe so terrible a picture. The ship itself in flames was dreadful, but more so were the cries of the unhappy sufferers, many of whom after being severely burnt were found swimming, endeavouring to avoid the power of one element by flying to another. Our Commodore sent his own boat and the *Bombay Grab* to relieve as many of the people as they possibly could. To the number of thirty were saved, but many of them such objects that it hurt the nature of man to see them, some shot in different places, others miserably burnt. Many will in all probability die. Every method was used to ease them that was in the power of the Surgeons by the application of such medicine as were proper and suitable.

It is to be remarked how singularly fortunate it was that not a person on board either vessel received the smallest hurt from the enemy, nor did either of our ships suffer, unless from one shot which struck the [Bombay] *Grab* forward. From the nearness with which the Company's vessels began, continued and ended the fight, it was reasonably to be expected that greater accidents would have happened than what did. The situation of each vessel was very dangerous at the time of the explosion as well as from the flames of the Moratta ship, but providentially they have both escaped.

It will ever afford me pleasure to relate with what spirit and bravery distinguished both officers and men on this occasion, each endeavouring to convince how much they were interested in the Honour of that Service in which they are engaged.

At the earnest solicitation of the prisoners, when off Gheriah,<sup>50</sup> the Commodore made a signal for a boat, which being observed by one going into that port from Vengurla, [Vengorla, Ratnâgiri District], she came to the *Revenge*, when those poor creatures were sent on shore—miserable objects indeed!

<sup>50</sup> Gheriah or Vijayadrug, a port in Ratnâgiri district, Bombay.—ED

Whilst lying to off this port there was seen flying a pendant similar to that which the vessel had we burnt, hoisted only half mast up.<sup>51</sup> May it not reasonably be supposed a kind of mourning for either the ship or her commander, as she must be a very great loss to them, being by far the finest ship in their service new and mounting guns of 18, 12, 9, and 6-pounders, which are said to have been taken from the *Saint Anne*, Portuguese ship.

Many enquiries made from the prisoners respecting the strength of the enemy's fleet, which they informed consisted of the following vessels, not including the ship destroyed before mentioned, *viz*:

The <i>Fatch Jung</i> [Fatch Jang]	of 38 guns
<i>Dat Paul</i> [Datu Pal]	26 do
<i>Narror Paul</i> [Narhar Pal]	26 do
<i>Naddow Paul</i> [Naday Pal]	32 do
<i>Rampersad</i> [Ramparshad] Ketch	12 do
<i>Groyparsad</i> [Guruparshad] Ketch	12 do
<i>Shoeparsad</i> [Shivparshad] Ketch	12 do

with two other ketches whose names they did not know, belonging to Rutnagury [Ratnagiri].

They also said that on seeing the [Bombay] *Grab* come up with them, they had determined to board her.<sup>52</sup> but were stopt therefrom by the quick fire kept up from that vessel, which prevented them from keeping on deck. Then sepoys [Marâtha soldiers] went down the Main [hatch or hold] and the lascars sheltered themselves in the Forehold, now and then stealing up to fire a gun or discharge a matchlock.

We learn likewise that on finding themselves so much overmatched the Moratta Commander resolved if possible to run his vessel on shore, as he observed to his own people, when by them desired to strike, that he could not think of so doing, as he would by such an action incur the displeasure of his superior officer, who would decapitate him if ever he returned to Gherrah.

The Head Subedar<sup>53</sup> (the prisoners informed us) left the ship. How many accompanied him we cannot learn, but from the size of the boat concluded but few could have been so fortunate, from whence it may be concluded that the major part of the number have perished.

[ *India Office Records, Home Series, Miscellaneous, Vol. 120, pp. 5—14.* ]

( *To be continued.* )

<sup>51</sup> The flag at half mast replaced the black flag as a sign of mourning as early at least as 1760, but certain countries kept to the old custom much later.

<sup>52</sup> The Marâthas, like the European pirates, were always much more strongly manned than the English ships of war, and generally, when unable to escape, tried to board in order to use their advantage of superior numbers. The warships, on the other hand, with better disciplined crews almost invariably tried to sink or disable them and so force the pirates to surrender without coming to close quarters.

<sup>53</sup> Subedar, the commander of the Marâtha seapoys.

## THE HISTORY OF THE NIZÂM SHÂHÎ KINGS OF AHMADNAGAR

By LT COLONEL T W HAIG CSI CMG

THE following account of the Nizâm Shâhî dynasty of Ahmadnagar is a translation of the second part of the *Burhân i Ma'âsu* by 'Alî ibn 'Azîz Allah Tabâtaba'î of Samnân, of which only three copies are known to exist. The first part of this work containing an account of the Bahmanî kings of the Dakan, is merely introductory and has already been translated by Major J S King, who published his translation in *The Indian Antiquary* Vol. XXVIII, from which it was reprinted in book form in 1900 by Messrs. Luzac & Co., under the title of *The History of the Bahmanî Dynasty, founded on the Burhân i Ma'âsu*.

Meeting Major King in the library of the India Office in 1909 or 1910 I asked him whether he purposed continuing his translation, and on ascertaining that he had no such intention, I made, for my own use, a translation of the rest of the *Burhân-i-Ma'âsu* which I was then reading. I now offer this translation to readers of *The Indian Antiquary*.

The author's style is bombastic and prolix in the extreme and in my translation I have freely curtailed the pompous phraseology of the original. Some passages such as the description of the festivities on the occasion of a royal wedding I have omitted altogether, as being void of historical interest.

The value of the work as a historical document is much impaired by its partiality, the author being a panegyrist of the dynasty whose history he professes to tell. The most flagrant instances of his unscrupulous partiality are his impudent attempt to claim for the founder of the dynasty, in the face of the clearest historical evidence, descent in the male line from the Bahmanî kings, his fictitious account of a defeat inflicted on Mahmud Shâh Begâra of Gujarât by Ahmad Nizâm Shâh fighting in defence of a mythical Mahmûd Shâh of Khândesh, and his praise of the maniac Murtazâ Nizam Shah I.

Nevertheless the chronicle is not without value. It is a record of events in the State in which the author lived, and is probably fairly trustworthy so far as it relates to domestic affairs, and the detailed record of the siege of Ahmadnagar by Akbar's troops is interesting, and is, so far as I know, the only original account of the siege from the point of view of the beleaguered garrison. It contains much information not to be found elsewhere.

Such a work as I have described requires to be carefully compared with other histories and this must be my apology for the number and length of the notes.

## I — ACCOUNT OF THE ORIGIN OF THE NIZÂM SHÂHÎ KINGS OF AHMADNAGAR

Since God's eternal mercy was closely connected with the preservation of the male line and the continuation of the kingdom and prosperity of the family, founded in vicegerency who, from father to grandfather, have been crowned kings and rulers since the days of Bahman the son of Isfandiyâr and, before that, as far back as Kayûmars, He saved the firmly founded house of the pillars of the kingdom of the king of the world, Sultân Muhammad Shâh Bahmanî, from the mroads of ruin and disintegration, and the misfortune of extinction and decay, by the birth of the successful and fortunate prince, a Faridûn with the power of Jamshîd, protected by the one God, Abû'l Muzaffar Sultân Ahmad Bahrî Nizâm Shâh. Although historians differ much in their accounts of that king of high birth and the author of this noble work has seen in the royal library of the Nizâm Shâhî kings a treatise in the noble handwriting of His Majesty whose abode is Paradise,<sup>1</sup> at the end of which he had written, "The writer of this was Shaikh Burhân-ud dîn, son of Malik Ahmad Nizâm ul-Mulk, son of Malik Nâib, who had from His Majesty the title of Ashraf i Humâyûn Nizâm Shâh," yet that which has come before the eyes of the writer of these lines in some works on the history of the sultâns of the countries of the Dakan, and which he has heard from experienced old men of this country, is the story which is now to be related.

Historians of Ahmad Nizâm Shâh have written as follows —

When the king of the world, Muhammad Shâh Bahmanî, was on the throne, some of the *amîrs* who were, by his orders, employed in collecting tribute from, and in laying waste, the country of the idolaters, captured a beautiful damsel. When they saw that she was worthy of the royal bedchamber, they sent her, with other gifts, to His Majesty. The modest virgin, on her arrival at court, found favour in the king's eyes, and was treated more kindly than any other member of the seraglio, as she excelled them all, not only in beauty, but also in courtesy, modesty, fidelity and understanding. Since it was God's eternal will that that Bilqîs of the period, that Mariyam of the age, should be the shell which was to contain the gem of the vicegerency and the place of rising of the star of sovereignty, the plant of her hopes, after the Sultân had gone in into her, bore fruit, and became heavy therewith. When her days were accomplished, a prince was born, and the Sultân on receiving news of the event, rendered thanks to God and gladdened his eyes with the sight of the child. The young prince was entitled Môtî Shâh, and received the name of Sultân Ahmad. The king then bestowed gifts on all around him, and commanded the astrologers to draw the young prince's horoscope with the utmost care. They foretold, from the aspects of the seven planets, that the child would become king, and that the further he could be sent from the court and the capital, the better it would be for the interests of the State.

When they reported the result of their investigations, the king, though delighted by the bright future foretold for the child, writhed with anguish at the thought that he must part from him. At last he decided that the interests of the State would be best consulted by his sending the prince and his mother to Malik Hasan Humâyûn Shâhî who ultimately obtained the titles of Majlis i-A'lâ Mansab i-Mu'allâ, and Malik Nâib, in order that that *vazîr* might send the prince and his mother to Râmgîr and Mâhûr, which were *parganas* far from the capital and held by Malik Nâib, and keep him in that country, taking the greatest pains in his education and in the care of him. Majlis i-A'lâ Mansab i-Mu'allâ Malik Nâib

<sup>1</sup> Burhân Nizâm Shâh I

was therefore summoned, and the Sultân took counsel with him on the project. Malik Nâib agreed that it would be best to send the young prince to Râmgar and promised, as a faithful servant, to neglect nothing that would be for the benefit of him and of his education. The Sultân accordingly carried out his design, and the education of the young prince was entrusted to Malik Nâib.

Some historians say that Sultân Mahmûd Shâh<sup>2</sup> gave Malik Nâib a slave girl from his *haram* and that when Malik Nâib took the girl to his *haram* she was discovered to be pregnant. Malik Nâib of necessity brought the matter to the notice of the king and it was decreed with the connivance of the slave girl, that since that royal offshoot had first seen the light in Malik Nâib's house, Malik Nâib should thenceforth be his tutor and afterwards when Mahmud Shâh came to the throne, the young prince (Ahmad) was generally regarded as the son of Malik Nâib. But God knows the truth of all things.<sup>3</sup>

Maḡlis i A'lâ (Malik Nâib) formed great hopes of advancement from the favour which had been shewn to him, and sent the young prince with a large retinue to Mahûr and Râmgar, which were his own *jâgîrs*, and took the greatest possible care of him. The king too, inquired closely and constantly into the young prince's affairs and devoted much attention to his education, always seeing that he was well supplied with rich clothes, Arab horses, arms, and all that was understood to become his position as a prince, and sending them to him.

When the prince came to years of discretion, having devoted his time to the acquisition of accomplishments and learning, his talk was ever of arms, and the distinction and honour to be gained by their use, and he was ever conversant with them, so that kingship

<sup>2</sup> Sic. A mistake for Muhammad.

<sup>3</sup> This fictitious account of the origin of the Nizâm Shâhi dynasty has apparently been fabricated by the author. The origin of the dynasty is well known. Its founder, Ahmad Nizam ul Mulk, who afterwards assumed the title of Shâh, was the son of Hasan, entitled Malik Nâib. Hasan was a Brâhman, originally named Timâ Bhat, who had been captured in his youth by Ahmad Shah Bahmani in a campaign against Vijayanagar in 1422 or 1423. Although he was captured in Vijayanagar territory, he was a Brâhman of the Marâṭha country, his father, whose name is corruptly given as Bhat, probably a version of Bharon or Bharava, having belonged to the family of the *kulkarnis* or *patnis* of Pathar on the Godâvari, and having fled from that place to Vijayanagar in order to escape the persecution to which he was subjected by the Muslims. From a further corruption of the name of Ahmad's grandfather, the cognomen Bahri, often applied to the dynasty, was formed.

Sayyid 'Alî cites no authority for his story except some unnamed historical works and the oral testimony of some old men. The evidence on the other side, both positive and circumstantial, is overwhelming. There is the statement of Burhân Nizâm Shâh I in his own handwriting, which is mentioned by Firishta (II, 199) as well as by Sayyid 'Alî, that he was the grandson of Malik Nâib; there is the evidence of the historians Firishta and Nizâm ud din Ahmad, author of the *Tabaqât i Akbari*, that Ahmad always passed and behaved as the son of Malik Nâib, and there is the action taken by Burhân Nizâm Shâh I in 1518 when he demanded of 'Alâ ud din 'Imâd Shâh of Berar the cession of the town and district of Pathar, then included in the Berar kingdom, in exchange for another district, on the ground that Pathar was the home of his ancestors and that many of his relations still lived there. On 'Alâ ud din's refusal to cede the district, Burhân I made war on him and annexed it.

The circumstantial evidence is also strong. Had Ahmad been a Bahmani prince he would have called himself Bahmani rather than Bahri, and when the feeble Mahmud was completely dominated by Qâsim, Bard ul Mumâlik, he would have made some claim to the throne of his ancestors, or at least to the regency. The house of Bahman still commanded much respect, and the rebellion of the provincial governors, Yûsuf Khân of Bijapur, Fathullah 'Imâd ul Mulk of Berar, and Sultân Qutb ul Mulk of Golkonda, was a revolt, not against Mahmud Shâh and his four feeble successors, but against the tyranny of the *minors du palais*, Qâsim and his son 'Alî Bard I, whose usurpation they resented. A prince of the royal house would certainly have commanded the allegiance of Qutb ul Mulk and 'Imâd ul Mulk, and probably that of Yûsuf Khân also. As a matter of fact these three *amirs* were hostile to him.

seemed, as it were, to blossom in him, and to be evident in his speech and actions. Indeed, he soon outstripped all in the use of arms. He attained all this perfection in his twelfth year, when Sultân Muhammad Shâh died.

Sultân Muhammad was succeeded, according to his will, by his son, Sultân Mahmûd Shâh. Mahmûd Shâh honoured Malik Hasan Humâyûn Shâhî (Malik Nâib) above all his fellows, and promoted him above all the *amîrs*, so that he became the butt of their envy, and the whole of the management of affairs of State was left in his hands.

## II - ACCOUNTS OF THE EARLY EXPLOITS OF MALIK AHMAD

While the prince was living happily in Râmgîr and Mâhûr, war broke out between Sultân Mahmûd Shâh<sup>4</sup> and the accused Uriya, who was the chief of the irreligious unbelievers of Tîlang. The king, having resolved on a holy war, set out with a large army for the country of the seditious polytheists, and the rebels prepared to resist him. The dispute came at last to actual fighting and a disaster befell the (usually) victorious army, the army of Islâm being defeated by Uriya the polytheist, so that most of the baggage, nay, some even of the ladies and female servants of the *haram*, were disgraced by falling into the hands of the enemy. The prince, on hearing of the disgrace which had befallen the king's army, resolved to go to his assistance, and, assembling his followers, marched in the direction of the enemy, who were pursuing the royal army. He took up a position in a mountain pass which blocked their way, defeated the infidels, and put them to flight. He plundered them and regained possession of the spoil which they had taken from the royal army, including the ladies of Mahmûd's *haram*, and sent these to the king. The king was overjoyed to hear that the prince, with so small an army, had defeated the forces of the unbelievers and had redeemed the honour of the house of Bahman by rescuing the ladies of the *haram* who had fallen into the enemy's hands by reason of the negligence and quarrels of the *amîrs*, but a number of jealous and envious men, who were ever at enmity with Malik Nâib on account of the relation in which he stood to the prince, took this opportunity of recalling to the king's recollection what the astrologers had predicted in respect of the prince, and represented to the king that the prince had now reached years of discretion and that the predictions of the astronomers to the late king were being fulfilled, for strange and wonderful signs of their fulfilment were daily apparent in the prince's actions. They said further that it would be but prudent to consider what steps should be taken to prevent any mischance.

## III - THE ACCOUNT OF THE SENDING OF THE VICTORIOUS PRINCE TO JUNNÂR AND ALL OTHER PLACES IN THE KONKAN, AS FAR AS THE SEA COAST

When the king was beginning to be anxious regarding the prince, which anxiety was perceived by Majlis-i-A'âlâ Malik Nâib, the subjects in the province of Junnâr and its dependencies complained to the king of the oppression of the unbelievers of Shivner and other

<sup>4</sup> Sayyid 'Alî again writes Mahmud for Muhammad. "The prince" is, of course, Ahmad Malik Nâib, his father, was at this time governor of Telingana and the great *vazîr*, Mahmud Gâvân, being suspicious of the loyalty of Malik Nâib and his abler and more energetic son Ahmad, had induced the king, Muhammad III, to separate them by giving Ahmad the command of 300 horse and fiefs in Mâhûr. Another reason for Ahmad's removal from the court was a connection which he had formed with one of the women of the royal seraglio. This intrigue may have suggested to Sayyid 'Alî his story of Ahmad's royal descent. Malik Nâib checkmated the minister by persuading the king to recall Ahmad to Telingana, where the Court then was, as commander of 1,000 horse, and this was the occasion of his return from Mâhûr to the royal camp. The story of the defeat of the royal army is not correct. It was Malik Nâib, governor of Telingana, who was then living at Râjamahendri, who was defeated by the Râja of Urîsâ.

forts in those parts, which were in the hands of the infidels. Malik Nâib seized this opportunity, before the king had issued any orders in respect of the prince, and represented that the prince, who had now come to years of discretion, was the fittest person to be sent to restore order in that country. The king accepted Malik Nâib's advice, and it was decided that the prince should be sent to Junnâr with orders to restore prosperity to that beautiful country, and to do his utmost to this end, applying the plaster of ease and justice to the wounds caused by the swords of the lords of oppression and injustice: thus by his kindness and courtesy consoling the inhabitants of the land.

Malik Nâib, in accordance with the royal orders, issued a *farman* to the prince and sent with it a petition of his own, urging the prince to set out for Junnar without delay on receiving the royal commands, as his enemies had been busy at court and had turned the king against him, and it was to be feared that if the prince did not set out at once, an order might be issued, the rectification of which would be beyond human power. The prince, as soon as he received his orders, issued pay to his army and set out for Junnar. When the prince arrived at Junnâr he was met by the principal inhabitants, and took his seat on the throne of honour and majesty like an independent sovereign, and opened the doors of justice and mercy in the faces of the cultivators, the inhabitants, and the merchants of that country, thus restoring happiness and prosperity to them. Thus all the inhabitants of that country and all travellers therein, Dakanîs and Khurâsânîs, Hindûs and Musalmans, passed their lives in peace and content, and gladly submitted, in all loyalty, to the prince.

Alî Bâlish Dihî, who had been one of the dependants of Khvaja Jahan Mahmûd Gâvân, and was at this time governor of the fort of Châkan and its dependencies, when he heard of the obedience and loyalty of the inhabitants of Junnar, and of the prosperity of that country, was moved by envy and jealousy, the fruit of which can be nothing but shame and repentance, to stray from the way of concord and amity with the prince, and entered into conspiracy with his enemies at court, constantly sending to court lying reports and petitions prompted by self-interest, and the prince's enemies at court taking advantage of this opportunity, persuaded the king that the prince cherished designs on the throne, and thus poisoned his mind against him. The king who was not free from a natural desire to see the prince again, issued an order summoning him to court. The prince marched for Bidar with his troops and was favourably received there, being accorded the honour of the *istighpâl*, which was performed by all the *amîrs* and officers of State, the Sayyids, Shaikhîs and learned men. He succeeded in disabusing the king's mind of the ideas which had been instilled into it by his enemies and was received most considerately and affectionately by him, and acquired further honours. He thus became more than ever the object of the envy and jealousy of his enemies.

When the king heard of the manner in which the prince had treated his subjects in Junnâr, and of the satisfaction of all the inhabitants of that country with him, he sent

<sup>5</sup> This is a garbled account of what actually occurred. After Malik Nâib had outwitted Mahmud Gâvân, the latter, apprehensive of the power of the provincial governors, subdivided the four great *tarafs*, or provinces of the kingdom, into eight. Thus Gulbarga was divided into the provinces of Gulbarga and Bijâpur, Daulatâbâd into those of Daulatâbâd and Junnar, Berar into those of Gawli and Mahur, and Telingâna into those of Râjamahendri and Warangal, and the powers of the provincial governors were much curtailed. The old governors, and especially Malik Nâib, bitterly resented this reform, and in 1481 Mahmud Gâvân's death was compassed by a band of conspirators of whom Malik Nâib was the chief. Malik Nâib succeeded Mahmud Gâvân as minister and sent his son Ahmad to Daulatabâd as governor. These expeditions into the Junnâr province were an attempt to reunite the provinces of Daulatabad and Junnar.

for Malik Nâib, who had been his tutor and mentor, and privately consulted with him as to what should be done with the prince. On Malik Nâib's advice, the king decided that the prince should not remain at court, but should return to Junnâr as governor, and on the following day, when the prince waited on the king, he was given a robe of honour and the honourable title of Nizâm ul Mulk. He was reappointed governor of Junnâr and its dependencies, and it was ordered that any forts that he might conquer from the unbelievers should be added to his *jaghirs*. The prince then left the court for Junnâr where he was welcomed by the inhabitants as before. He took his seat on the throne in the royal capital and again employed himself in administering Junnâr with justice and mercy.

VI.—AN ACCOUNT OF THE PRINCE'S EXPEDITION AGAINST THE FORT OF SHIVNER,  
AND ALL OTHER FORTS AND DISTRICTS OF THE KONKAN "

Since the prince was ever desirous of raising the standard of Islâm and propagating the faith and sacred law of Muhammad by engaging in a holy war and stamping out the strife and wickedness of infidels without faith and without righteousness and most of the forts of the Konkan and the hilly country of the Dâkan were in the hands of the polytheists and idolaters, vile misbelievers who harassed merchants and all other inhabitants of that country, it was necessary for the proper administration of the country that those forts and strongholds should be captured and the infidels punished. The Prince, therefore, with a view to carrying out this work, distributed rewards to the army, and in a short time collected a very large army of horse and foot, and when the army had assembled, the prince ordered that it should march first against Shivner.<sup>7</sup>

Shivner is a fortress situated on a high hill in the neighbourhood of the town of Junnâr so strong that it had never before been captured. The prince's army marched against it. After a short siege, in which the prince's army displayed the most determined valour and the infidels offered a stout resistance, the defenders had no choice but to capitulate, and the commandant of the fort and his chief officers came before the prince with swords and shroûds suspended round their necks and offered him the keys of the place. The prince took pity on them and granted them their lives, and his troops entered the fort, where they recited the *takbîr* and the *kalamah* and, after destroying the temples and dwellings of the idolaters erected mosques in their place. Much spoil, including jewels, money, rich clothes, merchandise, and beautiful slaves was taken by the prince's army and presented before the prince, who took what he required for the treasury and remitted the rest to the troops.

The prince regarded this great victory as an earnest of God's grace, and decided to proceed to the conquest of other forts in the Konkan. After appointing one of his trusted officers to the command of Shivner, he marched against the fortress of Jond, which also is in the neighbourhood of Junnâr.

6 The circumstances in which this campaign was undertaken are misrepresented. Muhammad Bahmanî III died in 1482 and left Malik Nâib, by his will, regent of the kingdom and guardian of his infant son Mahmud Shâh. Malik Nâib transferred his son Ahmad from Daulatâbâd to Junnâr, but also transferred to that province Bîr and many other *jagiras* which had belonged to Daulatâbâd. Ahmad was commissioned to reduce several forts held by Marâthâ officers who were loyal to the Bahmanî dynasty but were not disposed to submit to the regent or to the provincial governors and this campaign was undertaken in consequence.

7 Shivner is the hill fort of the town of Junnâr, situated in 19° 12' N and 73° 52' E.

The army surrounded Jond and captured it without much trouble much spoil falling to the lot of the victors. The prince handed over the fort to one of his trusty officers, and marched on the fortress of Lohagarh, which is known as Lohogarh.<sup>8</sup>

Lohogarh is situated on a high and rocky hill and when the prince reached it he commanded his troops to surround the fortress and to harass the defenders in every way possible. The troops fought with great valour, and the defenders resisted them stoutly, but the army of Islâm prevailed. The fort was taken by storm and the defenders were massacred, their bodies being thrown from the high rock on which the fort is built. The temples of the idolaters were overthrown, and mosques were built in their place. Much plunder was taken, and the prince, after appointing one of his officers *Lohar* of the fort, marched on the fort of Tung and Nikona.<sup>9</sup>

When the prince and his army arrived before Tung and Nikona the garrison, who had both heard of, and seen, the invariable success and victory of the prince, refrained from offering any resistance, and came forth and submitted. The prince had mercy on them and granted them their lives, granting them immunity from any attack by his army. The army, however, obtained much plunder from that place and the prince placing one of his trusted officers in command of that fort, marched to Kondhâna<sup>10</sup> which was one of the greatest forts of that time.

As soon as the prince's army arrived at Kondhâna, that fort like the others, was conquered, and the prince, after appointing one of his servants to command it, marched for Purandhar.<sup>11</sup>

The prince encamped before Purandhar and his troops resolutely attacked. The garrison exerted themselves in its defence, but their efforts were of no avail and the attacking force pressed them ever harder and harder, till they lost hope, and the fort was taken by storm, many of its idolatrous defenders being killed and their houses plundered and then burnt. The prince bestowed the governorship of that fort and its dependencies on one of his officers and marched towards Bhorap.<sup>12</sup>

When the army arrived at Bhorap the prince, by liberally bestowing largesse, encouraged them to attack the place with such spirit that it was at once taken by storm with much slaughter of the polytheists. Temples were overthrown and mosques were erected in their place, and much spoil fell into the hands of the victors, the wives and children of the miserable defenders being made captives. The prince then made arrangements for the restoration of the fortress by placing one of his officers in charge of it, and marched towards Marabdes.

<sup>8</sup> Lohogarh is a fort of some antiquity and importance situated in 18° 12' N and 73° 29' E. It was much used as a State prison by the Nizâm Shâhi kings.

<sup>9</sup> Tung and Nikona are two hill forts, the former five miles to the south by west and the latter twelve miles to the south east of Lohogarh.

<sup>10</sup> A fort situated in 18° 22' N and 73° 45' E and now known as Sinhgarrh which name was given to it in 1647 by Sivaji, when he acquired it by means of a large bribe paid to the Muhammadan commandant.

<sup>11</sup> A hill fort situated in 18° 17' N and 73° 50' E, now a sanatorium for European troops.

<sup>12</sup> A hill fort situated fifteen miles south west of Lohogarh.

The garrison of Malabdes, who had heard of the fate of Bhorap and all other forts, profited by the example which had been given to them, and showed consideration for their wives and children by opening the gates of the fort and appearing submissively before the prince with shrouds round their necks. The prince had mercy on them and ordered his troops to molest neither their persons nor their property, but to destroy all temples and idols and to build mosques in their place. The prince collected an indemnity from them, and ordered a commandant for that fort, and officers to assist him, to be chosen, and a body of troops to be stationed there for its protection, and for the propagation of the holy law of Muhammad. These orders were carried out, and the mind of the prince was set at ease with respect to that fort.

The prince next marched to Jûdhan,<sup>13</sup> and the army besieged that fort and attacked it with great spirit. The garrison at first defended that place bravely, but could not long endure the assaults of the prince's valorous troops, and at length came forth and humbly offered to surrender the fort. Their lives were spared, but the place was sacked, and the property of its inhabitants plundered and their houses destroyed. The prince appointed a trusty officer to the command of that fort, and the army then marched to the fortress of Khaj, and encamped before it.

The fortress of Khaj, like all other forts, was captured with very little trouble, all outward signs of idolatry were overthrown, and much spoil fell into the hands of the victors. The army then marched towards Kher Drug.

When the army arrived before Kher Drug<sup>14</sup> the inhabitants were much alarmed, and submitted with great humility to the prince, who mercifully spared their lives and appointed one of his officers to the command of the fort.

The prince next marched on the fort of Moranjan,<sup>15</sup> and cleared that fortress also of the base existence of evil men, uprooting the foundations of polytheism and infidelity, and thence marched for the fort of Tungî and Tatonî.

Those forts were very soon captured and much spoil, both in money and kind, was taken by the troops.

Thence the prince marched to Maholî, and, having encamped before the fort, issued orders for an assault. His troops attacked the place with great valour, and at the first assault overcame the garrison and captured the fort, and many of the polytheists were slaughtered. Much plunder fell to the lot of the army of Islâm, and the idol temples were levelled with the ground. The prince appointed one of his servants to the command of the fort, and marched on Pâli.<sup>16</sup>

<sup>13</sup> About thirteen miles north west of Junnâr

<sup>14</sup> About twelve miles south of Poona

<sup>15</sup> A fort about forty seven miles south west of Junnâr

<sup>16</sup> A fort about forty five miles west by north of Poona

Pâli is a fortress situated on a high mountain peak rounded like a dome, extremely strong, and well-nigh impregnable. When the prince arrived before it, he ordered that a regular siege should be undertaken and that the siege train should open fire upon it. The army set itself to obey these orders, and to capture the fort from its accursed and idolatrous defenders. The garrison defended the fort most strenuously, but to no avail, for weak gnats and ants, how numerous soever they may be, cannot resist the storm wind. At last victory declared for the Muslims, the vile misbelievers were overpowered, and this strong fortress fell into the hands of the prince. The troops proceeded to slay and plunder, granting no quarter, so that a large number of the unbelievers, young and old, were put to the sword, and rich spoil, elephants, horses, money, and goods, fell into the hands of the captors, and the smoke of annihilation rose from the dwellings of the idolaters and misbelievers. After thus wiping out the infidels, the prince appointed one of his trusty officers to the command of the fort of Pâli, with instructions to repair its ramparts and bastions, and marched for Kot Danda Râjpuri, and encamped before the fort.

The fortress of Danda Râjpuri<sup>17</sup> is a fortress on the shores of the Indian Ocean, so situated that the waters of the ocean come up on two sides of it, and it is approached on the third side by a road across the dry land, but athwart this road runs a deep and broad artificial ditch, connecting the two branches of the sea. The ramparts and bastions of the fort are of stone, and are very high. The garrison of that fort, a band of vile unbelievers, had the greatest confidence in its strength, and contumaciously banded themselves together to oppose the prince. But since the prince was under God's special protection, he was in no way perturbed by the thought of the strength of that fortress, and fearlessly ordered his valiant troops to attack it and send the contumacious miscreants to hell. The army attacked it with great valour, and a terrible fight was fought. The garrison of the fortress discovered that it was useless to attempt to contend with the prince's victorious army, and came forth and humbly submitted themselves to the prince, imploring mercy both for themselves and their children. The prince, in his mercy, ordered the troops to spare the lives of the inhabitants of the fortress, but to plunder their property, in order that they might furnish an example to other contumacious wanderers from the right way, and that nobody might henceforth swerve from obedience, or incline towards disobedience. The army, in accordance with the prince's orders, sacked the place, taking possession of all that belonged to the unbelievers.

In short, in a brief space of time all the forts and districts of the Konkan both above the Ghats and below the Ghats, were captured by the prince's army and there remained nobody who had not submitted to the prince's authority, although the infidels had been many and had fought valiantly.

<sup>17</sup> Danda and Râjpuri were two forts standing on either bank of the Râjpuri creek, on an island at the entrance of which now stand the fort and village of Janjira, situated in 18° 18' N. and 73° E., forty four miles south of Bombay Island. Janjira is the capital of the State of the same name.

The prince, having accomplished all this, returned to his royal capital of Junnâr, where he was welcomed and congratulated by his subjects. He then sent to the king a report of his victories together with rich offerings from the spoil which had been taken by his army. The king of the Dakan, when he heard of the prince's victories, highly praised him before the court, and offered up thanks to God. He bestowed robes of honour on the prince's messengers, and sent by them to the prince a special robe of honour, and a jewelled waist-belt, and bestowed on him in *jâgir* all the forts which he had captured. The prince then enjoyed himself, free from care, in his capital.<sup>18</sup>

(To be continued)

### MORE ABOUT KHWÂJA (AGHA) PETROS

*An Addition to Sidelights on Omukund (ante, Vol XLVII, pp 265—274)*

BY SIR RICHARD TEMPLE

IN the *Life and Adventures of Joseph Emin*, Second Edition, edited by Amy Apear, there is an interesting allusion to the Armenian merchant who remained loyal to the East India Company in 1756-1757 and also a long note (pp 434—438) giving details regarding Khwâja Petros and his family. Both are worth reproducing as an appendix to my article, noted above.

After an account of how Joseph Emin obtained an Ensign's brevet from Governor John Cartier, President of Bengal, in 1770, the author adds the following remark —

‘ Emin omitted inserting that when Mr Cartier favoured him with the brevet, the late rich Armenian Cope Petrus, at that time the earthly god of the other Armenians in Calcutta, being an old acquaintance of the author's father, and hearing of his good success, thought it polite to make him some presents, and ventured to send him a large horse (worth 600 rupees), with rich Turkish silver harness, and a pair of stirrups of the same metal, each large enough to weigh four pounds of silver, together with several fine shawls, the whole of the value of about 2,000 rupees, but Emin, whose spirit was above it, though poor, refused the present, and returned it with the following message —

‘ Several afternoons, when, in obedience to my father, I used to make you visits, you detained me in your house, in the cold season, till it was dark and foggy, without even offering me a mashal [torch] to light me home, and now, when you see me supported by the English, you send me presents! I return them with many thanks. Be pleased to send me some bread and salt, with a maund of rice, and half a maund of ghee, to confirm our friendship and to satisfy you that I can forgive all your Asiatic artful methods of setting a father against his son, who was lost, and then found. The same noble nation, through whom you thrive with riches among the Armenians in Calcutta, have provided, and will provide for me, rest satisfied.’

“ At this the Armenians were astonished, but the noble-minded English admired it, commending Emin for his disinterested spirit, when they heard his simple reasons, saying,

<sup>18</sup> The nature and object of this campaign in the Konkan are entirely misrepresented. Ahmad was not a chivalrous young prince defending or extending the dominions of his elder brother, but a rebellious Provincial governor busily engaged in carving a kingdom for himself out of the *disjecta membra* of the king. The dom of the Bahmanids and in overthrowing all officers who still remained faithful to that dynasty. The absurdity of the claim of royal descent for Ahmad is once more apparent. Mahmud Shâh ascended the throne in 1842 at the age of twelve, and according to Sayyid ‘Alî Ahmad was his younger brother, so that at the time of this campaign, which occurred in 1482 or 1483, he was not more than eleven or twelve years of age. Ahmad had been, in fact, sufficiently old, before 1478, to become an object of suspicion and was then sent to Mûhur as a commander of 300 horse. See note 4.

that to take any thing which is given with an ill will, is not better than exacting it by main force, for neither Petrus, nor any of the same cast, would do a piece of kindness without having some low design in it. They are to be pitied rather than blamed, since having once lost the sweets of liberty, and being kept under exorbitant tyranny for several centuries they are become like fatherless children, and it is impossible they should conduct themselves with the same delicate sentiments as a free or polite nation.

NOTE [BY THE EDITOR, AMY APCAR]

Khoja Petrus Arathoon, the "earthly god of the Calcutta Armenians," died in 1778. Emm is perhaps a little unjust to him. He was the Armenian [who] supplied the refugees at Fulta in 1756 with provisions for six months.

Pietros Arathoon's tombstone in the south choir of Nazareth's Armenian Church, Calcutta, is a white marble stone let into the marble flooring with an inscription in an exaggerated style, as follows — "The eminent princely chief Aga Pietros Arathoon of Erivan, New Julfa, Ispahan, of the family of Abraham, was a lustrous hyacinthine crown of the whole Armenian nation. He acquired a great fame amongst all peoples to the glory of his nation. He worked assiduously and expended lavishly. His generosity towards the destitute orphans and widows was without parallel. By his frequent munificent gifts he erected handsome and well embellished churches. He departed in the hope of salvation at the age of fifty-three, and was placed in this tomb with pomp, in the year of Our Lord 1778, the 29th of August, corresponding with the year 163 of the era of Azariah, the 12th of the month of Nadar."

The word translated princely chief is *Ishkhan*,—prince, or absolute ruler. There were no princes, or even "meliks" in New Julfa. Next to Khojah Pietros lies his wife, under a plain stone of blackish grey marble, inscribed with five lines of Armenian, as follows —

"This is the tomb of Dastagool, the daughter of Aga Minas of the family of Khoja Minas of Erivan (a parish of Julfa) and wife of Aga Pietros. She departed this life on the 3rd of June 1805."

Pietros Arathoon erected two small altars in the Armenian Church of Calcutta, on the north and south sides of the sanctuary there are respectively a vestry and a sacristy, and a flight of steps was introduced in each, leading up to an altar on a higher elevation than the principal altar. In an Armenian Church there should be only one altar but apparently a man of Pietros Arathoon's position was privileged to make an innovation. The inscriptions on the walls facing the congregation above the doors leading from the choir into the vestry and sacristy are as follows. In the north choir —

"This altar in the name of the Apostles S. Peter and S. Paul is [erected] to the memory of Aga Pietros, the son of Arathoon, a native of Old Erivan, in the year of Our Lord 1763." In the south choir —

"This altar in the name of S. Gregory the Illuminator is [erected] to the memory of Aga Gricor, the son of Arathoon, a native of Old Erivan, in the year of Our Lord 1763, December 21st."

Both altars were erected in the lifetime of the donor.

Aga Gricor (Gregory), known in Indian history as Gurgin Khan, was the brother of Aga Pietros. He was in the service of Mir Kasim, commanding his soldiery, and he fought against the troops of the East India Company. He established a foundry at Monghyr for casting cannon and manufacturing firelocks. He died by assassination in August 1763, and his brother erected the small altar to his memory in the same year. Aga Pietros was also the founder of the Armenian Church at Sadabad, built in 1758.

## B

**Bâchmatî**—The river Bâgmatî in Nepal. Eight out of fourteen great Tirthas of Nepal have been formed by the junction of the Bâgmatî with other rivers. The names of the eight Tirthas are —Panya, Śânta, Śankara, Râja, Chintâmanî, Pramadâ, Śatalakshana, and Jayâ. The source and exit of the Bâgmatî are two other Tirthas. Same as **Bhâgvatî**.

**Badarî**—The O-cha-li of Hiuen Tsiang. It has been identified by Cunningham (*Anc Geo*, p. 494) with Edar in the province of Gujarât, it was, according to him, Sauvîra of the Pauranic period. According to the *Bṛhat jyotishârnava*, Edar is a corruption of Ilva-duga. It is situated on a river called Hiranyanadi. The name of Badarî is mentioned in the Dhavala inscription at Vasantagad near Mount Abu (*JASB*, 1841, p. 821).

**Badarî**—See **Badarikâsrama**.

**Badarikâsrama**—Badrinâth in Garwal, United Provinces. It is a peak of the main Himalayan range, about a month's journey to the north of Hardwar and 55 miles north-east of Srinagara. The temple of Nara-Narâyana is built on the west bank near the source of the Bishengangû (Alakânanda), equidistant from two mountains called Nara and Narâyana, over the site of a hot spring called Tapanakunda, the existence of which, no doubt, led to the original selection of this spot. It is situated on the Gandhamâdana mountain (*Asiatic Researches*, vol. XI, article x, *Mahâbhârata*, Śânti, ch. 335). The temple is said to have been built by Śankarâchârya in the eighth century A.D. It was also called Badarî and Bisâlâ Badarî (*Mahâbhârata*, Vana, ch. 144). For a description of the place, see *Asiatic Researches*, vol. XI, article x.

**Badavâ**—Same as **Jvalâmukhi** (see *Mahâbhârata*, Vana, ch. 82).

**Baggumudâ**—Same as **Bhâgvatî**.

**Bâgmatî**—A sacred river of the Buddhists in Nepal. The river is also called Bâchmatî as it was created by the Buddha Krakuchhanda by word of mouth when he visited Nepâla with people from Gauda-deśa. Its junctions with the rivers Maradârikâ, Manis rohinî, Râjamañjarî, Ratnâvalî, Chârumatî, Prabhâvatî and Trivenî, form the Tirthas called Śânta, Śankara, Râjamañjarî, Pramodâ, Sulakshana, Jayâ and Gokarna respectively (*Svayambhu Purâna*, ch. v, *Varâha P*, ch. 215. See also Wright's *Hist. of Nepal*, p. 90).

**Bahela**—Baghelkhand in Central India. It has been placed with Kârusha (Rewa) at Vindhya-mûla (*Vâmana P*, ch. 13). Rewa is also called Baghilkhand (Thornton's *Gazetteer*).

**Bâhika**. The country between the Bias and the Sutlej, north of Kekaya. It is another name for Vâhika (see *Mbh*, Sabhâ, ch. 27, where Vâlheka is evidently used for Vâhika). It was conquered by Arjuna. According to the *Mahâbhârata* (Karna P, ch. 44), the Vâhikas lived generally between the Sutlej and the Indus, but specially on the west of the rivers Ravi and Âpagû (Ayuk Nadi), and their capital was Śâkala. They were a non-Aryan race and perhaps came from Bactria. According to Pânini and Patañjali, Vâhika was another name for the Panjab (IV, 2, 117, V, 3, 114, *Ind. Ant.* I, 122). See *Takka-deśa*. Bâhi and Hika were names of two *Asuras* of the Bias river after whom the country was called Vâhika (*Mbh*, Karna P, ch. 45 and *Arch. S. Rep*, vol. V). They lived by robbery. According to the *Râmâyana* (Ayodhyâ K, ch. 78), Vâluka was situated between Ayodhyâ and Kekaya.

**Bahuda**—The river Dhabala now called Dhumela or Burha-Rapti, a feeder of the Rapti in Oudh. The severed arm of Rishi Likhita was restored by bathing in this river, hence the river is called Bahuda (*Mahābhārata*, Śanti, ch 22, *Hanumanā*, ch 12). But in the *Śiva Purāna* (Pt VI, ch 60), it is said that Gauṛī, the grandmother of Mandhata, was turned into the river Bâhudâ by the curse of her husband Prasenajit. It has been identified by Mr Pargiter with the Runganga which joins the Ganges near Kanauj (see his *Mārkaṇḍeya P*, ch 57). See **Ikshumatî**. But this identification does not appear to be correct, as it is a river of Eastern India (*Mahābhārata*, Vana, ch 87).

**Bahulâ**—A Śakti Pīṭha near Kīṭwa in Bengal (*Tantrachudâmanî*).

**Bairbhraja-Sarovara**—Same as **Manasa-sarovara** (*Hanumanā*, ch 23).

**Baidisa**—See *Bidvîā* (Brahma P, ch 27).

**Baidûrya-Parvata**—1 The island of Mandhata in the Nerbuda, which contains the celebrated temple of Omkaranath, was anciently called Baidûrya Parvata (*Skanda P*, Revâ-Kh). 2 It has been identified by Yule (*Marco-Polo*) with the northern section of the Western Ghats. The Parvata or mountain is situated in Gujarat near the source of the river Visvâmitra which flows by the side of Baroda (*Vaiṇaṇuhita's Brihat-Samhitâ*, ch 14, *Mahābhārata*, Vana, chs 89, 120). 3 The Satpura range the mountain contained Baidûrya or Beryl (cat's eye) mines (*Mbh*, Vana, chs 61, 121).

**Baidyanātha**—1 See **Chitabhūmi**. It is a place of pilgrimage (*Padma P*, Uttara Kh., ch 59). 2 In the district of Kangra in the Panjab. Same as **Kiragrāma** (*Uatsya P*, ch 122). [Temples of Baidyanātha are —In Deogadh in the Sonthal Perganas in Bengal (*Brihad-Dharma P*, pt I, ch 14). See **Chitabhūmi**. For the establishment of the god and the name of Baijnath (Vaidyanātha), see Mr. Bradley But's *Story of an Indian Upland*, ch xi. 2 In Dabhoi, Gujarat (*Ep Ind*, vol 1, p 21). 3 In Kiragrāma on the east of the Kangra district, 30 miles east of Kot Kangra on the Binuan river (ancient Kandukâ-binduka) in the Panjab (*Ep Ind*, vol 1, p 97).]

**Baidyuta-Parvata**—A part of the Kailâsa range at the foot of which the Mânasa-sarovara lake is situated. It is evidently the Gurla range on the south of lake Mânasa-sarovara, the Saraju is said to rise from this mountain (*Brahmanda P*, ch 51). As Mânasa sarovara is situated in the Kailasa mountain (*Râmâyana*, Bala k., ch 24), Baidyuta mountain is a part of the Kailâsa range.

**Baihâyasî**—Same as **Begavatî** (*Devî-Bhâgavata*, VIII, ch 11, *Mack Col*, pp 112, 211).

**Bajayantî**—Banavâsî in North Kanara, the capital of the Kadambas. Same as **Kraûñchapura**. It is mentioned as Vajayanta in the *Râmâyana* (Ayodhyâ K., ch 9). It has also been identified with Bijayadung by Sir R G Bhandarkar (*Early History of the Dekkan*, p 33).

**Baikantha**—A place of pilgrimage about 22 miles to the east of Tinnevely visited by Chaitanya (*Chaitanya charitâmrta*). It is situated on the river Tâmrapararnî in Tinnevely. It is also called Śrivaikānatham.

**Barantya-Nagara**—Where Bhâsa places the scene of his drama *Arimâraka*. It was the capital of a king named Kuntî Bhoja (*Ibid*, Act VI). It is mentioned in the *Harsha-charita* (ch vi) as the capital of Rantideva. See **Kuntî-Bhoja** and **Rantipura**.

**Barâta-Pattana**—The capital of the old kingdom of Govisana, visited by Hsuen Tsiang in the seventh century. It has been identified with Dhikuli in the district of Kumaun (Fuhrei's *MAI*, p. 49).

**Baisâli** — Besâd in the district of Mazaffarpur (Tirhut), eighteen miles north of Hâjipur, on the left bank of the Gandak (General Cunningham's *Anc Geo*, p. 443 and *Râmâyana*, Âdikânda, ch. 47). The *Râmâyana* places Bisâlâ on the northern bank of the Ganges and the *Ava Kalp* (ch. 39) on the river Balgumatî. The Pergana Besârâ, which is evidently a corruption of Bisâlâ, is situated within the sub-division of Hâjipur. Bisâlî was the name of the country as well as of the capital of the Vrijjis (Vajjis) or Licchhavis who flourished at the time of Buddha. The southern portion of the district of Muzaffarpur constituted the ancient country of Vaisâlî. The small kingdom of Vaisâlî was bounded on the north by Videha and on the south by Magadha (Pargiter's *Ancient Countries in Eastern India*). It appears from the *Lalitavistara* that the people of Vaisâlî and the Vajjis had a republican form of government (see also *Mahâ-parinibbâna Sutta*). Buddha lived in the Mahâvan (Great Forest) monastery called Kutâgârasâlâ or Kutâgâra hall, rendered as "Gabled Pavilion" by Rhys Davids (*Chullavagga*, ch. v, sec. 13 and ch. x, sec. 1, *SBE*, vol. XI), which was situated on the *Markata-hrada* or monkey-tank near the present village of Bakhra, about two miles north of Besâd, and near it was the tower called Kutâgâra (double storeyed) built over half the body of Ânanda. About a mile to the south of Besâd was the Mango-garden presented to Buddha by the courtesan Âmiadârikâ called also Ambapâlî. Châpâla was about a mile to the north-west of Besâd, where Buddha hinted to Ânanda that he could live in the world as long as Ânanda liked, but the latter did not ask him to live. The town of Baisâlî, which was the capital of Videha at the time of Buddha and Mahâvîra, consisted of three districts: Baisâlî or Besâlî proper, Kundapura or Kundagâma (the birth-place of Mahâvîra, the twenty-fourth or last Tîrthankara of the Jainas), and Bâmyagâma, occupying respectively the south-eastern, north-eastern, and western portions of the city (Dr. Hoernle's *Uvasagadasao*, p. 4 n., *Âchârânga Sûtra*, and *Kalpa Sûtra* in *SBE*, vol. XXII, p. 227 f.). The second Buddhist Synod was held at the Bâlukârâma-vihâra in 443 B.C., but according to Max Muller in 377 B.C., in the reign of Kâlâsoka, king of Magadha, under the presidency of Revata who was one of the disciples of Ânanda (Turnour's *Mahavamsa*, ch. iv). Baisâlî, however, has been identified by Dr. Hoey with Chidând, seven miles to the east of Chapra on the Ganges (see *Chidând* in Pt. II). At Beluva (modern Belwa, north-east of Chidând), Buddha was seized with serious illness (*Mahâ-parinibbâna Sutta*, ch. ii). Châpâla (*Mahâ-parinibbâna Sutta*, ch. ii) has been identified by Dr. Hoey with Telpâ (or Talpâ, a tower) to the east of the town of Chapra, which was built for the Mother of the Thousand Sons. Titariâ, west of Sewan, has been identified by him with the forest, the fire of which was extinguished by the *Titar* or partridge. The name of Satnamâlâ has been connected with the seven (*sapta*) princes who were prepared to fight with the Mallas for the relics of Buddha. Bhâta-pokhar (Bhakta-Pushkara) is shown to be the place where Drona divided the relics among the seven princes. The country to the east of the river Dahan near Sewan was the country of the Mallas. The river Shi-la-na-fa-ti (Suvannavatî) of Hsuen Tsiang has been identified with the river Sonâ. Dr. Hoey identifies Besâd with the town of the Monster Fish, *Vasâthya* (really porpoise) [*JASB*,

vol LXIX— 'Identification of Kusinara, Vaisali and other Places' and my article on "Chidân in the district of Saran" in *JASB*, vol LXXII The places where Buddha resided while in Vaisâlî are Udena-Mandira, Gautama-Mandira, Saptambaka-Mandira, Bahuputraka-Mandira, Saranda-Mandira, and Châpâla-Mandira (*Maha parinibbâna Sutta* ch 3, Spence Hardy's *MB*, p 343) For the names of other places in Baisâlî where Buddha resided, see *Divyâvadâna* (Cowell's ed, chs xi, xii)

**Baisikya**—Same as **Basîyâ** (*Brahma P*, ch 27)

**Baitaranî**—1 The river Baitaranî in Orissa it is mentioned in the *Mahâbharata* as being situated in Kalunga (Vana Parva, ch 113) Jâipur stands on this river 2 The river Dantura which rises near Nasik and is on the north of Bassem This sacred river was brought down to the earth by Parasurâma (*Padma P*, Tungâî Mîhâtmya, Matsya P, ch 113, Da Cunha's *History of Chaul and Bassem*, pp 117, 122) 3 A river in Kurukshetra (*Mbh*, Vana, ch 83) 4 A river in Garwal on the road between Kedâra and Badrinâtha, on which the temple of Gopeshvara Mahâdeva is situated

**Bâkâtaka**—A province between the Bay of Bengal and the Sinsaula hills, south of Hyderabad in the Deccan The Kailakila Yavanas reigned in this province and Vindhyâsakti was the founder of this dynasty (*Vishnu P*, IV, ch 24, Dr Bhau Daji's *Brief Survey of Indian Chronology*) See, however, **Kilkila**

**Bakresvara**—Bakranâth, one of the Sakti Pithas in the district of Burdham in Bengal It derives its name from Bhairava Bakranath, the name of the goddess being Mahisha mardhini There are seven springs of hot and cold water (*Tantra-chudâmani*)

**Bakresvari**—The river Bâkâ which flows through the district of Burdwan in Bengal

**Bakshu**—The river Oxus (*Matsya P*, ch 101, cf *Chakshu* in *Brahmânda P*, ch 51, see *Sabdakalpadruma* s v. Nadi) Wuksh, the archetype of Oxus, is at a short distance from the river (Ibn Huakul's *Account of Khorasan* in *JASB*, XXII, p 176)

**Balabhi**—Wala or Wallay, a seaport on the western shore of the gulf of Cambay, in Kathiawad Gujarat), 18 miles north-west of Bhaonagar (*Dasakumâra charita*, ch vi, *JRAS*, vol XIII (1852), p 146, and Cunningham's *Acc Geo*, p 316) It is called Vamlapura by the inhabitants It became the capital of Samâshira or Gujarat It contained 84 Jaina temples (*JRAS*, XIII, 159), and afterwards became the seat of Buddhist learning in Western India in the seventh century A D, as Nalanda in Eastern India (Itsing's *Record of the Buddhist Religion* by Takakusu, p 177) The Valabhi dynasty from Bhatârka to Śilâditya VII reigned from c. A D 465 to 766 For the names of kings of the Valabhi dynasty, see Dr Bhau Daji's *Literary Remains*, p 113, *JASB*, 1838, p 966 and Kielhorn, "List of Inscriptions of N India," *Ep Ind*, Vol. VIII, App Bhartihari, the celebrated author of *Bhatti-Kâvya*, flourished in the court of Śridharasena I, king of Valabhi, in the seventh century Bhadrabahu, the author of the *Kalpasûtra*, flourished in the court of Dhruva Sena II (see Dr Stevenson's *Kalpasûtra Preface*) See **Ānandapura**

**Bâhika**—1 The country between the Bias and the Sutlej, north of Kekaya (*Râmâyana*, Ayodhyâ, ch. 78). The *Trilânda-sesha* mentions that Vâhika and Trigarta were the names of the same country (see **Trigartta**). The *Mahâbhârata* (Kâria Parva, ch. 44) says that the Vallikas lived on the west of the Ravi and Âpagâ rivers, i.e. in the district of Jhang (see **Bâhika**). The Madhas whose capital was Sâkala (Sangala of the Greeks) were also called Vahikas. Bahika is the corrupted form of this name. The inscription on the Delhi Iron Pillar mentions the Vâhikas of Sindhu (*JASB*, 1838, p. 630). See **Bâhika**. 2 Balkh—the Bactriana of the Greeks—situated in Turkestan [*Bṛhat samhitâ*, ch. 18 and *JASB*, (1838) p. 630]. About 250 B.C. Theodotus, or Diodotus, as he was called, the governor of Bactria, revolted against the Seleucid sovereign Antiochus Theos and declared himself king. The Græco-Bactrian dominion was overwhelmed entirely about 126 B.C. by the Yue-chi, a tribe of the Tartars (see **Sâkadvipa**). Balkh was the capital of Bactria comprising modern Kabul, Khurasan, and Bukhara (James Prinsep's *Indian Antiquities*, vol. 1). The palaces of Bactria were celebrated for their magnificence. Zoroaster lived at Bactria in the reign of Vitasa or Gustasp, a king of the Bactrian dynasty of Kâvja, between the sixth and tenth centuries B.C. According to Mr. Kunte, Zarathushtra (Zoroaster) is a corruption of Zarat Tvastri or "Praiser of Tvastri." Tvastri being the chiseller and architect of the gods (Kunte's *Excursions of Aryan Civilization in India*, p. 55). From the *Brahma Purâna* (chs. 89 and 132), Tvashti and Visvakarmâ (the architect of the gods) appear to be identical, as well as their daughters Usha and Samjñâ, the wife of the Sun. A few heaps of earth are pointed to as the site of ancient Bactria. It is called Um-ul-Bilad or the mother of cities and also Kubbet ul Islam (i.e. dome of Islam). It contained a celebrated fire-temple. For the history of the Bactrian kings, and the Græco-Bactrian alphabet, see *JASB*, IX (1840) pp. 149, 627, 733, for Bactrian coins, see *JASB*, X, (1842), p. 130.

**Ballâlapuri**. The capital of Adisura and Ballâla Sena, kings of Bengal, now called Râmpâla or Ballalabudî, about four miles to the west of Munshiganj at **Bikramapura** (qv) in the district of Dacca. The Sena Râjas, according to General Cunningham (*Arch. S. Rep.*) retired to this place after the occupation of Gaur by the Mahomedans (*Arch. S. Rep.*, vol. III p. 163). The remains of Ballâla Sena's fort still exist at this place. It is said to have been founded by Râjâ Râma Pâla of the Pâla dynasty, and a large tank in front of the fort still bears his name. He was the son of Vighrahapâla III and father of Madana-pâla. The five Brahmans who came to Bengal from Kanaur at the request of Adisûra, are said to have vivified a dead post by the side of the gateway of the fort into a Gajana tree, which still exists, by placing upon it the flowers with which they had intended to ble the king. It should be here observed that Âdisûra Jayanta or Âdisûra, who ascended the throne of Gaur in A.D. 732, caused the five Brahmans to be brought from Kanaur for performing a Putreshti sacrifice, and he gave them five villages to live in, namely, Panchakoti, Hanikoti, Kâmakoti, Kankagrâma and Batagrâma, now perhaps collectively called Pañchasûra, about a mile from Râmpâla. Ballâla's father Vijayasena conquered Bengal and ascended the throne of Gaur in A.D. 1072. Ballâla Sena, who ascended the throne in A.D. 1119, is said to have been the last king of this

place His queens and other members of his family died on the funeral pyre (the spot is still pointed out in the fort,) by the accidental flying of a pair of pigeons carrying the news of his defeat at the moment of his victory over the Yavana chief Bâyâdumba of Manipur, the Bâbâ Adam of local tradition, who had invaded the town of Bikramapura or as it was called Ballâlapuri, at the instigation of Dharmâ Guri the mahanta of the celebrated Mahâdeva called Ugriamâdhava of Mahâsthâna whom the king had insulted and banished from his kingdom (Ânanda Bhatta's *Ballala-Charita*, chs 26 and 27) Bâyâdumba or Bâbâ Adam's tomb is half a mile to the north of Ballâla bâdi Vikramapura was the birth-place of Dipankara 'Sî Jîhâna, the great reformer of Lamaism in Tibet, where he went in A D 1038, and was known by the name Atisa Râmpâla was also the capital of the Chandra and Varma lines of kings

**Bâlmîki-Âsrama**—Bithur, fourteen miles from Cawnpur, which was the hermitage of Rishi Vâlmîki, the author of the *Râmâyana* Sîtâ, the wife of Râmachandra, lived at the hermitage during her exile, where she gave birth to the twin sons, Lava and Kusa The temple erected in honour of Vâlmîki at the hermitage is situated on the bank of the Ganges (*Râmâyana*, Uttara, ch 58) Sîtâ is said to have been landed by Lakshma a, while conveying her to the hermitage, at the Satî ghât in Cawnpur A large heavy metallic spear or arrow-head of a greenish colour is shown in a neighbouring temple close to the Brahmvartta ghât at Bithur also situated on the bank of the Ganges, as the identical arrow with which Lava wounded his father, Râmachandra, in a fight for the *Keśamedha* horse, this arrow-head is said to have been discovered a few years ago in the bed of the river Ganges in front of the hermitage

**Bâloksha**—Beluchistan The name occurs only in the 57th chapter of the *Aravana Kalpalatâ* From the names of other places and that of Milinda, perhaps the Greek king Menander, mentioned in that chapter, Baloksha appears to be the country of the 'Balokshias' or Beluchis It is called Balokshi in the *Bodhisattvâvadâna-Kalpasûtra* (Dr R Mitra's *Sans Buddh Literature of Nepal*, p 60) Beluchistan was formerly a Hindu kingdom and its capital Kelat or Kalat (which means fort) was originally the abode of a Hindu ruler named Sewâmal, after whom the fort there was called Kalat-i Sewa, now known by the name of Kalat-wa-Neecharah One of the most ancient places in Beluchistan is the island called Sata-dvîpa (popularly known as Sunga-dvîpa) or the island of Sata or Astola (Astula or Kâlî), the Asthala of Ptolemy and Satalishestlo of Huen Tsiang (Astulesvara), just opposite the port of Pasanee (Pâshâni) which is evidently the Pâshân of *Bodhisattvâvadâna-Kalpasûtra* According to tradition, it was once inhabited, but the inhabitants were expelled by the presiding goddess Kâlî in her wrath at an incest that was committed there Sata-dvîpa is the Karmine of Nearchus, which is a corruption of Kâlyana or the abode of Kâlî There is still a Hindu temple at Kalat, which is dedicated to Kâlî or Durgî, and which is believed to have been in existence long before the time of Sewa Another place of Hindu antiquity in Beluchistan is the temple of Hingulaj (see *Hingulâ*) Mustang also contains a temple of Mahâdeva (*JASB*, 1843, p 473—"Brief History of Kalat" by Major Robert Leech)

**Balubāhūnī**—The river Bagin in Bundelkhand, a tributary of the Jamuna [*Skanda P*, Āvāntya Kh (Revā Kh, ch 4)]

**Balukesvara**—The Malabar Hill near Bombay, where Para-surāma established a Linga called Vālukēsvara Mahādeva (*Skanda P*, Sahya Kh, Pt 2, ch I, *Ind Ant*, III, (1874), p 248)

**Bamanasthali**—Banthali near Junagad

**Bamri**—Same as **Biveru**

**Bansa**—Same as **Batsya** (*Jatukas*, VI, 120)

**Bamsadhārā**—The river Bamsdhārā in Ganjam, on which Kalugapatam is situated (Pargiter's *Markand P* ch. 57, p 305, *Imperial Gazetteer of India*, s.v. *Ganjam* and *Vamsadhara*)

**Bamsagulma** A sacred reservoir (kunda) on the tableland of Amarakantaka, which is situated on the east (at a distance of about four miles and a half) of the source or first fall of the Nerbada (*Mahabhārata*, Vana, ch 85)

**Bana**—1 The twelve Vanas of Mathurā-mandala or Braja-mandala are Madhuvana, Tālavana, Kumudavana, Vindāvana, Khadravana, Kāmyakavana, Bahulāvana on the western side of the Jamunā, Mahāvana, Vihāvana, Lohavana, Bhāndīra-vana and Bhadravana on the eastern side of the Jamuna (Lochana Das's *Chaitanya-mangala*, III, p 192, Growse's *Mathurā*, p. 54) The *Varāha P* (ch 153) has Vishnusthāna instead of Tālavana, Kunda-vana instead of Kumudavana, and Bakula-vana instead of Bahulāvana 2 Same as **Aranya** (*Śabdakalpavṛkṣa*) 3 The seven Vanas of Kurukṣetra are —Kāmyaka, Aditi, Vyāsa, Phalaki, Sūrya, Madhu, and Sita (*Vāmana P*, ch 34). 4 For the Himalayan *vanas* or forests as Nandana, Chaitranatha, etc, see *Matsya P*, ch 120.

**Banapura**—1 Mahābalipura or Mahābalesvara or the Seven Pagodas, on the Coromandel coast, Chingleput district, 30 miles south of Madras. It was the metropolis of the ancient kings of the race of Pandion. Its rocks are carved out into porticoes, temples and bas-reliefs, some of them being very beautifully executed. The ruins are connected with the Puranic story of Bali and Vamana. The monolithic "Rathas" were constructed by the Pallavas of Conjeeveram, who flourished in the fifth century A.D. For descriptions of the temples and remains at Mahābalipura, see *JASB.*, 1853, p 656 2 Same as **Soṇitapura**

**Banavāsī**—1 North Kanara was called by this name during the Buddhist period (*Hari-vamśa*, ch 94). According to Dr. Bühler, it was situated between the Ghats, the Tungabhadra and the Barada (*Introduction to the Vikramānkadevacharita*, p 34, note) 2 Same as **Kraunchapura** in North Kanara. A town called Banaouasei (Banavāsī) on the left bank of the Varada river, a tributary of the Tungabhadra, in North Kanara mentioned by Ptolemy (McCrindle's *Ptolemy*, p. 176) still exists (*Lists of the Antiquarian Remains in the Bombay Presidency*, vol VIII, p 188). Vanavāsī was the capital of the Kadamba dynasty (founded by Mayūnavarman) up to the sixth century when it was overthrown by the Chalukyas. Asoka sent here a Buddhist missionary named Rakkhita in 245 B.C. Same as **Jayanti** and **Valjayanti**. In the *Vanavāsī-Māhātmya* of the *Skanda Purāṇa*, Vanavāsī is said to have been the abode of the two Daityas, Madhu and Kaitabha, who were killed here by Vishnu. The temple of Madhukesvara Mahādeva at this place was built by the elder brother Madhu (Da Cunha's *History of Chaul and Bassein*).

**Banāyu**—Arabia (T N Tatakavāchaspatri's *Śabdastomamahānuḥa Rāmāyana*, Ādi, ch vi) It was celebrated for its breed of horses (*Aṭhaśāstra* of Kautilya, Bk II, Aśvādhyaksha) But the ancient name of Arabia as mentioned in the Behistun inscription (*JRAS* vol XV) was Arbaya It appears from Ragozin's *Assyria* that the ancient name of Armenia was Van before it was called Uartu by the Assyrians But Armenia was never celebrated for its horses The identification of Vanāyu with Arabia appears to be conjectural (see Griffith's *Rāmāyana*, Vol I, p 42 note) Araba (Arabia) has been mentioned by Varāhamihira who lived in the sixth century A D (*Brhat sahitā* XIV, 17) The *Padma P* (Svaiga, Ādi, ch iii) mentions the Vanāyavas (people of Vanāyu) among the tribes of the north-western frontier of India

**Banga**—Bengal "In Hindu geography," says Dr Francis Buchanan, "Baga, from which Bengal is a corruption, is applied to only the eastern portion of the delta of the Ganges as Upabanga is to the centre of this territory, and Anga to its western limits" (Beveridge's "*Buchanan Records*" in the *Calcutta Review*, 1891, p 2) According to Dr Bhau Daji, Banga was the country between the Brahmaputra and the Padma (*Literary Remains of Dr Bhau Daji*). It was a country separated from Pundra, Samha and Tāmralipta at the time of the *Mahābhārata* (Sabha P, ch 29) Bengal was divided into five provinces Pundra or North Bengal Samatata or East Bengal, Karna suvarna or West Bengal, Tāmralipta or South Bengal, Kāmarupa or Assam (Huen Tsiang). According to General Cunningham, the province of Bengal was divided into four separate districts after the Christian era This division is attributed to Ballala Sena Barendra and Banga to the north of the Ganges, and Rāda and Bāgdī to the south of the river (but see *JASB*, 1873, p. 211), the first two were separated by the Brahmaputra and the other two by the Jalangi branch of the Ganges Barendra, between the Mahanandā and Karotoyā corresponds to Pundra, Banga to East Bengal, Rāda (to the west of the Bhāgirathī) to Karna-suvarna and Bāgdī (Samatata of Huen Tsiang and Bhāu of the *Akṣarānāma*) to South Bengal (*Arch S Rep*, vol XV, p 145, and see also Gopāla Bhattacharya's *Ballāla charitam*, Pūrva-khaṇḍa, vs 6, 7) Mr Pargiter is of opinion that Banga must have comprised the modern districts of Murshidabad, Nadia, Jessore, parts of Rājshāhī, Pabna and Faridpur ("Ancient Countries in Eastern India" in *JASB*, 1897, p 85) At the time of Ādisūra, according to Devīvara Ghataka, Bengal was divided into Rādha, Banga, Barendra and Gauda At the time of Kośava Sena, Banga was included in Paundravarddhana (see Edilpur Inscription *JASB*, 1838, p 45) The name of Banga first occurs in the *Antareya Āraṇyaka* of the *Rig-Veda* According to Sir George Birdwood, Banga originally included the districts of Burdwan and Nadia Banga was called Bāngālā even in the thirteenth century (Wright's *Marco Polo*) For further particulars, see **Bengal** in Part II of this work Dr Rajendralāla Mitra (*Indo-Aryans*, vol II, ch 13) gives lists of the Pāla and Sena kings [see also *Ep Ind*, vol I, p 305] (Deopārā Inscriptions regarding the Senas), *Ibid*, vol II, p 160 (Badal Pillar Inscription), *Ibid*, p 347 (Vaidyadeva Inscription at Benares), *JASB*, 1838, p 40 (Edilpur Inscription of Kesava Sena from Bakarganj] According to the copperplate inscription of Lakshmana Sena found in Sirajganj in the district of Pabna, it appears that the Sena kings were Kshatriyas who came from Karmata For the ancient trade and commerce of Bengal, see Mr W H Schoff's *Periplus*, Bernier's *Travels*, p 408, Tavernier's *Travels*, Bk III, Mr N Law's article, *Modern Review*, 1918 See **Saptagrāma** and **Karnasuvarna**

## VINCENT AQUILA SMITH

By SIR RICHARD TEMPLE

BY the death of Dr. V. A. Smith, C.I.E., D. Litt., I.C.S., the *Indian Antiquary* has lost a valued contributor of more than forty years standing and India itself an eminent student of her history and antiquities. It is fortunate, indeed, that he was spared to complete his invaluable *Oxford History of India*, a work of the first importance for all who wish to be introduced to an accurate knowledge of the story of that vast country in its many aspects.

His great attainments made it possible for him to take a leading part in the research which led up to his *Early History of India* from 600 B.C. to the *Muhammadan Conquest*, first published in 1904. Of this it has been truly said that it "sifted a vast quantity of evidence scattered in many monographs and periodicals and fashioned it into a connected and sane history." It conferred an immense boon on all interested in ancient India, and particularly on scholars, whose special researches made it difficult for them to assess all the information amassed by others. It became authoritative at once, for the want of such a compilation had been sadly felt. The third edition, published in 1914 with careful revision and large additions, will hold its position for many years to come.

Among other important works and contributions to a great number of Journals, he made a *Catalogue of the Coins in the Indian Museum* at Calcutta in 1906, and writing for Indian students, he compiled an *Oxford History of England* in 1912. He did not confine himself to political and social history, for in 1911 he produced his *History of Fine Art in India and Ceylon*, a work of remarkable usefulness. His *Life of Akbar the Great Mogul* has become very popular as a notable and characteristic account of the great Emperor.

Vincent Smith's connection with the *Indian Antiquary* dates from 1878, commencing with a query on Śaka and Samvat Dates, and since 1885, when this *Journal* passed into the hands of the late Dr. J. F. Fleet and myself, he was a constant contributor to its pages, his notes and papers being naturally concerned with the details of research. He also constantly favoured this periodical with many valuable notices of books and a number of miscellaneous notes on a great variety of subjects connected with things Indian. His contributions covered his favourite studies in history, chronology, epigraphy, numismatics, art and architecture.

His papers were always illuminating and suggestive, even if at times controversial, and in him the world of students has lost a valiant pioneer in many lines of thought and research, and myself an old and valued friend and coadjutor.

*Vincent Smith's principal contributions to the Indian Antiquary*

- 1878 Vol. VII Query Śaka and Samvat Dates
- 1885 Vol. XIV Note in Miscellanea The Coins of the Imperial Gupta Dynasty.
- 1886 Vol. XV A note on the Date of Mihirakula
- 1889 Vol. XVIII A Dated Græco-Buddhist Sculpture
- 1896 Vol. XXV. Query as to a List of Mudrās
- 1902 Vol. XXXI The Inscriptions of Mahānāman at Bodh Gayā
- Revised Chronology of the Early or Imperial Gupta Dynasty.

- 
- 1903 Vol XXXII Tibetan Affinities of the Lichchhavis  
A Chinese Asoka  
Asoka Notes (continued in vols XXXIV, XXXVII,  
XXXVIII, XXXIX)  
The Copper Age and Prehistoric Bronze Implements of India  
(continued in vol XXXVI)
- 1906 Vol XXXV Pigmy Flints  
Bacon's Allusion to the Oxyrhynchus
- 1908 Vol XXXVII The History and Coinage of the Chandel Dynasty of  
Bundhelkhand from A.D. 831 to 1203
- 1909 Vol XXXVIII The Pála Dynasty of Bengal
- 1911 Vol XL The 'Outliers' of Rājasthān  
Discovery of the Plays of Bhāsa, a Predecessor of Kālidāsa  
Indian Painting at the Festival of Empire, 1911
- 1914 Vol XLIII Painting and Engraving at Agra and Delhi in 1666  
Joannes De Laet on India and Shahjahan
- 1915 Vol XLIV Architecture and Sculpture in Mysore, the Hoysala Style  
The Date of Akbar's Birth
- 1918 Vol XLVII Asoka Notes, No XII (continued from vol XXXIX)

#### EPISODES OF PIRACY IN THE EASTERN SEAS, 1519 TO 1851

By S CHARLES HILL

( Continued from p 65 )

#### XXII

#### A MALAY MUTINY, 1792

The Malays have been notorious for their readiness to mutiny ever since they were first employed by Europeans. They are good seamen, but a blow, an insult real or fancied, or the desire and opportunity for plunder have always been sufficient to cause an outbreak.

---

#### *Piracy and Murder*

It is much to be lamented that this infernal practice seems to be gaining ground in India. We have in the instance before us to lament the loss of a most deserving young man, Captain Nelson, who sailed from Bombay in the *Snow Betsy*, bound for the west coast of Sumatra and Batavia. A few days after his leaving Bencoolen, the gunner, seacunnies,<sup>54</sup> and some Malays that were on board formed the plan of cutting off the vessel, and, having procured arms, in the night, during the Chief Mate's watch, came aft on the quarter-deck, wounded him on both his sides and cut him several times in the neck.

---

<sup>54</sup> Helmsmen, from the Arabo Persian *sukkān*, the man who steers the *sukkān*, helm.—ED

The noise he made caused an alarm, which brought up the Second and Third Officers. The Second Officer was immediately despatched and thrown overboard. The Third leaped overboard and swam for the longboat towing astern. Captain Nelson, finding everything lost, leaped out of the cabin window and got also to the longboat, though we have reason to think he was wounded before he left the cabin.

Having no knife to cut the boat's painter, they threw overboard the mast and some oars and committed themselves to this raft. At daylight they were discovered, and a boat with the gunner, some seacunnies and Malays were sent with a few muskets, who shot Captain Nelson and the officer. On their return on board, there were three Caffries,<sup>55</sup> of whom the gunner seemed apprehensive. They were therefore seized and most inhumanly murdered.

The Syrang,<sup>56</sup> collecting from the conversation of the gunner and seacunnies their intention of carrying the vessel to Manilla, began to be apprehensive for his own and the lascars' safety, and formed the resolution of taking the first favourable opportunity of retaking the vessel, which soon after occurred.

Having made the land and a boat being in sight, the gunner, with four of the seacunnies, the carpenter and his mate and some of the Malays went in the *Betsy's* boat in order to purchase some provisions. This was not an opportunity to be neglected. The party being weakened, the Syrang happily gained possession of the vessel, putting the seacunnies that remained on board to death. He afterwards fell in with the *Jane*, Captain Bampton, from China, bound to Bombay. He made a signal of distress which was observed by Captain Bampton, who immediately bore down, and after having learnt all the circumstances, sent an officer on board to take charge of her and conduct her safe to Bombay.

[ *Madras Courier*, 19 July 1792 ]

## XXIII

### KILLING THE WIND. A FIGHT BETWEEN THE DUTCH AND SOME MALAY PIRATES, c 1800

Captain Osborn in his book on Quedah gives this story as told him by an ex-pirate Jadee (Jaddi), who was employed upon a British ship-of-war. A somewhat similar story of a Malay pirate *prahu*, which fought to the last when surrounded by Dutch gun-boats in the year 1715, is to be found in *Parliamentary Papers*, LVI, 1 p. 63 (*Historical Notice upon the Piracies committed in the Indian Ocean*, by J. H. R. J. P. Cornets de Groot, Secretary General to the Minister of the Colonies, 1846), but, from the date of Captain Osborn's book, this story, if true, must refer to an action which took place at a very much later date—probably about the year 1800.

The courage displayed by the Malays against the Dutch was equally exhibited in their fights with the English cruisers, when the latter began to take their share in the suppression of piracy in these seas, but their peculiar animosity against the Dutch was due to a long record of suffering at their hands. Osborn says (p. 145) —“ One example of the Dutch

<sup>55</sup> Probably negro or Malagasy seamen.

<sup>56</sup> The Syrang (Pers. *sarhang*, a boatswain) who is the chief of the Indian seamen, was often the man who had engaged them—in many cases from amongst his own kinsmen or fellow-villagers.

policy may be quoted, and it is no singular instance of their phlegmatic cruelty — John Petersen Koen [Jan Pieterszoon Coen], their most illustrious Governor General of the Indies, exterminated the inhabitants of the Banda or Spice Islands<sup>57</sup> and replaced them by slaves. The piratical acts now [1865] committed in the Malay Archipelago are, I firmly believe, the result of the iniquities practised upon the inhabitants in the olden day, and the Dutch, Spaniards and English, even at the present time, are too prone to shoot down indiscriminately any poor devils who, for the first time in their lives, are told, with powder and shot arguments, that war as carried on by them is piracy by our laws.

In Dubois' *Vies des Gouverneurs Généraux des Etablissements Hollandois*, p. 69, we are told that Governor Coen took the Spice Islands in the year 1621. The greater part of the inhabitants of "Lonthor" (Lantor), which was the capital, retired into the interior, but after some years, when a large number of them had been killed, the remainder, owing to want of food, were compelled to leave the island.

It is, however, I think, certain, that the Malays indulged in piracy from the time of their arrival in these seas, and it is equally certain that the only argument for the suppression of piracy to which they would listen was the argument of force, but how far that argument should have been carried is another question.

#### *Narrative of Jaddi, a pirate*

Long before that action with the English man-of-war which drove me to Singapore, I sailed in a fine fleet of prahus belonging to the Rajah of Johore [Sultân Mahmûd Shâh]. We were all then very rich—ah! such numbers of beautiful wives and such feasting!—but, above all, we had a great many most holy men in our force! When the proper monsoon came, we proceeded to sea to fight the Bugismen [of Celebes] and Chinamen bound from Borneo and the Celebes to Java, for you must remember our Rajah was at war with them. (Jadee always maintained that the proceedings in which he had been engaged partook of a purely warlike, and not of a piratical character.)

Our thirteen prahus had all been fitted out in and about Singapore. I wish you could have seen them, Touhan [*Tuan*, Sir]. These prahus we see here are nothing to them, such brass guns, such long pendants, such creeses [Malay *knis*, dagger]! Allah-il-Allah!<sup>58</sup> Our Datoos [*datuk*, a chief] were indeed great men!

Sailing along the coast as high as Patani,<sup>59</sup> we then crossed over to Borneo, two Illanoon<sup>60</sup> prahus acting as pilots, and reached a place called Sambas [West Borneo] there we fought the Chinese and Dutchmen, who ill-treat our countrymen, and are trying to drive the Malays out of that country. Gold-dust and slaves in large quantities were here taken, most of the latter being our countrymen of Sumatra and Java, who are captured and sold to the planters and miners of the Dutch settlements.

'Do you mean to say,' I asked, 'that the Dutch countenance such traffic?'

<sup>57</sup> The Banda group of islands lies south east of Ceram.—ED.

<sup>58</sup> Lâ ilâha ill'allah, part of the Muhammadan Creed. There is no God but God. However, it is probable that what Jaddi really said, with the Malay pronunciation, was, Allâhu akbar, God is great.

<sup>59</sup> On the eastern side of the Malay peninsula.—ED.

<sup>60</sup> The name of the Mindanao and Sulu pirates, from Illana Bay in the Illano District of Mindanao.

'The Hollanders,' replied Jadec, 'have been the bane of the Malay race, no one knows the amount of villany, the bloody cruelty of their system towards us. They drive us into our prahus to escape their taxes and laws, and then declare us pirates and put us to death. There are natives in our crew, Touhan, of Sumatra and Java, of Bianca [Banka] and Borneo, ask them why they hate the Dutchmen, why they would kill a Dutchman. It is because the Dutchman is a false man, not like the white man [English]. The Hollander stabs in the dark, he is a liar!'

However, from Borneo we sailed to Biliton [island between Banka and Borneo] and Bianca, and there waited for some large junks that were expected. Our cruise had been so far successful, and we feasted away—fighting cocks, smoking opium and eating white rice. At last our scouts told us that a junk was in sight. She came, a lofty-sided one of Fokien [Fuhkien]. We knew these Amoy<sup>61</sup> men would fight like tiger-cats for their sugar and silks, and as the breeze was fresh, we only kept her in sight by keeping close inshore and following her. Not to frighten the Chmamen, we did not hoist sail but made our slaves pull 'Oh!' said Jadec, warming up with the recollection of the event,—'oh! it was fine to feel what brave fellows we then were!'

Towards night we made sail and closed upon the junk, and at daylight it fell a stark calm, and we went at our prize like sharks. All our fighting men put on their war-dresses, the Illanouns danced their war-dance, and all our gongs sounded as we opened out to attack her on different sides.

But those Amoy men are pigs! They burnt joss-paper, sounded their gongs, and received us with such showers of stones, hot-water, long pikes, and one or two well-directed shots that we hauled off to try the effect of our guns, sorry though we were to do it, for it was sure to bring the Dutchmen upon us. Bang! bang! we fired at them, and they at us, three hours did we persevere, and whenever we tried to board, the Chinese beat us back every time, for her side was as smooth and as high as a wall,<sup>62</sup> with galleries overhanging

We had several men killed and hurt, a council was called, a certain charm was performed by one of our holy men, a famous chief, and twenty of our best men devoted themselves to effecting a landing on the junk's deck, when our look-out prahus made the signal that the Dutchmen were coming, and sure enough some Dutch gun-boats came sweeping round a headland. In a moment we were round and pulling like demons for the shores of Biliton, the gun-boats in chase of us, and the Chinese howling with delight. The sea-breeze freshened and brought up a schooner-rigged boat very fast. We had been at work twenty-four hours and were heartily tired, our slaves could work no longer, so we prepared for the Hollanders, they were afraid to close upon us and commenced firing at a distance. This was just what we wanted, we had guns as well as they, and by keeping up the fight until dark, we felt sure of escape. The Dutchmen, however, knew this too, and kept closing gradually upon us, and when they saw our prahus baling out water and blood, they knew we were suffering and cheered like devils. We were desperate, surrender to Dutchmen we never would, we closed together for mutual support, and determined at last, if all hope of escape ceased, to run our prahus ashore, burn them, and lie hid in the jungle until a future

<sup>61</sup> From Amoy in the Fuhkien Channel.—Ed

<sup>62</sup> See *ante*, vol XLVIII, p 167.

day But a brave Datoo with his shattered prahu saved us , he proposed to let the Dutchmen board her, creese [stab with a *kris*] all that did so, and then trust to Allah for his escape.

It was done immediately , we all pulled a short distance away and left the brave Datoo's prahu like a wreck abandoned How the Dutchmen yelled and fired into her ! The slaves and cowards jumped out of the prahu, but our braves kept quiet , at last, as we expected, one gun-boat dashed alongside of their prize and boarded her in a crowd Then was the time to see how the Malay man could fight , the creese was worth twenty swords, and the Dutchmen went down like sheep We fired to cover our countrymen, who, as soon as their work was done, jumped overboard and swam to us , but the brave Datoo, with many more died as brave Malays should do, running a-muck against a host of enemies

The gun-boats were quite scared by this punishment, and we lost no time in getting away as rapidly as possible , but the accursed schooner, by keeping more in the offing, held the wind and preserved her position, signalling all the while for the gun boats to follow her We did not want to fight any more , it was evidently an unlucky day On the opposite side of the channel to that we were on, the coral reefs and shoals would prevent the Hollanders following us it was determined at all risks to get there in spite of the schooner With the first of the land-wind in the evening we set sail before it and steered across for Bianca The schooner placed herself in our way like a clever sailor, so as to turn us back, but we were determined to push on, take her fire, and run all risks

It was a sight to see us meeting one another , but we were desperate we had killed plenty of Dutchmen , it was their turn now I was in the second prahu, and well it was so, for when the headmost one got close to the schooner, the Dutchman fired all his guns into her, and knocked her at once into a wrecked condition We gave one cheer, fired our guns and then pushed on for our lives ' Ah ! sir, it was a dark night indeed for us Three prahus in all were sunk and the whole force dispersed '

To add to our misfortunes a strong gale sprang up We were obliged to carry canvass , our prahu leaked from shot-holes , the sea continually broke into her , we dared not run into the coral reefs on such a night, and bore up for the Straits of Malacca The wounded writhed and shrieked in their agony, and we had to pump, we fighting men, and bale like *black fellows* [Caffire or negro slaves] ! By two in the morning we were all worn out I felt indifferent whether I was drowned or not, and many threw down their buckets and sat down to die The wind increased and, at last, as if to put us out of our misery, just such a squall as this came down upon us I saw it was folly contending against our fate, and followed the general example ' God is great ! ' we exclaimed, but the Rajah of Johore came and reproved us ' Work until daylight,' he said, ' and I will ensure your safety We pointed at the black storm which was approaching ' Is that what you fear ? ' he replied, and going below he produced just such a wooden spoon and did what you have seen me do, and I tell you, my captam, as I would if the ' Company Sahib ' stood before me, that the storm was nothing, and that we had a dead calm one hour afterwards and were saved God is great and Mahomet is his prophet !—but there is no charm like the Johore one for killing the wind !

*N B*—The charm was worked as follows (see p 68) —“ Hand here the rice-spoon ! shouted Jadee, looking as solemn as a Quaker or a haggi [Hâjî] This rice-spoon, by the way, was the only one in the vessel , it was made of wood and used for stirring the rice whilst cooking over the fire , its value to us probably invested it with a certain degree of sanctity The spoon was brought and I tried to look as solemn as Jadee, who calling to his aid the

sanctimonious Alee ['Alî], placed the spoon upon the deck between him and the wind, and the pair of true believers repeated some verses over it—bound themselves by a vow to sacrifice several game-cocks upon a favourable occasion, and then the precious spoon was stuck through the lanyards of the main-rigging, with the handle to leeward. I think I should have died from the effects of suppressed mirth had not the fury of the squall and the quantity of water thrown on board of us given me enough to do to look after the safety of the craft. Jadee, however, sat quietly watching and waiting for the effect of his incantation. At last down came the rain, not in drops but in bucketfuls, and as usual, the wind fell entirely." 63

### CRUELTY OF ARAB PIRATES, 1819

The pirates mentioned in the following account were known as Joasmees (Juasmî, Juasmî) and were early Arab settlers from Nejd on the 'Omân Coast of the western side of the entrance to the Persian Gulf, opposite Ormuz, where they eventually assumed the chief position among a number of Arab tribes. They appear to have started plundering vessels of the weaker tribes about 1765 and became pirates as regards native ships. In 1797 they first attacked and captured a British war vessel, the *Snow Bassein*, for which they were punished by the Cruiser *Viper* in 1798. After this they treated the British flag with respect until 1804, when they came under the influence of the Wâhhâbîs. In the next year they captured the merchant ships *Shannon* and *Trimmer*, and attacked the Cruiser *Mornington*, behaving with great cruelty to all captives. Their extraordinarily cruel treatment of European and other prisoners, including Muhammadans, was no doubt due to Wâhhâbî fanaticism. The Joasmees continued to be a scourge in the Persian Gulf and neighbourhood for the next five years, and intermittently to give trouble till about 1853.

"Bombay, December 18th 1819. We learn by accounts, dated Okamandel<sup>64</sup> 19th November, that some pirates, whether Joasmees or others is not exactly known, have been committing some horrible outrages on that coast. About three days prior to the date of the accounts, a vessel going from Cutch Mandavie [Mândvî in Kachh] to Bate, [Beyt] in which were about 80 Byragees,<sup>65</sup> men and women, had arrived in sight of Bate, when she was unfortunately fallen in with and boarded by the pirates. The vessel had no merchandise on board, being taken up purposely to carry the pilgrims. The pirates cut off the heads of 40 persons and threw their carcasses into the sea, the remainder, with the exception carried off, they wounded with their spears, some in three or four places. The barbarians then

<sup>63</sup> According to Logan's *Journal of the Indian Archipelago*, IV, 690, the Malays have an idea that they can "call the wind," i.e., compel it to come, by sending the cook aloft as high as he can go with a bowl of rice. He then proceeds to make a great noise and scatters the rice about, repeating the ceremony at intervals until the wind comes. Naturally, the opposite effect would be expected from showing an empty spoon to the wind. I suppose the root idea is that the wind can be "called" by a process similar to that which "calls" birds.

<sup>64</sup> Okhâmandal, in Kâthiâwâr, Bombay Presidency.

<sup>65</sup> *Bairâgi*, a sect of Hindu religious mendicants.—ED

took away the sail and, having driven a hole through the bottom of the vessel, quitted her, in the hopes that she would sink and drown the poor wounded creatures left on board. These latter, however, after the departure of the pirates, which was about dusk in the evening, contrived to prevent the vessel filling. Tying together their few remaining clothes they formed a kind of sail and in that way reached Bate. Every assistance was afforded them by the Company's officer at that station in binding up their wounds and supplying them with food, six had notwithstanding died, and it was not expected that more than ten would eventually recover.

At the date of our advices there were then six pirate vessels within 2 miles of the shore, one of the Honourable Company's cruisers was also in sight outside of them, but the shallows and shoals on the coast would preclude her being able to come near them, nor was there any force on shore sufficiently disposeable or provided with light artillery to prevent these plunderers from landing at different places on the coast and sacking and pillaging the neighbouring country. There were reports received from the coast of Mekran, which were confirmed by the persons, who had been fortunate enough to escape out of the pirates' hands, that they intended to attack the temple of Dwarka, where they expected to find great plunder."

## THE HISTORY OF THE NIZÂM SHÂHÎ KINGS OF AHMADNAGAR

By LIEUT. COLONEL T. W. HAIG, C.S.I., C.M.G.

( *Continued from p 75* )

### V—AN ACCOUNT OF THE EXPEDITION OF THE PRINCE, UNDERTAKEN IN ORDER TO ASSIST THE KING, AND OF THE PRINCE'S WARFARE WITH THE ENEMIES OF THE EVERLASTING STATE <sup>19</sup>

While these affairs were in progress, a number of the *amîrs* of the Dakan, being inclined to rebellion against the king of the earth, collected a large army and marched on Bidar with the object of stirring up strife, of which circumstance some mention has already been made. The king of the world at once wrote a *farmân* detailing the seditiousness and faithlessness of the *amîrs*, and sent it with speed to the prince, whom he summoned to the capital. As soon as the prince had read the *farmân* he turned his attention to his army, and, having assembled it, set forth for Bidar.

When the prince's army neared Bidar, the *amîrs* and officers of state went forth to welcome him and attained the honour of kissing his feet. Thence the prince hastened at

<sup>19</sup> The whole of this chapter is a perversion of historical facts. Ahmad visited the capital to support his father the regent, who was attempting to crush the foreign *amîrs*, headed by Yûsuf 'Âdil Khân of Bijâpûr. Active hostilities began by a massacre of some of the Turkish troops. Fighting then began between the troops of Yûsuf 'Âdil Khân and those of Ahmad and lasted for twenty days, in the course of which three or four thousand men were slain. The *'ulamâ* at length made peace between the factions. Yûsuf returned to Bijâpûr and Ahmad to Junnâr but the Dakanî faction retained all power in the capital and Malik Nâib and Fathullâh 'Imâd ul Mulk of Berar were regent and prime minister for the next three years.

once to court and humbly saluted the king, presenting to him a suitable *pishkash* of rich clothes and merchandise, horses and elephants, and receiving in return many marks of royal affection and favour. The king then complained to the prince of the contumacy of his enemies and took counsel with him regarding the suppression of the rebellion. The prince then bade the king take heart, for that he would exterminate the rebels. The king then thanked the prince and prayed to God for his success.

When the rebellious *amîrs* with their troops neared the capital the king went forth with the prince, Majlis-i A'la, Mansab-i-Mu'allâ, Malik Nâib, and the *amîrs* and officers of state from the capital, and the royal forces were drawn up over against the rebel army. A fierce fight ensued, but since the disloyal *amîrs* were treading the path of rebellion, they were unable to attain their object. The prince displayed the utmost valour in the battle, and sent many, with his own hand, to hell. The rebels fought with great courage, but were at length compelled to give way, and fled. The victorious prince pursued them for several leagues, and put many to the sword, capturing all their property and effects, their horses, and their arms. He then returned and respectfully saluted the king, who embraced him affectionately, bestowed on him the high title of Ashraf-i-Humâyûn, Nizâm ul-Mulk Bazrî, and placed on his body a royal robe of honour, and on his head a royal crown, and the prince of the age, Ashraf-i-Humâyûn, Nizâm ul-Mulk Bahrî then obtained leave from the king to depart, and set out for his capital. On his arrival there he busied himself in the management of his kingdom and the administration of justice.

On several occasions after this, Sultân Mahmûd Bahmanî was confronted by difficulties and dangers, and always appealed to the prince for help. Sometimes the prince answered the appeal in person, and after rendering such assistance as was required, returned to his capital, and on other occasions he sent to the king's assistance, with his army, his *amîrs*, such as Zarîf ul-Mulk, the Afghan, and others as will be clear from what has gone before.

VI—AN ACCOUNT OF THE MARTYRDOM OF MAJLIS I-A'LÂ, MANSAB-I-MU'ALLA, MALIK NÂIB WASIYY-I KHÂSS, AND OF THE OCCURRENCE OF STRIFE AND CONTENTION BETWEEN THE VICTORIOUS PRINCE, AND THE AMÎRS OF THE DAKAN

It has already been mentioned that most of the *amîrs* of the Dakan were constantly at strife and variance with the prince and with Malik Nâib, his tutor and foster-father, to whom was entrusted the regency at the capital of Bidar, and were speaking against them to the king, but, since the prince was under God's special protection, their plots came to nought, and the prince prospered ever the more and more, so that the despair and fear of his enemies increased, until, in A.H. 888 (A.D. 1483),<sup>20</sup> when the king with his army had marched

<sup>20</sup> This date is wrong by three years. Malik Nâib, Ahmad's father, was put to death in 1486. The *amîrs* generally were disgusted with his arrogance and complained against him to the king, who was chafing under the restraint to which he was subjected. The king requested Qâsim Barîd ul Mamâlik, Dastur Dinâr to aid him of Malik Nâib, and the latter, becoming aware of the design against his life, fled from Warangal, where the court then was, to the capital, Bidar, and summoned his son Ahmad from Junnâr to his assistance. The king and the *amîrs* followed Malik Nâib towards Bidar, and Malik Nâib, not being strong enough to meet the royal army in the field, prepared to flee to Junnâr, carrying with him the contents of the royal treasury. Dilpasand Khân, governor of Bidar, whom Sayyid 'Alî calls Pasand Kîân, pretended to be Malik Nâib's partisan, but deceitfully dissuaded him from fleeing and sent a secret message to the king saying that he was detaining Malik Nâib in Bidar and awaited instructions regarding him. The king replied that if Dilpasand Khân was a loyal subject he would send him Malik Nâib's head. Dilpasand Khân, at a private interview with Malik Nâib, strangled him, cut off his head and sent it to the king (F. II, 707, 708.)

against the infidels of Telungâna, the prince not being with him, the ill-disposed, finding Malik Nâib deprived of the prince's support and assistance, took advantage to fasten some accusation on that wise minister, and to accuse him to the king of base acts and wicked deeds, and urged the king to issue orders for his execution. The king harkened to their counsel and issued orders for the minister's death—orders which led not only to remorse, but to the ruin of his kingdom.

When Malik Nâib became aware of the plots of his enemies, he fled from the king's camp, but since fate had decreed his martyrdom, the screen of negligence was placed before his eyes, so that he did not take the way of safety, which lay in the direction of the prince's protection, but, reposing confidence in Pasand Khân, governor of the city of Bidar, who was one of his own *protégés*, he went to Bidar, and the wretch, Pasand Khân, whose temerity in committing an atrocious act has earned for him the title of *harām khān* made him a martyr and sent his head to the king.

When the news of Malik Nâib's martyrdom reached Ashraf Humayun, Sultan Ahmad Bahri, he mourned for him and wept bitterly, and all his *amirs* and all his army participated in his grief.

After this calamity the prince displayed greater anxiety than ever regarding the plots of his enemies, and paid more attention than formerly to collecting troops, and to preparing for revenge on his enemies.

Some say that the prince, after the murder of Malik Nâib, left the king's camp with 1,500 horse, all valiant soldiers, and went to Junnâr and strengthened the fortress of Shivner, which had hitherto not been a fortress of any great strength, and increased his forces until he had a most numerous and powerful army.

When the news of the prince's assembling of his forces reached his enemies and opponents, they took counsel together as to the best means of resisting him before he should become too powerful to be resisted, and devoted all their attention to his overthrow. They continued to slander him to the king more than ever, now saying that he had been alarmed for his own safety on hearing of Malik Nâib's death, and that he had withdrawn from his allegiance, and was collecting such an army as would enable him to declare himself independent, and that it was necessary to overpower and disarm him before matters became worse. As has already been mentioned, Sultan Mahmud Shah Bahmani had, in the later days of his reign, very little power in the state, and was a king only in name, the *amirs* managing all public business, the most powerful of them for the time being making himself regent until he was overcome by a combination of the others, and another was set up in his place. Thus the king, as he was too weak to manage any important affair, was induced to issue a *farmân* to the prince's enemies, giving them authority to take such action as they might deem best in the interests of the state. Accordingly, these lovers of strife agreed among themselves that a force should be sent, under the command of some of the boldest officers of the royal army, against Sultan Ahmad, in order that his power might be broken, and his well-wishers and faithful servants might be dispersed. They therefore selected Shaikh Mu'addi, the Arab, entitled Nâdir-uz Zamân, who was distinguished above all the officers of the royal army for his valour and intrepidity, to take command of the army to be sent against Sultan Ahmad Nizâm ul-Mulk Bahri, and he accepted that arduous task, while those who appointed him plumed themselves on the courage and

valour of the fool, believing that a lamp could remain alight in the storm-wind, and that a crafty fox would prevail against the teeth and claws of a raging tiger <sup>21</sup>

When the contemptible and impertinent Shaikh undertook the expedition against the prince, he was given the command of 1,200 fierce Arab lancers, who were his own troops, and, taking the road to prison, encamped at Parner <sup>22</sup> The prince was informed by his spies, of the designs of his enemies, and of the appointment of Nâdir-uz-Zamân with his Arabs as an expeditionary force He assembled his forces, and, opening the doors of his treasuries, distributed both to his foot, and to his horse, liberal largesse, gold, horses, and arms, and soon had such an army as would have astonished the god of war The army having assembled, the prince marched from Junnâr to Nakot, so that a distance of not more than four leagues intervened between his army and that of the enemy

#### VII —AN ACCOUNT OF THE PRINCE'S EXPEDITION AGAINST 'ALÎ-TÂLISH DÎHÎ, AND OF THAT ILL-DOER'S REWARD FOR HIS ERRORS

In the midst of these affairs the prince's informers reported that 'Alî Tâlîsh Dîhî,<sup>23</sup> who was the governor of the fort of Châkan-<sup>24</sup> and its dependencies, and of whose enmity to the prince some mention has already been made, had taken advantage of the prince's being occupied with his enemies, to assemble his troops, and was impudently marching to the support of Shaikh Mu'addî The prince determined to march first against 'Alî Tâlîsh and crush him before he could join Shaikh Mu'addî, and it so happened that the arrow of his design hit its mark, and that his well-conceived plan led to the complete defeat of both armies

The prince sent for Masnad i-'Âlî Malik Nasîr ul Mulk Gujarâtî,<sup>25</sup> who was at that time *vakîl* and *pîshvâ*, and took counsel with him Masnad i-'Âlî highly approved of the prince's plan, and it was decided that Nasîr-ul-Mulk Masnad i-'Âlî should remain where he was, with the main body of the army, and that the prince should take a picked body of men by forced marches against Zain-ud-dîn 'Alî Tâlîsh, should fall upon him, crush his army, and put him to death before he could effect a junction with Shaikh Mu'addî, and should then return to the main body of his army and deal with the Shaikh The Prince, having chosen the force which was to accompany him, impressed upon Masnad-i-'Âlî the necessity

<sup>21</sup> It was at the instigation of Qâsim Barîd, who had succeeded Malik Nâib as *marre du palais*, that this expedition was sent against Ahmad Qâsim first tried to enlist the aid of Yusuf 'Âdil Khân of Bijâpûr, who had been the bitter enemy of Malik Nâib, but it was the system rather than its representative that Yusuf opposed and he transferred to Qâsim all the ill will he had formerly borne to Malik Nâib He not only refused to act against Ahmad but sent him a message of condolence on the death of his father, encouraged him to resist Qâsim and withdrew a force of 10,000 horse which he had sent to Indâpur to support Zain ud dîn 'Alî Tâlîsh, governor of Châkan, who resisted Ahmad's authority It was on the failure of the negotiations with Yusuf that Qâsim dispatched the expedition under Shaikh Mu'addî, whose title is given by Firîshî as Bahâdur uz Zamân (F u, 182)

<sup>22</sup> About 23 miles west by south of Ahmadnagar

<sup>23</sup> Called by Firîshî, Zain ud dîn 'Alî Tâlîsh and mentioned on page 6 as 'Alî Bâlîsh Dîhî Tâlîsh is a district on the south western coast of the Caspian

<sup>24</sup> Situated in 18° 45' N and 73° 32' E

<sup>25</sup> According to Firîshî, Ahmad had appointed Zarîf ul Mulk the Afghan his *amîr ul umaid* and Nasîr ul-Mulk Gujarâtî his *amîr i jumla* The appointment of officers with these titles was tantamount to a declaration of independence

of remaining where he was and of refraining from attacking the enemy Masnad-i-Âlî promised obedience and declared that he would avoid any conflict with the enemy until the prince returned. The prince, with his chosen force, then set out at night, by forced marches, for the fortress of Châkan.<sup>26</sup>

'Âlî Tâlish Dihî was still making his preparations for war and collecting his troops when the prince's force suddenly fell upon him. 'Âlî Tâlish Dihî came forth to meet them as best he could, and fought bravely against them, but to no avail for he and his troops, after fighting for some time, could withstand the prince's force no longer, and Âlî Tâlish Dihî was slain and his troops were put to flight. The victorious king put a large number of fugitives to the sword and much spoil fell into the hands of the victors, and was presented, together with the head of 'Âlî Tâlish Dihî, to the prince. The victorious king, after slaying and plundering his enemies, turned towards Masnad-i-Âlî,<sup>27</sup> who having heard of his master's victory, was emboldened to attack Shâikh Mu'addî and his followers. As this action was contrary to the will of the king, the usually victorious troops were defeated and dispersed, and Nasîr ul Mulk was compelled to retire on his former position, and halt there. The king then arrived with his victorious troops, and was much annoyed on hearing of Masnad-i-Âlî's untimely action and of the presumption of the enemy. He severely rebuked Nasîr ul Mulk, and told him that disobedience to the commands of one's master could bear no other fruit than mishap and repentance. Masnad-i-Âlî humbly asked for pardon. The king graciously forgave him, and said that with God's help he would crush the rat-eating Arabs.

Shâikh Mu'addî had been rendered over confident by his temporary success and was devoting himself to pleasure, with no thought of fighting, and the king Ahmad purposely delayed attacking him for a few days, in order that he might grow still more careless, and then marched one night at midnight to attack him. He reached the enemy towards morning and found that they were still sleeping the sleep of negligence. He therefore fell upon him. He took them completely by surprise, and though the Arabs, when they woke, fought bravely, it was of no avail, and Shâikh Mu'addî and nearly all his followers were killed. The few survivors fled, and with much difficulty reached Bîdar, while all the camp, the baggage, the horses, and elephants fell into Ahmad's hands.

The victorious king, after thus slaying and plundering his enemies, returned triumphantly to his capital, Junnâr, the inhabitants of which humbly congratulated him on his success.

When the news of the death of Mu'addî and of 'Âlî Tâlish Dihî, and of the defeat of the army which had been sent against the prince, reached the ears of the king of the world (Mahmûd Shah) and of his *amîrs*, great fear fell upon them, and they bitterly repented of their action in sending against so brave and powerful a prince, whose power they had underestimated, a small body of troops. They saw that the prince was growing more powerful

<sup>26</sup> Firishta says that Ahmad first sent Zam ud dîn 'Âlî a message proposing a reconciliation to which Zam ud dîn 'Âlî agreed but afterwards changed his mind on hearing of the advance of Shâikh Mu'addî. Ahmad, on learning that Zam ud dîn 'Âlî was awaiting an opportunity of joining the Shâikh, left his army and marched rapidly to Châkan with a small picked force, scaled the walls by night and put Zam ud dîn 'Âlî and the garrison, consisting of 700 foreign archers, to the sword.

<sup>27</sup> Firishta says that Nasîr ul Mulk was successful against a part of Shâikh Mu'addî's force but when he encountered the main body, led by the Shâikh in person, he sustained a crushing defeat and was obliged to retreat and join Zarîf ul Mulk.

and his followers more numerous every day, while their own army was enfeebled and disheartened. It was decided that the best plan would be to send against the prince a large army of experienced veterans under the command of a cautious but active officer, and that this force should be sent against him before he grew too powerful to be meddled with. Accordingly, most of the *amîrs* and officers who were at the royal court, with eighteen *amîrs* who chose to serve against the prince, were appointed to the army which was to act against the prince. Some say that the first of Sultân Mahmûd's *amîrs* to take the field against the prince, was Majlis-i Rafî 'Yûsuf 'Adil Khân,<sup>28</sup> and that a great battle was fought between him and the prince, but in all these wars the prince was victorious. Sultan Mahmûd then appointed the eighteen ministers who were always in attendance on him to the army acting against the prince, and 'Alî Tâlish Dihî came from the fort of Châkan to the assistance of the *amîrs*. The royal army encamped near Wargâon, and the prince's army was in Wargâon. Sultan Mahmûd's *amîrs* then sent on several of the principal officers of the army with the advanced guard against the prince, and the prince sent Rûmî Khân and Châlak Khân to repulse them. These officers overcame the advanced guard of the royal army, slew many, and captured three elephants, which were presented to the prince. The next day the prince marched from Wargâon and encamped at Kapar, where his spies reported to him that the royal army was drinking morning and evening, and in their pride took no account of the prince's army. The prince accordingly marched at midnight with his army to attack the *amîrs*, and with 'Alî Tâlish Dihî fell upon them before morning broke. The *amîrs* were captured and stripped to the waist and were then ridden on buffaloes through the prince's army. After that they were let go. The prince highly honoured 'Alî Tâlish Dihî, and again conferred on him the command of the fortress of Châkan. After a while the prince asked for that fool's daughter in marriage, and 'Alî Tâlish attempted to put him off with excuses. The prince then led an army against Châkan, captured it, put 'Alî Tâlish Dihî and his principal officers to death but laid no hands on his daughter, who was in the fort, for 'Alî Tâlish Dihî when the prince asked her in marriage, had uttered words which changed his inclination to dislike. The prince then levelled the fortress of Châkan to the ground. But God alone knows the truth of the matter.<sup>29</sup>

#### VIII AN ACCOUNT OF THE SECOND EXPEDITION OF THE PRINCE'S ENEMIES AGAINST HIM

The *amîrs* who elected to fight against the prince (Ahmad), left the capital of Bidar with a large army and marched to the foot of the Merî Ghât. When spies brought the information that they had with them a very large army, the prince, although his views in all contingencies were such that they always proved in the end to be in conformity with what had been decreed by God, summoned Masnad-i 'Alî Malik Nasîr-ul-Mulk Gujarâti and the officers of his army, and took counsel with them. Some, noted for their bravery,

<sup>28</sup> This is a mistake. Yusuf 'Adil Khân did not take the field against Ahmad on this occasion. 'Azamat ul Mulk the minister commanded the first force sent against him from Bidar after the defeat of Shaikh Mu'addi, but the account here given by Sayyid 'Alî seems to be a confused medley of the records of two or more expeditions.

<sup>29</sup> This account, given as an alternative to what has gone before, is incorrect. Zam ud din 'Alî did not change sides as described, and he had already been slain. Ahmad certainly did not level the fort of Châkan with the ground, for portions of a structure anterior to the date of the capture of the fort by Ahmad are still standing.

advised the prince to attack the enemy, while others known for their cowardice, advised another course, but the prince followed the advice of neither. To be drawn unnecessarily into action with an enemy so much more numerous than his own was, he argued, imprudent, while to fly before them would mean disgrace. He therefore determined on a stratagem which would bring disunion between them and throw them into such confusion that they might safely be attacked. The prince then said that his design was to make a forced march on Bîdar, with a picked body, to bring the *haram* of Malik Nâib and his own servants forth from the city, and to carry off the wives and families of the *amîrs*, in order that he might be freed from anxiety regarding the former and might have an opportunity of falling on the latter when they were thrown into confusion by the news of the raid.

The prince therefore marched from Junnâr with his army, and, avoiding the enemy, marched on Bîdar. The enemy, when they heard of his movement, thought that he was flying from them, and gave themselves up to enjoyment, untroubled by any anxiety regarding a battle. The prince, however, pressed on, and in a very few days arrived before Bîdar, and, entering the city by night, before any of his enemies were aware of his movements, gained possession of the children of Malik Nâib and his own servants, put them into *pâlkis* and *singhâsans*, and sent them off to Junnâr under the escort of some trusted troops and eunuchs. He then carried off from Bîdar the families of the *amîrs* who had been sent against him, with the servants and eunuchs who attended them, and sent with them another detachment of his troops, to whom he gave strict injunctions to guard the captives and their honour most carefully, and to attend to all their comforts. The prince followed them with the remainder of his troops, and when all had proceeded one stage from the city the prince had tents pitched for the wives of the *amîrs* and allayed their anxiety. The next day the *kotwâls* and guards of the city of Bîdar informed the king of the prince's raid, and of his carrying off the *haram* of Malik Nâib and the wives of the *amîrs*. He accused the *amîrs*, who were at court, of negligence, and sent eighteen of the principal *amîrs* to pursue the prince and recover the wives of the other *amîrs*, nay more, to capture the prince and bring him to court.<sup>30</sup>

Some of the histories of the prince relate that when the *amîrs* who had been sent against him were defeated, Sultân Mahmûd took the field against the prince in person, and marched on Junnâr, with a large army, and that when the prince heard that he had taken the field, he considered that it would not be politic to fight against the king, who was his elder brother, and his father's heir, and that he left the fortress of Shrivner in the hands of one of his trusted officers, and himself marched on Bîdar by way of Daulatabad. When he

<sup>30</sup> Sayyid 'Alî's principle apparently is to collect all the conflicting accounts he can find of a campaign and to offer them to his readers either as different accounts of the same campaign, among which they are at liberty to take their choice, or as accounts of different campaigns. What really happened after the defeat of Shaikh Mu'addî's force was as follows. Mahmûd Shâh, or rather his *man du palais*, was much annoyed by the news and sent against the rebel a large force under the minister Azamat ul Mulk, with eighteen other *amîrs*. Ahmad was too weak to meet this force in the field and, eluding it, made a forced march on Bîdar. Having corrupted the guard at one of the gates he entered the city and carried off his own household and the wives and families of the *amîrs* in the manner described by Sayyid 'Alî. The *amîrs* dared not attack him now, but sent him a message reproaching him with having warred against women, whereupon he sent them wives and families back to them, and retired to Parenda.

Mahmûd Shâh bitterly reproached the *amîrs* with having permitted the rebel to raid the capital and they, in reply, laid all the blame on Azamat ul Mulk's incompetence. Azamat ul Mulk was recalled to the capital and Jahangir Khân from Telingâna was appointed to the command of the army and sent to join it at Bîr.

reached Bîdar he collected his own *haram*, which had been left in the capital until then, Malik Nâib's *haram*, and the *harams* of those *amîrs* who were in his service, and returned by another way.

When the king reached the neighbourhood of Junnâr and learnt of the prince's flight he set his heart on capturing the fortress of Shrivner, and laid siege to it. The *kotwâl* of the fort prepared to defend it, and removed from his mind any thought that he was bound by ties of duty to the king. The king sent a message to the *kotwâl* to say that all forts and districts were in his hands and that the young prince himself was no more than one of his servants. He said that the *kotwâl* was committing an error in refusing to submit to him. The *kotwâl* replied that the prince had entrusted the fort to him, and that if he were false to the prince and surrendered the fort to the king, the latter could thenceforth have no confidence in him.

In the meantime the news of the prince's raid on Bîdar reached the king's army, and the king was perturbed by the thought that the prince might have seized the capital and placed him in great straits. He set out for Bîdar by the road by which the prince was returning, but the prince, turning aside, avoided him. The king then issued a *farmân* summoning the prince to court, and attempted to satisfy him by means of a safe conduct, but the prince sought refuge in plausible excuses and avoided attendance on the king. After this the king molested the prince no more till the day of his death.

It is clear that this story is more probable than the other, for it is more credible that it was in the king's absence, rather than when he was in the capital, that the prince ventured to go to Bîdar and carry off the *haram*.<sup>11</sup>

( *To be continued* )

## ANDAMANESE IN PENANG, 1819

By SIR R. C. TEMPLE

### *Prefatory Note*

THE two following accounts of the same event, namely a visit to Penang of two Andamanese captured by a Chinese junk in 1819, are taken respectively from the *Prince of Wales Island Gazette* of the 3rd April 1819 and from the May 1867 number of a now extinct journal called *Indian Society*, published in Calcutta.

Both accounts purport to relate the circumstances of the capture and the visit, embellished by remarks from Hamilton's article on the Andamans in his *East India Gazetteer*, published in 1815, his information in its turn being based on Colebrooke's paper on the Andaman Islands, No. 27 of vol. IV, *Asiatic Researches*, ed. 1799 and on Symes' *Embassy to Ava*, published in 1800. The later version of the story has also further details of the Andamanese taken from Mouat's *Adventures and Researches among the Andaman Islanders*, published in 1863.

The first account was written by John Anderson, Secretary to Government, Prince of Wales Island, and the second by his son, Captain T. C. Anderson, Bengal Staff Corps.

The footnotes to the accounts will show where they are in error.

<sup>11</sup> In spite of Sayyid 'Alî's estimate of its probability, this story is incorrect, and Mahmud Shâh was in the capital when Ahmad made his daring raid.

## I

On Thursday morning were landed on the beach two Negroes<sup>1</sup> from the Andaman Islands, captured by the crew of a China Junk. Their appearance excited much interest and curiosity as a race of people generally considered as Cannibals.<sup>2</sup> The following account of them has been obligingly communicated to us by a Gentleman who has very humanely taken them under his care.<sup>3</sup>

"A Chinese Junk manned partly by Chinese and partly by Burmahs proceeded to the Andaman Islands to collect Becho de Mer [*beche de mer*], and laying about 2 Miles from the shore, they observed about 8 or 10 of the Savages approaching the Junk, wading through the water. Upon coming within a short distance of the vessel they discharged several showers of arrows, which severely wounded four of the Chinese. The Burmahs gave immediate pursuit in their boat, and after much difficulty took two of the Savages prisoners.

"During the chase they were frequently observed to dive and to make their appearance at a considerable distance to elude their pursuers. Several of the arrows were picked up by the Chinese, which are now in my possession, they are made of Rattans with a piece of hard wood for a point, and an iron nail or fish bone fastened to the extremity in such a manner as to make it difficult to extract, if it enters the body.<sup>4</sup>

"These Negroes are extremely diminutive in stature, though apparently well formed and their limbs and arms are uncommonly small, one of them is 4 feet 6 inches, the other 4 feet 7 inches high, and each weighing 76 lbs. Avordupois. They have large paunches and though so small, are in good condition. One is an elderly man of ferocious aspect, the other a boy of about 17, of a good expression of countenance. They appear dull and heavy, extremely averse to speaking, when conversing, which they only do when left alone and imagine they are unobserved, they make a noise resembling much the cackling of Turkeys.<sup>5</sup> They are of a jet black colour and their skin has an extraordinary shining appearance, and their bodies are tattooed all over, of a most voracious appetite, and crack the bones of fowls with their teeth with the greatest facility. Their manner of ascending a Coconut Tree is remarkable, running up like a monkey, and descending with astonishing velocity."

As some account of the inhabitants of the Andamans may not be unacceptable to our readers, we have great pleasure in submitting the following extract from the *East India Gazetteer*, which, it will be observed, corresponds materially with the description given of the two Negroes abovementioned.<sup>6</sup>

"The population of the great Andaman and all its dependencies does not exceed 2,000 or 2,500 souls. These are dispersed in small societies along the coast, or on the lesser islands within the harbour, never penetrating deeper into the interior than the skirts of the forest.

<sup>1</sup> The Andamanese are not Negroes but Negritos.

<sup>2</sup> They are not and never have been cannibals. See Temple, *Census of India*, 1901, Vol. III. *Andaman and Nicobar Islands*, pp. 48 and 44, where it is explained how the error arose and also why the Andamanese first met with by the English were hostile to all strangers.

<sup>3</sup> That is, Mr John Anderson himself.

<sup>4</sup> See E. H. Man, *On the Aboriginal Inhabitants of the Andaman Islands*, pp. 139-141.

<sup>5</sup> This is a gross misrepresentation. Andamanese on growing old are apt to become dull, but are anything but unintelligent while young and in the vigour of life. Their languages are characteristic of savages, but show a long history of intelligent development.

<sup>6</sup> The rest of the description is taken from Hamilton, *East India Gazetteer*, vol. I (ed. 1815), s. v. *Andamans*.

Their sole occupation seems to be that of climbing rocks or roving along the margin of the sea in quest of a precarious meal of fish, which, during the tempestuous season, they often seek in vain <sup>7</sup>

“It is an object of much curiosity to discover the origin of a race of people so widely differing, not only from all the inhabitants of the neighbouring continent, but also from those of the Nicobar Islands, however, the inquiries of travellers have produced no satisfactory conclusion <sup>8</sup> In stature the Andamanes seldom exceed 5 feet, their limbs are disproportionately slender, their bellies protuberant, with high shoulders and large heads, and they appear to be a degenerate race of negroes, <sup>9</sup> with woolly hair, flat noses and thick lips their eyes are small and red, their skin of a deep sooty black, while their countenances exhibit the extreme of wretchedness, a horrid mixture of famine and ferocity They go quite naked, and are insensible to any shame from exposure <sup>10</sup>

“The few implements they use are of the rudest texture Their principal weapon is a bow, from 4 to 5 feet long, the string made of the fibres of a tree or a slip of bamboo, with arrows of reed, headed with fish bone or wood hardened in the fire Besides this, they carry a spear of heavy wood, sharp pointed, and a shield made of bark They shoot and spear fish with great dexterity, and are said also to use a small hand net made of the filaments of bark <sup>11</sup> Having kindled a fire, they throw the fish on the coals and devour it half broiled <sup>12</sup>

“Their habitations display little more ingenuity than the dens of wild beasts Four sticks fixed in the ground are bound at top and fastened transversely to others to which branches of trees are suspended an opening just large enough to admit of entrance is left on one side, and their bed is composed of leaves Being much incommoded with insects, their first occupation of a morning is to plaster their bodies all over with mud, which hardening in the sun, forms an impenetrable armour Their woolly heads they paint with ochre and water, and when thus completely dressed, a more hideous appearance is not to be found in the human form Their salutation is performed by lifting up one leg, and smacking with the hand the lower part of the thigh <sup>13</sup>

“Their canoes are hollowed out of the trunks of trees by fire and instruments of stone, having no iron in use among them but such as they accidentally procure from Europeans or from vessels wrecked on their coast <sup>14</sup> The men are cunning and revengeful and have

<sup>7</sup> This is a mistake They are found all over the islands, obtaining ample food all the year round from fruit, fish, turtle and pigs

<sup>8</sup> It is now known that they are aboriginal Negritos with probable ethnological connections still existing in the Malay Peninsula and Archipelago, at any rate. For the reason of their long isolation as a race, see *Census of India*, 1901, vol. III *Andaman and Nicobar Is*, p. 51

<sup>9</sup> They are not negroes at all, nor are they a degenerate race

<sup>10</sup> For a correct physical description of the Andamanese, see *Census of India*, *op cit*, p. 56, Man, *Aboriginal Inhabitants of the Andaman Islands*, pp. 4—11

<sup>11</sup> For Andamanese bows, arrows, spears and manufactures, see Man, *op cit*, pp. 136—187 It is entirely an error to suppose that their implements are of the “rudest texture”

<sup>12</sup> The Andamanese cook all their food, except fruit, on wood fires

<sup>13</sup> For Andaman dwellings, plastering the body with ochre and forms of salutation, see Man, *op cit.*, pp. 37—48, 184, 79—81

<sup>14</sup> For canoes, see Man, *op cit*, pp. 149 150

a great hatred to strangers they have never made any attempt to cultivate the land, but subsist on what they can pick up or kill <sup>15</sup>

"The language of the Andamaners has not been discovered to possess the slightest affinity to any that is spoken in India, or among the other islands.<sup>16</sup>

"They appear to express an adoration to the sun, the genii of the woods, waters, and mountains. In storms they apprehend the influence of a malignant being, and deprecate his wrath by chanting wild chorusses. Of a future it is not known they have any idea, which possibly arises from our imperfect means of discovering their opinion."<sup>17</sup>

## II

A Chinese Junk manned partly by Chinese and partly by Burmans, proceeded to the Andaman Islands to collect *Bêch de mer*, sea-slugs (a great treat in China) and somewhat resembling a black snail, which the Chinese dry and eat, as well as edible birds' nests which abound there. The crew of the junk which was lying about two miles from the shore observed about eight or ten of the savages approaching the vessel and wading through the water. Upon coming within a short distance of the vessel, they discharged several showers of arrows, which severely wounded four of the Chinese. I have seen their arrows and can well fancy the wounds caused by them would be of a severe nature. Dr. Mouat in his work alludes to them. The Burmans gave immediate pursuit in their boat, and after much difficulty captured two of the savages. These were brought to Penang by the Chinese.

During the chase they were frequently observed to dive and to make their appearance at a considerable distance to elude their pursuers. Several of the arrows were picked up and found to be made of rattans with a piece of hard wood for a point and a nail or fish one fastened to the extremity in such a manner as to render the arrow difficult to extract, if it once entered the body.

These savages were extremely diminutive in stature, though apparently well formed, and their limbs and arms were uncommonly small. One of the savages was 4 feet 6 inches, the other 4 feet 7 inches in height, and each weighed about 76 lbs. Avonchupois. They had large paunches, and though they were so small, were in good condition. One was an elderly man of ferocious aspect, who afterwards died of cholera on board ship on the way to Calcutta, the other was a boy of about seventeen years of age and of a good expression of countenance. He subsequently died of delirium tremens as he had contracted the bad

<sup>15</sup> The mental limitations of the Andamanese are thus described in the *Census of India, op cit*, p. 59 — "In childhood the Andamanese are possessed of a bright intelligence, which, however, soon reaches its climax, and the adult may be compared in this respect with the civilized child of ten or twelve. He has never had any sort of agriculture nor, until the English taught him the use of dogs, did he ever domesticate any kind of animal or bird, nor did he teach himself to turn turtle or to use hook and line in fishing. He cannot count and all his ideas are hazy, inaccurate and ill defined. He has never developed unaided any idea of drawing or making a tally or record for any purpose, but he readily understands a sketch or plan when shown to him. He soon becomes mentally tired and is apt to break down physically under mental training."

<sup>16</sup> This is quite true as regards the known modern languages of India and the East, except perhaps as regards some of the terms in "Negrito" languages of the Far East.

<sup>17</sup> This statement is partly incorrect. For an account of the religion, superstitions, mythology and initiatory ceremonies of the Andamanese, see *Census of India, op cit* pp. 62-64.

habit of drinking <sup>18</sup> Both of them at first appeared dull and heavy and extremely averse to speaking When conversing, however, which they only did when left alone and imagined they were unobserved, they made a noise resembling the cackling of turkeys They were invariably made to sleep in an outhouse lest they should make an attempt on the children's lives, as having been supposed to belong to a cannibal race, they were looked upon with some dread <sup>19</sup>

On one occasion the old man made his appearance without any hair on his head, and on an attempt being made to find out how he had contrived to do so, it was found that he had scraped off the hair with a piece of broken plate <sup>20</sup> He had a bad habit of attacking the fowls with his bow and arrow, and on one occasion attempted the life of the domestic goat The younger lad, who was christened Tom, was more docile, and took an interest in the family He acquired a knowledge of Hindoostanee and Malay These two natives appear to have been smaller than those captured at Port Blair during Colonel Haughton's time, one of whom was 5 feet 4 inches in height

My father in a work published by, and under the authority of the Penang Government (and not to be obtained), entitled "Considerations relative to the Malayan Peninsula," says in a paper on a tribe called "Semangs" "There is little doubt that the degenerate inhabitants of the Andaman Islands, in the Bay of Bengal, are descended from the same parent stock as the Semangs, and it is extraordinary that they have preserved the same uniformity of manners and habits through such a series of ages" And again he says of a Semang whom he saw "This man was at the time of his visit to Penang, when I saw him, about 30 years of age, four feet nine inches in height His hair was woolly and tufted, his colour a glossy jet black, his lips were thick, his nose flat, and belly very protuberant, resembling exactly two natives of the Andaman Islands, who were brought to Prince of Wales Island in the year 1819" <sup>21</sup>

The two specimens alluded to were of a jet black colour and their skin had an extraordinary shining appearance They had a most voracious appetite, and cracked the bones of fowls with their teeth with the greatest facility Their manner of ascending a cocoanut tree was remarkable, running up like monkeys and descending with astonishing velocity

The population of the great Andaman is very small and is dispersed in small societies along the coast They never penetrate deep into the interior and their sole occupation seems to be that of climbing rocks or roving along the margin of the sea in quest of a precarious meal of fish, which, during the tempestuous seasons, they often seek in vain

---

<sup>18</sup> Andamanese, like other savages, will drink to excess on opportunity arising Taking unaccustomed food or drink to excess is common to all wild animals The writer of these notes, at one time the possessor of an extensive aviary, in which food appropriate to many kinds of birds was placed daily, has frequently seen birds go to death on unaccustomed food meant for other species, while deserting that to which they were accustomed from birth.

<sup>19</sup> See note 2 above The fact was entirely unfounded

<sup>20</sup> For the shaving methods of the Andamanese, see Man, *op cit*, pp 9-10, 114-115 The present writer has undergone the process as an experiment, the razor used being chips from a glass bottle It is a rough but safe method of shaving

<sup>21</sup> "My father" was Mr John Anderson of the first account, and this paragraph shows acute observation For the agreement and physical differences between Samangs and Andamanese, see *Census of India, op cit*, p 67 the present writer has been unable to discover any real connection between the languages

It is an object of much curiosity to discover the origin of a race of people so widely differing, not only from all the inhabitants of the neighbouring continent, but also from those of the Nicobar Islands. However, up to the present time, no satisfactory conclusion has been arrived at. In stature the Andamanese seldom exceed 5 feet, their limbs are disproportionately slender, their bellies protuberant, with high shoulders and large heads, and they appear to be a degenerate race of negroes, with woolly hair, flat noses and thick lips, their eyes are small and red, their skin of a sooty black, while their countenances exhibit symptoms of famine and ferocity. They go quite naked, and are insensible to any shame from exposure.

The few implements they use are of the rudest description. Their principal weapon being a bow from 4 to 5 feet long, the string being made of the fibres of trees. Their arrows are of wood, with a nail or fish bone for the tip, and they are very expert in using them. Some of them are armed with wooden spears. They shoot and spear fish with great dexterity. Having kindled a fire they throw the fish on the coals and devour it half broiled.<sup>22</sup>

Their habitations display etc.

[The remainder of the account is identical with the preceding.]

#### BOOK-NOTICE

THE SOUTH INDIAN RESEARCH—A Monthly Journal Devoted to All Kinds of Researches. Edited by T. RAJAGOPALA RAO, B.A. Vepery, Madras. Nos. 1 to 12.

We, of the now old *Indian Antiquary*, always welcome any new effort on the part of native scholars in this Country to look into their past and learn what they can about it. It is clear that they are in a better position to do so than are Europeans, however learned and enthusiastic the latter may be. It is therefore with much pleasure that we watch the growth of so many new Societies and Journals all over India, from the Panjab and Bihar to Madras and Mysore, and elsewhere. Burma too has now a flourishing Burma Research Society. They all unearth something of value to History and Ethnology.

The *Journal* under notice is eclectic in its articles, many being of the 'magazine' order and some almost purely literary. On the other hand, it admits some that are true efforts of Research—original articles on original documents. For instance, it is good to see a report on an "Unpublished Inscription of Kumāra Tailapa" and a translation of "The Vyākaraṇa Mahābhāṣya." There is also, we notice, a novel and interesting suggestion as to the true derivation of "Karrāṣṭa," and "Maisur" and a notice of "The Chronology of the later Gāṅgas." There is further a suggestive article on "Prākṛita and the Dravidian Languages," all of which and the like are true Research.

Two other articles have attracted the special attention of the present writer. In a note on "The Interrelation of Kannada and Telugu" are given a number of words meant to show a very ancient relation of these tongues to the languages of Northern Europe by borrowing or otherwise. The article is not very convincing in itself, but it does open up a more than interesting speculation. Was there a pre-historic and very ancient immigration of the variety of mankind now called Dravidian from the West into India through Persia in pre-Persian days? Elsewhere, for entirely different reasons than those of the author of this article, the present writer has suggested that there was. Anyhow, the subject is worth pursuing historically, philologically and ethnologically. Let the author seek relationship in the languages of the earliest known inhabitants of the delta of the Tigris and Euphrates and the Coast Eastwards to India—Elamite, Akkadian, Sumerian and the like, through Brahūi (Baluchistan) to India. There is plenty of evidence of 'Dravidian' terms being known to the oldest Sanskrit grammarians with which to carry on the investigation.

The other article is an "Historical Basis for the Kanyaka Purana of the Komatis." *Puranas* of this kind are always worth sifting for chance light they may throw on genuine history. They are seldom altogether legendary.

R. C. TEMPLE

## EPISODES OF PIRACY IN THE EASTERN SEAS, 1519 TO 1851

By S CHARLES HILL

( Continued from p 84 )

## XXV

## A MALAY PRAHU FLIES THE BLACK FLAG, 1820

I have said that I have found records of only two occasions on which the Black flag was used in Eastern waters. The first was the raid of the pirate Seager on England in 1720,<sup>66</sup> the second was the fight given below between the brig *Pallas* with twenty Malay *prahus*, the leading one of which carried such a flag. I strongly suspect that there must have been a European leader in the Malay fleet, though the Captain of the *Pallas* apparently did not identify such a man. This supposition is strengthened by the fact that whereas the fight with the *Pallas* took place on the 2nd August 1820, the following paragraph appears in the *Asiatic Journal* for April 1820 —

“ *Dutch Pirate* A Dutch pirate has made his appearance in the Eastern Seas. A man named Thunderwold, formerly a resident at one of the outposts in Java, whose property had been confiscated for some offence against the Dutch Government, has armed two brigs, one mounting 22 guns, and with 6 praus, is committing great depredations in those seas. It is stated that he has attacked and sunk 2 Dutch cruisers and is otherwise annoying their trade materially. A Dutch 74 and a frigate are gone in quest of this marauder, who, it is reported, is now cruising about the straits of Singapore. We do not, however, learn that he has molested any vessel under British colours ”

A noticeable point in regard to the fight with the *Pallas* is the absurd smallness of the cruisers, manned largely by lascars, which were sent by the Indian Government to suppress piracy in the Malay Archipelago. The same is true of the Dutch cruisers, but this fact does not wholly account for the long endurance of piracy in these seas. The habit was engrained in the very nature of the islanders and only constant watchfulness and swift punishment could avail to suppress it. The introduction of steam vessels made these possible, and it is almost a truism to say that it was Steam which destroyed Piracy. Little incidents, occurring right up to the present time, show that the spirit and will still exist.

*Defeat of Malay Pirates*

“ We have great pleasure in bringing to the notice of the Public the following account of an affair which does honour to the spirit with which it was maintained, the defeat of 20 Malay pirate prahus off Coba on the island of Banca [Koba, on the East Coast], by the little brig *Pallas* of this port [Calcutta] of 150 tons.

Her crew consisted of 24 persons only when she left this port, including the Commander, Chief Mate, Gunner and Seacunnies.<sup>67</sup>

Captain Roberts modestly avoids taking notice of the part he bore in the action, but says, ‘ Too much praise cannot be bestowed on Mr Smith, the Chief Mate, and his brave little crew for their conduct on this occasion, the whole of whom fortunately escaped unhurt ’. We are not aware that the crew had been at all increased, but are informed that five of

<sup>66</sup> See Episode No XX, ante, p 37<sup>67</sup> See ante, note on p 78

the specified number, together with the longboat, were on shore at Coba during the whole of the action "

*Extract from the Log of the Brig Pallas August 2, 1820*

" At 2 a m sent on shore the longboat with one Seacunnie and four hands At 5 30 Captain Roberts repaired on shore in the jolly-boat At 7 a m saw from off deck 20 large Prows standing towards the brig, fired a gun and made a signal for the boats At 7-30 from hearing tom-toms beating and loud shouting on board the Prows together with their standing on directly for the brig, knew them to be Pirates Loosed and set sail At 7-45 came on board the jolly-boat with Captain Roberts, the Prows being then within gunshot, Endeavoured to slip the cable but found that we had not time to make a buoy fast, the Prows being almost alongside Cut the cable at the 90 fathoms mark for the safety of the vessel as well as the crew on board, and made all possible sail with a light breeze from the S E, when the headmost Prow hoisted a black flag at her mast head—and one upon her larboard quarter, a white flag with a black dagger and skull Fired the starboard broadside, loaded with round and canister into the headmost boats, who instantly returned the fire, which was kept up on both sides till 9-30, when a moderate breeze sprung up from the S W Set the starboard studding sails and, the breeze freshening, by 10 was out of gunshot

At 10-15 breeze decreasing and at 10-30 calm, hauled in the studding sails and up courses, the Prows coming up very fast Shifted 2 guns to the aftermost side ports and at 10-45 the Prows being again within gunshot opened their fire, the Brig not having steerage way They kept under our stern and, from the constant fire they kept up, cut our sails and standing and running rigging very much Shifted 2 guns aft to the stern mooring ports and fired upon the nearest Prows, who then pulled up on our quarter, when we kept up a constant fire with the stern guns, two aftermost guns and musketry, the Prows being then within half pistol shot

At 11 the whole of the Prows having come up, surrounded us completely, when our fire commenced on both sides, which was returned by the whole of them and lasted till 1-30 p m, when the boat having a black flag hoisted, struck her colours and pulled from us A breeze springing up at the same time from the W S W, made all possible sail, when the whole of the boats, after discharging their guns at us, lowered their sails, ceased firing, and pulled inshore

In hauling our wind to weather Pallas Isle,<sup>68</sup> gave them our starboard broadside and sunk the boat that had formerly the black flag flying Perceived that the remaining 19 Prows had pulled and anchored close inshore and blockaded the mouth of Coba River deemed it expedient for the safety of the vessel to proceed to the first port upon the coast, where any of the H N M [Dutch] cruizers might be lying, and knowing that gun-boat No 17, Captain Kolfe, was then lying at Langa Leat,<sup>69</sup> bore up and made all possible sail for the above port

Fired 26 broadsides during the action and found expended two hundred pounds of powder, two hundred and sixty round shot and forty cannister ditto and thirty-four bag of musket balls, each bag containing twenty-six, and two hundred and forty-two ball cartridges "

[*Calcutta Journal*, 18 November 1820 ]

<sup>68</sup> Evidently intended for the name of one of the many islets in the neighbourhood —ED.

<sup>69</sup> That is, off the *linggi* or point of Liat Island, between Banka and Billiton

## LAST FIGHT OF A PERSIAN GULF PIRATE, 1826

When the Portuguese came to India at the end of the fifteenth century, they found the external trade of the countries bordering on the shores of the Indian Ocean almost entirely in the hands of the Arabs, who, as far as we know, were generally a peaceable class of seafaring folk, but not of a character to submit tamely to injustice at the hands of foreigners, and who strongly resented any intrusion upon what they had hitherto considered a close trade. The overbearing behaviour of the Portuguese soon resulted in the Arabs arming their ships and the next step to piracy was an easy one. As the Portuguese decayed, the Arabs became more formidable, nor did the growing power of the Marâthas in any way check them, but they were no match for Europeans like the British, nor, even when assisted by the Turkish Government, could they make any headway against the European pirates who visited the Red Sea and the Persian Gulf at the end of the seventeenth century. From that date they ceased to be formidable.

At the end of the eighteenth century the Arabs came under Wāhhābī influence. Their fighting spirit revived, and the Arabs of the Persian Gulf—notably the Joasmees<sup>70</sup>—became the scourge of the Indian merchants, until they were suppressed by the British about the year 1810. The unrest caused by the Wāhhābīs continued for some thirty years longer, finding its vent in internecine piratical warfare.

One of the most notorious of these Arab pirates was Rāhmah bin Jābir of the tribe known to history as the Uttoobees ('Uttūbī) of Koweit at the head of the Persian Gulf. He was one of the four sons of Jābir bin 'Uttūb who joined in an attack on the island of Bahrein in 1784, but being dissatisfied with their share of the spoil, withdrew to Khor Hasan on the Arabian Coast close by and, under the leadership of Rāhmah, the ablest though not the eldest of the four brothers, betook themselves to piracy. Rāhmah always tried to cultivate good relations with the British and also with the Wāhhābīs, but in 1816 he quarrelled with the latter and retired to Bushire and later to the island of Dammām near Khatif on the opposite coast, being always at war with the Uttoobees of Bahrein. This state of things lasted until the year 1826, when he found himself bereft of all friends and not only old but blind. He determined, however, at any rate to die not ingloriously, and sailing to Dammām, from which in the interval the Uttoobees had driven him, he forced them to fight him. Meeting his challenge in the spirit in which it was given, a single vessel was sent out for a fight to the finish.

“About the end of 1826, finding himself much pressed by his enemies, who had invaded Demaun [Dammām] Rahmah [bin Jābir] proceeded over to Bushire, with the view, if possible, to interest the British authority in his favour, and also to procure an addition to the crew of his Buggalow,<sup>71</sup> which had suffered very materially. In his interview with the Resident, this singular old man (although nearly seventy years of age, totally blind and covered with wounds) displayed the same haughty and indomitable spirit which had always characterised him, and he expressed equal ferocity and scorn against his Uttoobee enemies. Failing in his design of inducing the Resident to interfere in his behalf, he set sail from Bushire with a reinforcement of 25 or 30 Beloochees [Balūchīs] and proceeded over to Demaun,

<sup>70</sup> See *ante*, p. 85.

<sup>71</sup> The Indian term *baylā*, *bagalā*, a corruption through Arab *bakalā* or Port *bayel*, *bazel*, etc., of the European term *vascellum*, means a large native teak built vessel.—ED

where he ordered his vessels to fire a salute—a mark of contempt which so irritated the Bahrein Chiefs, that Ahmad bin Suleman [Ahmad bin Sulaimân] a nephew of the ruling Shaikh, volunteered to attack him in his own Buggalow. His offer being accepted, he laid himself alongside of Rahmah's vessel, and a most furious action took place, the struggle being for life or death. The people of the Uttoobee Buggalow, however, suffered so severely from the heavy and well directed fire of the enemy, that she was under the necessity of sheering off, in order to recruit her exhausted crew from the other Bahrein vessels in the vicinity. Having procured a reinforcement, and refusing the assistance of the rest of the fleet, Shaikh Ahmad again advanced to the attack weakened as his crew was in the former combat.

Rahmah soon found that he was in no condition to carry on the engagement and that in a short time he must be taken by boarding unless he surrendered—an alternative which was out of the question, considering the atrocious and sanguinary warfare he had so long carried on against Bahrein. Having therefore given orders for his vessel to grapple with the enemy, he took his youngest son (a fine boy about eight years old) in his arms and seizing a lighted match, directed his attendants to lead him down to the Magazine. Although acquainted with the determined character of their Chief and, of course aware of the inevitable destruction which awaited them, his commands were instantly obeyed, and in a few seconds the sea was covered with the scattered timbers of the exploded vessel and the miserable remains of Rahmah bin Jaubû and his devoted followers. The explosion set fire to the enemy's Buggalow, which soon after blew up but not before her commander and crew had been rescued from their impending fate by the other boats of the fleet.

Thus ended Rahmah bin Jaubû, for so many years the scourge and terror of this part of the world, and whose death was felt as a blessing in every part of the [Persian] Gulf. Equally ferocious and determined in all situations, the closing scene of his existence displayed the same stern and indomitable spirit which had characterised him all his life."

## XXVII

### THE TREACHERY OF AHMAD BIN DÂD KARÎM, 1846

The following extract from the Bombay Records illustrates one of the perils to which Indian trade was exposed during the early nineteenth century, though I do not think many similar instances of treachery can be found among captains to whom Indian Merchants entrusted their vessels.

"In the month of September 1846 a buggalow, belonging to Nansee Thackersee [Nânî Thâkurjî], a Bombay merchant, set sail from Muskat for the Presidency [Bombay]. She was commanded by one Ahmed bin Dad Kureem [Ahmad bin Dad Karîm] a Beloochee, native of Muttra [Mâttrah], subject to the Imâm<sup>72</sup> of Muskat. Having arrived in the vicinity of the Island of Busheab,<sup>73</sup> Ahmed bin Dad Kureem formed the project of plundering and possessing himself of all the treasure in the vessel. He seems in the first instance to have endeavoured to carry out his purpose by stealth and quietly, for, in the dead of night, whilst the supercargo, in whose charge the money was, was asleep, he repaired to the

<sup>72</sup> Imâm, a title given to the Princes of 'Omân. See Yule, *Hobson Jobson*, s.v. Imâm.—ED

<sup>73</sup> Busheab, Abu Shu'âib, Shakh Shu'âib, Jaziratu's Shôkh, an island near Al Kais (Kann) on the Persian Coast of the Gulf, about 150 miles from the entrance.—ED

treasure chest and was in the act of making off with its contents, when one Moorad [Murâd], a sailor on board remonstrated with him and caused him to desist. The Nakhoda's <sup>74</sup> plans being thus frustrated he resolved to rid himself of his opponents and to perform by force what he was unable to do by stealth. The following night accordingly, at an advanced hour whilst his unsuspecting victims were in a profound sleep he, with a number of his followers, fell upon and savagely butchered both Moorad and the supercargo. He likewise put an end to the existence of an unfortunate slave, who happened to be standing by at the time. Some of the crew affrighted, leaped into the sea <sup>75</sup> many took part in the bloody deed. and the rest, however well disposed in their hearts to resist, were too much overawed by the fierce brutality and fiendish threats of the Nakhoda and his accomplices to dream of opposing them.

Ahmad bin Dad Kureem vowed in tantamount death to any man of the party who would not take the oath of Zamtullak [*zamtulâq*] (the most solemn form of oath among Arabs—'By the divorce of the wife') to keep inviolate secrecy. They then came and all, nineteen in number, embarked in the longboat having previously set fire to the buggalow and collected the treasure in date jars. Six of the men, notwithstanding that they had taken the oath required of them fell victims to the Nakhoda's suspicions, and were cruelly slaughtered. Two others, fearful of their lives, let themselves down into the sea close to Shinas <sup>76</sup> and swam ashore whence they proceeded to Lingah <sup>76</sup> and back to Muttra [Mâtiah] their native city. Scarcely had they reached the latter place before they were seized and conveyed to Muskat, as accomplices of Ahmed bin Dad Kureem.

For a length of time they denied all knowledge of the matter, and assured both his Excellence Syud Sowcynce [Sayyid Sumi] and the British Agent that, as soon as the vessel caught fire, they threw themselves into the sea to save their lives, that they knew nothing further. Guilt, however, attached itself too strongly to these individuals to permit of their story being credited. Recourse was had to intimidation, and preparations were even made for inflicting torture upon them, when, upon being promised full pardon and liberty, they turned informers and related all that had occurred.

In March 1847, after endless search and trouble, Ahmed bin Dad Kureem was likewise apprehended and conveyed to Muskat, where, on being examined and told that there was evidence forthcoming to convict him of his dastardly act, he at once confessed his guilt and threw himself upon the mercy of his accusers. The matter of his trial was referred to the Bombay Government, who desired he might be tried before the Native Court in Muskat and suffer such punishment as the judicial authorities in that town might think fit to award.

His Excellence Syud Sowcynce, strange to say, did not so much as consult the Court of Justice regarding the punishment to be inflicted, nor did he cause any form of trial whatsoever to be undergone by the prisoner but simply and plainly pronounced sentence of death upon him. His execution took place on the 5th day of October 1848 in the presence of the whole concourse of the Muskat population."

## THE HISTORY OF THE NIZÂM SHÂHÎ KINGS OF AHMADNAGAR

By LT -COLONEL T W HAIG, C S I, C M G

(Continued from p 91 )

### IX —AN ACCOUNT OF THE THIRD EXPEDITION OF THE PRINCE'S ENEMIES AGAINST HIM, AND OF THEIR CAPTURE BY RÛMÎ KHÂN

The *amîrs*, already mentioned, left the city with a large army to take vengeance on the prince, and pursued him, but when the *amîrs* who had first been sent against him, heard that he had visited Bidar, and carried off their wives and families, fear and trembling fell upon them and they were divided and scattered, so that the prince's object was gained. On the receipt of this news, a numerous and well appointed army was dispersed, and its officers repaired to court complaining bitterly, and in the strongest language of the negligence of the *amîrs* who had been at court when the raid was made. When the prince's spies informed him of the approach of these *amîrs*, and the news of the dispersal of the army, which had been encamped at the Meri Ghât, became known in his army, he left the wives and families of the *amîrs* where they were and marched on his capital by way of Parenda. The king's troops, who had followed him from Bidar, emboldened by his marching away from them, followed in his tracks.<sup>32</sup>

When the prince halted at Parenda,<sup>33</sup> he sent for Jalâl Rûmî Khân and told him that his forces were much weakened, for a detachment had gone with the *haram*, and many, exhausted by his forced march on Bidar, had fallen out by the way. He then ordered Rûmî Khân to hold Parenda and await the arrival of the stragglers, while he marched on one stage, in order that the royal army might believe that he was fleeing from them, and might pursue him, and not on any account to emerge from Parenda until the pursuers had passed it, in order that he (the prince) might then make a stand while Rûmî Khân issued from the fortress in the enemy's rear and thus surrounded him. Jalâl Rûmî Khân promised to obey these orders and remained in the fort while the prince marched on one stage, and when the *amîrs* heard that the prince had passed Parenda, they were puffed up with pride, and pressed on with all haste in pursuit of the prince, until they came to the stream which is known as Alat Nadî,<sup>34</sup> and flows past the town of Parenda. Here they halted and circulated the wine cup and had music, paying no more attention to Jalâl Rûmî Khân, who was in Parenda, than if he had not existed. So careless were they that they took no heed of anything until they fell into a drunken sleep.

When Rûmî Khân heard of the state of the enemy's army, he wisely thought that he could best serve the prince by disobeying his orders, seeing that the enemy's negligence promised him a certain victory and the opportunity was one not to be neglected. He therefore assembled his army and with a strong force, fell upon them when many of them were in a drunken sleep and many more had barely slept off their debauch. Some were sent to eternity from a drunken sleep and some opened their eyes only to be sent by the same road. Not a single man of the enemy had any time to prepare for the fight, and large numbers were sent to hell by Rûmî Khân's troops. The *amîrs* and the principal

<sup>32</sup> This appears to be an account of the operations of the royal troops after Jahângîr Khân had taken command.

<sup>33</sup> Situated in 18° 16' N and 75° 27' E. The fort of Parenda was built by the great minister Mahmûd Gâvân.

<sup>34</sup> Parenda stands between two small tributaries of the Sina, which is a tributary of the Bhima.

officers of their army who had stirred up strife against the prince, were caught in the clutches of fate and it was the good fortune of the prince that such a victory was gained by Jalâl Rûmî Khân as will be the preface of all the noble gests and deeds of kings till the end of time

Rûmî Khân, when the slaying was finished, took large quantities of plunder, and took those eighteen persons who had been the chief *amîrs* of the king's army, mounted on buffaloes, to the prince's camp<sup>3</sup>,

When the news of the victory reached the prince, he first rendered thanks to God, and then, with the sound of trumpets and drum, gave the signal for rejoicing throughout his army. At this moment Rûmî Khân arrived at the prince's camp with the captive *amîrs*. Rûmî Khân made his obeisance to the prince and was loaded with favours and encouraged to expect great advancement. He received a royal robe of honour, and the king's *amîrs* also participated in the favours bestowed on him, for they received robes of honour and were given leave to depart for Bidar. By such laudable actions the prince captivated the hearts of these men, nay most of the *amîrs* of the king's army, and made all those who had been his enemies subservient to him, so that in a short time the greater number of the army which had opposed him, both Dakanis and Foreigners, submitted themselves to him and were enrolled among his servants.

The prince, after this famous victory, which was the dayspring of his fortune and the origin of royal reign and kingly power, returned in triumph to his capital and showered favours upon, and executed justice among, the people of Junnâr and the districts, until nobody was seen in his dominions with a torn collar, if we except the dawn with its collar torn by the torch, and no blood was seen on any, if we except the gloaming tinged by the ruddy light of the lamp.

#### X—AN ACCOUNT OF AHMAD SHÂH'S ENTHRONEMENT ON THE THRONE OF SOVEREIGNTY, i.e. HIS DECLARATION OF INDEPENDENCE

It has already been mentioned that in the reign of Sultân Mahmûd Shâh Bahmanî the king's authority was much shaken, and most of the *amîrs*, *maliks*, and officers, turning aside from the path of obedience and submission took the road to the desert of contumacy and rebellion. Among these was Majlis-i-Ra'îf Malik Yûsuf 'Adl Khân, who by the king's authority held the country of Bîjâpûr and all its dependencies in *jâgîr*. He raised the stan-

<sup>35</sup> This account differs widely from Firishta's, who gives to Ahmad himself the credit of the victory. As Jahângîr Khân's force advanced, Ahmad fled from Parenda to Parthan, whence he unsuccessfully sought aid from Fathullâh 'Imâd ul Mulk of Berar. As Jahângîr Khân approached Parthan, Ahmad retired and occupied the hilly country of Jôur, where he was joined by Naşîr ul Mulk Gujarâtî from Qâdirâbâd. Jahângîr Khân marched to Nikâpûr and cut off Ahmad's retreat to Junnâr. The two armies lay within six leagues of each other for nearly a month and as the rainy season had begun Ahmad's troops suffered severely. But the *amîrs* of the royal army, believing that Ahmad could not escape, neglected all military precautions and gave themselves up to feasting and drinking. Ahmad marched by night to Nikâpûr, arrived there early on the morning of June 19, 1490, and fell on the royal army while most of them were still in a drunken sleep. Nearly the whole of the army was slain, including the *amîrs* Jahângîr Khân, Sayyid Ishâq, Sayyid Lutfullâh, Nizâm Khân, and Fathullâh Khân. The other *amîrs* were captured and Ahmad, after stripping them down to the knees and parading them round his camp on buffaloes, sent them back to Bidar. The battle was known as "the battle of the garden," from a garden which Ahmad laid out on its site. This battle established Ahmad's independence.

dard of opposition and made the claim "I and there is none beside me" In the same way Majlis-i-ʿAlā Malik Sultān Qulī Qutb-ul-Mulk,<sup>36</sup> who, by the king's command, held the whole of the province of Telingana, raised the banner of independence and pride, and regarded none beside himself, Malik Fathullah, ʿImād-ul-Mulk in the country of Berar raised the standard of usurpation and pride sky-high, and gave currency to the habit of rebellion In the same way all the rest of the *amīrs* and *malūks*, who were in their own provinces, went astray, and Majlis-i-Mukarram Malik Qāsim, Barid-i-Mamālīk, who held the districts of Qandahār<sup>37</sup> and Ausa<sup>38</sup> and their dependencies, raised the banner of authority and independence in the capital, Bidar, and took into his own hands the whole administration of the country, leaving to Sultān Mahmūd nothing but the name of a king In the meanwhile the *amīrs* were constantly leading their armies from all parts to Bidar, in the attempt to overthrow Malik Qāsim, Barid-i-Mamālīk In some of these expedition matters were compounded without bloodshed or fighting, but sometimes the quarrels of these erring men could not be settled without an appeal to the sword In several of these expeditions Ashraf-i-Humāyūn Sultān Ahmad Shāh Bahrī was present in person, allaying strife, and punishing the quarrelsome and contumacious with the sword, as has already been described, until at last, on the date<sup>39</sup> which has already been given, the king of the countries of Dakan, Sultān Mahmūd Bahmanī, bade farewell to this transitory world and took his departure for the eternal abode

Since Malik Nāib suffered martyrdom at the instigation of the contumacious but still frustrated men, and the stirrers up of strife poisoned the mind of the king of the world Mahmūd Shāh Bahmanī, against His Highness Ashraf-i-Humayūn, Sultān Ahmad Shāh Bahrī, so that armies were several times sent against his highness with a view to crushing him, as has been related, the *amīrs* and officers of the kingdom, who were in the service of His Highness Ashraf-i-Humāyūn, Sultān Ahmad Bahrī, represented that the disloyal *amīr* of the king had obtained the supreme power, and that very little authority was left in the hands of the king, while the whole of the attention of these disloyal *amīrs* was devoted to attempts to crush the prince, and therefore the salvation of the prince's rule and of his dominions lay in his proclaiming himself independent and in his ascending the throne of sovereignty and donning the crown of royalty, in order that the administration might be efficiently continued and that the dominion might not depart from the great family (Bahman)

<sup>36</sup> This is not correct Sultān Qulī Qutb ul Mulk was of all the great provincial governors the most faithful to the house of Bahman, and though he often refused to recognize the orders issued by Qāsim Barid, he would not formally declare his independence until Mahmūd Shāh died in 1518 and his young son Ahmad III was placed on the throne in Bidar by Qāsim Ahmad Nizam ul Mulk was the first to propose to the other provincial governors that they should declare their independence of Bidar, and all, except Qutb ul Mulk, agreed

<sup>37</sup> The name of this place is always thus spelt by Muhammadan historians The correct spelling Kandhār It is on the Manāda river, about 65 miles north of Bidar

<sup>38</sup> Situated in 18° 15' N and 77° 30' E

<sup>39</sup> The date already given is Zi l Hijjah 24, A H 924 (December 27, A D 1518). See *The History of Bahmanī Dynasty* by Major J S King, p 147 Firishta (i, 726) gives the date as Zi l Hijjah 4, (Dec 7, 1518) Sayyid ʿAlī conveniently ignores the existence of the nominal successors of Mahmūd Ahmad III, ʿAlā ud dīn, Wālī ullah, and Kalīm ullah, and makes it appear that Ahmad ascended the throne as a Bahmanī king though he carefully avoids describing him as Bahmanī and always gives him the distinctive cognomen of his dynasty, Bahrī

Therefore his highness the Sulaman of the age, Ashraf-i Humâyûn, Sultân Ahmad Shâh Bahrî, who was, in the opinion of his loyal officers, the means of continuing the royal line and the candle of the family of the *Khulâfat*, at a time when the aspect of the sun foretold the continuance of the kingdom and of its glory in his family, that is, A H 891 (A D 1486)<sup>40</sup> took his seat on the royal throne, and imparted glory to the crown of kingship by placing it upon his head

When his majesty ascended the throne he was twenty years of age <sup>41</sup>

The *amîrs* swore fealty to the king and tendered their congratulations to him. They scattered gold abroad and received honours and royal favours in measure corresponding to their degrees. After that the king paid attention to the wants of his army and his subjects, and abolished all tyranny and oppression and raised the standard of justice and equity. He made even greater efforts than before to increase his army, in order that he might conquer the hereditary dominions of his father and grandfather, which God destined to be his.

#### XI—AN ACCOUNT OF THE WAR BETWEEN 'ADIL KHÂN AND THE KING OF THE WORLD, ASHRAF-I-HUMÂYÛN, AHMAD BAHRÎ

When Sultân Ahmad Shâh Bahrî ascended the throne of sovereignty, and the fame of his kingdom and justice was through all the world, Majlis-i Rafî', Yûsuf 'Âdil 'Khân, who was distinguished from all other *amîrs* of the Dakan by the greatness of his power and the extent of his *jaqîrs* and his province, and was intoxicated by the numbers of his army and by pride of place, opened the door of strife in his own face. In short, the desire of power and conquest entered 'Âdil Khân's head and he thought that royal robes and the honours of the *Khulâfat* were for every seeker after them, whether he had been externally predestinated to them or not, not knowing that the royal umbrella is a *humâ*,<sup>42</sup> which spreads not the wing of good fortune over any but the elect, and that lordship over men is an '*angâ*',<sup>43</sup> which settles not but on the Qâf of the worth of those who have been accepted, and that a kingdom is not administered and maintained solely by means of the abundance of treasure and the number of one's adherents and assistants.

Malik Yûsuf 'Âdil Khân considered that Ashraf-i Humâyûn Sultân Ahmad Shâh Bahrî was in one quarter of the Dakan, and that much land intervened between his province and Sultân Ahmad's, which land could without much trouble be added to his province. It behoved him, therefore, to forestall Ahmad Nizâm Shâh, and to capture and occupy that country before he entered it. 'Âdil Khân, therefore, set out from Bijâpûr, which was

<sup>40</sup> This date is wrong by four years. The provincial governors had been their own masters since the death of Muhammad III, but Ahmad had not technically become a rebel until 1486, in which year his father was put to death, for he had been obedient to his father, who was regent. From the time of his father's death he was in open rebellion, but it was not until 1490 that he, Yusuf 'Âdil Khân of Bijâpûr, and Faîrullâh 'Imâd ul Mulk of Berâr declared themselves, at Ahmad's instance, independent.

<sup>41</sup> Ahmad's age is here absurdly understated. Frishta does not give it, but in 1478 he had been considered sufficiently dangerous to be banished from court and cannot then have been less than twenty-five years of age. His father was then at least sixty-five years of age and it is probable that Ahmad was thirty or even more, so that he was now probably about forty, and in 1490, when he actually declared his independence, forty-four or forty-five.

<sup>42</sup> A fabulous bird of happy omen, supposed to fly constantly in the air without touching the ground and to indicate that the head on which its shadow falls will wear a crown.

<sup>43</sup> A fabulous bird said to dwell in Qâf or Mount Caucasus. The legend is similar to that of the phoenix.

his capital, with a very large army and encamped before the fort of Rânûbarî. As that fort was not very strong, 'Âdil Khân formed the intention of capturing it and handing over the command to one of his officers, in order that he might then make it his base of operations against Ahmad Nizâm Shâh's country, and capture that country with ease.

When the king's spies reported to him Yûsuf 'Âdil Khân's expedition, he issued orders for the assembling of his army, and prefects and muster-masters were sent in haste to all parts of the kingdom to bid the *amîrs* and chief officers of the army to assemble at court with their troops. In a short time a very large army was thus collected, with which the king marched against the enemy. When the royal army arrived at Ghârî Vabalad, near which was the army of Majlis-i-Raî' Yûsuf 'Âdil Khân, the king commanded that the pass at the head of the *ghât* through which the invaders must pass, should be blocked, in order that their retreat might be cut off and that they might be confounded in the whirlpool of perplexity.

Although this plan for crushing the enemy was very well conceived, Masnad-i-'Âlî Malik Nasîr-ul-Mulk and the rest of the *amîrs* humbly represented that to close entirely the enemy's way of retreat would but compel him to invade still further the king's dominions and to support himself there by plundering the country. The best plan, they said, would be for the royal army to move aside and leave one line of retreat open. The king accepted this advice and ordered the *amîrs* to choose a camping ground for the army. Then the king issued a *farmân* to the *kôlis* dwelling in those parts, authorizing them to plunder and slay the enemy. The *kôlis* had been hoping and praying for such a permission. The enemy's camp was surrounded by jungle and brushwood, so dense that an ant could not penetrate it without shedding its skin like a snake. The *kôlis* crept through this jungle on dark nights and poured showers of arrows into the enemy's camp and carried off horses and goods without any serious opposition, and when the day broke, took refuge again in the jungle and in their places of retreat, and would then again lie in ambush and attack the enemy with clouds of arrows, and thus in a short time reduced the army of 'Âdil Shâh<sup>44</sup> to great straits. The enemy's spirit was entirely broken, and at last, without fighting and without having acquired any honour, they determined to retreat, and set forth on their retreat by that road which passed close to the camp of the royal army. Since the king's army had closed the enemy's line of retreat and every pass was occupied by a detachment of royal troops, it was only with the greatest difficulty that 'Âdil Khân extricated himself alive. The royal army fell upon his troops and defeated them with great slaughter and those of the enemy who dismounted and fled on foot escaped, while those who would not dismount and throw away their arms were slain. The royal army took much spoil from the vanquished, and the king returned in triumph to his capital.<sup>45</sup>

<sup>44</sup> Here Sayyid 'Alî incautiously admits that Yûsuf was as much a king as his hero was.

<sup>45</sup> It is not easy to identify this raid of Yûsuf 'Âdil Shâh's. The author of the *Barâtin us Salatin* says that Khwâja Jahân of Bijâpur completed the fortress of Parenda in 1487, but there is no mention of any interruption of the work by Ahmad. According to Firsihta, Ahmad's first enterprise after his declaration of independence in 1490 was the reduction of Danda Râjpûrî (Chaul), the siege of which place he had raised on hearing of the death of his father in 1486. The siege now occupied him for ten months or a year, at the end of which time the fortress surrendered and left Ahmad free to march on Daulatâbâd (F n, 186). The account can hardly refer to Ahmad's expedition to Bijâpur in A.D. 1503-04 which was undertaken for the purpose of compelling Yûsuf 'Âdil Shâh to revoke his ordinance establishing the Shrah religion (F n, 19), and it is not improbable that the incident has been invented by Sayyid 'Alî for the glorification of Ahmad.

## XII —AN ACCOUNT OF AHMAD NIZÂM SHÂH'S EXPEDITION AGAINST DAULATÂBÂD

As Ahmad Nizâm Shâh was always anxious to capture fortresses, he now turned his attention to Deogîr, which is generally known as Daulatâbâd. This is a very strong fort, situated on a high hill, so strong that it has never been taken. So wonderful is the construction of the fort and so great are the stones used in its bastions and ramparts, that it is the generally received opinion, nay, it is certain, that it is not the work of men, but of some more powerful agency, for it is generally agreed that the work is beyond the power of men.<sup>46</sup>

Sultân Mahmûd Bahmanî had entrusted the *kotwâlî* and governorship of the fort of Daulatâbâd, with the city and the surrounding district, to Malik Sharq and Malik Wajîh,<sup>47</sup> two brothers who were among Sultân Mahmûd's trusted officers. Since the time when Sultân Ahmad Shâh Bahrî had ascended the throne Malik Sharaf-ud-dîn, rendered confident by the impregnability of Daulatâbâd, had set foot in the desert of rebellion and strife. As the king was always anxious to conquer his hereditary dominions, he made preparations for the conquest of that lofty fortress. As the capture of this fortress by force of arms appeared to be very difficult, Ahmad Nizâm Shâh determined first to treat courteously and diplomatically with its governors and to endeavour to win their hearts. He therefore opened communications with them and gave in marriage to Malik Wajîh-ud-dîn one of the daughters of Malik Nâib, who was in his palace,<sup>48</sup> thus establishing friendship with him on a firm foundation. But since Malik Sharaf-ud-dîn's star was declining and the days of his prosperity drawing towards evening, he withdrew himself from the friendship which had been established, and his disposition deteriorated so that he committed blameworthy acts, and the brotherly love which had existed between him and his brother, Malik Wajîh-ud-dîn, was changed to enmity. For Malik Sharaf-ud-dîn had considered the matter and had come to the conclusion that the result of this alliance with Ahmad Nizâm Shâh could lead to nothing but the loss of the command of the fort. Malik Sharaf-ud-dîn's wrath increased daily and he was ever resolving plans for the undoing of his brother, until at last he compassed his death.

After the murder of Malik Wajîh ud dîn, his widow, the daughter of Malik Nâib, went to Junnâr and appealed to Ahmad Nizâm Shâh for justice against her husband's murderer. The king comforted the victim of tyranny and resolved to revenge her on the tyrant, and to capture the fort of Daulatâbâd and the country belonging to it, and he set out with a large army for Daulatâbâd. When he reached Daulatâbâd he encamped before it, and his army surrounded the fortress and prevented all ingress and egress. The next day the king mounted his horse and reconnoitred the fortress. He perceived that its reduction by force of arms would be very difficult and that a protracted siege would be necessary. He came to the conclusion that it would be better to gain possession of it by stratagem, and he therefore summoned Masnad-i-Âlî Malik Nasîr-ul-Mulk and all his other *amîrs* and officers, and took counsel with them. When Nasîr-ul-Mulk and the rest of the *amîrs* had heard what the king had to say, they said that his object could best be attained by laying waste and plundering the Daulatâbâd district every year at harvest time, and thus depriving the fort of

<sup>46</sup> The fort was built by Muhammad Tughluq between 1337 and 1343.

<sup>47</sup> See, for Malik Sharaf ud dîn and Malik Wajîh ud dîn. In subsequent passages I have corrected the names.

<sup>48</sup> This, of course, was Ahmad's own sister. Her name was Bibî Zamab and she bore to Wajîh-ud-dîn a son named Motî. Sharaf ud dîn, who was governor of the province, while his brother was commandant of the fort of Daulatâbâd, cherished the ambition of declaring his independence and much resented his brother's close alliance with Ahmad, because it strengthened both Ahmad and Wajîh ud dîn and diminished his chances of being in a position to assume independence. He therefore put both Wajîh ud dîn and his infant son Motî to death.

supplies, by which process the defenders would be compelled to surrender. The king then issued orders that the plundering should begin at once and the army plundered the city and the surrounding country and destroyed the dwellings of the people. The king then returned to his capital.

### XIII.—AN ACCOUNT OF THE FOUNDATION OF THE CITY OF AHMADNAGAR

Since the erection of buildings is one of the most essential affairs in the world and one of the most necessary for the comfort of mankind, great kings in all countries have left behind them wonderful monuments by building cities and laying out gardens planted with fruitful trees. The king of the age and the earth (Ahmad Nizâm Shâh), who was ever solicitous for the welfare of the world and its inhabitants, determined to found a city. As it had been decided that the king should lead an army every year to Daulatâbâd to plunder and lay waste that province, and it would have been necessary for him on each occasion to traverse the considerable distance which intervened between Daulatâbâd and his capital, which in those days was Junnâr, he determined to found a city between Junnâr and Daulatâbâd in order that he might dwell there until the fall of Daulatâbâd and his army would not have so far to march. He therefore pitched on the site of Ahmadnagar, exactly half way between Junnâr and Daulatâbâd, in a tract which in climate and in greenness and freshness of its hills and plains, may be compared with Paradise, and is indeed second only to the Paradise on high.

Some historians have given the following account of the founding of the fair city of Ahmadnagar. Ahmad Nizâm Shâh, who was very fond of hunting and of wandering in the country, was one day hunting with some of his companions and nobles in the plain on which Ahmadnagar now stands. A fox was viewed, and the king ordered the hounds to be loosed on it. The fox tried to save himself by craft, but when this failed, and he was hard pressed by the hounds, he turned on them and faced them, ready to make a fight for his life. The king was much astonished and determined to build his new capital on the spot, deeming that the land which could instil such courage into a feeble animal like the fox, was a fit place for a king's abode.<sup>49</sup> He communicated his design to the *amirs* and companions who were with him, and they applauded it. He then consulted his ministers and astrologers who declared that the spot was a fit one for the capital.

When it was finally decided to build the capital in that spot, the king halted there and, having ordered the astrologers to select an auspicious day for the beginning of the work, summoned surveyors, architects, and builders from Junnâr to lay out and build the city. An auspicious day was selected, and the surveyors, architects and builders obeyed the king's commands, and laid out and began to build the city with its palaces, houses, squares and shops, and laid out around it fair gardens. In a short time, a very fine city was brought to completion under the king's personal supervision.

When the question of the naming of the new city came up for consideration, the king remembered that the city of Ahmadâbâd in Gujarât, which was built by the late Sultan A' mad of that country, had been so called from the king who built it, his minister, and the *Qâzi* of the sacred law, who all bore the name of Ahmad. In this case also, by a fortunate coincidence, the king's name was Ahmad, the name of his minister, Masnad-i- 'Âlî, Malik Nasir ul-Mulk Gujarâtî, was Ahmad, and the *Qâzi* of the royal army also bore the name of Ahmad. For this reason the new capital was named Ahmadnagar.

(To be continued)

<sup>49</sup> A similar story is told of the foundation of Bidar, Nirmal, and other towns. In fact there are very few towns in the Dakan, the foundation of which is recorded, of which the story is not told.

THE WIDE SOUND OF *E* AND *O* IN MARWĀRĪ AND GUJARATĪ

BY PANDIT VIDHUSHEKHARA BHATTACHARYA SHASTRI, SANTINIKETANA

THE controversy between Dr Tessitori and Mr Divatia regarding the above subject leads me to write the following lines which may throw a little light on some of the points discussed by them

It is a well-known fact that the Sanskrit diphthongs *ai* and *au* ( ऐ, औ ) are composed of two vowels, *a*+*i* and *a*+*u* respectively, and though each of these two groups of vowels has two syllables separately, they form only one syllable in the resultant diphthongs. For a diphthong is a long vowel, and therefore its component vowels must combine themselves in such a way that they may not exceed the regulation quantity of one long vowel. It therefore follows that the component vowels must suffer loss in their original quantity and such loss may be unequal in amount in the mutual adjustment, that is to say, the one portion may occupy longer duration than the other

This is what the Prātiśākhyaś affirm when they say that the first element of a diphthong (i.e. *a*, अ) is short and the second (i.e. *i* or *u*, इ, उ,) is far longer than the first<sup>1</sup>

It has, however, not been strictly followed in the vernaculars, for, as we shall see later on, sometimes the first and sometimes the second element of a diphthong has been lengthened and this has given rise to different words from the original

Neither the *ai* ( ऐ ) (with a single exception, see *Hem*, VIII, 1 161, *Trivikrama*, II, 2 74 = *Shadbhāṣā*, B S S p 150), nor *au* ( औ ) of Sanskrit is to be found in Prakṛta, the former becoming generally (i) *a-i*, अ-इ-, and the latter *a-u*, अ-उ-, both in two syllables, and sometimes (u) *e*, ए, and *o*, ओ, respectively

The Prakṛtic *a-i* and *a-u* in two syllables gradually began to contract themselves into one syllable again, according to the principle of quiescence or disappearance of medial or final vowels—a process the operation of which is seen widely, not only in our vernaculars, but also in the Vedic and classical Sanskrit, about which I have already discussed in detail elsewhere<sup>2</sup> By the word *quiescence*, for which I have used the Sanskrit term *grasta* ( ग्रस्त ), following Prof Jogeshchandra Ray in the article referred to, I mean a vowel sound which first becomes articulate and then gradually disappears or is deprived of its proper or original quantity. For instance, from the stem or crude form *rājan* in the singular number fourth case-ending *e* we have first *rā-ja-ne* in three syllables, and then, according to the principle above mentioned and the rules thereof, the second syllable, *i e*, *a* in *ja* first becomes quiescent, and finally disappears, giving rise to the form *rāj-ne* in two syllables, which again in accordance with *Sandhi* rules coalesces into *rājñe*. Let us take another example. The H *chaurthā* ( चौथ ) is derived from Skt *chaturthaka* through the stages as follows—(i) *cha tur-tha-ka* > (ii) Pr *cha-u t̥tha-a* > (iii) *cha u-t̥thā* > (iv) *chau-t̥thā* > (v) *chau thā*. Here in the third stage, a trisyllabic word *cha u t̥thā* can never change into the fourth stage *chau-t̥thā* until the second syllable (i.e. the *u* of the trisyllabic *cha u-t̥thā*) lessens its own quantity or *mātrā* and combines with the preceding syllable, i.e. the *a* in *cha*. This decrease in quantity is governed by a principle which I have explained in the paper alluded to. For the sake of convenience I shall denote such thinned vowels by putting them above the line. Thus the dissyllabic *chau-t̥thā* is to be written *cha<sup>u</sup>-t̥thā* and so on

<sup>1</sup> According to *Itk Pr*, Benares, XIII, 41, the *mātrā* of the first element (*a*) is  $\frac{1}{2}$  and that of the second (i.e. *i* or *u*) is  $1\frac{1}{2}$ . See *Tar Pr* Mysore, II 26—29 (Ubbata says  $\frac{1}{2} + 1\frac{1}{2} = 2$ )

<sup>2</sup> *Vaṅgīya Śāhitya Parishat Patrikā*, Vol XXV, pp 26 ff

According to this principle of lessening the quantity of a vowel, new sets of diphthongs have found their way into our vernaculars. But in these, the sounds were changed owing to the shifting of the accent or stress, sometimes on the first and sometimes on the second element, and also because of the peculiarity of pronunciation of the first element, *i e a*, in different vernaculars.

As regards the wide sound of *è* and *ò* in Marwâri and Gujarâtî, I think, it is due to the accent, or stress, on the first part of *a<sup>i</sup>* and *a<sup>u</sup>*. And so it goes without saying that here I am at one with Mr Divatia, who has clearly said (*Indian Antiquary*, Feb 1918, p 41) 'that when in the vocalic group of अ इ or अ उ, अ is accented the इ, उ getting subordinate, the ultimate result is the wide sound ऐ औ'. But I am at one with Dr Tessitori in his disagreement with Mr Divatia when the latter says that "अइ and अउ pass through an intermediate step—अय and अव (eventually अय् and अव्) before assuming the wide sounds ऐ and औ". As regards the narrow sound of *é* and *ó*, it owes its existence to the accent on the second part of *a-i* (dissyllable) and *a-u* (dissyllable) and not of *a<sup>i</sup>* (monosyllable) and *a<sup>u</sup>* (monosyllable). Here the accented *i* and *u* become *e* and *o* respectively, and they are narrow, because there are no other elements whatever to widen them, and then the preceding *a* is assimilated with the following *e* and *o* according to the Prakritic rules for assimilation. I should note here what Mr Divatia has stated (*ibid*) in this connection. "When in these groups (अइ and अउ) the इ-उ are accented, their prominence leads to the uniting of अ and इ and अ and उ into the narrow ए and ओ".

Examples are needed to illustrate what I have to say, but before producing them I must briefly discuss the question of accent above mentioned. At the very outset it should be borne in mind that accentuation of words has undergone a great many changes from the Vedic time downward. The accent which was the cause of original corruption of a word does not necessarily continue to be in its place so long as the word remains either in the same or other form, for it may have a different accent resulting, in some cases, in its assuming a further new form. I do not wish here to enter into details, but simply to say as a general proposition that accentuation in Prakrita has played a great part in forming the words of different vernaculars. Evidence has been given by Sir R G Bhandarkar in his *Wilson Philological Lectures*, of the accent on the penultimate or final syllable, from which a number of new words have found their place in our vernaculars. But he did not cite any Prakritic words in support of his view though such words are not wanting. Mark the following words *vāulla* also *vāṛla* (Skt *vyākula*), *darva* (Skt *darva*), *paravvasa* (Skt *para-vaśa*). Here the accent is evidently on the penultimate syllable. It can, however, also be shown that sometimes in Prakrita the first syllable of a word is accented. Let me here draw attention to the following words which will support this contention *nivedayitarva* (Skt *nivedayitavya*), *Samarāchchakahā*, *Bibliotheca Indica*, p 134, *sapparihāsa* (Skt *saparihāsa*), *Shadbhāshā*, p 47, *jovvāna* or *juvvāna* (Skt *yauvana*), *Kumārāpāla*, III, 18, *sochchia* (Skt  $\sqrt{\text{such}} + \text{tvā}$  or *ya*), *Prākṛitarūpavatāra*, XII, 78, etc. These words invariably carry the accent on the first syllable which accounts for the doubling of those consonants which have to bear the brunt of the stress. The same thing happens in different vernaculars. Mark the following Bengali expressions (i) *sakkale jāne*, 'all know', (ii) *lakkhano nā*, 'never', (iii) *kichchhu dibo nā*, 'nothing I will give', (iv) *baidā garam*, 'too hot', (v) *chotto gāchh*, 'a very small tree', etc. So in Hindi *Kausikha* and *Gautamma* for *Kausika* and *Gautama* respectively (*Hammīra rāso*, *Nagṛipracārīnī*, p 9).<sup>3</sup> The subject of accentua-

<sup>3</sup> Sometimes doubling is made to suit a metre. Instances are abundant in Pithvīrajārāso.

tion in Prakṛita and the vernaculars is a very important one which, if not properly attended to, will leave unexplained several points of word formation in our vernaculars

With this preliminary remark I proceed to examine a few words to find out the influence of accents in determining the process of corruption —

- (i) Skt *khadira* > (ii) Pr *khaira* > (iii) *kha<sup>a</sup>ra* > (iv) H P M *khairā*, खैर (usually so written, but strictly, *khair*, the final vowel *a* being dropped and thus the word becoming practically monosyllabic)

Here in the second stage, (ii) *khaira* evidently contains three syllables (*kha-i-rah*) Now in the third stage, the word *kha<sup>a</sup>ra*, which is dissyllabic (*kha<sup>a</sup>-ra*), could by no means be formed unless the second of the three syllables in the second stage was reduced in quantity and thus easily blended with its preceding syllable or vowel (*i e a* in *kha*), making the word a dissyllabic one, and this reduction in the quantity of the second syllable in the second stage, (*kha i-ra*) becomes logically impossible unless the quantity of the first syllable is somewhat strengthened and lengthened by some stress or accent on it

Similarly

- (i) Skt *chatushka* > (ii) Pr *chaushka* > (iii) *cha<sup>u</sup>kka* > (iv) H P M *cha<sup>a</sup>ka* > *charka*, चौक (= *chauk*, चौक् )

Here the existence of the third stage which is a dissyllabic one depends entirely on the reduction in the quantity of the second syllable in the second stage which is effected by the accent on the first syllable

In a similar way we may explain the cases where there are *aya* or *ava* in a Sanskrit or Prakṛita word Thus

- 1 (i) Skt *nayana* > (ii) Pr *nayana* or *nayana* (with *ya-śruti*) > (iii) *nay na* > (iv) *nay-na* > (v) H P *na<sup>a</sup>na* > (vi) *na<sup>i</sup>n* or *na<sup>a</sup>n* ( नैन, नैन् )
- 2 (i) Skt *kavala* > (ii) *kav<sup>a</sup>la* > (iii) *kavla* > (iv) *ka<sup>a</sup>la* > (v) *ka<sup>u</sup>l* or *ka<sup>a</sup>l* ( कौल, कौल )

In the above instances the *ya*, *y<sup>a</sup>*, or *y*, and *va*, *v<sup>a</sup>*, or *v* have gradually become *i* and *u* respectively, because they are not accented. It is evident from Vedic texts that *ya* and *va* undergo *samprasāraṇa* only when they are not accented, on the other hand when they are accented they do not do so. For example, from √ *yaj*, 'to sacrifice', we have *is-tā* on the one side and *vyāj-a* on the other, from √ *vad*, 'to speak', *udī-tā*, *udyā-te*, when the root is unaccented, and *vāda-h* when it is accented. This fact has been noticed by Dr Tessitori, too, when he says (*ante*, Sept 1918, p 231) "so long as the *v* in *kasa vatī* retains the stress or emphasis it can never undergo *samprasāraṇa*". The principle working here is not difficult to understand. Accent or stress strengthens a syllable, which then cannot be subject to a change.

Let us now illustrate what has been said before regarding the wide and narrow sounds of *è*, *ò* and *é*, *ó* in Marwārī and Gujarātī

- (i) Skt *vaira* (dissyllable) > (ii) Pr *va<sup>a</sup>ra* (trisyllable) < (iii) G *vaira* (dissyllable) > (iv) *va<sup>i</sup>r* = *vair* = (with a pronunciation different from that of the Skt diphthong *ai*) *vèr*, वैर्

Here in the third stage, *vaira*, which is derived from the second (*vaira*, trisyllable), as shown above, there are two syllables, *va<sup>i</sup>* and *ra*, the accent falls here on the first part of the first syllable, *vai*, *i e* on the *va* or *a* of *va* and not on the whole syllable *va*. The accent having

fallen thereon strengthens and lengthens it to some extent, while the following *i* though reduced to something less than its normal proportion affects the preceding vowel sound thus making the whole sound of the vocalic group (*ai*) somewhat oblique. It may be compared with the *æ* sound in English, that is, the sound of *a* in 'hat' lying half way between *ê* (or *ē* long) and *â* (or *ā* long). The M. H. P. words like *khair*, खैर (Skt. *khadira* > Pr *khaira*) should be explained in this way though the sound of *ai* in them differs, as has ably been mentioned by Mr Divatia (*ante*, Jan 1918, p. 26).

I have already hinted that the narrow sound of *i*, *o* has come from dissyllabic *a i* and *a u*, the process being through the accent falling on the second syllable, *i e* on the *i* and *u* of *a-i* and *a u*, they are turned into *e* and *o* respectively, or in other words, according to the native grammarians, firstly there is the *guna* transformation of *i* and *u* into *e* and *o*, and secondly the preceding *a* of the original *a i* and *a-u* and the subsequent *a-e* and *a-o* is euphonicly coalesced according to the general rules for *Sandhi* either in Sanskrit or Pāli-Prakṛita. As it will take up too much space I purposely refrain here from explaining these rules in detail, citing, however, only two examples from the Sanskrit grammar, which are well known to all, viz *upa + egate = upegate*, *upa + oshati = uposhati* (Pāṇini, VI, 1. 94).

I believe, every *e* and *o*, as result of *Sandhi* of *ā + i* and *ā + u* in Sanskrit and Prakṛita and vernaculars as well, have appeared in this way and in this way only. *E* and *o* though still regarded as *Sandhyakshara* or diphthong in Sanskrit grammars through tradition, had long ago, even at the time of some of the *Prātisākhya*s lost that character and become single vowels, which could only be due to the process suggested above.

Sanskrit *ai* and *au* have generally assumed two forms each in Prakṛita, *a-i* and *e*, and *a-u* and *o* respectively. As regards the first forms, *a-i* and *a u*, it should be observed that they are dissyllables, while originally in Sanskrit they were monosyllables. Sanskrit monosyllables *ai*, *au* split themselves in Prakṛita into dissyllables *a-i* and *a-u* respectively. And then, in course of time, these dissyllabic *a-i* and *a-u* gradually became monosyllabic *e* and *o* through the process explained above. Now the whole process stated stands thus —

- (1) Skt *karlāsa* > Pr *karlāsa* (= *ka-i-lā-sa*-) > \**kaelāsa* (= *ka e-lā-sa*) > Pr *kelāsa*

Again

- (2) Skt *karlāsa* > Pr *karlāsa* (= *ka i-lā-sa*-) > (vernaculars such as B) *ka'lāsa* or *ka'lās*, usually written *karlāsa*

It goes without saying that this process holds good as regards *o*, too.

Here in the first series Pr *ka i-lā-sa* continued to be pronounced for some time in four syllables with its accent unaltered. Then the accent shifted on to the second syllable, *i e* on *i*, changing it into *e*, the whole form becoming \**ka e-lā-sa*. Following the law of economy in pronunciation the preceding *a* merged in the following *e* which had double strength of a long and accented vowel, and this resulted in the trisyllabic form, Pr *kelāsa*.

A few words of explanation are required about the change of *i* into *e*, and of *u* into *o* when they are accented. Examples of such cases are numerous, as will be borne out by the following. G *gora* (*gora*), 'family priest', < Skt *guru*, M *mehuna* (*mehuna*) < Pr *mihuna*, < Skt *mihuna*, S *peu* < Pr *piuo* < Skt *pitṛika*, etc, etc. That the *guna* in Vedic Sanskrit is due to accent is proved beyond any shade of doubt. For instance, *é-ti* (from  $\sqrt{\text{g}}i$  'to go') and *i-hi*, *bédha ti* (from  $\sqrt{\text{b}}udh$  'to wake' and *bud-dhā*, etc. Sometimes *i* and

*u* undergo *guna* before a conjunct letter, as Pr *penda* < Skt *pinda*, Pr *tonda* < Skt *tunda* (Hem VIII, 1 85, 116) This fact goes to show that the *guna* in such cases has been caused by the conjunct letter affecting the preceding *i*, *u* in the same way as an accent or stress does

Though it may seem from what has been said above that a narrow *e* can never come from Pi *a i*, of which the last member *i* does not change into *e*, we find in some cases the wide *è* gradually changing into a narrow *e*. I quote here the following words of Dr Tessitori — "There is in modern Marwarī Gujarātī a marked tendency to pronounce *e* and *ò* less wide when they are final than in other cases. In some cases the vowel is *actually heard as narrow*" (Italics are mine) Instances have been given by him (*Ante*, 1918, Sept, p 232) The cause of it is a natural one. For the sound of *è* (= *æ* as *a* in English 'hat') lies, as has been stated above, half way between *é* and *â*. One starting from *é* cannot reach *â* without passing through *è* (= *æ*). Thus the gradation is

$$(i) \acute{e} > (ii) \grave{e} > (iii) \hat{a}$$

I cannot, however, say whether *â* is actually found in the place of *è* in any word of Marwarī Gujarātī, but there is possibility of its being so

The sound *è* (*e*) is seen in Bengali in such words as *eka* (*ek<sup>a</sup>*), 'one', pronounced *æk<sup>a</sup>*, *dekha*, 'see', pronounced *dekha*, etc. It is seen also in Sinhalese, in which it is further divided into two, long and short, as *mæda* 'a ram' (generally transliterated as *med<sub>a</sub>*, *e=a* in 'hat'), B *mædhā* (generally written *medhā*) < Skt *mendaka*, *næna* (= *nena*), B *gæna* (though generally written as the following Skt) < Skt *jñāna*, *pækum*, 'mud', B *pækā* (written *pēkā* or in some quarters *pākhā*) < Skt *panka* or *pankaka*. This sound, with some diversities, exists in several other vernaculars the treatment of which is not necessary here

Now it will be seen in the above Bengali words that the sound in question has been expressed, though not adequately, sometimes by *e*, and sometimes by *â* of the elements of which it is made. (The sound *æ* is a combination of that of *e* and *â*) But sometimes again, it is represented in Bengali by *yâ*, as the same word *dekha* is now written by those who intend to represent the sound phonetically, as *dyākha* (or *dyākho*). Instances of this kind of writing abound in old Bengali MSS. In Sinhalese, too, this sound is expressed by *a* which is open in that tongue together with the symbol of *y* joined to a consonant. It is, thus, that when the English word 'manager' is transliterated into Bengali we come across two sorts of spelling, viz (i) *menejār<sup>a</sup>*, or (ii) *myānejār<sup>a</sup>*, while in Hindi it is written *mañejār<sup>a</sup>* (मैनेजर). Sometimes *â* is also seen for the same sound in Bengali though not properly, as, 'Harrison Road' is written either (i) *Hârisan Road*, or (ii) *Hersan Road*, or (iii) *Hyârisan Road*. Similarly we see the English word 'catalogue' written in Gujarātī as *ketālāga* (કેટલાગ), and so 'assistant' as *âsistant<sup>a</sup>* (આસિસ્ટન્ટ), 'malaria' as *meleriyâ* (મેલેરિયા), etc., etc.

As regards *ó* from *ò* in modern Marwarī-Gujarātī it is to be explained in the following way. Sometimes the second member of the group *a-u* being accented as stressed turns itself into *ó* and that *ó* predominating overcomes the preceding *a* which now disappears, as has already been stated. But sometimes, specially in compound words, there may not actually be a vocalic group of *a-u* or *a<sup>u</sup>* in spite of its apparent possibility, and consequently the above explanation cannot be applied there. In such cases, in the beginning of the final word of a compound we have an *u* or *û* which being accented changes into a narrow *ó*, there being nothing to widen it.

Thus, the word राथोड is pronounced in Marwâî-Gujarâî *râthôra* (= *râthôra*) with wide o, but sometimes *râthôra* (= *râthôra*) with narrow ó, as Dr Tessitori says. Here the original Skt is *râshtrakûta* whence through Pr gradually came *rattha-ûta* > *râtha-ûta* > *râtha<sup>u</sup>-ra* (ia becoming ra). Here in this last stage the final a of the first word and the initial û of the last one have become together a<sup>u</sup> (= ò), the whole compound word being in three syllables (*ra tha<sup>u</sup>-ra*) as already explained, and we have at last *râthôra* or *râthôr*. But the derivation of the word *râthôra* may be traced through a different process, viz *râtha-ûra* > *râth<sup>a</sup>-û<sup>a</sup>* > *raih û<sup>a</sup>* > *râihô<sup>a</sup>*, the accented û of *ûr* becoming ó<sup>4</sup>.

The same process may be the origin of the narrow ê in such words as *aveva* (or *avev<sup>a</sup>*) etc., as, Skt *avayava* > *avay<sup>a</sup>va* > *ava<sup>a</sup>va* > *av va* > *av êva=aveva* (or *avev<sup>a</sup>*). But *néra* (or *néra<sup>a</sup>*) is to be explained thus (i) Skt *nagara* > Pr *nayara* > *na<sup>a</sup>ra* > *na-ira* > *na era* > *néra* (*néra<sup>a</sup>*), or (ii) *na<sup>a</sup>ra* > *nèra*, and then gradually *néra* (*néra<sup>a</sup>*) as in the case of the transformation of *râthôra* into *râthôra<sup>a</sup>*, though it is not unlikely that in this last example, i.e. *râthôra<sup>a</sup>* the cause of the change lies in the loss of that element in ò which renders the simple sound an oblique one, i.e. the u of o<sup>u</sup>.

### MISCELLANEA

#### PAISÂCHÎ IN THE PRÂKRITA-KALPATARU

The late regretted S P V Ranganathaswami Aryavaragun was quite correct in his remarks in the important article on Paisâchî Prâkrî in the *Indian Antiquary* for November 1919, so far as they refer to my account in the Bhandarkar Commemoration Volume of Râmatarkavâgîsa's classification of Paisâchîka. I was there quoting Professor Konow's statements, which, in their turn, were based on Lassen's *Institutiones*. Since then, I have myself been able to study the India Office MS of the *Prâkrîta kalpataru*. Lassen's "chaska" certainly does not exist, and the correct word, as the Pandit has said, is evidently *chatushka*. I may add that I have since edited the whole Paisâchî chapter of the *Prâkrîta kalpataru*, and that it will appear in due course in the Asutosh Mukerjee Commemoration Volume.

I am, however, right in saying that Hemachandra does mention three varieties of Paisâchî. That is to say, he describes Paisâchî and two varieties of Chûlikâ paisâchîka (see iv, 325, 327).

I regret that in my article in the Bhandarkar Volume, I was compelled to trust to Lassen's incorrect account of the *Kalpataru* passage, which, at the time, was the only authority within my reach. That will now be corrected in my forthcoming edition, but the mistakes of Lassen in

no way invalidate the main argument of the portion of the article in which they are quoted. It is undoubted, as there maintained, that the standard Paisâchî of Râmatarkavâgîsa, of Mûkandeya, and of Lakshmîdhara was closely connected with the Kaikoya country.

(GEORGE A. GRIBSON)

#### A NEW GUPTA INSCRIPTION

This inscription was discovered by me a few months ago in the course of my listing tour at Tumain, a village in the Esagath District of Gwalior State, situated about forty miles to the west of Eran. Unfortunately the right portion (possibly more than one half) of the inscription is missing and consequently the first part of all the lines is lost. The inscription will be published in detail along with facsimile in the *Epigraphia Indica*. But as this must take some time, I hasten to give here a summary of the contents of the inscription with brief remarks on its historical bearing for the information of scholars.

The contents of the inscription can be briefly summarised as follows.—In the existing portion of line 1 is preserved the latter part of a verse which apparently refers to Samudragupta.

<sup>4</sup> That the process *râtha û<sup>a</sup>* > *râtha ô<sup>a</sup>* > *râthô<sup>a</sup>* is also quite possible has already been said.

The next verse in line 1 eulogises Chandragupta II as one who conquered the earth as far as the ocean. Line 2 is dedicated to Kumāragupta I here described as Chandragupta's son, who protected the whole earth as a chaste and devoted wife. Line 3 praises **Ghatotkachagupta** who is compared to the moon and who is spoken of as having won by (the prowess of) his arms the good fame attained by his ancestors. Line 4 specifies in words the date of the inscription, namely, **the year 116 of the era of the [Gupta] sovereigns** and mentions Kumāragupta as ruling over the earth at the time. The remaining two lines record the construction of a temple sacred to a god (whose name is lost), by a band of brothers residents of **Tumbavana** which is identical with modern Tumain where the inscription was found.

The chief historical interest of this inscription is this, that it enables us to recognise with certainty a member of the Imperial Gupta dynasty whose identity was hitherto a matter of surmise only. The person in question is **Ghatotkachagupta**, a name which was so far known from two documents (1) a seal<sup>1</sup> found at Basarh bearing the inscription *Sri Ghatotkachaguptasya* and (2) a coin<sup>2</sup> in the St Petersburg collection which, according to Mr Allan, bears on the obverse a marginal legend ending in *guptah* and beneath the king's arm the name *Ghato* with a crescent above and on the reverse a legend which seems to read *Kramadityah*. Dr Bloch was inclined to identify Ghatotkachagupta of the Basarh seal with *Mahārāja* Ghatotkacha, the father and predecessor of Chandragupta I, and this view was approved of by the late Dr V A Smith.<sup>3</sup> But Mr Allan<sup>4</sup> in his *Catalogue of the Gupta Coins in the British Museum* rightly points out the difficulties in the way of this identification and surmises that Ghatotkachagupta was probably a member of the Imperial Gupta family and that he probably held some office at the court of the *Yuvarāja* Govindagupta who was governor at

Vaisālī (Basarh) during the reign of his father Chandragupta II. The Ghato of the coin in the St Petersburg collection is believed by Mr Allan to be still another Ghatotkachagupta on the ground that the style and weight of the coin place it about the end of the fifth century and that it therefore cannot be referred either to Ghatotkacha, father of Chandragupta I, or to Ghatotkachagupta of the Basarh seal. But this conclusion which is arrived at from such general evidence can be only approximate and not exact. It certainly requires to be modified in the light of the new information supplied by our inscription.

Hitherto the identification of Ghatotkachagupta remained uncertain because he was known only from his seal and coin which did not mention his genealogical relations and because he was not referred to in any of the genealogical lists of the Guptas known so far. This want is now supplied by the genealogical list given in our inscription which places Ghatotkachagupta immediately after Kumāragupta I. Unfortunately the word expressing the exact relationship between Kumāragupta I and Ghatotkachagupta, which probably occurred in the inscription, is lost with the missing portion of the stone. It would appear, however, that Ghatotkachagupta was a son of Kumāragupta I and during the reign of his father held the office<sup>5</sup> of the governor of the province of Eran (Arikina) which included Tumbavana (the place where the inscription was recorded). This latter was evidently the reason why his name is recorded in the inscription although it refers itself to the reign of Kumāragupta I. Our inscription further gives a definite date for Ghatotkachagupta, namely, G E 116 (=A D 435). This date is so convenient as to make it almost certain that the Ghatotkachagupta of the Basarh seal, of the coin of St Petersburg collection and of our inscription were all identical.

## BOOK-NOTICE

THE ANNUAL REPORT OF THE MYSORE ARCHAEOLOGICAL DEPARTMENT FOR THE YEAR 1919  
Bangalore, Government Press

Mr R Narasimhachari, Director of Archaeological Research, Mysore, has produced a creditable and well illustrated report of energetic departmental work during the year 1919.

The somewhat bewildering iconography of South India is again represented in the plates, and it is well that it should be so, for the more European students learn of this, the better will they be able to understand Indian architectural design and ornament. They should also be specially grateful for the illustrations of the *mastikals* (memo-

<sup>1</sup> Director-General of Archaeology's *Annual Report* for 1903-04, pp 102 and 107.

<sup>2</sup> Allan's *Catalogue of the Coins of the Gupta Dynasties, etc in the British Museum*, p 149 and plate XXIV, 3, and Introduction, p liv.

<sup>3</sup> *Journal of the Royal Asiatic Society* for 1905, p 153, *Early History of India* (edition of 1914), p 280, note 1.

<sup>4</sup> Allan's *Catalogue*, Introduction, pp xvi-xvii and liv.

<sup>5</sup> That Ghatotkachagupta enjoyed a share in the Government is also proved by his having his own seal and coin.

rials) shown on plate V, as these are the counter parts of the family mural tablets and bas reliefs to be found all over Europe in churches and other sacred buildings. The two fine specimens of the *dīpa stambhas* or lamp pillars on plate III are extremely interesting and one is glad to note three good plates of inscriptions of the Gangas and the Hoysalas.

There are however two points in the *Report* that are of special interest to myself. The inscriptions reported of two of the Nayaks of Ikkeri dated A.D. 1660 and 1662 (Venkatappa II and Bhadrappa), because of the visits to that now lost capital in the days of Virabhadra and Venkatappa respectively by the European travellers Peter Mundy and Della Valle. In such cases we have the records of these ephemeral local dynasties as left by themselves, and the stories of their Courts as they appeared to contemporary European visitors. For instance, Peter Mundy in 1637 thus quaintly describes Virabhadra, "I dare say there is hardly such another grosse proportionable man to be found in all his owne dominions off aboutt 30 yeares of age" (*Travels*, ed Temple, Hakluyt Society, vol. III, p. 82).

The other point is a note on p. 12 regarding an inscription which is worth quoting in full. "At Rāmpura near Kadaba is an inscription, EC XII, Gubbī 27, dated 1696, which is of great interest from a sanitary point of view. It states that it was decided at a meeting of the villagers that no corpse should be buried within an arrow shot of a well that had been newly built, and that in case any burial took place the buriers and the buried should be outcasts in this world and the next. We have some evidence here of the ideas

of sanitation which the villagers had about two centuries and a quarter ago."

It is indeed interesting to note that villagers in South India in the late 17th Century A.D. recognized the danger of percolation into wells from insanitary surroundings, considering the universal old world theory in India that water of any kind of itself purifies. But epigraphs such as this are always worth recording wherever found, since one of the things that strikes observers of old and even ancient India and Asia generally is the modernity of the ways and thought of the people. Take the extraordinary "modernness" of mind that is in the *Ītihaśa* of Chāṇakya with its "on and off" drink licence, take the "Domesday Book" of Kulottunga Chola in the very year of that of William the Conqueror (A.D. 1086), take the self governing municipalities and local areas of ancient India. Even if these last be looked at in the light of relics of the Oriental policy of Alexander the Great, the idea is old enough in all conscience. Take the futile effort on the part of a Babylonian King to stop official corruption, the equally fruitless attempt of a Tibetan ruler to equalise the social position and property of every one in the State, the long War of Liberation in Annam, the close parallel between the use of the Popes of Rome and the Dalai Lamas, though it is not perhaps generally known that the former long preceded the latter. The fact is that the social methods of civilized man have a family likeness at the various periods and places of his existence, and it is therefore of value always to note them wherever they are found faithfully recorded without any ulterior motive.

R. C. TEMPLE

## NOTES AND QUERIES

### NOTES FROM OLD FACTORY RECORDS

17 Alligators' Gall and Hunting (Poligar) Dogs

[ February 1682 ] Letter from Brameny Podula Lyngapah [ the Brāhman agent, Podela Lingappa ] from Conjevaram [ Kanchipuram ] to William Gyfford, Governor of Fort St George. I enjoy good health wishing to hear the like from your Worship. His Lordship Brameny Accana [ the Brāhman Minister, Akkanna ] hath great necessity for one Vicee [ viss, vissai ] weight of Alligators Gaul [ a native laxative medicine ] and that I should by all means procure it and send it to him and therefore I beg the favour of your Worship to order your Mussula and Cattimarran [ *masūla* and catamaran, *kāṭimaram*, boat ] men to use the

utmost to gett a Vicee weight of the said Gaul, I earnestly desire your Worship to procure it. Some great Persons who are my friends at Court have desired me to procure for them some hunting Dogs, and I was inform'd your Worship had some thereabouts. If it be soe I desire your Worship to make choice of those which are handsome courageous and fleet to catch wild hogges, and to send two couple of them, and in so doing it will be as if your Worship had given me a Lack of Pagodas so I entreate your Worship to send them to me and to keepe a continuance of your Love towards me. (*Records of Fort St George, Letters to Fort St George, 1682, Vol. II, p. 15*)

R. C. T.

**Bânjagr ma**—Same as **Bâniyagâma**

**Bâniyagâma**—Vaisâlî (or Besâd) in the district of Muzaffurpur (Tirhut), in fact, Bâniyagâma was a portion of the ancient town of Vaisâlî (Dr Hoernle's *Uṛāsagadasâo*). See **Kuṇḍagâma**

**Baṇji**—Same as **Karura**, the capital of Uchra or Kerala, the Southern Konkan or the Malabar Coast (Caldwell's *Drav Comp Gram*, 3rd ed, p 96)

**Baṇjula**—The river Manjerâ, a tributary of the Godâvarî Both these rivers rise from the Sahya-pâda mountain or Western Ghats (*Matsya P*, ch 113) Baṇjula is mentioned as Maṇjula in the *Mahabhārata*, Bhîshma P ch 9

**Bankshu**—Same as **Chakshu** (*Bhâgavata P*, v 17)

**Bârâ**—Same as **Baruṇâ** (*Arā Kalp*, 99)

**Baradâ**—1 The river Wardha in the Central Provinces (*Mâlavikâgnimitra*, Act V *Agni P* ch 109, *Mbh Vana*, ch 85, *Padma P*, Âdi, ch 39) 2 A tributary of the Tungabhadra, on which the town of Vanavâsî, the abode of the two Dairyas Madhu and Kairabha, is situated See **Vanavâsî** and **Vedavati**

**Barâha-kshetra**—1 Baramûla in Kâsmîra on the right bank of the Jhelum, where Vishnu is said to have incarnated as Varâha (boar) There is a temple of Âdi-Varaha (see **Sâkara-kshetra**) 2 Another place of the same name exists at Nâthpur on the Kuśî in the district of Purnea below the Trivenî, see **Mahâ-Kausika** (*JASB*, XVII, 638) It is the Kokâmukha of the *Varâha Purâna* sacred to Varaha, one of the incarnations of Vishnu (*Varâha P*, ch 140) See **Kokâmukha**

**Barâha-Parvata**—A hill near Baramûla in Kâsmîra [*Vishnu Samhitâ*, ch 85, *Institutes of Vishnu*, *SBE*, vol VII, p 256, note]

**Barapa**—1 Bulandshahr near Delhi in the Punjab (Growse, *JASB*, 1883) This town is said to have been founded by Janmejaya, son of Parikshit and great-grandson of Arjuna (*Bulandshahr* by Growse, in the *Calcutta Review*, 1883, p 342) At Ahar, 21 miles north-east of Bulandshahr, he performed the snake-sacrifice (*JASB*, 1883, p 274) A Jaina inscription also shows that it was called Uchchanagara (Dr Buhler, *Ep Ind*, vol 1, p 375) 2 Same as **Aornos** (*Ind Ant*, I, 22)

**Baraṇâ**—Same as **Baruṇâ** (*Kûrma P*, I, ch 31)

**Barâṇsa**—Same as **Parâṇsâ**

**Bârânasî**—Benares situated at the junction of the rivers Barnâ and Asî, from which the name of the town has been derived (*Vâmana P*, ch III) It was formerly situated at the confluence of the Ganges and the Gumtî (*Mbh*, Anuśāsana, ch 30) It was the capital of Kâśî (*Râmâyana*, Uttara, ch 48) At the time of Buddha, the kingdom of Kâśî formed a part of the kingdom of Kosala (see **Kâśî**) According to James Prinsep, Benares or Kâśî was founded by Kâśa or Kâśîrâja, a descendant of the Pururavas, king of Pratishthana (see **Pratishthana**) Kâśîrâja's grandson was Dhanvantari, Dhanvantari's grandson was Divodâsa, in whose

reign Buddhism superseded Śiva-worship at Benares, though it appears that the Buddhist religion was again superseded by Saivism after a short period. In 1027, Benares became part of Gauda, then governed by Mahîpâla, and Buddhism was again introduced in his reign or in the reign of his successors Sthirapâla and Vasantapâla. Benares was wrested from the Pâla kings by Chandra Deva (1072—1096) and annexed to the kingdom of Kanauj. Towards the close of the twelfth century, Benares was conquered by Muhammad Ghuri who defeated Jaya Chand of Kanauj (James Prinsep's *Benares Illustrated, Introduction*, p 8, *Vâyu P*, Uttara, ch 30). In the seventh century, it was visited by the celebrated Chinese traveller Huen Tsiang. He has thus described the city and its presiding god Visvesvara, one of the twelve Great Lingas of Mahâdeva. "In the capital there are twenty Deva temples, the towers and halls of which are of sculptured stone and carved wood. The foliage of trees combines to shade (the sites), whilst pure streams of water encircle them. The statue of Deva Mahesvara, made of *teou-shih* (brass), is somewhat less than 100 feet high. Its appearance is grave and majestic, and appears as though really living." The *Padma P* (Uttara, ch 67) mentions the names of Visvesvara, Vindumadhava, Manikarnikâ, and Jñānavâpî in Kâśî (Benares). The present Visvesvara, which is a mere *Linga*, dates its existence since the original image of the god, described by Huen Tsiang, was destroyed by the iconoclast Aurangzebe and thrown into the Jñānavâpî, a well situated behind the present temple. There can be no doubt that Benares was again converted into a Buddhist city by the Pâla Râjâs of Bengal, and Śiva-worship was not restored till its annexation in the eleventh century by the kings of Kanauj, who were staunch believers in the Pauranic creed. The shrines of Âdi-Visvesvara, Venimâdhava, and the Bakarya-kunda were built on the sites of Buddhist temples with materials taken from those temples. The temple of Âdi-Kesâva is one of the oldest temples in Benares. It is mentioned in the *Prabodha Chandrodaya Nâitaka* (Act IV) written by Krishna Miśra in the eleventh century A.D. The names of Mahâdeva Tilabhândeśvara and Dasâśvamedhesvara are also mentioned in the *Śiva Purâna* (Pt 1, ch 39). The Manikarnikâ is the most sacred of all cremation ghats in India, and it is associated with the closing scenes of the life of Râjâ Harîchandra of Ayodhyâ, who became a slave to a Chandâla for paying off his promised debt (Kshemesvara's *Chanda-kauśika*, *Mârkandeya P*, ch viii). The old fort of Benares which was used by the Pâla Râjâs of Bengal and the Rathore kings of Kanauj, was situated above the Râj-ghât at the confluence of the Barnâ and the Ganges (Bholanath Chunder's *Travels of a Hindoo*, vol I). Benares is one of the Pithas where Sati's left hand is said to have fallen, and is now represented by the goddess Annapûrnâ, but the *Tantrachudâmani* mentions the name of the goddess as Visâlakshî. There were two Brahmanical Universities in ancient India, one at Benares and the other at Takshasilâ (Taxila) in the Punjab. For the observatory at Benares and the names of the instruments with sketches, see Hooker's *Himalayan Journals*, Vol I, p 67. Benares is said to be the birth-place of Kâśyapa Buddha, but Fa Hian says that he was born at Too-wei, which has been identified by General Cunningham with Tadwa or Tandwa (Legge's *Fa Hian*, ch xxi, *Arch*

*S Rep*, XI), nine miles to the west of Srāvastī Kasyapa died at Gurupāda hill (see *Gurupāda-giri*) But according to the *Atthakathā* of Buddhaghosha, Kasyapa (Kassapa) was born at Benares and died at Mrigadāva or modern Sarnāth (*JASB*, 1838, p 796) In the *Yuvāñjaya-Jātaka* (*Jātakas* IV, 75), the ancient names of Benares are said to have been Surandhana, Sudasana, Brahmavarddhana, Pushpavatī, and Ramya

**Bārānasi-Kāṭaka**—Katak in Orissa, at the confluence of the Mahānadi and the Kāṭjuri, founded in A D 989 by Nripa Kesarī, who reigned between A D 941 and 953 He removed his seat of government to the new capital According to tradition, his capital had been Chaudwar which he abandoned, and constructed the fort at Katak called Badabātī The remains of the fort with the ditch around it still exist For a description of the fort (Barabātī), see Lieut Kitto's "Journal of a Trip to Cuttack" in *JASB*, 1838, p 203 The former capitals of the Kesarī kings were Bhuvanesvara and Jāṅpur (Hunter's *Orissa* and Dr R L Mitra's *Antiquities of Orissa*, vol II, p 164) Fleet's identification of Vmītapura and Nayātmagata of the inscriptions with Katak appears to be very doubtful The strong embankment of the Kāṭjuri is said to have been constructed by Markat Kesarī in A D 1906 The town contains a beautiful image of Krishna known by the name of Sākshi-Gopāla (*Chaitanya-chintāmanī*, II, 5)

**Bārānāvata**—Barnava, nineteen miles to the north-west of Mirat where an attempt was made by Duryodhana to burn the Pāṇḍavas (Führer's *MAI*, and *Mbh*, Aḍi, ch 148) It was one of the five villages demanded by Krishna from Duryodhana on behalf of Yudhishthira (*Mbh*, Udyoga, ch 82)

**Barddhamāna** 1 From the *Kathā-saut-sāgara* (chs 24, 25), Barddhamāna appears to have been situated between Allahabad and Benares, and north of the Vindhya hills It is mentioned in the *Mārkaṇḍeya Purāna* and *Vetāla-pañchavimsati* 2 Barddhamāna was called Asthikagrāma because a *Yaksha* named Śālapāni had collected there an enormous heap of bones of those killed by him Mahāvīra, the last Jaina Tīrthankara, passed the first rainy season at Barddhamāna after attaining Kovaliship (Jacobi's *Kalpāsūtra*, *SBE*, vol. XXII, p 261) From a copper-plate inscription found at Banskhera, 25 miles from Shah-Jahanpur, it appears that Barddhamāna is referred to as Barddhamāna-kotī (see also *Mārkaṇḍeya P*, ch 58), where Harshavarddhana had his camp in A D 638 Barddhamāna-kotī is the present Bardhankotī in Dinajpur Hence Barddhamāna is the same as Bardhankotī Barddhamāna is mentioned as a separate country from Banga (*Devī P*, ch 46) 3 Barddhamāna (Vadhamāna) is mentioned in Spence Hardy's *Manual of Buddhism*, p 480, as being situated near Danta 4 The Lalitpur inscription in *JASB*, 1883, p 67, speaks of another town of Barddhamāna in Malwa 5 Another Bardhamāna or Bardhamānapur was situated in Kathiāwād it is the present Vadvāna, where Merutunga, the celebrated Jaina scholar, composed his *Prabandha-chintāmanī* in A D 1423 he was also the author of *Mahāpurushacharita*, *Shaddarśanavichāra*, &c (Merutunga's *Therāvalī* by Dr Bhau Daji, *Prabandha-chintāmanī*, Tawney's Trans, p 134, and his *Preface*, p vii)

**Barendra**—Barenda (*Devī P*, ch 39), in the district of Maldah in Bengal, comprising the Thānās of Gomastapur, Nawabganj, Gajol and Malda it formed a part of the ancient kingdom of Pundra It was bounded by the Ganges, the Mahānandā, Kāmrup, and the Karatoyā Its principal town was Mahāsthāna, seven miles north of Bogra, which was also called Barendra (*JASB*, 1875, p 183) See **Pundra-vardhana**

**Barnu**—Bannu in the Punjab it is the Falanu of Huen Tsiang and Pohna of Fa Hian It is mentioned by Pāṇini (Cunningham's *Anc Geo*, p 84, *Ind Ant*, I, p 22)

**Barshāna**—Barshan, near Bharatpur, on the border of the Chhāta Parganā in the district of Mathurā, where Rādhikā was removed by her parents Bṛishabhānu and Kīrat from Rāval, her birth-place Rādhikā's love for Kṛishna as incarnation of Narāyana has been fully described in the Purānas See **Āṣṭagrāma** Barshan is perhaps a corruption of *Bṛishabhānupura* Barshān, however, was also called Baśasānu, a hill on the slope of which Bṛishabhānupura was situated

**Barsha Parvata**—The six Baisha Parvatas are Nēla, Nishadha, Sveta, Hemakūta, Himavān, and Śṛṅgavān (*Varāha P*, ch 75)

**Bārtraghnī**—Same as **Britaghnī** and **Betravali** 2

**Barunā**—The river Barnā in Benares (*Mahābhārata*, Bhīshma, ch 9)

**Baruṇa-tīrtha**—Same as **Salīlarāja-tīrtha** (*Mbh*, Vana 82)

**Barusha**—The Po-lu-sha of Huen Tsiang It has been identified with Shahbazgarhi in the Yusufzai country, forty miles north-east of Peshawar A rock edict of Aśoka exists at this place

**Bāsantaka-kshetra**—Same as **Bindubāsinī** (*Bṛhaddharma P*, I, 6, 14)

**Basatī**—The country of the Basatis or Besatæ, a Tibeto-Burman tribe, living about the modern Gangtok near the eastern border of Tibet (*Mbh*, Sabhā, ch 51, Mr W H Schoff's *Periplus*, p 279) McCrindle, on the authority of Hemachandra's *Abhidhāna*, places it between the Indus and the Jhelam (*Invasion of India*, p 156 note) It comprised the district of Rawal Pindi

**Bāsika**—Same as **Bāśya** (*Matsya P*, ch 113)

**Baśishtha-āśrama**—1 The hermitage of Rishi Vāśishtha was situated at Mount Abu (see **Arbuda**) At a place one mile to the north of the Ayodhyā station of the Oudh and Rohilkhand Railway 3 On the Sandhyāchala mountain near Kāmārupa in Assam (*Kālikā Purāna*, ch 51)

**Baśishthī**—1 The river Guntī (*Hemakosha*) 2 A river in the Ratnagiri district, Bombay Presidency (*Bomb Gaz*, X, pp 6—8, *Mbh* Vana, ch 84).

**Bastrāpatha-kshetra**—See **Girīnagara**

**Basudhārā-tīrtha**—The place where the **Alakānandā** (*q v*) has got its source, about four miles north of Badrinath, near the village Manāl

**Basyâ**—Bassein in the province of Bombay Basyâ is mentioned in one of the Kanheri inscriptions It was included in Barâlâtâ (Barâr), one of the seven divisions of Paraśurama-kshetra The principal place of pilgrimage in it is the Bimala or Nirmala Tīrtha mentioned in the *Skanda Purāna* The Bimaleśvara Mahādeva was destroyed by the Portuguese (Da Cunha's *Hist of Chaul and Bassein*) It was the kingdom of the Śilāhāras from whom it passed into the hands of the Yādavas in the thirteenth century (*JRAS*, vol II, p 380)

**Bâtadhâna**—A country mentioned in the *Mahābhārata* (Sabhâ, ch 32) as situated in Northern India it was conquered by Nakula, one of the Pāndavas It has been supposed to have been the same as Vethadvīpa of the Buddhist period (see *Vethadvīpa*) see *JASB*, 1902, p 161 But this identification does not appear to be correct, as in the *Mahābhārata* (Bhishma P, ch 9, Sabhâ P, ch 130), in the *Mārkaṇḍeya Purāna*, ch 57 and in other Purānas, Bâtadhâna has been named between Bāhika and Ābhua, and placed on the west of Indraprastha or Delhi, so it appears to be a country in the Punjab Hence it may be identified with Bhatnair Batadhâna has, however, been identified with the country on the east side of the Sutlej, southwards from Ferozepur (Pargiter's *Mārkaṇḍeya P*, p 312, note).

**Batapadrapura** - Baroda, the capital of the Gaikwar, where Kumārāpāla fled from Cambay (Bhagavankar Indraj's *Early History of Gujarat*, p 183).

**Bâtâpi**—See **Batâpipura**

**Bâtâpipura**—Badami near the Malprabha river, a branch of the Krishnâ, in the Kaladgi district, now called the Bijapur district, in the province of Bombay, three miles from the Badami station of the Madras and Southern Mahratta Railway It was the capital of Pulakeśi I, king of Mahārāshtra (Mo-ho-la-cha of Huen Tsiang) in the middle of the sixth century A D, he was the grandson of Jaya Simha, the founder of the Chālukya dynasty He performed the Āśvamedha sacrifice It was Pulakeśi II, the grandson of Pulakeśi I, who defeated Harshavardhana or Śilāditya II of Kanauj There are three caves of Brahmanical excavation, one of which bears the date A D 579, and one Jama cave temple, A D 650, at Badami One of the caves contains a figure composed of a bull and an elephant in such a way that when the body of one is hid, the other is seen (Burgess's *Belgam and Kaladgi Districts*, p 16) Bâtâpi is said to have been destroyed by the Pallava king Narasimhavarman I (*Ep Ind*, vol III, p 277) The name of Bâtâpipura was evidently derived from Bâtâpi, the brother of Ilvala (of the city of Manmatha see *Ind Ant*, XXV, p 163, note) Bâtâpi was killed by Rishi Agastya on his way to the south (*Mbh*, Vana, ch 96) See **Iivalapura**

**Batesa**—Same as **Batesvaranātha** (*Agni P*, ch 109)

**Batesvaranātha**—Same as **Śilāsangama** The temple of Batesvaranātha is situated four miles to the north of Kahalgāon (Colgong) on the Pātharghāt Hills called also Kasdi Hill The *Uttara-Purāna* describes the rock excavations and temple of Batesvarnātha

at this place (Franklin's *Palibottra*) The rock excavations and ruins at Pātharghātā are the remains of the Buddhist monastery named Bikramaśīlā Saṅghāīama (see *Bikramaśīlā Vihāra*)

**Batsya**—A country to the west of Allahabad It was the kingdom of Rājā Udayana, its capital was Kauśāmbī (see **Kausambi**) At the time of the *Rāmāyana* (I, 52), its northern boundary was the Ganges

**Batsyapattana**—Kausāmbī, the capital of Batsya-deśa, the kingdom of Batsya Rājā Parantapa and Udayana (*Kathāsarit-sāgara*) See **Kausāmbī**

**Bedagarbhapurī**—Buxar, in the district of Shahabad in the province of Bengal (*Brahmānda P*, Pūrva Kh, chs 1—5 called *Vedagarbha-māhāt*, and *Suanda P*, Sūta-saṃhitā, IV, Yajña Kh, 24) The word Buxar, however, seems to be the contraction of Vyāghrasara, a tank attached to the temple of Gaurī-śankara situated in the middle of the town Same as Viśvāmītra-āśrama, Siddhāśrama, Vyāghrasara and Vyāghrapura

**Beda-parvata**—A hill in Tirukkalukkuniam in the Madras Presidency, on which is situated the sacred place called Pakshī-tīrtha See **Pakshī-tīrtha** (*Devī P*, ch 39, *Ind Ant*, X, 198)

**Bedāranya**—A forest in Tanjore, five miles north of Point Calimere it was the hermitage of Rishi Agastya (*Devī-Bhāgavata*, VII, 38, Gangoly's *South Indian Bronzes*, p 16)

**Bedasmṛiti**—It is the same as **Bedasrutī** (*Mbh*, Bhishma, ch 9)

**Bedāśrutī**—1 The river Barta in Oudh between the rivers Tonse and Guntī (*Rāmāyana*, Ayodhyā, ch 49) 2 The river Besulā in Malwa The name of Bedāśrutī does not appear in many of the *Purānas*, only the river Bedasmṛiti being mentioned

**Bedavatī**—1 The river Hagari, a tributary of the Tungabhadra in the district of Bellary and Mysore [*Skanda P*, Sahyādri kh, *Ind Ant*, vol XXX (Fleet)] But see *Varāha P*, ch 85 The river Baradā or Bardā, southern tributary of the Kṛishnā, the Baradā of the *Agni Purāna*, CIX, 22 (Pargiter's *Mārkandeya P*, p 303) See **Baradā**

**Bedisa-giri**—Same as **Bessanagara** (*Oldenberg's Dīpavamsa*) and Bīḍīkā or Bhūḷa, 26 miles north-east of Bhopal in the Gwalior State

**Begā**—Same as **Begavatī** (*Padma P*, Śiṣṭī, ch 11)

**Begavatī**—1 The river Baiga or Bygi in the district of Madura (*Śiva P*, Bh 11, ch 10, *Padma P*, Uttara, ch 84, Mackenzie Collection, pp 142, 211) The town of Madura is situated on the bank of this river 2 Kārchīpura or Conjevaram stands on the northern bank of a river called Begavatī.

**Behat**—The river Jhelum in the Punjab

**Beltura**—Berul, Yerulā, Elura, or Ellara in the Nizam's Dominion (*Ind Ant*, XXII, p 193, *Bṛhat-saṃhitā*, XIV, 14)

**Benā**—The river Wain-Gaigā in the Central Provinces (*Padma P*, Ādi kh, ch 3) Same as **Benva** It is a tributary of the Godāvāī [*Mbh*, Vana, ch 85, *Padma P*, Svarga (Ādi), ch 19]

**Benākātaka**—Wāṅgaḷ, the capital of Teluṅgaṇa or Andhra (*Literary Remains of Dr Bhanu Datta*, p 107)

**Beṅgi**—The capital of Andhra, situated north-west of the Elur lake, between the Godāvarī and the Kṛṣṇā in the Kistna district It is now called Begi or Pedda-Begi (Sewell's *Sketch of the Dynasties of Southern India*, p 99) Viṣṇuvardhana, brother of Pulakeśi II, founded here a branch of the Chalukya dynasty in the seventh century A D (see *Andhra*) Its name is mentioned in the *Vikramāṅkadevacharita*, VI p 26 (see Buhler's note in the *Introduction* to this work at p 35) From the capital, the country was also called Bengi-desa which according to Sir W Elliot, comprised the districts between the Kṛṣṇā and the Godavari (*JRAS* vol IV) It is now called the Northern Circars (Dr Wilson's *Indian Caste* vol II, p 88) Its original boundaries were, on the west the Eastern Ghats, on the north the Godāvarī and on the south the Kṛṣṇā (*Bomb Gaz*, vol I, Pt II, p 280)

**Beṇi**—1 A branch of the Kṛṣṇā (*Padma P*, Uttara, ch. 74), same as Benvā 2 The Kṛṣṇā itself

**Beṇi-gangā**—The river Wam Gangā see **Benvā** (*Bṛhat-Śiva P*, Uttara, ch 20)

**Benkāṭa-giri**—The Truṇalai mountain near Tripaṭi or Tirupaṭi in the north Arcot district, about seventy two miles to the north-west of Madras, where Rāmānuja, the founder of the Śrī sect of the Vaiṣṇavas, established the worship of Viṣṇu called Venkatasvāmi or Bālāji Bīṣvanātha in the place of Śiva in the twelfth century of the Christian era same as **Tripaṭi** See **Srirangam** The *Padma Purāṇa* (Uttara kh, ch 90) mentions the name of Rāmānuja and the Venkaṭa hill See **Tripaṭi**. Benkaṭādri is also called Śeṣhādri (*Ep Ind*, vol III, p 240, *Skanda P*, Viṣṇu kh, chs 16, 35) For the list of kings of Venkaṭagiri, see *JASB*, (1838) p 516

**Benugrāma**—Same as **Sugandhāvartī**

**Beṇuvana vihāra**—The monastery was built by king Bimbisāra in the bamboo-grove situated on the north-western side of Rājgir and presented to Buddha where he resided when he visited the town after attaining Buddhahood It has been stated in the *Mahavaṅga* (I, 22, 17) that Venuvana, which was the pleasure garden of king Seniya (Śrenika) Bimbisāra was not too far from the town of Rājagṛha nor too near it (see **Girivrajapura**) It was situated outside the town at a short distance from the northern gate at the foot of the Baibhāra hill (Beal's *Fo-Kwa-Ki*, ch xxx, *Ava Kalp*, ch 39)

**Benvā**—1 The Bena, a branch of the Kṛṣṇa, which rises in the Western Ghats Same as **Beṇi** 2 The Kṛṣṇā 3 The river Wam-Gangā, a tributary of the Godāvarī, which rises in the Vindhyaṭpāda range (*Mārkaṇḍeya P*, ch 57) Same as **Beṇā** It is called **Beṇi Gangā** (*Bṛhat-Siva P*, Uttara, ch 20)

**Benya**—Same as **Beṇā** the river Wam-Gangā

**Bessanagara**—Besnagar, close to Sanchi in the kingdom of Bhopal, at the junction of the Besali or Bes river with the Betva, about three miles from Bhilsa It is also

called Chetiya, Chetiyanagara, or Chetyagiri (Chaityagiri) in the *Mahāvamsa*. It was the ancient capital of Dasârna. Asoka married Devî, the daughter of the chieftain of this place, on his way to Ujjayinî, of which place, while a prince, he was nominated governor. By Devî, he had twin sons, Ujjeniya and Mahinda and a daughter Saughâmitta. The two last named were sent by their father to introduce Buddhism into Ceylon with a branch of the Bodhi-tree of Buddha-Gayâ. Asoka was the grand-son of Chandragupta of Pâtaliputra, and reigned from 273 to 232 B.C. A column was discovered at Besnagar, which from the inscription appears to have been set up by Heliodorus of Tarsus who was a devotee of Vishnu, as *Garuda dhvaja*, in the reign of Antialcidas, a Bactrian king who reigned about 150 B.C. See **Chetyagiri**.

**Bethadîpa**—It has not been correctly identified, but it seems to be the modern Bethia to the east of Gorakhpur and south of Nepal. The Brahmins of Bethadîpa obtained an eighth part of the relics of Buddha's body after his death (*Mahaparinibbâna Sutta*, ch. vi). See **Kusinagara**. It seems that the extensive ruins consisting of three rows of earthen barrows or huge conical mounds of earth, about a mile to the north-east of Lauriya Navandgar (Lauriya Nandangarh) and 15 miles to the north-west of Bethia in the district of Champaran, are the remains of the *stupa* which had been built over the relics of Buddha by the Brahmins of Bethadîpa. At a short distance from these ruins stands the lion pillar of Asoka containing his edicts. Dîpa in Bethadîpa is evidently a corruption of *Dhâpa*, which again is a corruption of *Dâgaba* or *Dhâtugarbha* or *Stûpa* containing Buddha's relics [cf. **Mahâsthâna**, the ancient name of which (*Sîtâ-dhâpa* or *Sîtâ-dhâtugarbha*) was changed into *Sîtâ-dîpa*]. The change of *Dîpa* into *Dia* is an easy step. Hence it is very probable that from Bethadîpa comes Bethia.

**Betravati**—1. The river Betwa in the kingdom of Bhopal, an affluent of the Jamunâ (*Meghadûta*, Pt. I, 25), on which stands Bhilsa or the ancient Vidisâ. 2. The river Vatrak, a branch of the Sâbarmatî in Gujarat (*Padma P.*, Uttara, ch. 53, on which Kaira (ancient Khetaka) is situated [*JASB* (1838) p. 908]. Same as **Brtraghni** and **Bartraghni**.

**Bhaddiya**—It is also called Bhadiya and Bhadiyanagara in the Pâli books. It may be identified with Bhadaria, eight miles to the south of Bhagalpore [see my "Notes on Ancient Anga" in *JASB*, X, (1914), p. 337]. Mahāvîra, the last of the Jaina Tirthankaras, visited this place and spent here two Pajjusanas (rainy-season retirement). It was the birth-place of Visakhâ, the famous female disciple of Buddha (see **Srâvastî**). She was the daughter of Dhanañjaya and grand-daughter of Mendaka, both of whom were treasurers to the king of Anga. Buddha visited Bhaddiya (*Mahāvagga*, V, 8, 3), when Visakhâ was seven years old and resided in the Jâtîyâvana for three months and converted Bhaddaji, son of a rich merchant [*Mahāvagga*, V, 8, *Mahâ-Panâda-Jâtaka* (No. 264) in the *Jâtakas* (Cam. Ed.), vol. II, p. 229]. Visakhâ's father removed to a place called Sâketa, 21 miles to the south of Srâvastî, where she was married to Pûrvavarddhana or Purnyavardhana, son of Migâra, the treasurer of Prasenajit, king of Srâvastî. She caused Migâra, who was a follower of Nigrantha-Nâthaputra, to adopt the Buddhist faith, and hence she was called Migâramâtâ (*Mahāvagga*, VIII, 51, Spence Hardy's *Manual of Buddhism*, 2nd ed., p. 226). It appears that at the time of Buddha, the kingdom of Anga had been annexed to the Magadha kingdom by Bimbisâra, as Bhaddiya is said to have been situated in that kingdom (*Mahāvagga*, VI, 34, Spence Hardy's *Manual of Buddhism*, p. 166).

## EPISODES OF PIRACY IN THE EASTERN SEAS, 1519 TO 1851.

BY S CHARLES HILL

( *Continued from p 101* )

## XXVIII

## WHOLESALE DESTRUCTION OF BORNEO PIRATES, 1849

The piratical inhabitants of Borneo were of two classes, the Dayaks, whose object was chiefly to secure human heads as trophies, and the Malays, whose object was plunder and also to take as many prisoners as they could to sell as slaves. In 1839-41 the celebrated Rajah Brooke established himself at Sarawak in Borneo, and set about suppressing piracy not only amongst his own subjects, but also amongst his neighbours. After some mistaken opposition, he received the support of the British Government, and the following letter to the *Illustrated London News* narrates the destruction of a large fleet of piratical *prahus* on their return from one of their raids. The affair was characteristically described in Parliament as a massacre of practically unarmed men, against whom there was no proof of piracy—much as if one were to call it murder to shoot a tiger when, after having gorged itself on its prey, it was seen slinking back to its lair.

-----  
*To the Editor of the Illustrated London News*

I send you the following account of an expedition against the pirates of the north-western coast of Borneo

"Arrangements were made that H M S *Maeander*,—guns, *Albatross*, 12 guns, and *Royalist*, 10 guns, together with the H E I C war-steamers *Nemesis* [Captain T Wallace] and *Semramis*, should rendezvous at Sarawak, and furnish boats and an European force of 300 men

"The *Maeander* and *Semramis* however did not arrive, and the effective force of the *Royalist* and *Nemesis* were so reduced by illness, that we could only muster 7 boats, manned by 108 men, including officers

"All arrangements being completed, it was considered better to proceed, even with this reduced force, than (by waiting longer) to run the risk of being overtaken by the rainy season. Accordingly we started on the 24th July to attack the strongholds of the pirates on the River Rejang,<sup>77</sup> who had been very daring of late. I may mention here that, shortly before we left Sarawak, the pirates of the River Serebus<sup>78</sup> sent an insulting message to the Rajah, Sir James Brooke, asking 'if he were an old woman and afraid, that he did not attack them as he had threatened.' It will be seen in the sequel that this message is not likely to be repeated. The *Nemesis* towed the *Royalist* up the Batang Lupar, a noble stream, and moored her at the mouth of the Linga, which falls into the Batang Lupar,<sup>79</sup> to protect a friendly tribe resident there, during the absence of the warriors, who accompanied us on the expedition

"We left Batang Lupar on the 26th July 1849 and towed the European boats to Banting Marron, a low sandy point separating the Rivers Serebus and Kaluka, [all in Datu Bay] and which had been appointed by the Rajah as the place of rendezvous for the entire force, European and native, previous to starting for the River Rejang.

---

<sup>77</sup> On the west of Borneo —ED.

<sup>78</sup> Sambas River, to the south of Rejang River, flows into Datu Bay —ED

<sup>79</sup> The Batang Lupar and Linga, two streams, also flow into Datu Bay —ED

"On the 27th an old Malay chieftain brought us intelligence that a piratical fleet of 107 prahus, with at least 3,500 men, had left the Serebus the day before our arrival, passing round Tanjong Siri<sup>80</sup> to attack and plunder such villages on the Rejang as were not powerful enough to resist them. The piratical tribes [Dayaks] reside for the most part very far inland, near the sources of the numerous rivers of this coast, in which situations the streams are very contracted and rapid and the banks elevated and heavily timbered. They take advantage of these circumstances and render the advance of an enemy almost impossible by felling huge trees across the river and by cutting others and keeping them suspended by rattans, so that they can be launched in a moment on a passing boat, crushing her to atoms. On any alarm at sea they immediately retreat to some of these strongholds and sink or otherwise conceal their prahus in some of the innumerable creeks with which the rivers abound. All attempts therefore at intercepting a piratical fleet have hitherto failed. Their practice is to make a raid, and pouncing on some unsuspecting village (as the Malays poetically express it) like the rush of the alligator, to burn it, killing all the men and boys and cutting their heads off (which they value beyond price as trophies) and carrying off the women as slaves. They then, whether successful or unsuccessful, return as speedily and quietly as they issued forth, having plundered any native trading prahu they fall in with and murdered the crew. Advantage was therefore taken of the unusually favourable opportunity now offered, and a plan was immediately laid by Captain Farquhar of H. M. S. *Albatross*, who commanded the expedition, and the Rajah [Sir James Brooke] for surprising and cutting them off on their return. The Serebus and Kaluka, the only avenues to the country of the pirates, flow into a deep bay [Datu Bay], round the north east point of which, called Tanjong Siri, the piratical flotilla must return. The following disposition therefore was made of the force under Captain Farquhar's orders. Very fast spy or scout boats were stationed at Tanjong Siri with instructions to return on the first appearance of the enemy and announce their approach.

"The Rajah with a native force of about forty well-armed prahus, including the *Singa Rajah*, pulling eighty oars, commanded by Sir James Brooke in person, and the *Rajah Walla*, pulling sixty oars, commanded by the Rajah's nephew and acknowledged successor, Captain Brooke of the 88th Regiment (Connaught Rangers) [afterwards Rajah Sir Charles Johnson Brooke,] as well as the cutters of the *Albatross* and *Royalist*, commanded by Lieutenants Wilmshurst and Everest, were stationed in ambush at the mouth of the Kaluka. A large native force of about forty prahus was stationed at the entrance of the Serebus, supported by the three remaining boats of the *Albatross* commanded respectively by Captain Farquhar, Lieutenant Brickwell and Mr. Williams, and the two boats of the *Nemesis*, under Messrs Goodwin and Baker as well as the *Ranee*, a very inefficient river steamer, commanded by Mr. Wright.

"Trying as it was to the patience of all parties, we remained in position until the 31st, during which interval every precaution human foresight could suggest was adopted to secure success. About 7½ p.m. we were engaged in a rubber of whist on board the *Nemesis* and had almost abandoned all hope of surprising the enemy, when a spy-boat returned at best speed, with the long and anxiously looked for intelligence that the piratical fleet had rounded Tanjong Siri and was rapidly approaching our position. As yet it was of course uncertain for which river they would make. This question was however soon set at rest

<sup>80</sup> Tanjong (Cape) Siri, at the mouth of the River Rejang —ED

and a brisk fire of rockets from the cutters and of great and small guns from the remainder of the Rajah's force, stationed at the mouth of the Kaluka announced that the enemy had attempted to force that river and had met with a warmer reception than they had anticipated. A rocket was now fired by the Rajah, and on this preconcerted signal Captain Farquhar moved round Banting Marion with the European force under his immediate command to support the Rajah if necessary, and also with a view to enclosing the enemy between two fires, leaving however a strong native force at the mouth of the Serebus to intercept the pirates in case of their passing the European boats and making for this their native river. Finding themselves foiled at the Kaluka, the enemy, gallantly followed by the two cutters and the Rajah's light skimming boats (which kept up a constant fire), put to sea, with the intention of running for the Batang Lupar, here, however, no doubt much to their surprise, they encountered Captain Farquhar's boats, and being saluted with round shot and rockets, they divided their force. They yet, however, preserved admirable order. Some returning to the Kaluka (still most judiciously guarded by the Rajah) renewed their attempt to enter, but with the like bad success, others passing in shoal water inside Captain Farquhar, made for the Serebus, and the remainder, having greater speed than his heavily laden boats, succeeded for the present in escaping to sea.

"The *Nemesis* had hitherto remained at the mouth of the Serebus in position, but ready to move at a moment's notice to any point where her services might be required. She now acted her part, and that right nobly. Perceiving by the fire from Captain Farquhar's boats that the enemy had attempted to put to sea, Commander Wallace gave chase and fell in with seventeen prahus, which had succeeded in escaping Captain Farquhar and were making in a beautiful line for the Batang Lupar. When abeam we saluted them with grape and canister from our 32 pounders, raking the entire line, which we then broke, driving many of them on shore badly crippled, where they fell an easy prey to the Dyak boats, which, headed by Mr Steele of Sarawak in the *Snake*, followed the *Nemesis*, but never interfered with her fire. We then pursued five others and destroyed them in detail, passing round each and pouring in a constant fire of grape and canister, musketry and rifles, until they drifted past as helpless logs, without a living being on board.

"That discharge of grape was a fearful sight as, at point blank range, it crashed over the sea and through the devoted prahus, marking its track with the floating bodies of the dying, shattered prahus, planks, shields and fragments of all sorts. I should have pitied them, but they were pirates, and the thought steeled my heart. At this period the scene was exciting in the extreme, fighting was going on in all directions wherever the eye was turned it met the brilliant double flash of the great gun, the bright quick flame of musketry, the lightning streak of the rocket or the dazzling blaze of the blue light, whilst the ear was saluted with the boom of cannon, the roar of musketry, the wild tone of the tom-tom, the clear startling note of the gong or the still more fearful war whoop of the Dayak telling a sad tale of destruction and death. The pirates now, finding themselves surrounded, lost all presence of mind—order was no longer preserved—the flotilla scattered and fled in every direction, the crews jumping overboard and swimming for the shore or running the prahus aground and taking refuge in the jungle. About 12 o'clock at night the fight might be considered as over, although isolated firing continued until midnight [? daylight]. The entire force under Captain Farquhar's command may be estimated at 3000 men. From informa-

tion subsequently obtained, that of the enemy cannot be taken lower than 120 prahus and 4000 men. The loss of the enemy in the action was 90 prahus and not less than 400 men, whilst we lost but 2 men killed and 6 wounded. In addition however to the loss in action, the enemy suffered most severely being followed in the jungle by the Dyaks, who, like bloodhounds tracked and hunted them down cutting their head off and bringing them in as a proof of victory, and even of those who escaped a violent death at least one third must have perished before they reached their homes being altogether destitute of food. The total loss of the enemy may therefore be estimated at 1500 men. They have also lost an immense quantity of brass guns, muskets, gongs and arms of all sorts with which they were well provided but which they either threw overboard to lighten their prahus and increase their speed and prevent them from sinking, or abandoned on taking to the jungle. More than a mile of the beach of Banting Maron was strewed with wrecks and abandoned prahus, which were either burnt or carried off as prizes.

As an instance of the cruelty of these bloodthirsty fellows I may mention that on the expedition [the piratical flotilla] having surprised the village of Matou as well as a trading prahu they &c the pirates took some heads and one female prisoner. On being compelled to take to the jungle they found they could not carry her off with them they therefore cut her head off and mingled the body in a most frightful manner in which state it was found after the action, lying on the beach of Banting Maron a ghastly object the legs and arms being nearly separated from the body, which was literally chopped in pieces.

A considerable force was left at the scene of action to follow the pirates in the jungle and complete the work of destruction, and the remainder moved up the Seribus about forty miles, where the *Nemesis* and the large prahu anchored, whilst the light boats proceeded up the River Pahoo [Pahu a tributary of the Saribas] to destroy the fortified villages on its banks before the warriors could return to their defence. The advance was opposed by nine large booms lately thrown across the river. These were with difficulty removed but at length a monster tree, so hard that the axes scarcely made any impression on it, seemed an almost impassable barrier to further progress. After in vain using every effort to overcome the difficulty, the force was disembarked with the intention of clearing a road through the jungle and marching overland but they had scarcely landed and commenced operations, when a skirmish took place in which four natives of our party were killed and amongst them Bunsee and Toojong [Bansi and Tupong], two sons of the Chief of Lundu [in Datu Bay]. We all felt the deepest regret for these youths, as (unlike their countrymen) they knew not what fear was, and fell victims to the rashest valour having contrary to orders, moved in advance of their party, almost unarmed. One brother was carried in headless, and the other with his face cut off and otherwise fearfully mangled. This untoward event threw such a damp over the spirits of the natives that it was not deemed advisable to advance until confidence was somewhat restored and in the meantime the unusually low water enabled the boats to pass under the tree and proceed up the river, where they destroyed Pahoo and several other villages and took some prisoners as well as a great quantity of plunder, amongst which were some ancient jars,<sup>81</sup> which the Dyaks hand down from father to son as heirloom and prize very highly, some of them being valued as high as £200. It was indeed fortunate the fleet had been destroyed, as otherwise it would have been impossible to perform the service without

<sup>81</sup> *Martaban jars*. For a history of this term from c. 748-1880, see *ante*, Vol. XXII pp. 361-365.—ED

immense loss of life on our side, for a very small party, armed with rifles and stationed in the jungle opposite each boom, could have picked off every European whilst removing the trees and without the loss of a man on their side.

During the absence of the boats, numbers of the pirates who had escaped in the action but were not aware of our still occupying the river were cut off by the Dyak boats in attempting to ascend the Seribus, and I then had an opportunity of witnessing the operation of preserving the heads. The Dyaks, having killed their enemy, immediately cut off his head with a fiendish yell, they then scoop out the brains and suspend the head from a rod of bamboo. They then light a slow fire underneath and the smoke ascends through the neck and penetrates the head thoroughly drying the interior. It is then placed in a basket of very open work and carried suspended from the belt of the captor—more highly prized than ornaments of gold or precious stones. On one occasion I saw five heads on a platform undergoing the operation, and within two feet of it the Dyaks were coolly cooking some wild boar chops for their dinner and inhaling the mingled perfume of baked human and hog's flesh.

"We now proceeded up the River Rejang, the finest and most interesting of the rivers of the north eastern coast of Borneo. One glance at the town [either Sānik or Siba] speaks volumes as to the state of this unhappy country and proclaims the lawless character of one party and the insecurity of the other. The houses inhabited by the Milanos [Milanau, Malanau], a race distinct from the Malay and Dyak, are of immense length, some of them containing 300 people. They are erected on pillars of wood, about 35 feet in height, and are only approachable by ladders, which can be drawn up on the appearance of an enemy each thus forms in itself a perfect fortress. An immense gallery, protected by a musket proof breastwork, runs the entire length of the building, this is used as the common sitting room, and here are collected offensive and defensive weapons of all sorts—brass guns, rifles, spears, shields, parangs, sumpitans,<sup>82</sup> stones &c and they also pour boiling water and oil on the heads of assailants. I was informed that on the erection of one of these houses, a deep hole was sunk for the corner pillar, and in this (as we place a bottle containing a coin and engraved inscription) they, *horresco referens*, lowered an unfortunate girl, decked out in all her finery, and then dropped the enormous post on her head, crushing her to atoms, and yet they are now a fine, intelligent race and cordially unite with the Rajah for the suppression of piracy.

"Having obtained a sufficient supply of fire wood we proceeded up the River Rejang to the Kenowit, up which river the boats advanced about forty miles, and, surprising the enemy, plundered and destroyed the villages and took several prisoners. The boats having returned, we pressed on to the town of Kenowit [on the Rejang river], on the inhabitants of which the Rajah imposed a heavy fine, with a threat of visiting them with his heaviest displeasure in the event of their violating the pledge they now gave to abandon their piratical habits. All prisoners were released with instructions to inform their respective tribes not only that the Rajah had no wish to injure them, but that he would most willingly afford them all the protection in his power if they would only abandon piracy and live at peace with their neighbours.

"We returned to Sarawak on the 24th August, well pleased with the extraordinary success of our expedition. We had destroyed the most powerful piratical tribe on the Coast

<sup>82</sup> *Parang*, *sumpitan*, Malay terms indicating a large heavy sheath knife and a blow gun made from a hollow cane from which poisoned arrows are shot.—ED

under the most unequivocal circumstances of piracy, having intercepted them returning from a desperate foray, with their hands red with the slaughter of innocent and unsuspecting traders—thus inflicting a lesson which will be remembered on the Coast for ages. We destroyed the fortified towns and crippled the resources of several other tribes at the same time proving to them by sparing and ultimately liberating the prisoners, that we were not actuated by that thirst for blood, which is the usual motive for Dyak warfare. I feel great pleasure in stating that the Rajah was enabled to control our Dyak allies and induce them (much as they have suffered) to spare the women, children and unresisting men, who, instead of being butchered in cold blood and beheaded, were now, for the first time brought in as prisoners—a grand step towards the ultimate adoption of the customs of civilised warfare, which had hitherto been invariably outraged.

I remain &c, &c,

### A BRUSH WITH CHINESE RIVER PIRATES 1851

The increase of European shipping and the regular appearance of European warships in the China Seas put an end to open piracy in those quarters in the beginning of the nineteenth century, but the mouths of the great rivers were long after infested by a class of river-pirates, who preyed upon the traffic and carried off people for ransom. These men always acted in connection with confederates on shore and—especially in their attacks upon Europeans—it was suspected with the connivance of the Chinese authorities.

#### *Extract from a private letter*

On the 26th March, Captain Hely, commanding Messrs Dent and Co's Store ship the *Amata*, stationed in the River Min, whilst proceeding up the river to the town of Foochow,<sup>83</sup> in two China boats, with eight men, was attacked by six large piratical junks, carrying forty to sixty men each. They commenced a heavy fire and made sail upon him, evidently with the view of running his boats down, but a well-directed and continued fire from a large swivel duck-gun and muskets by his crews disinclined the pirates to close quarters though their boarding-nettings were triced up eight feet high. The boat following his own was, however, intercepted by one of the junks and one of the Lascars was knocked overboard. The hazard was great, but there was no other means of saving the man's life. He ranged his boat right athwart the junk's bow, gave her a raking and engaged in hand-to-hand fighting with the crew.

The struggle was desperate, beside the continual fire of small arms, they heaved stones and stink-pots<sup>84</sup> (pots filled with powder bags having slow matches attached, which are broken by being thrown on any object and explode) upon his crew, and wrested the pikes from two of his men's hands. The Lascar was, however, picked up alive, a tow line was made fast [to the second boat] and Captain Hely had the triumph of sailing both his boats away.

<sup>83</sup> Fu chau fu, capital and fort of Fuh kien Province.

<sup>84</sup> Probably the same thing as the 900 pots of powder, which were amongst the ammunition that Fama provided for his fight with Coja Acem. See *ante*, Vol. XLVIII, p. 163.

and proceeding on his course, the light wind giving him a superiority over the heavy junks. Considering the immense force of the pirates and the time the engagement lasted (half an hour), the escape of Captain Hely and his small crew was miraculous. Seven were however severely wounded whilst alongside the junk by spears and pikes, he himself was struck on the head by a stone, carrying away his cap but without injuring him, and one man only escaped unhurt. Captain Hely had no doubt that the pirates had received timely notice of his intention to visit Foochow, for the shore was crowded with spectators, watching the contest and cheering on the pirates. His fire proved effective, for the Chinese authorities, who were taking measures to secure the pirates, informed him that five were killed and forty wounded, many of them severely."

## THE HISTORY OF THE NIZÂM SHÂHÎ KINGS OF AHMADNAGAR

By LIEUT-COLONEL T W HAIG, C.S.I., C.M.G., C.B.E.

( *Continued from p 108* )

### XIV—AN ACCOUNT OF THE CAPTURE OF THE FORTRESS OF DAULATÂBAD.

It has already been mentioned that Ahmad Nizâm Shâh had determined to send an army every year into the Daulatâbâd district to plunder and ravage the country, to collect all the grain and all agricultural produce and to carry off what was moveable, and burn the rest, in order that the garrison might be prevented from carrying into the fort a single grain which would help to enable to sustain life. These orders were carried out, and every year, at the reaping time and harvest, an army used to invade that country and carry off all that they could, burning the houses and the dwellings of the cultivators and inhabitants.

When some years had passed in this manner, most of the cultivators and labourers of that country were reduced to sore straits by want of food and by the attacks of the royal army, and every day bands of men from the fort, guided by divine grace into the path of wisdom, truth, and righteousness, used to desert the fort and come to the royal court, where their affairs were bettered and they lived free from the anxieties of the times under the king's protection. Those misguided fools who turned their backs on the good fortune and sought not refuge in the royal court had their recompense from the world-consuming wind of the king's wrath, and those who were shut up in the fortress were reduced to the greatest straits. At length these turbulent men were compelled to go in a body to the originator of all the strife, Malik Sharaf-ud-dîn, and to represent to him that it was perfectly evident and clear to all that the heir of the kingdom and of the race of Bahman was none other than Ahmad Nizâm Shâh, who was too powerful to be resisted. They urged Sharaf-ud-dîn to submit, in order that their lives and the lives of their wives and children might be safe. Malik Sharaf-ud-dîn was obstinate and blind to his own interests and would not listen to their advice. Just now, however, Malik Sharaf-ud-dîn was overtaken by fate, and died, and immediately after his death all the inhabitants of the fortress, rich and poor, great and small, young and old, came forth and submitted to the king, surrendering to him the keys, and beseeching him to spare their lives. The king pardoned their offences, and the fortress of Daulatâbâd, like

all the other forts which he had attacked, fell into his hands, and he appointed one of his officers to command it <sup>50</sup>

XV—AN ACCOUNT OF AHMAD NIZÂM SHÂH'S EXPEDITION TO HELP MAHMÛD SHÂH OF BURHÂNPÛR, AND HIS FIGHTING WITH MAHMUD SHAH OF GUJARÂT, AND THE MANNER IN WHICH THE AFFAIR TERMINATED

Historians relate that during the reign of Ahmad Shâh Bahî, 'Âdil Shâh Fârûqî, who was the ruler of Burhânpûr and its dependencies, died, and according to his will his son Mahmûd Shâh <sup>51</sup> succeeded him

In those days the ruler of the country of Gujarât and the coasts of Somnât was Sultân Mahmûd Bekara, who is also well known as Mahmûd Nikî, and the rulers of Burhânpûr by reason of their nearness to their powerful neighbour and their own weakness were always very submissive to the rulers of Gujarât. Sultân Mahmûd of Gujarât was puffed up with pride in his own power and greatness and in the strength of his army, and had strayed far from the path of justice and equity. When he heard that the ruler of Burhânpûr had entitled himself Mahmûd Shâh, he was intensely enraged and, summoning his *amîrs* and the officers of his army for the purpose of taking counsel with them in this matter, said to them, 'What power has the Burhânpûrî to make himself the partner of our name and title, or to even himself with us?' At this time the brother of Mahmûd Shâh of Burhânpûr sent letters to the Sultân of Gujarât, professing obedience to him, and securing his friendship by promising that when the army of Gujarât invaded Khândesh he would cause the fortress of Asîr to be surrendered to it without a blow being struck. Sultân Mahmûd was delighted with this letter and set out with a very numerous army for Asîr and Burhânpûr. When

<sup>50</sup> This is a very cursory account of the capture of Daulatâbâd, which held out for a long time. Sharaf ud dîn took advantage of an invasion of Khândesh by Sultân Mahmud Bekara of Gujarât to send a message to Sultân Mahmûd, imploring his aid against Ahmad Nizâm Shâh and promising, if it were given, to hold Daulatâbâd as a dependency of Gujarât, to remit annual tribute and to cause the *Khutbah* to be recited in the name of Sultân Mahmud. The first message had no result, but on receiving the second, Sultân Mahmûd marched towards the Dakan and Ahmad Nizâm Shâh raised the siege and retired to Ahmadnagar. Sharaf ud dîn, in gratitude for this relief, caused the *Khutbah* to be recited in the mosque of Qutb ud dîn Mubâarak Shâh in the name of Sultân Mahmûd, and Sultân Mahmûd returned to Gujarât. After his retreat Ahmad Nizâm Shâh hastened, by forced marches, to Daulatâbâd and the Marâtha garrison, who resented Sharaf ud dîn's recognition of the sovereignty of the king of Gujarât, sent messages assuring him of their loyalty and fidelity. Sharaf ud dîn discovered the correspondence and is said in one account to have fallen sick of grief and vexation and to have died within five or six days, when the fort was surrendered to Ahmad Nizâm. Another account, given in the *Muntakhab ul Lubab*, Vol. III, attributes Sharaf ud dîn's death, with greater probability, to poison.

The history of the relations of Ahmadnagar, Berar, Khândesh, and Gujarât at this period teems with contradictions and discrepancies which it is impossible to reconcile.

<sup>51</sup> There was never a Mahmûd Shâh of Khândesh, and 'Âdil Khân II, here described as 'Âdil Shâh Fârûqî, died on the 28th September, 1501, and was succeeded by his brother Dâ'ud Khân, here described as "Mahmud Shâh of Burhânpûr." The whole of this account of Ahmad's expedition to Khândesh appears to be a fabrication and its details will be discussed later. What really happened was that Husâm ud dîn, one of the worthless of Dâ'ud Khân's *amîrs*, invited Ahmad Nizâm Shâh to assist him in deposing Dâ'ud Khân. Ahmad, who had at his court a scion of the Fârûqî house of Khândesh, one 'Âlam Khân, res ponded to the appeal and invaded Khândesh in 1504 with the object of placing his *protégé* on the throne. Dâ'ud Khân appealed to Nâsir ud dîn Shâh of Mâlwa for assistance and he sent an army under Iqbâl Khân, one of his *amîrs*, which expelled Ahmad Nizâm Shâh and his *protégé* from Khândesh. Ahmad's campaign against Mahmud of Gujarât came later and brought him no more credit than this one. (See Finishta, *passim*, and *An Arabic History of Gujarât*.)

Mahmûd Shâh heard of the approach of Sultân Mahmûd, he was much alarmed, for he knew that he was not strong enough to meet the army of Gujarât, and he therefore appealed for help to Ahmad Nizâm Shâh, and sent him a letter in which he complained of the high-handed conduct of Sultân Mahmûd, and besought him to come to his assistance <sup>52</sup>

Ahmad Nizâm Shâh, who was ever ready to help the weak and oppressed, when he read Mahmûd Shâh's letter, started at once with his army for Burhânpûr, and refrained from consulting Masnad-i-'Âli Nasû-ul-Mulk Gujarâtî, lest he should be opposed to an expedition against the king of his native land Nasû ul-Mulk, who was accustomed to being consulted in all matters of importance, obtained information of Ahmad's intention, but although he adduced clear proofs of the danger of entering into this quarrel, the king would not follow his advice

Ahmad Nizâm Shâh marched to Burhânpûr and encamped there, but Masnad-i-'Âli was still endeavouring to allay the strife and was ever revolving plans to this end, in order that nothing might happen which should lead to the ruin of the country, or the harassing of the king's subjects, for the enemy's army was twice as strong as that of 'Ahmad Nizâm Shâh, and victory and defeat depended upon the will of the Almighty. It occurred to him that it would be well to open a correspondence with those who were nearest to the person of Sultân Mahmûd of Gujarât and by this means to try to pour water on the fire of strife which was about to burst into flame. Accordingly he sent a letter to one of his intimate friends who was in the confidence of Sultân Mahmûd, saying that although, in accordance with the decrees of fate, he was in the service of Ahmad Nizâm Shâh, yet he did not forget that Gujarât was his birth-place, and was a sincere well-wisher of Sultân Mahmûd, and made bold to represent what he thought was for his interest. He wondered, he said, that the person to whom he was writing, who was a wise and prudent man, should have arranged, and was continuing to arrange, that Sultân Mahmûd should engage personally in an expedition concerning so trivial a matter as the affair of Mahmûd Shâh (of Burhânpûr) whose rank was no more than equivalent to that of one of Sultân Mahmûd's *amîrs*, especially when Ahmad Nizâm Shâh had come to the assistance of the Burhânpûrî with his powerful army. He said that the Gujarâtîs could hardly be aware of the strength and valour of the army of the Dakan, who knew no fear at the prospect of a fight, but regarded it rather as others

<sup>52</sup> Major King, in a note to his preface to *The History of the Bahmanî Dynasty*, says that Firishta never mentions the *Burhân i-Ma'âsir*, unless he alludes to it under some other title, and adds, "Professional jealousy probably accounts for this."

Firishta does mention this work, but under another title. In connection with this story of Ahmad Nizâm Shâh's victory over Mahmûd of Gujarât he writes (II, 189) "In the *Waqâ' i Nizâmshâhyyah* which Sayyid 'Âli Sammânî was writing in the reign of Burhân Nizâm Shâh II and which he did not live to finish, it is written (and the responsibility for the account is on him who wrote it,) etc."

Then follows a narrative based on the account here given but connected with Ahmad's siege of Daulatâbâd. The story is not exactly copied, as Firishta's habit is, but corresponds fairly with its original. Firishta concludes the passage with the following criticism, which can hardly be said to err on the side of severity:

"It would appear from the internal evidence supplied by this account that it has been hastily compiled or copied and that no attempt has been made to comment on it. But God knows the truth!"

Firishta's weakness was not professional jealousy, but shameless plagiarism.

It may be added that Nizâm ud dîn Ahmad, author of the *Tabaqât i Akbarî*, probably refers to the *Burhân i Ma'âsir* in the following remark appended to his extremely brief notice of the reign of Ahmad Nizâm Shâh:

"As I have seen a long work on the history of this dynasty I have confined myself to this brief account."

would a social banquet. Victory, he said, depended on the will of God, and it behoved the Gujarâtis to consider carefully what was likely to be the upshot of this affair. Should the victory be theirs, people would say that Sultân Mahmûd had come with an overwhelming army and had overpowered a small force, but if, on the other hand, the reverse should be the case, Sultan Mahmûd's dynasty would incur a disgrace which would never be wiped out till the end of time.

Before the minister's letter reached the Gujarâtis it fortunately happened that Ahmad Nizâm Shâh was able to devise a scheme for throwing the army of the enemy into confusion. The scheme was as follows. The king called a *mahaut* to him in private and ordered him to make his way into Sultân Mahmûd's camp and there make friends with the *mahaut* who had the charge of Bîrî Sâl, the largest and fiercest of all Sultân Mahmûd's elephants, and to persuade him by stimulating his avarice to loose Bîrî Sâl in the camp in the middle of the night, when Sultân Mahmûd and his army were all asleep, and thus throw the camp into confusion, when the two *mahauts* would have an excellent opportunity of plundering and of dividing their spoil one with the other. Ahmad Nizâm Shâh also arranged to send on that night with the *mahaut* a force of rocketeers and musketeers, who were to conceal themselves in the vicinity of the camp and listen for the sound of the confusion in the enemy's camp, on hearing which they were to come forth and fire their rockets and muskets into the camp, at the same time making a fearful noise with drums and trumpets.

Ahmad Nizâm Shâh's device succeeded. The *mahaut* and the force of infantry set out for the enemy's camp and the infantry lay in ambush, waiting for the *mahaut* to fulfil his promise. The *mahaut*, in accordance with his undertaking, made friends with Sultân Mahmûd's *mahaut*, and then succeeded in persuading him to fall in with his proposals. In the middle of that dark night Bîrî Sâl's *mahaut* unfastened his leg chains and loosed the elephant in the camp. The elephant ran about trumpeting hither and thither in the camp, killing people as he went, and shouts of confusion arose from the camp of the Gujarâtis. Ahmad Nizâm Shâh's infantry, who were awaiting this sound, sprang from their ambush with shouts, and with rockets and muskets ready. When the Gujarâtis saw that disaster was looming upon them from all directions and heard shouts from every side, they were convinced that Nizâm Shâh had made a night attack on their camp, but since they could not see their enemy and did not know which way to turn in order to face him, flight was the only choice left for them, and Sultân Mahmûd and his army left their camp and fled in disorder, and did not check their flight until they had covered a distance of nearly twenty miles.

The next day spies announced to Ahmad Nizâm Shâh the joyful news of the defeat of the enemy. And Ahmad Nizâm Shâh marched from Burhânpûr and occupied the camp which Sultân Mahmûd had left.

When Sultân Mahmûd learnt that the disgraceful flight of his army had been occasioned by nothing which should have caused alarm, he was overwhelmed with shame. At this moment the letter of Masnad-i-'Âlî Naşîr-ul Mulk reached his camp and was shewn to him. As the Sultân already repented of his coming in person, he confirmed the truth of what Naşîr-ul-Mulk had written and said that what he had written had actually come to pass. He ordered his ministers to write to Naşîr ul-Mulk and say that if he would persuade his master to retreat, the army of Gujarât would return to its own country. A letter in these terms was sent to Naşîr-ul-Mulk and he shewed it to Ahmad Nizâm Shâh. But Ahmad Nizâm Shâh

said that he would not budge until Sultân Mahmûd had set out for his own country, for if he did, his retreat would be attributed to cowardice and would be a confession of weakness. A long correspondence on this subject ensued between the Dakanîs and the Gujarâtîs and at last Masnad-i-Âli wrote to the Gujarâtîs to say that his purpose was to compose and not to foment the strife, and suggesting that the Gujarâtîs should first march two stages towards Idar, when the Dakanîs would march two stages towards 'Imâd-ul Mulk's country and both armies could then retire to their own countries. This proposal was accepted and the Gujarâtîs first marched towards Idar, and the Dakanîs then marched towards 'Imâd-ul Mulk's country, and Ahmad Nizâm Shâh then returned to his capital.<sup>53</sup>

The king of Burhânpûr having thus, by Ahmad Nizâm Shâh's help, been freed from his powerful enemy, was firmly established on his throne in independence, but for the rest of his life he was under an obligation to Ahmad Nizâm Shâh and always deferred to him. Afterwards, when Burhân Nizâm Shâh was on the throne and strife was stirred up between him and Bahâdur Shâh of Gujarât by 'Imâd ul Mulk, Mahmûd Shâh of Burhânpûr, remembering his obligation to Ahmad Nizâm Shâh, used his best endeavours to compose the quarrel and succeeded in converting the enmity of the disputants into friendship, as will be related in the account of Burhân Nizâm Shâh's reign.

#### XVI—AN ACCOUNT OF THE BUILDING OF THE FORT OF AHMADNAGAR

After the conquest of Daulatabâd, the king determined to erect a fort in his capital of Ahmadnagar, which he had built. Surveyors and architects laid it out in an auspicious hour, and masons and overseers set to work to carry out the king's orders. In a short time this strong lofty fortress was completed, and was surrounded by a deep and wide ditch. The slope which formed a berm between the wall and the ditch was scarped, and the approach to the fort, even should the ditch be crossed, was thus rendered inaccessible. In the interior of the fort dwelling houses and other buildings were built, gardens were laid out and planted with fruit trees, flower gardens were planted with herbs and flowering plants, and

<sup>53</sup> This imaginary account of a victory gained over Mahmûd Shâh of Gujarât is apparently intended to do duty for the history of Ahmad Nizâm Shâh's two expeditions into Khândesh. The result of the first, undertaken in 1504, has been given in note 51. The course of the second was briefly as follows.—Dâ'ud Khân died on the 28th August, 1508, and his son Ghaznî Khân was raised to the throne but was poisoned after a reign of ten days. With him the direct line of the Fâruqî house expired and two parties were now formed in Khândesh, one under Husâm ud dîn, already mentioned, supporting 'Âlam Khân, Ahmad Nizâm Shâh's candidate, and the other under Malik Sâdan, another *amir*, supporting another 'Âlam Khân, the candidate of Mahmud Shâh of Gujarât. The latter 'Âlam Khân, who may be called, for distinction, 'Âdil Khân, the title which he afterwards assumed, was a descendant in the fourth generation of Hasan, Malik Ifthikhar, younger son of Malik Râjû (1382—1399) the founder of the Fâruqî dynasty. Malik Ifthikhar had taken refuge in Gujarât from his elder brother, Nasir Khân, and his descendants had lived in that country and had intermarried with the royal family. Mahmud Shâh of Gujarât had promised to place 'Âdil Khân on the throne of Khândesh and 'Âdil Khân II had adopted him as his heir.

Ahmad Nizâm Shâh, invited by Husâm ud dîn, was first in the field and marched to Burhânpûr, where his candidate, 'Âlam Khân, was proclaimed. 'Âlâ ud dîn 'Imâd Shâh of Berar also marched to assist him. Meanwhile Mahmud Shâh, with 'Âdil Khân, invaded Khândesh from the west and captured Thâlnar. Ahmad Nizâm Shâh with his *protégé* and 'Âlâ ud dîn 'Imâd Shâh fled disgracefully to Gâvilgarh on hearing of Mahmud Shâh's approach and 'Âdil Khân was enthroned in Thâlnar. Ahmad Nizâm Shâh, who had now reached the frontier of his own territories, wrote to Mahmûd Shâh suggesting that his *protégé*, 'Âlam Khân, should inherit at least a share of the territories of Khândesh, but unfortunately for him wrote as one king to another. Mahmûd was much enraged and would not deign to answer the letter, but gave the unfortunate envoy a message for his master. How dared the son of a slave of the Bahmanî kings, he said, write as though he were a king? A humble petition was the only communication that a slave should address to a king. Let Ahmad see that he did not repeat such insolence, or it would be the worse for him. The unfortunate Ahmad Nizâm Shâh retired, humiliated and mortified, to Ahmadnagar, taking his *protégé* with him.

Sayyid 'Alî's unwillingness to give a faithful account of such an event is comprehensible

fine palaces with arches and domed roofs were erected with coloured and latticed walls like the mirror of the satin sky, red and yellow, with floors paved with turquoise and *lapis lazuli*, their courts were like the gardens and their fountains like the springs of paradise.

After the completion of the fort, the king made it the seat of his government and took up his residence there.

XVII—AN ACCOUNT OF THE DEATH OF MASNAD I ALI MALIK NAŠIR-UL-MULK GUJARĀTĪ  
THE KING'S PRIME MINISTER, AND OF THE APPOINTMENT OF MIYÂN CHANDU  
(MUKĀMMAL KHAN) ONE OF THE KING'S OLD SERVANTS IN HIS PLACE

After these events the king's faithful able and prudent minister Masnad i Āli Malik Naṣir ul Mulk, died, and he bade farewell to his ministry and betook himself to the neighbourhood of the mercy of a forgiving God. The king was much grieved by the loss of his minister, but as the administration of the kingdom had to be carried on he appointed to the vacant office of minister, Miyân Chandu one of his old servants, who had great wisdom and intellectual power and was passably well fitted for the post and moderately generous. He gave him the title of Mukāmmal Khān and conferred other favours upon him and entrusted to him the care of his army and his subjects.

Some historians have said that Ahmad Nizam Shah predeceased Malik Naṣir ul Mulk Gujarātī, who poisoned him in a quid of betel and was executed for his treason, but the story which has been told above is nearer to the truth. But God knows the truth of the matter.

XVIII—AN ACCOUNT OF THE DEATH OF SULTĀN AHMAD NIZAM SHĀH

Death comes alike to prince and peasant, and Sultān Ahmad Bahā, after he had reigned for nineteen years and four months, or, according to another account, for twelve years, and had waged holy wars and had taken most of the forts and districts of the Dakan from the idolaters and turbulent men, and made them his own, and had destroyed the temples and places of worship of the accursed infidels and the unreligious polytheists, came at last to the end of his days. The signs of death appeared in his face and the hand of sickness was heavy upon him. His *amīrs* and officers of State, but especially Mukāmmal Khān, feared that his spirit would take flight from his sufferings and earnestly prayed that God would allow them to die rather than that they should behold the sufferings of their king. Although skilful physicians treated him with all the skill at their command, nothing was of any avail, and the king's power declined day by day.

When the king became aware of the approach of death, he withdrew from desire of wordly kingdom and sent for the prince, Al Mu'ayyad Min'andī'llāh Abūl Muzaffar Burhān Nizām Shāh, who was then seven years of age, and gave him his counsel.

After that he sent for the *amīrs* and officers of State, and conjured them all to be faithful and obedient to the prince. All the *amīrs* and officers of State, the rest of the army and the subjects of the king promised to be obedient to the prince and swore allegiance to him.

When the king had given his parting instructions to all about him, he died, and great grief fell on the *amīrs*, the army, and all the kingdom. The *amīrs* and the officers of the army made all preparations for the funeral and the king was buried in the tomb which he had built for himself in the environs of Ahmadnagar, in the garden known as the Rauzah.<sup>54</sup>

This calamity happened in A H 911 (A D 1505-06).<sup>55</sup>

(To be continued.)

<sup>54</sup> Probably Rauzah, in the hills above Daulatābād, and not a garden in the environs of Ahmadnagar.

<sup>55</sup> Firishta says (ii, 198) that Ahmad died in A H 914 (A D 1508-09). Firishta's date must be accepted as correct, for Ahmad certainly invaded Khāndesh in 1508, retiring early in 1509, and there is other evidence in favour of the later date. Perhaps Sayyid 'Alī intentionally antedated his death. On page 105 he places Burhān's accession, and consequently Ahmad's death, in A H 918 (A D 1512-13).

## INTER-STATE RELATIONS IN ANCIENT INDIA

BY NARENDRA NATH LAW, M.A., B.L., P.R.S., CALCUTTA

### Prefatory Remarks

THE subject of ancient inter-state relations is evidently very wide, including not merely those inter-state relations that were regulated by inter-state laws corresponding to the international laws of later times, but also those that fell outside the said laws. Light is here attempted to be thrown on the two fields of regulated and unregulated relations in order that a comparative estimate may be made of each in contrast with the other. The recondite nature of the task requires among others a thorough study of the latter half of the *Kautilya Arthasāstra* which happens to be the toughest portion of the whole work. Its English translation has, I must admit with gratitude to its learned translator, helped me a good deal in overcoming many difficulties within a shorter time than I could have done without its aid, but at the same time I have to mention, without the least intention of detracting from the credit of the very useful pioneering performance of the said translator, that there have been very many occasions for me in the course of my research to differ from the translation. A critical perusal of the said latter half of the *Kautilya* was undertaken with the object that generalizations made from one of its parts should not run the risk of being contradicted by another. The subject matter of this portion of the *Kautilya* is hardly met with in any other Sanskrit text that I know of with the same elaboration of details, and hence, references to other Sanskrit works in my treatment of the subject are few and far between. It must not however be supposed that I have ignored the evidence available from other quarters, whether law-codes, epics, *purāṇas*, dramas, codes of polity or documents of any other description. On the other hand, I have always kept my mind on a keen look out for all kinds of evidence on my subject and would welcome them whenever anything fresh comes or is brought within my reach.

The task of refutation of certain opinions rendered current by previous writers who had occasion to touch the subject of "statal circle," and such other topics pertaining to the present subject, rendered my task doubly difficult. These opinions have become deep-rooted not only by the length of time they have been obtaining currency but also on account of the eminence of one or two of the writers who have lent them their support. In the facility with which the finished products of research are perused, we are apt to lose sight of the great difficulties besetting the stemming of current opinions or the elicitation of facts and generalizations from a confusing mass of evidence, and hence I make no apology for pointing out the following —

(1) The various states forming the *mandala* (statal circle) have not hitherto been regarded as a collocation, general in character and applicable to the case of any state whatsoever, surrounded by the rest with mutual feelings of friendliness or enmity issuing from the principle of *spacial* adjacency.

(2) The *madhyama* state has been hitherto rendered as "intermediary," signifying the misconception about its real character.

(3) The state called *uddāsīna* has also been wrongly rendered as "neutral" as the result of a mistaken notion about its position and function in the statal circle.

(4) A *yātavya* is not the same as *ari*, which again is not identical with *satru*. Though the differences among them are not clear in the *Kāmandakiya*, they do exist and appear

from the *Kautilya*. In the English translation of the latter, the differences have not been clearly kept in view.

(5) The term *sandhi* bears in reality various meanings and cannot be rendered by the expression "treaty of peace". Even in the *Kāmandakīya*, the term has been in one place used in the sense of *alliance*. In the English translation the various meanings have been missed, giving rise to confusion in several chapters.

(6) The *dandopanata* and the *dandopanāyi* are totally different individuals and the confusion between them appearing in the English translation should be guarded against.

(7) One is led to suppose from the English translation that a state could be attacked by another state without any previous provocation. I have attempted to prove this supposition to be baseless.

### Section I.

(A) It was usual with the ancient Hindu writers on Polity to commence their discourses on inter state relations by imagining a number of states with special names, and inclined to one another as friends or enemies, owing to their mutual *spacial* correlation. The adjacency of one state to another, which is obviously a fruitful source of rivalry and differences, was taken to be the determining factor of their mutual attitude. If A be the state with which we start our discourse and B its immediate neighbour, it would be allowable to infer that ordinarily they would be hostile to each other. The same inference applies to A's relation to any other of the states which, like B, may happen to be its immediate neighbour. The territories of the first neighbours of A therefore constitute a zone of natural enmity<sup>1</sup> towards A. Not so the zone of second neighbours indicated by C. The C's being the immediate neighbours of the B's are hostile to them and therefore friendly to A. The second zone therefore is one of natural friendliness<sup>2</sup> towards A. For the present purpose, we need take into consideration A the central state (*vijigishu*)<sup>3</sup> and one state from each of the zones, keeping their adjacency intact (Diagram I). Let us put down in a separate diagram this set of A B C, and by applying the aforesaid determiner of friendliness and enmity, add D, E and F to their numbers (Diagram II). D being in the second zone from B would be its friend, and E and F, for the same reason, friendly to C and D respectively. We can now name the states as follows —

- (1) A=Central state (*vijigishu*),
- (2) B=Enemy (i.e. of A) [*ari*],
- (3) C=Friend (i.e. of A) [*mitra*],
- (4) D=B's friend i.e. enemy's friend (*ari-mitra*)

<sup>1</sup> "Tasya samantato mandalibhūtā bhūmīyantarā ari-prakṛtiḥ"—*Kautilya*, Bk VI, ch 2, p 258. Within this zone, congenital enemies (*sahaja*) are created by common lineage, and acquired enemies (*kṛtrima*) by actual opposition or causing of opposition (*Kautilya*, Bk VI, ch 2, p 258).

<sup>2</sup> "Tath-aiva bhūmīy-ekāntarā mitra prakṛtiḥ"—*Ibid*. Within this zone also, congenital and acquired friends are distinguished (*Kautilya*, Bk VI, ch 2, p 258).

<sup>3</sup> *Vijigishu* literally means a state bent on conquests. But as this desire is not the peculiar characteristic of A alone, it is better to attach to the term some colourless signification and to render it accordingly.

(5) E=C's friend i e friend's friend (*mitra-mitra*),

(6) F=D's friend i e friend of the enemy's friend (*ari-mitra mitra*)

It will be seen that C, D, E, F are equally divided among themselves as adherents of A and B, for in the ultimate analysis, C and E would be on the side of A, and D and F

on that of B (Diagram III) It was not generally thought necessary to add to the chain of friendly and hostile states any more, for inter-state relations were not considered generally to bring into operation the active friendliness or hostility of a larger number of states in a particular direction

In the opposite direction, however, it would be necessary to take into account a number of states, for the reason that if the *casus belli* occurs between A and B, and they be the actual belligerents, A may be attacked and helped from behind in the same way as we have supposed in B's case Four states are therefore set down in the rear, their attitude towards the central state being determined by the usual principle These states are called

(7) A=Rear-enemy [*pārshn-grāha* (lit "heel-catcher")],

(8) B=Rear-friend (*ākṛanda*),

(9) C=Rear-enemy's friend (*pārshn-grāhāsāra*),

(10) D=Rear-friend's friend (*ākṛandāsāra*)

Thus the two belligerents A and B have each two adherents in front and two in the rear, the total number including the belligerents themselves being ten (Diagram IV)

The reasons for supposing the belligerents to be as adjacent states and not belonging to separated "zones" are perhaps that (1) adjacency was the most prolific source of jealousy and enmity, and (2) the waging of war between two distant states with one or more territories separating them rendered the outbreak of war a difficult matter until the interposing states were persuaded to allow them a free passage of troops and all other necessities of war through their territories This was rendered difficult by the fact that the states of the first and every alternate zone of each of them are naturally hostile to it, and should they be persuaded by money or otherwise to admit such passage, severance of supply and communication might arise at any moment, for the hostile states could not be fully trusted, and their temporary accession to a demand might ultimately prove to be a trap for the hazarding parties (3) If however the hazarding party was very powerful, it might subdue first the interposing states and reach its distant enemy, but such cases must be rare (4) If the interposing hostile states were won over by money or prospect of material gains to fight on the side of the attacking party against its distant enemy, the situation would then be reduced to one of adjacency of the central state and its enemy, alliance having extended the former's range of hostile activities to the latter's door In these circumstances, it was reasonable to put down the belligerents as adjacent states and determine the mutual attitude of the surrounding territories by the application of the principle of adjacency as the cause of enmity, a principle that has not perhaps yet lost its force

To the types of friendly and hostile states already named were added two more, viz. *madhyama* and *uddāsina*. The former is situated within the first zone of both the central state and its enemy, and is therefore within the zone of enmity to each of them. But as expressed enmity to one of them results in friendliness to the other, none of them can consider *madhyama* as friend or foe until its word or action crystallizes its position. The texts lay down that it helps the central state and its enemy if allied, and can help or destroy each of them when not combined. From this issues the corollary that the strength of this state is much greater than that of either the central power or its enemy, but less than their conjoint resources<sup>4</sup> (henceforth, we shall call it the medium power or state). The *uddāsina* (henceforth to be termed super power or state) is the strongest power we have to imagine within the first zone of the central state. It is laid down that the super-power takes a friendly attitude towards the three powers when combined, and can at pleasure help or destroy each of them when separate. This gives rise to the position that its strength is less than the combined strength of the central state, its enemy, and the medium state, and necessarily much greater than the individual power of each of them. (Diagram V shows the location of the medium and super states.)

The *madhyama* is so called from its strength being intermediate between the central state or its enemy on the one hand, and *uddāsina* on the other, the last being the strongest power within the first zone, within which therefore three states besides the central, of gradually higher strength, are contemplated, viz., enemy, medium, and super. This zone, as already stated, is the region where the chances of war between the central and other states are the greatest, and hence the location of two states of higher grades of strength within it, with their special names, to meet emergencies of reference to such powers in the discourse to follow.

<sup>4</sup> The *Kautilya* (Bk VI, ch 2, p 259) has this passage "ari vijigishvor=bhūmy-antarāḥ samhat-āsamhatayor=anugraha-samartho nigrahe ch=āsamhatayor=madhyamaḥ". The expression *saṁhat-āsamhatayor=anugraha-samarthaḥ* is ambiguous inasmuch as it may be made to signify (1) "can help the central state and its enemy both when allied with each other, and when not so allied"; (2) "can help the central state or its enemy both when allied with other power or powers, and when not so allied".

The first meaning gains support from the "Upādhyāya nirapekṣasāstrīni" commentary (Bibl. Indica) on *sarga* 8, *ślo* 18 of the *Kāmandakya*, and the second meaning from Śankarācārya's commentary on the same.

The merit of the first interpretation is that it indicates the measure of strength of the *madhyama*, while the second leaves it obscure. It may be objected that the central state and its enemy cannot easily be transformed into allies which this interpretation implies. To this the reply may be made that the alliance (though it is not an impossibility) is suggested only to show that, should they be allied, the *madhyama* single-handed will not dare offend them both simultaneously but rather will turn to help them. This indicates that the strength of the *madhyama* is greater than both that of the central state and its enemy but less than their combined resources. That such a measure of strength in the *madhyama* was intended to be conveyed by the political thinkers of yore may be inferred, not only from the name *madhyama*, but also from the location of a higher power than *madhyama* within the first zone of the central state. This power is called *uddāsina* (literally "seated on a height") and is the highest power that we have to keep in view within the aforesaid first zone. With reference to the central state or its enemy on the one hand, and the *uddāsina* on the other, the *madhyama* comes as a state of medium strength, and hence its name.

<sup>5</sup> *Kautilya* (Bk VI, ch 2, p 259) has "ari vijigishu-madhyamānām vahiḥ prakṛtibhyo balavat tarāḥ....". The Bibl. Indica commentary on *Kāmandakya*, *sarga* 8, *ślo* 19, which uses the words "maṇḍalād-bahiḥ," interprets 'vahiḥ' as "vijigishor=bhūmy anantarāḥ" i.e. "within the first zone of the central state."

## INTER STATE RELATIONS IN ANCIENT INDIA

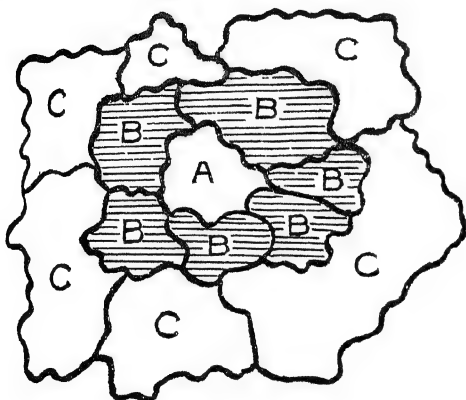

DIAGRAM I

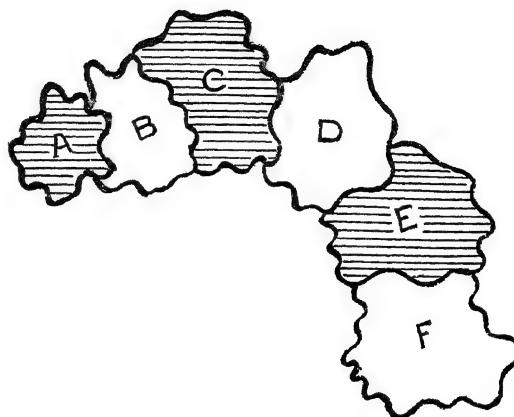

DIAGRAM III

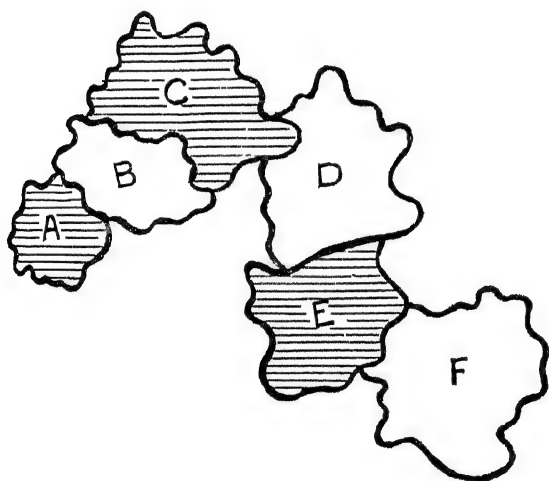

DIAGRAM II

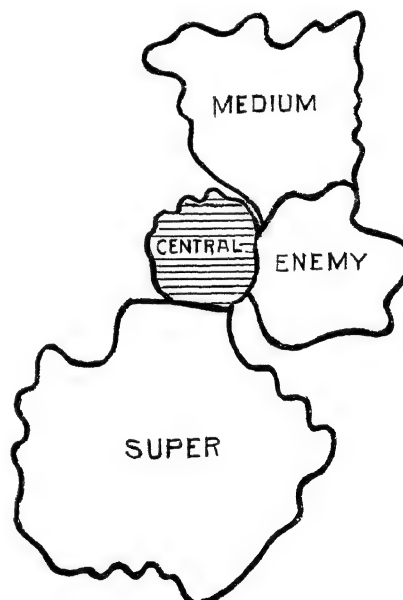

DIAGRAM V

DIAGRAM IV

To render *udāsina* by 'neutral' and *madhyama* by 'mediatory,' i.e. as effecting a mediation between the central state and its enemy would be wide of the mark. The significance of their names has already been indicated. Mediation need not be the special work of a particular neighbour, nor neutrality the special attitude of one of the aforesaid eight states in the hostilities between the central power and its enemy.

A state was analysed by Hindu statesmen into seven constituents, viz., (1) *Svāmī* (sovereign), (2) *Amātya* (minister), (3) *Janapada* (territory with its subjects), (4) *Durga* (fort), (5) *Kosa* (treasure), (6) *Danda* (army) and (7) *Mitra* (ally).

Seven constituents  
or sources of strength  
of a state

To gauge the strength of a state, it is necessary to measure the individual excellence of each of the seven constituents. The first constituent, *svāmī*, signifies the person holding the supreme authority in a state, and in a monarchy the king personally. The excellences of these constituents as enumerated in the *Kautilya*<sup>6</sup> make it clear that *svāmī* signifies a king or any other person in supreme authority in a state, and not any constitutional body or bodies in which the sovereign-power may be vested. In the above scheme of twelve states, each has its *svāmī*, and if the central sovereign or his enemy wants to measure the allied strength of the other before taking any important political action the aforesaid attitudes earmarked for the several states may well furnish a basis upon which to calculate roughly the number of his allies. The above calculation will have to be supplemented by gauging the strength of each state from the information previously collected as to the excellence of each of its first six constituents.<sup>7</sup> The twelve states, with five inner con-

The sovereign elements and the resource-elements

stituents in each (the first constituent *svāmī* being merged in the state, and the seventh *mitra* in the allies among the twelve states) compose a *mandala* (circle),—the twelve states being called the sovereign-elements (*rāja-prakṛti*)—and the sixty constituents the resource-elements (*dravya-prakṛti*), the total number of the two kinds of elements being seventy-two [12 + (12 × 5) = 72]

A general consensus of opinion among the Hindu publicists accepts the above composition of the statal circle as sufficient for the needs of reference to or delineation of the situations arising among the states in their mutual intercourse, the components of the circle with their defined correlation and special nomenclature furnishing the basal concepts and terminology for the performance of the aforesaid task with ease and precision.

There were various opinions inclining to an extension of the range of the statal circle or a different arrangement of its components for the same purpose e.g. (1) the 72 elements form four *mandalas* of 18 elements each [the central state with a friend, and friend's friend with inner constituents of each are equal to (3 + 15 = 18) elements composing the first *mandala*,

Other schemes of  
*mandala*.

<sup>6</sup> *Kautilya*, Bk. VI, ch. i, p. 255.

<sup>7</sup> The seventh constituent is here left out, as it has been taken into account already.

the second, third and fourth *mandalas* being similarly formed by the enemy, medium, and super states with a friend and friend's friend of each ]<sup>8</sup> (2) The central state, enemy, friend, rear-enemy, medium, and super states form a circle of six sovereign elements according to Puloman and India<sup>9</sup>

A list of other opinions is given below<sup>10</sup>

The excellences of the seven constituents are indicated in the *Kautilya*<sup>11</sup> (1) Those of the sovereign are —(a) The *inviting* qualities (*abhigāmikā-guṇa*)—of very high descent, favoured by destiny (*dava-sampanna*), intelligent (*buddhi-sampanna*), steady (in weal or woe) (*sattva-sampanna*), seeing through people old in wisdom, virtuous, truthful, non-contradictory, grateful, having large aims, highly energetic, prompt, able to control neighbouring states, resolute served by good men, and self-controlled<sup>12</sup>

(b) The *intellectual* qualities (*prajñā-guṇa*)—desiring to hear what is worth hearing, hearing it, understanding, retaining in memory, discriminating, deliberating, rejecting what does not appeal to reason, and adhering to what is regarded as best<sup>13</sup>

(c) The *energetic* qualities (*utsāha-guṇa*)—courageous, justly indignant, quick, and industrious

<sup>8</sup> *Kautilya*, Bk VI, ch 2, p 259. This corresponds to Maya's view in the *Kāmandakya*, *sarga* 8, *ślo* 20, calling the four principal states *mūla prakṛti* (root elements). The other elements would be called *śākhā prakṛti* (branch elements)

<sup>9</sup> *Kāmandakya*, VIII, 21. The resource elements have not been calculated

<sup>10</sup> (a) *Maya* (second view) the usual 12 sovereign elements with an ally and an enemy of each ( $12 + (12 \times 2) = 36$  sovereign elements) *Ibid*, VIII, 23.

(b) *Bṛhaspati* 12 sovereign elements + an enemy of central state + an enemy of enemy + a friend as well as an enemy of each of the latter two =  $12 + 1 + 1 + 1 = 18$  sovereign elements *Ibid*, VIII, 26

(c) *Kaṇvaśā* (the wise) 18 sovereign elements mentioned in (b) + 5 resource elements of each =  $18 + 90 = 108$  (both kinds of elements) *Ibid*, VIII, 27

(d) *Viśālāśha* 18 sovereign elements + an ally and an enemy of each =  $18 + 36 = 54$  sovereign elements *Ibid*, VIII, 28

(e) 54 sovereign elements mentioned in (d) + 5 resource-elements of each =  $54 + 5 \times 54 = 324$  (both kinds of elements) *Kāmandakya*, VIII, 29 [M. N. Dutta's translation of this passage at p. 90 is incorrect. He refers to "three hundred and twenty four monarchies" which is likely to mislead a reader.]

In this way, the varying speculations of the ancient Hindu publicists mention 14, 6, 36, 21, 48, 10, 60, 30, 2, and even 1 element (*Ibid*, VIII, 30—40), the generally accepted view as already pointed out being that of 12 sovereign elements (*Ibid*, VIII, 41)

<sup>11</sup> *Kautilya*, Bk VI, ch 1, pp 255, 256

<sup>12</sup> I have consulted Śaṅkarārya's commentary as well as that called "Upādhyāya nirapekṣha sārṇi" on *ślo* 6—8 of the fourth *sarga* of the *Kāmandakya* in translating the above passages of the *Kautilya*

<sup>13</sup> Cf. *Kāmandakya*, IV, 22, 23 with the aforesaid commentaries

(d) The personal qualities (*ātma sampat*)—intelligent, bold in the refutation of arguments, with retentive memory, strong, towering, able to easily dissuade others from evil ways, proficient in arts, able to reward or punish for benefaction or injury in calamities, shameful,<sup>14</sup> far-sighted, able to utilize the advantages of time, place, and manly efforts resorting timely to alliance, *vikrama*,<sup>15</sup> concession, restraint upon actions and compacts, and turning into account the weaknesses of enemies, reserved (*samvrita*), noble-minded (*adina*), treating jests with oblique looks and brow beating,<sup>16</sup> devoid of evil passions, anger, avarice, idleness, frivolity, haste, and wickedness, able, and talking with smile and dignity, and acting upon the advice of men old in wisdom.

(2) The excellences of ministers have been enumerated at the beginning, middle, and end of the *Kautilya* <sup>17</sup>

(3) The excellences of the *janapada* are —Extensive, self sufficing, able to supply the needs of other states in their calamities, provided with sufficient means of protection and livelihood, (with subjects) hostile to inimical states, able to control the neighbouring states, devoid of miry, stony, saline, uneven, thorny lands as well as forests with ferocious animals, lovely, containing agricultural lands, mines, timber and elephant forests, inhabited by energetic people, provided with cattle, other animals, and well-protected pastures, not relying upon rain for irrigation purposes (*i.e.* containing irrigation works), possessing land and water-ways, large quantities of valuable and variegated articles of commerce, able to maintain an army and bear taxes, inhabited by laborious tillers of the soil and numerous intelligent (*abdhisa*) owners of properties, and containing numerous people of lower castes and loyal and righteous citizens

(4) The excellences of forts have been already mentioned <sup>18</sup>

(5) The excellences of the treasure are —Acquired honestly by the sovereign himself or his predecessors, containing large quantities of gold and silver, gold coins and varieties of big gems, and able to withstand long calamities and non replenishment

(6) The excellences of the army are —Hereditary service, permanent, devoted, contented, maintaining wife and children, not dissatisfied (*avisaṃvādita*) in sojourns,

<sup>14</sup> The next expression in the text is not intelligible

<sup>15</sup> Including *prakāśa yuddha* (open fight), *kuta yuddha* (treacherous fight) and *tushṇa yuddha* (secret fight). See *Kautilya*, Bk. VII, ch. 6, p. 278

<sup>16</sup> “*Abhīhāsa jhama-bhrukutikshaṭa*” (implying *abhīhāsyā=abhīhāsyā-vishaye*)

<sup>17</sup> See *Kautilya*, Bk. I, (*mantri-purohitotpatṛi*), p. 15, and the next chapter, p. 17, the qualities of the *amātyas* lie scattered elsewhere in the work, the word referring to officials like *samāhartṛ* and *sannidhātṛ* and not to *mantrins* (councillors) alone

<sup>18</sup> *Kautilya*, Bk. II (*durga vidhānam*), p. 51, Bk. VII, ch. 10, pp. 292, 293

irresistible everywhere, enduring, experienced in many battles trained in all modes of fighting and skilful in the use of all sorts of weapons, never failing in adversity<sup>19</sup> (sharing equally as they do the weal and woe of the king) and composed mostly of Kshatriyas

(7) The excellences of a friendly state are - Friendly from generation to generation, unchanging, devoted liberal, and responding promptly to call for help<sup>20</sup>

(To be continued)

### MISCELLANEA

#### CONTRIBUTIONS TO THE STUDY OF THE ANCIENT GEOGRAPHY OF INDIA

##### A NOTEWORTHY OMISSION

Our thanks are due to Mr Surendranath Majumdar Sastri, M A, for publishing in the *Indian Antiquary* of February 1919, a bibliography on the ancient geography of India. While Mr Majumdar has included such books as Bahu Nabin Chandra Das's *Geography of Asia Compiled from the Ramayana*, which he himself styles as of 'no importance, it is extremely regrettable that he has omitted from the list by far the most important contribution on the subject made by an Indian. We cannot point to a more devoted scholar in the field of Sanskrit research than the late Mr Anundoram Barooah, B A, ICS, Barrister at Law, of Assam. His *English-Sanskrit Dictionary* written in the late seventies was for a long time the only book of that type by an Indian. To the third volume of this Dictionary Mr Barooah prefixed a long introduction on "The Ancient Geography of India" and an appendix of "Geographical names rendered in Sanskrit". Along with Sir Alexander Cunningham's monumental work on the subject, Mr Barooah's is regarded as the most valuable, and I have seen editors and commentators of Sanskrit texts quote Mr Barooah's authority in tracing the identity of places mentioned in our ancient classics. The well known editor of Sanskrit Classics, Rai Sahib Bidhu Bhusan Goswami, M A, has added a summary of Mr Barooah's "Ancient Geography of India" to his excellent edition of Kalidasa's *Meghadûtam*. Prof Max Muller has said about Mr Barooah's work in the *Academy* of the 13th August 1881 - "Mr Barooah has added to the third volume of his *English-Sanskrit Dictionary* a long and important introduction on the 'Ancient

Geography of India, and an appendix of Geographical names rendered in Sanskrit both of which will be gratefully received by Sanskrit scholars in Europe. Prof Cecil Bendall has remarked in *Tribune's Record* No 245, 1889, -

'Not content with commencing such a *magnum opus* as a dictionary he added to its second and third volumes two new and original works -

his *Higher Sanskrit Grammar* and a Sanskrit geographical names illustrated by a valuable prefatory essay. Both are thoroughly original works and rather suffer by being united with the dictionary. The latter is, I believe, still a unique contribution to Indian research.'

It is to be regretted that the existence of such a book on the ancient geography of India has not come to the knowledge of Mr Majumdar, deeply read as he is in Indian antiquities. We hope in future discussions he will not omit Mr Barooah's most noteworthy contribution on the subject.

Here we may add that we agree with Prof Bendall when he says that the value of Mr Barooah's "Geography of Ancient India" has suffered by being united with the dictionary. His *Higher Sanskrit Grammar* was published separately during Mr Barooah's life time. Could not the lovers of Sanskrit learning, and the various organizations existing all over the country for its promotion and research, see their way to reprint and publish separately Mr Barooah's "Geography of Ancient India" and thus rescue from oblivion this most valuable contribution by an Indian to the ancient geography of the land of his ancestors?

S K BHUVAN

Cotton College, Gauhati, Assam

<sup>19</sup> For the meaning of *advardhya*, cf *Kautilya*, Bk VII, ch 9, p 289

<sup>20</sup> These attributes of the friendly state have been dealt with at length at p 289 of the *Kautilya*, Bk VII, ch 9. The *Kāmandakiya* dwells on the excellences of the state elements in *sarga* 4 and offers many parallels to the statements in the *Kautilya*.

## JAPANESE DESTROY A SPANISH SHIP, 1640

Mr W A Woolley gives the Japanese version of this episode as follows —

"In 1640, on July 7th, a ship from Luzon [Manila] arrived. It was seized and the crew were imprisoned in Deshima [a small island in the harbour], 61 of whom were put to death at Nishizaki on August 3rd, and the ship with its cargo, consisting of 60 *kwamme* [one *kwamme*=10 lbs Troy or 8½ lbs Av] of gold, gold ornaments and piece goods was sunk off Sudzure in Nishidomari. Thirteen of the crew, who stated that they had come to Japan against their will, were spared and sent home in a Chinese Junk to inform their countrymen of the fate of their comrades and of the prohibition against the coming of foreigners. In 1663 the sunken cargo was presented to the Machi-doshi yori, who succeeded in raising over 45 *kwamme* of gold."

*A Chinese Account of Episode VII*

## THE PIRATE COXINGA TAKES FORMOSA FROM THE DUTCH, 1661

(Communicated by Mr. S Charles Hill and edited by Sir R C Temple, Bt)

The Dutchman Lang-peih-tseih-li ho (?) after his unsuccessful raid on the coast of Fuh-keen, made sail for Holland, and throwing himself on the mercy of the King, was pardoned.<sup>85</sup>

Kwei-yih,<sup>86</sup> a younger brother of the King's, burning with anxiety to avenge the honour of his country, was allowed to organize the next expedition which consisted of veteran troops, and which embarked in fifteen transports. Favoured with southerly breezes the flotilla progressed, until on a certain day high land hove in sight, which caused Prince Kwei to enquire whether the China coast was not being approached. An old soldier, one who had served under Lang-peih-tseih-li-ho, on being appealed to replied, that judging from the colour of the water he surmised that they were on the coast opposite to China, whereupon the Prince ordered the squadron about so that they might determine their position.

An anchorage having been discerned, the Prince was able to make out through his telescope that there were no towns or cities on shore, therefore the ships were anchored in line, guns were run out for use in case of need, and the Prince's son, Tung-lan(?) landed to recon-

<sup>85</sup> This statement is either a garbled account of the attempt of the Dutch, under Franzoon, in 1623, to trade with Amoy (see Valentyn, *Oud en Nieuw Oost Indien*, IV, Formosa, pp 47, 48) or an allusion to the unsuccessful attack on Macao, in 1660, by Admiral Van der Laan, who subsequently retired to Batavia. But, as the narrator goes on to describe the settlement of the Dutch in Tai ovan in 1624, it seems unlikely that he is referring to the latter incident.

<sup>86</sup> By "Prince Kwei yih" the narrator means Frederik Coyett, as is evident from the account of the taking of the Dutch possessions on Formosa which follows. But Frederik Coyett, Governor of Fort Zeelandia in 1661, had nothing to do with the first settlement of the Dutch on Tai ovan, an islet on the S. W. of Formosa, in 1624. Moreover, the expedition was made peaceably under Maarten Sonk, who became the first Governor (see Valentyn, *op cit*, p 49, Imbault-Huart, *Formosa*, pp 13—22). The right of the Dutch to settle on Formosa was conceded to them by the Chinese, on condition of their evacuation of the Pescadores Islands. A treaty was negotiated by Cornelius Reyersz in 1623 and concluded by Sonk in the following year.

noitre, being accompanied by a guard of one hundred men, each armed with musket, pistol and sword. Nothing but some old ruins being observed at Kwen-shen the party returned to their boats and crossed to the other bank of the river,<sup>87</sup> where after traversing a  $\frac{1}{2}$ <sup>88</sup> or so, a native came in sight who was armed with a bow and arrow, and who was destitute of clothing. His language proved unintelligible, but by signs he led the way to where his tribe were living. It so happened that at the time one Ho-pin, a linguist, was lying sick in the encampment of the tribe, and on the approach of the Dutch he came forward and explained that the country they had reached was called Tai-wan. He further explained that there were no rulers in the island and that people settled here and there at their pleasure. On learning this the Dutch were delighted beyond measure and took Ho-pin on board ship with them to see Prince Kwei. After questioning the linguist the Prince was highly pleased with him, engaged his services, and made him his right hand man generally.<sup>89</sup>

In due course he came to enquire as to the distance from Taiwan to China, and on being informed that the Pescadores could be reached in four watches, and Amoy in seven, he replied that he was eminently satisfied, as in the absence of any fixed government in the island he intended to colonize.

From morning till night therefore he proceeded to busy himself with Ho-pin in surveying, and in laying out sites for cities, all with a view to permanent occupation.

Substantial walls were run up at Tseih-kwen-shen, the bricks being well faced, and cemented together with a compound of ground rice and lime, and outside these again a fort [Zeelandia] was erected. On the opposite shore at Chih-khan [Sakkam] a smaller fort [Provincia] was built. The soldiers of the expedition were directed to take women of the Sinkiang aboriginal tribes to wife, whilst three transports were despatched to Holland to convey despatches, and to obtain supplies generally for the new colony.

The land works being completed, attention was next paid to the approaches to the position from the seaward, and as these were found to be comparatively easy, six or seven of the old transports were filled with stones and scuttled in such positions as to render it necessary for a vessel entering port to pass under the guns of the fortifications otherwise she ran a great risk of striking on the sunken vessels. The above precaution having been taken, the position was deemed to be impregnable.<sup>90</sup>

In the 18th year of Shun-chih (A.D. 1667),<sup>91</sup> Ho-pin, the linguist, having embezzled several tens of thousands of dollars from Kwei-yih's treasury,<sup>92</sup> and fearing lest he be called on to render an account, had recourse to a stratagem. He managed to find out about the intricacies of the river navigation, and, having engaged two vessels to lie in wait for him, he prepared for flight. A feast was arranged to which he invited Prince Kwei and his staff, and whilst lamps were blazing on all sides, firecrackers were being let off, puppet shows, dancing and feasting were in full swing, he waited for the turn of the tide, and then, feigning to be the worse for liquor, and to have a colic, let himself out by a back entrance, and reaching his vessel made good his escape to Amoy.<sup>93</sup>

Arriving there he called on Cheng-cheng kung [Coxinga], and whilst unfolding to him all the advantages to be reaped by the possession of Formosa, he drew from his sleeve and presented him with a plan of the whole Dutch position.

<sup>87</sup> I have found no confirmation of this part of the story or any mention of "the Prince's" (Sonk's) son.

<sup>88</sup> The ordinary Chinese itinerary measure, now reckoned as rather less than a third of an English mile, but it varies in different parts of China and has varied at different dates.

<sup>89</sup> This part of the account is substantially correct (see Imbault Huart, *Formosa*, pp. 21-22, 58-59).

<sup>90</sup> See Imbault Huart, *op cit*, p. 23, for confirmation.

<sup>91</sup> An error for 1661. Shun-chi, ninth son of T'ien-ming, was proclaimed Emperor in 1644.

<sup>92</sup> Kwei-yih here means Frederick Coyett, Governor of Taiwan, 1656-1662.

<sup>93</sup> For corroboration of this account of Ho-pin, a Fuhkienese interpreter, see Imbault Huart, *op cit*, pp. 58-59.

Cheng was highly delighted with all he heard, and after a deep consultation with his several Commanders, he put to sea with his whole fleet on the 3rd of the moon, bound for Tai-wan [Formosa] On the morning of the 4th a look out man at the mast head discovered the Pescadores, and little after mid day the expedition reached Neang-ma king in safety <sup>94</sup> On the 6th oblations were offered to the sea gods, and a thorough reconnaissance of the adjacent islands was made

On the 8th the fleet weighed anchor, and on Luh-urh-mun <sup>95</sup> being descried in the distance, Cheng made prayer for a favourable tide to carry his vessels safely into port. Prayer ended, he directed leadsmen to take a line of soundings, and these returned with the news that the tide had risen fully ten feet higher than on the previous day

On receiving this intelligence, Cheng fired a gun, and, hoisting signals for a general advance, was followed by his whole fleet The linguist Ho pin was posted in the prow of the leading vessel to point out the passage as laid down on the chart he had provided and eventually, after much poling, sounding and manœuvring, the fleet came to an anchor with great uproar off the city of Chih-khan [Sakkam] <sup>96</sup>

The Commandant of Chih-khan, Meaou-nan ting <sup>97</sup> no sooner beheld the martial appearance of Cheng's landing party, than he despatched Lang-ho-ke (?) to Kwen-shen <sup>98</sup> for reinforcements, and at the same time opened fire on the fleet from all his guns

On the 10th Cheng, having directed each soldier of the force to provide himself with a bundle of straw, laid close siege to Chih-khan, and sent two interpreters to the front to inform the Commandant that unless he capitulated the whole place would be set on fire This menace had the desired effect, as Nan ting (?) being terrified to a degree, surrendered, and the position [Fort Provincia] was at once occupied by the assailants

Here it is necessary to pause a moment in order to mention that on the occasion of Ho pin's feast, Prince Kwei had not the slightest idea but that the linguist's retirement was consequent on his having imbibed too freely Nay, not until the second day, when efforts to find him proved fruitless, could he be brought to believe that he had absconded Even then he continued to attribute his flight to the embezzlement which he had been guilty of, and could not believe that he would so far turn traitor as to guide an expedition whose ambition was to dispossess the Dutch of their settlements

To resume on the 18th a heavy gale sprang up, the waves breaking on shore with a roar which was at once deafening and appalling, and this state of affairs continued till midnight.

At daylight the Prince [Coytt] and his officers mounted the city wall to reconnoitre, and on looking seaward they observed a whale swimming to and fro with a human figure seated on his back The figure was clad in red garments and its locks were dishevelled

From Luh-urh-mun the fish started, and after indulging in a variety of gambols, finally passed Chih-khan city and disappeared The Prince and his staff stood staring at one another, until, finding their tongues, they concluded that they had either been in a trance or had seen a vision <sup>99</sup> Then ears were now greeted with the sound of heavy guns from the direction of Luh-urh-mun, and on mounting a look out, they discerned through their glasses a whole fleet of vessels approaching with their ensigns and banners floating in the sunlight

<sup>94</sup> The fleet touched at Mâ Koung, Pescadores, on the 30th April 1661

<sup>95</sup> Lou eul mun, the Gate of the Stag's Ear, the strait between Tai ouan and the mainland of Formosa, called also Lou k'eou, Mouth of the Stag

<sup>96</sup> See Imbault-Huart, *op cit*, p. 60.

<sup>97</sup> (i) Leonard Campin, who was one of the Council at Tai ouan in 1661 (see Valentyn, *op cit*, p. 50).

<sup>98</sup> From this and the preceding references, "Kwen shen" seems to represent the district where Fort Zeelandia, the headquarters of the Dutch, was situated

<sup>99</sup> See *ante*, Episode VII, Vol XLVIII, p. 179, for a reference to this apparition

On seeing the vessels the Prince burst out laughing, and remarked that the Chinese in invading his position in this fashion must have little regard for their lives, and he at once gave orders for the batteries to be in readiness to treat the fleet to a broadside on its nearer approach. Thus he expected to annihilate the invaders at one stroke.

Whilst still chuckling to himself, the tactics of the leading vessel, which were being carefully followed by the rest, came under notice. First she tacked to the north, then went about to the eastward, and again altered her course to the north, until finally she and her consorts came to an anchor without passing under the guns of the batteries. The Prince turning to the staff observed that heretofore the channel which the Chinese fleet had come through was thoroughly impracticable and it was strange that they had not shoaled and come to utter grief. Whilst pondering over these matters, he still gave the order to open fire, but owing to the long range, the firing was ineffectual. His next move therefore, was to direct one of his subordinates, Li ying-san(?), to thoroughly man the Dutch vessels in port, and to proceed to dispute the advance of the enemy.

By the time the Dutch troops were in order night was drawing on apace, and as the tide was flooding, Li-ying-san soon became aware that a whole fleet was investing Chih-khan [Sakkam], and that a landing party had been disposed on shore in fighting array. At this juncture the Prince Kwei [Coyett], fearing lest his own position should be assailed, recalled the force he had sent on shipboard, and directed Li to advance and Kwen-shin to the assistance of the Chih-khan garrison. On reaching San kwen shen, Li was met by Lang-ho ke who stated that the force he was advancing with was too small to be of any material avail, and who proceeded to report to the Prince that the enemy were such a soldier-like lot that before attacking them it would be advisable to call in, and hold in readiness, all auxiliaries.

In reply, the Prince, after enquiring as to where the enemy had come from, called out all his infantry, and made preparation for marching on the morrow. At daylight Cheng became aware from the bugling and drumming which was audible in the direction of An-ping that the Dutch were about to advance, so, sending for his several Commanders, he informed them that the Dutch would rely principally on their artillery, and he disposed of his forces as follows —

500 infantry armed with muskets, and 200 heavy gingals<sup>100</sup> were formed into three divisions under a Commander, who had orders to march on Kwen-shen-wei and engage the Dutch as they advanced. 500 shield bearers under another Commander were ordered to take up their position to the left of Kwen shen and to attack the enemy's flank when opportunity offered. Another body of troops manned some 20 small junks, and were directed, on observing the Dutch to have passed Tseih kwen shen and to be about to open fire, to wave their flags and shout vigorously, at the same time making a feint of attacking the city by heading their boats in its direction. This proceeding it was hoped would be noticed by the Dutch force, and throwing them into a state of perturbation, would cause disorder in the ranks, thus rendering their defeat comparatively easy.

The above disposition of forces having been made, the balance of Cheng's force was drawn up as a reserve.

In due course the Dutch force arrived at Tseih-kwen-shen-wei, and were about opening fire when they were horrified by noticing a movement amongst the junks, which appeared to betoken an attack on the An-ping position from the water. Whilst still in doubt as to what steps to take, the shield-bearing force commenced its flank attack, the result being that the Dutch gave way, and with a loss of half their numbers retreated on the stronghold whence they had issued.<sup>1</sup>

<sup>100</sup> Gingall, jingall, Hind *janyal*, a swivel or wallpiece, a word of uncertain origin (see Yule, *Hobson-Jobson*, s.v. Gingall).

<sup>1</sup> The narrator seems to have drawn largely on his imagination for these details.

To this close siege was now laid, but the defenders worked their guns so well, and by constant sallies inflicted such loss on the besiegers, that an advance, or an attempt at storming was impossible

Cheng continued to hold the only road which communicated with the fort, however, and he now, in order to protect his people, commenced the erection of earth works and of a battery

During the 8th moon the Dutch Prince organised two expeditions, the one being despatched in the direction of Chih-khan by water, the other against Kwen-shen by land. In opposition to these Cheng commanded afloat in person, whilst the shore forces were handled by one of his generals, Hwang gan

The battle raged the whole day, until the Dutch, having lost one ship and three boats, retreated to the fort, which they continued to defend most stoutly

In the 11th moon the N E monsoon having now set in, Cheng ordered his subordinates Cheng-seuen and Cheng-chung to load some ten old boats with saltpetre and other inflammables, and to attempt the destruction of the Dutch ships, whilst a general attack from the shore was simultaneously made on the fort

In this engagement the Dutch lost three more ships and a number of men, which even caused Prince Kwei to be much cast down<sup>2</sup>

Taking advantage of the victory, Cheng sent a linguist named Li-chung into the Dutch lines with a message<sup>3</sup>

It was to the effect, that the position now held by Kwei yih was no Dutch possession, nor, owing to the distance from Holland, could he possibly hope to maintain a lasting occupation of it. The neighbourhood had been originally occupied by an Imperialist garrison, and it was Cheng's firm intention to regain possession. Having some pity for the defenders of the fort who had come from afar, he had no desire to injure them, and in consideration of the surrender of the treasury chest, stores, ammunition, &c., he was willing to afford them a loop hole for escape with their private effects and valuables

Failing acceptance of the terms now offered, it was his intention to renew the attack on the morrow from all sides. Their vessels should then be burnt, their stronghold reduced, and their personal annihilation must follow

Prince Kwei-yih and his staff on receiving the above message were much moved, and offered to surrender if supplied with provisions for the homeward voyage

The linguist returning to Cheng gave the reply to the ultimatum, and the surrender was at once completed, the victors taking over, as per list, the contents of the government chest, the military stores, &c.<sup>4</sup>

The surviving Dutchmen were then allowed to remove their personal effects on board ship, and on the 3rd of the 1st moon they took their departure for their native land

[ Translation of a Chinese record concerning Coxinga or Koxinga (Cheng-cheng-kung) the celebrated Chinese pirate, by H. E. Hobson (*Journal of the North-China Branch of the Royal Asiatic Society*, 2nd Series, No. XI, pp. 34-40) ]

<sup>2</sup> There is some exaggeration here. Of the four Dutch ships in the harbour, the *Hector* was burnt, the *Maria* escaped to Batavia and the two others retired, after sinking several junks, under the cannon of Fort Zeelandia (see Imbault-Huart, *op cit*, p. 60)

<sup>3</sup> It was a protestant minister, Antonius Hambroek, whom Coxinga sent as an emissary, keeping his wife and two of his children as hostages. Hambroek urged the garrison to fight to the last and returned to Coxinga to meet his death (see Valentyn, p. 90, Imbault-Huart, pp. 66-67)

<sup>4</sup> This is not correct. Emissaries were sent to Coxinga, offering to deliver up to him Fort Provintia in order to save the other buildings and Fort Zeelandia. Coxinga replied by demanding the immediate evacuation of Formosa. Provintia was thereupon surrendered, on the 4th May 1661, but the citadel of Zeelandia was defended vigorously and it was not until the 12th February 1662 that Coxinga was able to raise his standard on the Fort. (See Imbault-Huart, pp. 64-72)

## ( III )

## CAPTAIN JOHN HALSEY FIGHTS FOUR ENGLISH SHIPS AND TAKES TWO OF THEM, 1707

Of the European pirates, one of the most humane was Captain John Halsey of the *Charles* Brigantine, who on the 7th November 1704, received a commission from Governor Cranstone of Rhode Island to cruise against the French on the Banks of Newfoundland. This he considered good enough authority to cover attacks upon native shipping in the Indian Seas, and though at first he refrained from molesting European vessels, that scruple did not long hold good. On the occasion described in the episode narrated below, we find the very unusual fact of a single pirate attacking a number of merchantmen, all apparently ready to defend themselves and to support each other. Halsey's kindness to his prisoners is a matter of history, and the episode in question fully justifies Captain Johnson's eulogy — "He was brave in his person, courteous to all his prisoners, lived beloved and died regretted by his own people" (*History of the Pirates*, II, 118).

A comparison of Johnson's account of the fight with that given by Robert Adams, the East India Company's Chief at Calcutt, is useful, as it shows that Johnson, however confused may be his chronology, was fairly accurate in regard to other details.

The Records of the East India Company give further information about Captain Samuel Jago, whose ignominious flight gained him an unenviable notoriety on this occasion. He was employed by the Court of Managers in England and was sent out by them in command of the *Bombay Frigate* (or *Merchant*), a ship expressly designed for the defence of Bombay and the neighbouring coast against the attacks of pirates. By the Court's orders, Captain Jago proceeded first to Mocha to land a cargo. There, it seems, he fell in with the *Rising Eagle*, *Essex*, *Mary* and *Unity*, all country ships from the Coromandel Coast, and together they were sailing towards Bombay when they encountered the pirate.

Captain Jago reached Bombay on the 22nd August 1707 and apparently held his peace regarding his cowardly desertion of his consorts. Even when Robert Adams' account of the affair was received two months later, no notice seems to have been taken of the conduct of Jago, who had meanwhile been sent to Kârwâr. However, disaster was in store for him. On the 11th November 1707 he and some of his crew returned to Bombay in the *Prosperous* and the *Union Frigate*. He stated that he sailed from Kârwâr with the *Union* on the 27th October. "The 28 about 11 Clock in the morning, seeing one Savajee [Marâtha] Boat hovering about them, Fired their Chase Gunn,<sup>5</sup> after which the *Bombay Frigate* immediately blew up and Sunk, and ten English and about as many blacks lost, besides what since dyed, and others in a Languishing condition, and near Fifty burnt."

On the 9th December 1707 and 27th January 1708 letters were received from Fort St George containing "a warm Information and Complaint against Captain Jago for not engaging the Pyratte in his Passage from Mocha hither, but left four of their private Ships, two of which Seized by said Pyratte." Certificates by the supercargoes and commanders of the vessels were enclosed. There is, however, no record of any action taken by the Bombay Government in the matter.

Early in 1708 Captain Jago took the *Indian Frigate* to Persia, and on his return to Bombay in May of that year, he was permitted to embark in the *Aurangzeb* for Europe.<sup>6</sup>

We have also some account of the subsequent fate of Halsey's crew who, after his death, settled in Madagascar, and survived, some of them at any rate, till 1710.

<sup>5</sup> Chase guns fixed in the chase ports in the fore part and stern of vessels were known as bow chase (chasers) and stern chase guns. Smyth, *Sailor's Word Book* defines Bow chasers as "two long chase-guns placed forward in the bow-ports to fire directly ahead."

<sup>6</sup> The particulars regarding Captain Samuel Jago are taken from the East India Company's Records, *Bombay Public Consultations*, Vol. 2.

When the *King George*, an East India Company's ship commanded by Captain Samuel Lewis, was at St. Mary's, Madagascar, in 1719, her Log, under date 23rd July (*Marine Records, India Office*), tells us that two Europeans, John Guernsey and Old Nick of Dover came to see the captain, who writes as follows —

"These I kept on board two nights and entertained them plentifully with liquor, in hopes to sound what might be gathered from them. They faithfully promised me provisions speedily, but I found their tempers much alike (with a downcast eye, not able to look me in the face), very cautious of what they spoke till almost drunk, then they lay themselves open and tell of their loose way of living, bragging in their villainy as braves. They acknowledge of their being in the brigantine [the *Charles*] that took [killed] Chamberlayne, and at the plundering of three Moors ships and bringing away a fourth, which lay sunk in their harbour. Thus they called the *Fair Chance*, and they wanted but one hit more and then to go home, for they were aweary of their course of life. Their number was now reduced to 17 with about 10 or 12 Mustees<sup>1</sup> and free negroes. That they live separate on the other side upon the Main, some 20 or 30 miles asunder, each having a town to himself and not less than five or six hundred negroes<sup>2</sup> their vassalls, ready to serve 'em upon any expedition. They do not appear to be in any wise concerned for their former ill actions, only in relation to Sir John Bennett,<sup>3</sup> whom they acknowledged they had not used well in taking his goods and money from him after a fair agreement. Thus freely they would talk when warm with liquor, but always cautious when sober. I likewise askt 'em why they did not accept of the King's pardon [1718] and go home in time. They told me that they believed it was a sham and would not trust to any unless they had the Great Seal to it. Such impudence and ignorance possess them."

1 — *Captain Johnson's Account*

Three days after, they spied the 4 ships, which they took at first for the trees of Babel Mandeb, at night they fell in with and kept them company till morning, the trumpets sounding on both sides all the time, for the Pyrate had two on board as well as the English. When it was clear day, the four ships drew into a line, for they had hailed the pyrate, who made no ceremony of owning who he was, by answering according to their manner, "from the Seas."

The brigantine bore up till she had flung her garf [*sic*]. One of the ships perceiving this, advised Captain Jago, who led the van in a ship of 24 guns and 70 men to give chase, for the pyrate was on the run, but a mate, who was acquainted with the way of working among the pyrates, answered he would find his mistake, and said he had seen many a warm day, but feared this would be the hottest. The Brigantine turned up again, and coming astern, clapped the *Rising Eagle* aboard, a ship of 16 guns and the sternmost. Tho' they entered their men, the *Rising Eagle* held them a warm dispute for three quarters of an hour, in which Captain Chamberlain's mate and several others were killed, the Purser was wounded, jumped overboard and drowned.

In the mean while the other ships called to Captain Jago to board the pyrate, who bearing away to clap him on board, the pyrate gave him a shot, which raked him fore and aft and determined Captain Jago to get out of danger, for he ran away with all the sail he could and though he was fitted out to protect the coast against pyrates. His example was followed by the rest, every one steering a different course, thus they became masters of the *Rising Eagle*.

I can't but take notice that the second mate of the *Rising Eagle*, after Quarters were called for, fired from out of the Forecastle and killed two of the pyrates, one of whom was the gunner's consort, who would have revenged his death by shooting the Mate, but several

<sup>1</sup> *Mestigos*, Portuguese half castes.

<sup>2</sup> *I.e.*, Malagasi

<sup>3</sup> See *infra*, 2

Irish and Scots, together with one Thomas White, once a commander amongst the pyrates but then a private man, interposed and saved him, in regard that he was an Irishman

They examined the prisoners to know which was the ship came from Juffa [Juddah], for that had money on board, and having learned that it was the *Essex*, they gave chase, came up with her, hoisted the bloody flag at the mainmast head, fired one single gun, and she struck, though the *Essex* was fitted for close quarters, there were not on board the Brigantine above 20 hands, and the prize [the *Rising Eagle*] was astern so far that her topmast scarce appeared out of the water. In chasing this ship they passed the other two who held the fly of their ensigns in their hands ready to strike. When the ship had struck the Captain of her asked who commanded that Brigantine. He was answered, "Captain Halsey." Asking again who was Quartermaster, he was told "Nathaniel North," to whom he called as he knew him very well. North, learning his name was Punt, said, "Captain Thomas Punt, I am sorry you are fallen into our hands." He was civilly treated and nothing belonging to himself or the English gentlemen, who were passengers, touched, though they made bold to lay hands on £40,000 in money belonging to the ship. They had about £10,000 in money out of the *Rising Eagle*. They discharged the *Essex* and with the other prize and the brigantine, steered for Madagascar, where they arrived and shared their booty

[ C JOHNSON, *History of the Pirates*, II, 114-115 ]

2 — *Robert Adams' Account, received per Captain Thomas Punt*

May it please Your Excellency, &c

Captain Gaywood being wind bound off this Port, have just time to write to your Excellency a few lines, Copies of our last being at Callicut, which were under 30th past, *vid* Carwarr, per Pattamar, cannot send them. Came from Callicut the 7th Instant to view this place, being advised of its miserable condition, which have found beyond expectation to be laid in no less than five places leavell with the Ground by the great Rames, so that are forced to make Bamboo hedges to keep the Cattell out

The following relation is the unhappy news received from Captain Punt, who [we] found here at our arrivall in the Ship *Essex*

They sailed from Mocho the beginning of August, in all 5 sail, *vizt*, The *Bombay Merchant* from Europe, the *Eagle*, *Essex*, *Mary* and *Unity* from the Bay and Coast, when fell in with a Brigantine Pyrat. They all drew up with an intention to fight. The *Bombay Merchant* and *Eagle* gave him some broad sides, but so soon as boarded Captain Chamberlaine, the *Bombay Merchant* bore away, which put all the rest to shift for themselves. Captain Chamberlaine, Captain Phillips and all the Stern Quarters were killed, but one French man who cried out quarters. Mr French, Chief Mate, who was in the Fore Castle, not knowing what was done a baft, fired briskly on the Pyrats and killed 6 and wounded 20 of them, and did not yield up, but kept his arms in his hand till they promised him good quarters. So soon as they got the *Eagle*, they forced the people to tell them which was the Judda Ship, and immediatly both Brigantine and ship made after her, and went by the others and came up with her and took her, the Passengers and People being so discouraged that they would not let the Captain make any resistance least they should put them all to the Sword, they coming up to them with the Bloody Flagg. After this they detained both ships in their Company, designing for Socatora to take in Refreshments, but the *Essex* breaking her fore yard and springing her Foretopmast &c, not keeping them Company, Sir John Bennet and several of her people are left on board the Pyrat, and Mr French is on board Ship, who is gone to Callicut to see if he can get into the River, if not, to goe down to Cocheen, but since hear she is in Callicut River

[ Letter from Robert Adams &c at Tellicherry to the President and Council at Surat, dated, 17th September, 1707 (*Factory Records*, Surat, Vol. 101) ]

[ THE END ]

INTER-STATE RELATIONS IN ANCIENT INDIA

By NARENDRA NATH LAW, M.A., B.L., P.R.S. CALCUTTA

(Continued from page 136)

(1)

The scheme of a *mandala* of twelve states was, as we have just said, generally accepted, the needs of reference to particular states in a certain spacial or political correlation, or of description of particular political situations being ordinarily satisfied by the scheme. All the twelve states composing the circle may not, in particular cases, be put to the necessity of siding with the one or the other of the warring parties, the activities being limited say to the second zone. In this case, only a few states of the circle may be noted in calculations of strength or other such forecasts. The list of excellences of the seven constituents of the state furnish the criterion by which those constituents of the required states in the circle have to be judged, and the group of qualities of a particular constituent in the list shows the points with regard to which the enquiries require to be instituted. The final estimate shows the merit or deficiency of each constituent, and the total strength of the states, their weak and vulnerable points being exposed to view for the guidance of the inquirer. It may be mentioned in this connection that the making of such estimates necessarily implies the agency of informants through whom accurate information as to the details of the constituents was procured. The scheme of the *mandala*, and the analysis of the state into its constituents with an enumeration of their excellences serving as criteria for estimates of strength of states, enabled a sovereign to take the course or courses of action to be detailed presently. These courses were analysed into (1) *sandhi* (including alliances, treaty of peace etc.), (2) *vigraha* (war), (3) *āsana* (halt), (4) *yāna* (attack), (5) *samśraya* (resigning oneself to another's protection), and (6) *draudhibhāva* (making alliance with one and fighting with another). They admit of certain combinations and include various sub-courses of action adopted in stated situations.

(B) The six courses of action, including their combinations and sub-courses for particular inter-state situations, are the source of *vyāyāma* and *sama*, the exertion to create means for the beginnings of undertakings, and exertion to ensure the enjoyment of results of undertakings. In addition to human exertion, there is scope for the operation of providential forces in the creation of the conditions in which a state may be at any particular moment. The causes, therefore, that determine those conditions, are of two kinds, human (*mānusha*) and providential (*daiva*). The former lies in the pursuit of the right or wrong courses of action (*naya* and *apanaya*) and the latter in the favourable or unfavourable circumstances or forces of nature (*aya* and *anaya*).<sup>21</sup> The net result of the operation of the two sets of causes is the particular condition of the kingdom at any particular moment, viz. deterioration (*kshaya*), stagnation (*sthāna*), or prosperity (*varddhi*).<sup>22</sup> In other words, it is the afore-said causes that bring about the weakness or vigour of each of the sovereign and resource-elements, upon which depends the total strength (*akṛi*) of the state as well as the happiness of its citizens [*sukha* identified with *siddhi* (success)].<sup>23</sup> The prosperity of the state stands as the ideal, and though the immediate result of every undertaking may not be conducive to this ideal—and it is impossible that it should be so—the final aim of persons at the

<sup>21</sup> These forces and their effects are dealt with in a subsequent section on the *vyasanas* (calamities)

<sup>22</sup> *Kautilya*, Bk VI, ch 2, pp 257, 258

<sup>23</sup> *Ibid*, Bk VI, ch 2, p 259

helm of the state should be this and none other. Hence, temporary deterioration, or stagnation of the state is permissible if the ultimate issue of the actions be gainful <sup>24</sup>

With reference to the central state, any other state may be superior (*jyāyān*), equal (*sama*), or inferior (*hina*) in strength and prosperity. Efforts should be directed by the above state towards the increase of its own strength in order that it might be superior to others in its *mandala*.

It is mentioned in the *Kautilya* that conformity with the advice of treatises on polity leads a self-controlled sovereign to greater and greater power and position, making him ultimately the ruler of the whole earth, while the reverse conduct on the part of even an emperor with dominion from sea to sea reduces him to miserable straits <sup>25</sup>. The statement may at first sight sound too much laudatory of treatises on polity and the efficacy of their rules and recommendations, but, yet, on closer observation, it cannot be said to be without a foundation. For, in those days, "jealous rivalry between two or more states, the awakening of ambition, craving for rich colonies, desire of a land-locked state for a sea-coast, endeavour of a hitherto minor state to become a world-power, ambition of dynasties or great politicians to extend and enlarge their influence beyond the boundaries of their own state, and innumerable other factors" were at work to create causes of war in the same way as they do at present. These causes, numerous as they are, must have been more prolific than now in view of the then state of inter-statal relations regulated by comparatively fewer laws and provided with smaller facilities for the pacific cessation of hostilities by inter-statally constituted means <sup>26</sup>. Hence, the outbreaks of hostilities were comparatively greater, furnishing opportunities to an aspiring sovereign for the extension of his territory or for other means of acquisitions. The sovereign, to achieve the great results promised by the treatises on polity, must be endued with the qualities inculcated by their writers. The onerous conditions made necessarily rare the existence of such sovereigns, but nevertheless there is no reason to deny that the recommendations of the writers had no merit by virtue of their applicability to the conditions of internal and inter-statal politics of those days.

Attack on a state by another merely because the former is weak and the latter strong was not justified by practice, though of course, a pretext put forward as a real cause for war might have been picked up for the opening of hostilities. Conflict must have preceded

<sup>24</sup> *Kautilya*, Bk VI, ch 2, p 262

<sup>25</sup> *Ibid*, Bk VI, ch 1, p 257, Bk I, v *ultha sam yoga*, p 11

<sup>26</sup> It should be noted that a state in calamities (*vyasana*) is called *yataya* (lit assailable, i.e. tottering) by *Kautilya*, who includes it in the list of the various kinds of hostile states (*Kautilya*, Bk VI, ch 2, p 258). This may lend colour to the supposition that a 'tottering' state was generally thought to be assailable by another state without any preceding conflict. That such a supposition is baseless will be apparent from the following —

(1) *Kautilya* says that a state in calamities can be *protected* or easily attacked (*Kautilya*, Bk VIII, ch 1, p 319)

(2) A state in calamities is mentioned by *Kautilya* as *yataya* with reference to another state on the assumption that ill will exists between the two parties. Should they be friendly, the former would be protected instead of being attacked by the latter.

(3) It is expressly laid down by *Kautilya* that wits (implying negotiation) are the root of peace and war between states [*Kautilya*, Bk II (*sasandhikāra*), p 70, *Kautilya* tells us that he wrote the chapter on royal wits not merely in accordance with all the *sāstras* (treatises on polity) but also the prevailing practices (*prayoga*) of the day. *Ibid*, p 75]

(4) If *pratapa* means 'ultimatum' [see *Kautilya*, Bk I (*duta mandhikā*) p 32,] then it is evidence of the existence of negotiation before the declaration of war. Hence, it is not permissible to suppose that a state in calamities could be attacked by another state without any previous conflict. It was preceding conflict alone that justified an attack. A friendly state would, on the other hand, protect it in its sorry plight.

war, and there is, as has been shown already, no ground to suppose otherwise. This supposition is rendered firmer by the fact that there are means at the disposal of a very powerful sovereign to demand submission of other sovereigns far and near for reasons other than existing conflict. These means were provided by the politico-religious ceremonies of *râjasûya* and *asvamedha*, which could be performed at will with the said political object in view. But they could be utilized by those sovereigns alone, who had already become powerful enough to dare and defy the active oppositions that were sure to follow the celebration of the ceremonies, and served more as ways of asserting power already acquired than as those of acquiring the power itself. The steps leading to world-power at the disposal of the humbler states aspiring to such power are thus described by Kautilya<sup>27</sup> —

I (1) The central state should, after subduing the 'enemy,' try to subdue the medium state, and when successful in this attempt, the super state

(2) The medium and super states being subjugated (by the first step), the central state should, in proportion to the increase of its power, subdue the other states within the first zone.<sup>28</sup> When these states are brought under subjection, the states within the other zones<sup>29</sup> should be dealt with in the same way

(3) When the whole statal circle has been put under the sway of the central state (by the second step),<sup>30</sup> an *amitra* (enemy) [among the states faced next] should be squeezed,<sup>31</sup> by a *satru*,<sup>32</sup> or a *satru* by a *mitra* (friend)

II Or a weak neighbouring state should be subdued, and then with double power, a second, and with triple power a third.<sup>33</sup>

The processes involve a series of fights, but as the time occupied by them is not in any way limited, there is no reason to suppose that they necessarily imply disregard of such inter-state practices as attacking states without preceding conflict, or friendly states in

<sup>27</sup> *Kau. Inq.*, Bk. XIII, ch. 1, p. 406

<sup>28</sup> 'In *prakritih*' in the text refers to '*râja prakritih*' (sovereign elements) within the first zone and not to the citizens of the states

<sup>29</sup> '*Uttarah prakritih*' refers similarly to the sovereign elements in the other zones of the statal circle

<sup>30</sup> The subjugation of the sovereign elements of the statal circle brings the central state face to face with other states, if any, which will be either friendly or hostile, and dealt with in the above process

<sup>31</sup> The word used in the text is *sampâtana* which is thus explained in the *Kâmandakiya* sarga VIII, slk. 58: *pâtana* is more serious than *karsana* (or *karshana*). The latter is effected by causing the emaciation of the treasure and army together with the death of the high ministers of state. *Pâtana* being more serious than *karsana* includes acts much more oppressive. Śaṅkarârya explains it by "*mâla vâja deśa vitapanam*"

<sup>32</sup> A *satru* is thus described by Kautilya: "*ari-sampad-yuktah sâmantah satruh*" (a neighbouring state endued with *ari-sampad* is called *satru*) (*Kautilya*, Bk. VI, ch. 2, p. 258). The *ari-sampats* (or *amitra-sampats*) are those qualities that render a hostile state an easy victim to the central state and are thus enumerated: "Not born of a royal family, greedy, surrounded by mean persons, having disloyal subjects, unrighteous, silly, addicted to evil passions, devoid of energy, trusting to fate, indiscreet, inconsistent, coward, and injurious" (*Kautilya*, Bk. VI, ch. 1, pp. 256, 257). Owing to these disabilities, a *satru* can be easily made an instrument in the hands of the central sovereign. It is implied that the former is helped by the latter in the act of 'squeezing'.

<sup>33</sup> The first three *mârgas* (lit. ways) are but links of a single process, one leading to the other. The fourth *mârğa* may be taken either as a link supplementary to the third (in which case, it cannot be called, strictly speaking, the fourth *mârğa*) or as an independent second process standing apart from the first process composed of three links. The words "*dvigunah*" and "*triguna*," unless they be taken as used loosely, favour the interpretation of the fourth *mârğa* as an independent second process of conquering the world.

The independent existence of friendly states was not perhaps regarded as a bar to world conquest, if the central state could subjugate the hostile ones and thereby extend his dominion over a large expanse of territory, say from sea to sea.

disregard of friendship. An aspiring king should abide the opportunities offered by dispute with other states but should not artificially stir them up to create the opportunities. It cannot be asserted that no breaches of salutary practices conducive to inter-state peace occurred in ancient times. An unruly, aggressive sovereign might have set them at naught but not without incurring the displeasure of the other states or even of his own subjects.<sup>34</sup> Whether this displeasure could take shape in steps to bring to justice the infraction of the practices is another question. The displeasure indicates the volume of opinion for the maintenance of the practices and can well be a reason for considering them as the prevailing ones.

The legitimate inference, therefore, stands out to be that an aspiring sovereign should accumulate as much power as possible by a due application of the *Sāstric* injunctions to his personal conduct as well as to his administration of the realm. The increase of vigour of the resource-elements of the state should always be followed up by the pursuit of those measures that remove the obstructions retarding their progress and make them stout and healthy. The steps suggested for the extension of territory and acquisition of power by conquests may lead one to infer that they imply treacherous attacks, without preceding conflict, on friendly states or on those in a miserable plight, but in the light of other evidences there does not appear to be any ground for such supposition. The opportunities for war offered by the disputes that naturally came on were generally enough for the ambition of a royal aspirant able to utilize them fully. Unjustified invasions of states merely to satisfy the earth hunger of the invader were condemned by the opinion of the sovereigns generally as well as of the citizens. When a king was powerful enough, he could assert and proclaim his power by performing the *rājasūya* or the *āśvamedha*, but so long as he lacked this power, he had to wait for opportunities, making most of those that actually did present themselves. The advice of the writers of treatises on polity is directed to this full utilization of opportunities, which is possible only by a previous accumulation of strength from careful and diligent internal administration of the realm and a regulation of inter-statal dealings in the light of their instructions and recommendations garnering the political wisdom of the past.

The 'conquest of the earth' may be the goal cherished by the sovereigns but the difficulties besetting it are enormous. The lower the position of a monarch in the comity of states, the more onerous is his attempt to reach the goal. Favourable circumstances play no mean part in the achievement of the object, as also the capacity of the aspirant and his adherents. The task moreover cannot, except rarely, be accomplished by the labour of a single monarch in his life-time. The various usurpations of the throne of comparatively larger kingdoms extended into 'world powers' by the usurpers may tend to obscure this view of the question, but really the kingdoms acquired by the usurpers were not fabrics of their creation but of their predecessors. Keeping these limitations in mind, we can well endorse the statement of the *Kautilya*, laudatory in a way of the injunctions of the works on polity.

*Ātmavāns=tv=alpadeśo=pr yuktah prakṛtisampadā*

*nayajñah prithivīm krtsnām jayaty=eva na hīyate*<sup>35</sup>

[A self-controlled (king), with even a small territory, but versed in polity and possessed of the 'state-elements' in a flourishing condition, is sure to conquer the world and never decline in power.]

Kautilya's discourse on the courses of action is not meant for the central state alone, but also for the other components of the *mandala*, for advice is needed as much for the state centrally situated as for those in different situations. Hence, two aspects of his advice

The courses of action  
(*śāśṭra gunyam*)

<sup>34</sup> See the *Kautilya*, Bk VII, ch 13, p 300, where reference is made to the displeasure incurred by attacks on sovereigns righteous, or friendly

<sup>35</sup> *Kautilya*, Bk VI, ch 2, p 257

are often noticeable on the one hand, for instance, he states the circumstances in which to make a treaty of peace with hostages while, on the other, he enumerates the means by which the hostages can escape from the territories to which they have been committed, similarly, he advises a powerful monarch as to when and whom to attack, recording as well the ways by which a weak or distressed monarch should defend himself against the attack, he offers his guidance in the same way to an invader by asking him to take proper precautions against a rear attack, directing at the same time a rear enemy as to when and whom to attack from behind. Thus his advice is meant for the solution of problems arising from different inter-statal situations and has in view the welfare not of a single state in a particular situation in the *mandala* but of the other states in it as well.

An analysis of the ways by which difficulties in inter statal situations could be tided over laid bare to the Hindu statesmen six courses of action,—*sandhi*, *vigraha*, *āsana*, *yāna*, *saṁśraya*, and *draudhībhāva*. A further analysis may reduce them to the first two, and according to Vātsyāyāni, these two are taken as the fundamental courses, but the afore-said six are generally recognized in view of their applicability to different conditions.<sup>36</sup>

These six courses of action admit of combinations and imply many other measures which need not be named at present. Let us treat of the first course first.

## SECTION II.

*Sandhi* in the sense of treaty of peace represents but one of its uses in the *Kauṭīliya*. The other senses have to be carefully distinguished from the first in order to avoid a confusion. The term bears in the *Kauṭīliya* the following meanings—

- (1) It is *panabandha*, i.e., a treaty of peace<sup>36</sup> concluding hostilities between the parties to the treaty.
- (2) It is a compact between powers in their efforts to have friendly state to help them in their needs.<sup>37</sup>
- (3) It is a compact between powers out on an expedition to divide among themselves the lands that might be acquired by each as the result of their combined efforts against a hostile state.<sup>38</sup>
- (4) It is a compact to plant a colony.<sup>39</sup>
- (5) It is a compact to carry out particular works advantageous to the parties to the compact, such as building forts, exploiting mines, constructing trade routes.<sup>40</sup>
- (6) It is a settlement of differences between the king and his friend or servant.<sup>41</sup>

It is the first signification alone that has to do with the treaty of peace. The use of the second kind of compact will be realized when it is borne in mind that to secure a friendly state for help in difficulties, specially in war, was not an easy matter, for, as on the one hand, the combined request of two or more states was likely to be more mighty and persuasive than the request of a single state, so on the other, the compact was helpful in the dissension that might have ensued from the rejection of the request.<sup>42</sup> The compact though termed a kind of *sandhi* was altogether different from the treaty of peace (*hīna-sandhi*), and might have been in certain cases dissociated from war. The third compact had connection with but preceded the conclusion of the war in which the parties acted as friends, while the fourth and fifth need not have anything to do with war at all. The sixth would be devoid of any

direct inter-statal bearing if the *mitra*<sup>43</sup> instead of signifying a friendly sovereign meant only a courtier or a personal friend of a particular king

(A) *Hīna sandhi*

(A) It is the *hīna-sandhi*s alone that constitute the treaty of peace for bringing the hostilities between the belligerents to a close. This is what we ordinarily mean by the term *sandhi* and will be dealt with at present, relegating the other kinds to subsequent sections.

A treaty of peace should be concluded by a sovereign in view of the fact that the continuance of hostilities will make him gradually weaker than his enemy.<sup>44</sup> It is recommended to be made with states of superior or even equal power, for in the former case, the continuance of war is ruinous to the inferior state, and in the latter, to both. Should a superior power reject an offer of peace, the inferior has no other alternative but to throw itself up to the mercy of the former or have recourse to the methods of defence recommended in '*āvalīyasam*'.<sup>45</sup> If an offer of peace by a belligerent be rejected by another of equal strength, the former should wage war only so long as the latter sticks to it. An unqualified submission made by an inferior state ought to put a stop to hostilities, for, as on the one hand, the state may grow in fury by further maltreatment, so on the other, it may be helped by the other powers of the statal circle taking pity on its miserable condition. Should a state allied with other states against an enemy find that the states of the adjacent zone<sup>46</sup> naturally hostile to it will not attack (*n=opagachchhanti*) it, even if they are tempted, weakened, and oppressed by the enemy (trying to win them over to its side) or will not do so through fear of receiving blow for blow from the allied states (*pratyādāna bhaya*), then the state in alliance, even if inferior to the enemy individually, should continue the war. When again a state in war with another finds that the states of the adjacent zone will attack it, tempted, weakened, or oppressed by the latter, or through anxieties caused by the war waged next door, it should, even if individually superior to the enemy, make a treaty of peace in the first case, and remove the causes for anxiety to the aforesaid states in the second.<sup>47</sup> If a belligerent sees that he is afflicted with calamities greater than those of his enemy, who will be able to remedy them easily and carry on the war effectively, the former though superior in strength should make peace with the latter.<sup>48</sup>

Kinds of *hīna sandhi*      The various kinds of treaty of peace (*hīna-sandhi*)<sup>49</sup> are —

I. (1) *Ātmāmśha*<sup>50</sup> The defeated sovereign (henceforth abbreviated into DS) agrees to help the conqueror (henceforth abbreviated into C), by going over to him personally with a stipulated number or the flower of his troops. A person of high rank is also given as a hostage.

<sup>43</sup> In the passage "*bhṛtyena mitrena va doṣa āpasṛtina*" "*Kautilya*, Bk VII, ch 6, p 279

<sup>44</sup> *Kautilya*, Bk VII, ch 1, p 261, *parasamādādhīyamānah samudādhita*

<sup>45</sup> *I.e.*, Bk XII of the *Kautilya*

<sup>46</sup> *Para prakṛtaya = arī-prakṛtaya*, the reference being to the *rāja prakṛtis* and not to the citizens of the state of the enemy

<sup>47</sup> The text (*Kautilya*, Bk VII, ch 3, p 267) has "*mānopagachchhanti*" which appears to be an error for *mām-upagachchhanti*

<sup>48</sup> For the texts of this paragraph, see *Kautilya*, VII, ch 3, pp 266, 267

<sup>49</sup> The treaty of peace is also called *sama* or *samādhi*. See *Kautilya*, Bk VII, ch 17, p 311

<sup>50</sup> Corresponds to *Kāmandakiya*, sarga IX, śloka 16

(2) *Purushântara* The DS agrees to help the C by sending the aforesaid troops headed by his son and commander-in chief <sup>51</sup> This exempts the personal attendance of the DS and hence its name A woman is also given to the C as a hostage <sup>52</sup>

(3) *Adrishtapurusha* The DS agrees to help the C by sending the aforesaid troops headed either by himself or by somebody else In the latter case, the personal attendance of himself, his son or his commander-in-chief is exempted <sup>53</sup>

The above three kinds of treaty form the class of *sandhis* called *dand-opanata*, *danda* (army) being the chief subject-matter of their stipulations

II (1) *Parikraya* The DS gives up his treasure to the C as the price of setting free the rest of the state elements <sup>54</sup>

(2) *Shandhopaneya* The indemnity is paid in instalments <sup>55</sup>

(3) *Upagraha* By it, according to Kāmandaka, peace is purchased by the surrender of the entire kingdom to the C <sup>56</sup>

(4) *Surana* Its foundation lies in friendship and mutual confidence Hence, it is called Golden <sup>57</sup>

(5) *Kapāla* This form of treaty is of a nature reverse to that of the Golden Under this, a very large indemnity has to be paid to the C According to the *Kāmandakiya*,<sup>58</sup> the two parties to the treaty are of equal strength, and the peace concluded between them does not produce mutual confidence rendering it the reverse of the Golden <sup>59</sup>

The five forms <sup>60</sup> of treaty constitute the class called *koś-opanata*, i.e., having *kośa* (treasure) as the chief subject-matter of their terms

III (1) *Īdhishta* The DS cedes a part of his territory to the C

(2) *Uchchhanna* It requires the DS to cede to the C all the rich lands in his territory except his capital <sup>61</sup> The C intends by this form of treaty to bring misery upon his enemy (*para*)

(3) *Apakraya* <sup>62</sup> The DS releases his dominion by giving up the products of his lands to the C

<sup>51</sup> Corresponds to *Kāmandakiya*, IX, 13

<sup>52</sup> The *śloka* in the *Kautiliya*, Bk VII, ch 3, p 268, is as follows —

‘*Mukhyastr bandhanam kuryāt purvayoh paschime tvam,  
Sādhayed=guḥham=atī=ete dandōpanata-sandhayaḥ*’

I have taken *mukhya* and *strī* separately in view of the fact that *mukhyas* are stated to have been given as hostages at *Kautiliya*, Bk VII, ch 17, p 312 *Arām guḥham sādhayet* refers perhaps to the over-reaching of the other party by the subsequent secret deliverance of hostages from the C's custody (see *Kautiliya*, Bk VII, ch 17, pp 313, 314) If this meaning be accepted, *paschime* should be taken in the sense of ‘subsequently’ instead of as referring to the third treaty, in spite of the juxtaposition which at first sight appears to exist between this word and *purvayoh*

<sup>53</sup> Corresponds to *Kāmandakiya*, IX, 14

<sup>54</sup> Corresponds to *Ibid*, IX, 17

<sup>55</sup> Corresponds to *Ibid*, IX, 19 (*skandhashandhena* means, according to Śankarārya, *khanḍa-khanḍena*)

<sup>56</sup> Corresponds to *Ibid*, IX, 16 The *Kautiliya* is not so clear on this point, but says nothing that contradicts the above definition

<sup>57</sup> Corresponds to *Ibid*, IX, 8

<sup>58</sup> *Ibid*, IX, 5 Śankarārya accounts for the name of the treaty by stating that as the two skull-bones (*kapāla*) of a man appearing similar to each other from a distance show points of dissimilarity when observed closely, so the two belligerents though agreeing so far as to be parties to the *sandhi* really differ from each other owing to the lurking suspicion of each for the other

<sup>59</sup> *Ibid*, IX, 15

<sup>60</sup> *Kautiliya*, Bk VII, ch 3, p 269, last *śloka*

<sup>61</sup> ‘*Atta sārāṇām*’ in the text (*Kautiliya*, Bk VII, ch 3, p 269) if taken to signify ‘denuded of resources,’ renders the meaning of the passage opposite to that given above ‘*Atta*’ may mean ‘seized’ and ‘*attasārāṇām*’ from *attāḥ sārāḥ yayā tasam*’ may be interpreted as ‘possessed of resources’ This meaning is in accord with that of the *Kāmandakiya*, IX, 18

<sup>62</sup> Pandit R. Shama Sastri's English rendering of the text puts the term as *avakraya*

(4) *Paribhūshana*<sup>63</sup> The DS has to pay more than his own lands produce

These four forms of treaty are termed *desopanata*, the cession of territory (*desa*) being their special feature

Kautilya mentions in all twelve kinds of *hina-sandhis* of which three belong to the first class, five to the second, and four to the third. Barring slight differences of meaning and taking into account the similarity of names of the treaties, all the *hina-sandhis* of the *Kautilya* are found in the *Kāmandakīya* with the exception of *avakriya* alone. As the latter has sixteen altogether, these five, viz., *upahāra*, *santana*, *upanyasa*, *pratikara* and *sanyoga* have no equivalents in the former. Of these, the last two appear rather to be alliances and not forms of treaty of peace at all, *pratikāra* corresponding with alliances like the *bhāma sandhi* and *sanyoga* with alliances like the *karma-sandhi* of the *Kautilya*.

(To be continued)

#### BOOK-NOTICE

SHIVAJI AND HIS TIMES by JADUNATH SARKAR, M.A., Indian Educational Service M.C. Sarkar & Co. Calcutta, 1920

This new historical study by Mr. Sarkar has come out at an opportune time, and I have no hesitation in saying also in an opportune manner. It relates to a second birth struggle, as it were, of a nation that subsequently achieved great things, and is at the present day of much importance in the land it occupies, and also to a struggle between peoples dwelling in two totally different atmospheres of religion, thought and emotional feeling, and consequently attached strongly to separate sympathies. It is therefore practically impossible for writers belonging to either party to look at the historical events or the actions of the historical personages concerned without some feeling of partisanship peeping out in any accounts they may severally give of them. A Hindu will involuntarily lean towards Shivaji and his Marathas, a Muhammadan towards Bijapur and Aurangzeb. I may at once therefore say that the great merit of this book by a Hindu lies in the fact that he has tried to be fair, tried to get at the original documents and to relate nothing that cannot in his judgment be supported by the most reliable authorities open to him. Throughout he gives his authorities in such a way that they can be verified. The book is indeed history treated in the right way and in the right spirit.

It was inevitable that in former uncritical times Muhammadan historians should give a version of Shivaji and his doings from their point of view only, and that the outpourings of the Maratha bards and the statements of the *bakhars* should take a similar line from the Hindu side of the story. It is inevitable also that current patriotic emotions should colour present day *rechauffés* of the old writers, and so perpetuate false and partisan history. Indeed, one can quite appreciate the national

feeling on the part of the Marathas that prompts the modern devote to whitewash Shivaji and blacken Afzal Khan, who was his first enemy, and, after all is said and done, his most important opponent. But in view of the crucial part that these two antagonists played in the revolution of Modern Indian History it is well worth while to combat legend and get at the truth as nearly as may be after 250 years. This is what I think Mr. Sarkar has tried to do. Consequently, I propose to examine closely the story as he tells it, and to confine myself to the events on which the whole of Shivaji's great career depended. I make no apology for an examination at length, as so very much has depended on two points—the murder of Chandra Rao More and the assassination of Afzal Khan (Abdullah Bhatani).

Mr. Sarkar, who places Shivaji's birth on or about 6th April 1627 (p. 23), tells us (p. 22) that "Shahji Bhonsla, a captain of mercenaries, belonged to a Maratha family that had migrated from Daulatabad and entered the service of Ahmadnagar. Some of his kinsmen had joined the Mughals with their retainers and risen to high rank early in Shah Jahan's reign. Shivaji, the second son of Shahji, was born in the hill fort of Shivner, which towers over the city of Junnar, in the extreme north of the Pune district. His mother Jija Bai (a daughter of the aristocratic Jukhpī Jadav of Sindhkhed) had prayed to the local goddess, Shiva Bai, for the good of her expected child, and named him after that deity."

On pp. 23-24 we are told that "We know from the contemporary Persian historians that Shahji led a roving life, subject to frequent change of place and enemy attacks, during much of the period 1630 to 1636. Under these circumstances he would naturally have left his wife and infant son for safety in a stronghold like Shivner. But in reality, he seems to have deserted both."

<sup>63</sup> The *Kāmandakīya* of Trivendrum Sanskrit Series has *parādūshana* in the place of *paribhūshana*.

We thus get a clear view of Shivaji's origin and upbringing—the son of a wandering commander of Hindu soldiers of fortune, in general conflict with the Muhammadan powers of the day, left in the mountains of the Western Ghats to grow up as best he might, without any literary education<sup>1</sup> and the knowledge that such brings with it, and the hard and practical surroundings of a highland peasantry. A boy of natural strength and ability would grow up self-reliant and self-seeking in such circumstances.

In October, 1636, when Shivaji was ten and a half years old, his father made peace with the Mughals, but had to cede Shivner. He, however, "retained his ancestral jagir of Puna and Supa" (p. 26). Shivaji and his mother were accordingly moved to Puna, and Dadaji Kohnddev, an experienced *kulkarni*, or land steward, was appointed guardian. Dadaji was an effective administrator, and until his death in 1647, Shivaji grew up under his tutelage, becoming his own master at the age of 20. Dadaji (p. 35) was "a man of methodical habits, leading a sober blameless and humdrum life, but quite incapable of lofty ideals, daring ambition or far-off vision. Shivaji's love of adventure and independence appeared to his guardian as the sign of an untutored and wayward spirit, which would run his life's chances." The other strong influence on his character is thus described (pp. 33-34):—"Young Shivaji wandered over the hills and forests of the Sahyadri range, and along the mazes of the river valleys, thus hardening himself to a life of privation and strenuous exertion, as well as getting a first-hand knowledge of the country and its people. During his residence at Puna his plastic mind was profoundly influenced by the readings from the Hindu epics and sacred books given by his guardian and other Brahmins, and still more by the teaching of his mother. The deeply religious, almost ascetic, life that Jija Bai led amidst neglect and solitude imparted by its example, even more than by her precepts, a stoical earnestness mingled with religious fervour to the character of Shiva. He began to love independence and loathe a life of servile luxury in the pay of some Muslim king. It is, however, extremely doubtful if at this time he conceived any general design of freeing his brother Hindus from the insults and outrages to which they were often subjected by the dominant Muslim population. An independent sovereignty for himself he certainly coveted, but he never posed as the liberator of the Hindus in general, at all events not till long afterwards."

Shivaji was now his father's representative in his jagir, and at once took matters in hand himself on the opportunity offering of self-aggrandisement by the illness and consequent incapacity of the Bijapur monarch, Muhammad Adil Shah. He took the Bijapur fort of Torna by a trick and managed to retain it by bribery at Court (p. 38),

and by similar means annexed Supa, Chakan, Kondana and Purandhar, and so on, even from his own relatives (pp. 38-41). Kahan, Bhimri and Rairi (afterwards his capital as Rajgarh), and a number of places in the Thana and Kolaba districts and in the Northern Konkan followed into his possession by raids or attacks, seemingly unprovoked (pp. 41-43).<sup>2</sup> At this by 1648 when he was about 21. He was then drawn up with a round turn by the imprisonment of his father in that year at Jinji across the Peninsula by the Bijapur authorities (pp. 44-47). This brought about a crisis in Shivaji's affairs and induced him to negotiate with the Mughal Emperor, and even after the release of Shahji in 1649, it kept him quiet till 1655, spending the interval in consolidating his gains, which can hardly be said to have been well gotten (pp. 46-50). Shivaji was now 28.

Then comes the crucial event of the murder of Chandra Rao More in the year 1655. Here is Mr. Sarkar's version (pp. 51-54): "A Maratha family named More had received a grant of the State of Javli [Satara District] from the first Sultan of Bijapur early in the 16th century, and made the claim good by their sword. For eight generations they conquered the petty chieftains around and amassed a vast treasure by plunder. They kept 12,000 infantry, mostly sturdy hillmen of the same class as the Mavles, and succeeded in getting possession of the entire district and parts of Konkan. The head of the family bore the hereditary title of Chandra Rao, conferred by a Bijapur king in recognition of the founder's personal strength and courage. The younger sons enjoyed appanages in the neighbouring villages. Eighth in descent from the founder was Krishnaji Bajji, who succeeded to the lordship of Javli about 1652.

"The State of Javli, by its situation, barred the path of Shivaji's ambition in the south and south-west. As he frankly said to Raghunath Ballal Korde, 'Unless Chandra Rao is killed, the kingdom cannot be secured. None but you can do this deed. I send you to him as envoy.' The Brahman entered into the conspiracy, and went to Javli, attended by an escort of 125 picked men, on a pretended proposal of marriage between Shiva and Chandra Rao's daughter.

"On the first day the envoy made a show of opening marriage negotiations. Finding out that Chandra Rao was fond of drink and usually lived in a careless unguarded manner, Raghunath wrote to his master to come to the neighbourhood in force, in readiness to take advantage of the murder immediately after it was committed. The second interview with Chandra Rao was held in a private chamber. Raghunath talked for some time on the endless details of a Hindu marriage treaty, and then drew his dagger all of a sudden and stabbed Chandra Rao, who was despatched by a Maratha soldier. The assassins promptly rushed

<sup>1</sup> It has not been proved that he could read or write (p. 30).

<sup>2</sup> In this, however, he merely followed a very old Indian custom, Hindu and Muhammadan.

out of the gate, cut their way through the alarmed and confused guards, beat back the small and hurriedly organised band of pursuers and gained a chosen place of hiding in the forest

"Shivaji had kept himself ready to follow up his agent's crime, according to later accounts he had arrived at Mahableshwar with an army on the plea of a pilgrimage. Immediately on hearing of the murder of the Mores, he arrived and assaulted Javli. The leaderless garrison defended themselves for six hours and were then overcome. Chandra Rao's two sons and entire family were made prisoners. But his kinsman and manager Hanumant Rao More, rallied the partisans of the house and held a neighbouring village in force, menacing Shivaji's new conquest. Shiva found that 'unless he murdered Hanumant, the thorn would not be removed from Javli.' So, he sent a Maratha officer of his household named Shambhaji Kavaji with a pretended message to Hanumant Rao, who was then stabbed to death at a private interview (about October 1655). The whole kingdom of Javli now passed into Shivaji's possession and he was free to invade South Konkan with ease or extend his dominion southwards into the Kolhapur district.

"The acquisition of Javli was the result of deliberate murder and organised treachery on the part of Shivaji. His power was then in its infancy and he could not afford to be scrupulous in the choice of the means of strengthening himself.

"The only redeeming feature of this dark episode in his life is that the crime was not aggravated by hypocrisy. All his old Hindu biographers are agreed that it was an act of murder for personal gain and not a human sacrifice needed in the cause of religion. Even Shivaji never pretended that the murder of the three Mores was prompted by a desire to found a 'Hindu swaraj'."

To this remark I would like to add, as an onlooker, that the story shows Shivaji in 1655 in the light of a man cunning, intriguing, tricky, without scruple, and capable of going to any length to gain his ends, and it prepares us for the story four years later of Afzal Khan.

Mr Sarkar goes on to say (pp 54-55) "Some Maratha writers have recently 'discovered' what they vaguely call 'an old chronicle,'—written nobody knows when or by whom, preserved nobody knows where, and transmitted nobody knows how,—which asserts that Chandra Rao had tried to seize Shiva by treachery and hand him over to the vengeance of Bijapur, and that he had at first been pardoned by the latter and had then conspired with Bajji Ghorpade to imprison Shivaji. Unfortunately for the credibility of such convenient 'discoveries,' none of the genuine old histories of Shiva could anticipate that this line of defence would be adopted by the twentieth century admirers of the national hero, they have called the murder a murder."

Now let us see what are the authorities on which Mr Sarkar relies for his version. They are given on pp 500—502.

- (1) *Shiva chhatrapati chen Charitra* by Krishnaji Anant Sabhasad (*Sabhasad Bakhar*) 1694.
- (2) *Shiva-chhatrapati chen Sapta prakaran aimak Charitra* by Malhar Ram Rao, Chitnis 2nd ed., 1894.
- (3) *Shiva digvijay* Ed. or published by P. R. Nandurbarkar and L. K. Dandekar, 1895.
- (4) *Shrimant Maharaj Bhonsle yanchi Bakhar* of Shedgaon, published by V. L. Bhabe 1917.

The second and fourth Mr Sarkar describes as valueless (pp 501, 502). He has not a much higher opinion of the third "but the kernel of the book is some lost Marathi work composed about 1760—1775, and containing, among many loose traditions, a few facts the truth of which we know from contemporary Factory Records." Of the first he has not a high opinion, "but [it is] the most valuable Marathi account of Shivaji and our only source of information from the Maratha side. All later biographies in the same language may be dismissed, as they have copied this *Sabhasad Bakhar* at places word for word." Evidently Mr Sarkar has gone as far back as he could for the facts of the story of Shivaji's relations with the More family and has given us the best source available, unsatisfactory though that is. When Mr Kincaid, replying to criticism on his and Rao Bahadur Parasnis' *History of the Marathas* in the *Times Literary Supplement*, August 14, 1919, states "we acquitted Shivaji of guilt in connection with Chandra Rao's death," he has no such authority to support him, and the probabilities are against him in view of Shivaji's general character and story.

In 1656, when Shivaji was still under 30, there came the great crisis in his and indeed in Maratha history. He had much enlarged his kingdom and commanded a considerable army, said by Sabhasad, writing from memory, to be some 10,000 cavalry and 10,000 infantry, while he held about 40 forts. In that year Muhammad Adil Shah of Bijapur died, and Shivaji began "to prepare for the invasion of Bijapur" (p 58). He entered into negotiations with Multafat Khan, the Mughal Governor of Ahmadnagar, and also with Aurangzeb himself at Aurangabad all against the Bijapur kingdom (p 59). But in the end he sided for the time being with Bijapur, his officers raiding Mughal territory right up to Aurangabad (p 60), while he himself captured Junnar. This roused the wrath of Aurangzeb, then besieging Bidar. Shivaji's escapades resulted in his own discomfiture for a time, for Aurangzeb was no fool when it came to organising a campaign or protecting his frontiers. In the end Shivaji had to make his peace by 1658. Then commenced "the War of Succession which kept Aurangzeb busy for the next two years, 1658-1659," and freed Shivaji from all fear of the Mughals (pp 58—67).

By 1659 Khawas Khan was administering the Bijapur Kingdom with ability and vigour for the

virtual ruler, the Queen Mother Barī Sahiba, and it became necessary to crush Shivaji if possible (pp 67-68). But "the command of the expedition against him went a begging at the Bijapur Court, till Afzal Khan accepted it" (p 68). However, when the push came, he did not feel strong enough (he had no more troops at his command than had Shivaji) to openly attack the rebels. "Indeed, he was instructed by the Dowager Queen to effect the capture or murder of Shivaji by 'pretending friendship' with him and offering to secure his pardon from Adil Shah" (p 69). "He planned to effect his purpose by a combination of 'frightfulness' and diplomacy. From Bijapur the expedition marched due north to Tuljapur, one of the holiest shrines in Maharashtra and the seat of Bhavani, the guardian goddess of the house of Bhonsla. Afzal's strategy was either to make a sweep round Shiva's line of southern fortresses and penetrate to Puna through the exposed eastern flank of the Maratha kingdom, or to provoke Shiva, by a gross outrage on his faith, into coming out of his fastnesses and meeting the Bijapuri army in the open. At Tuljapur he ordered the stone image of Bhavani to be broken and pounded into dust in a hand mill" (p 70). In addition, he plotted to win over Maratha chiefs, and continued his 'frightfulness' by further acts of sacrilege (p 70). While he was proceeding in this manner, Afzal Khan "sent his land steward Krishnaji Bhaskar to Shivaji with a very alluring message, saying, 'Your father has long been a great friend of mine, and you are, therefore, no stranger to me. Come and see me, and I shall use my influence to make Adil Shah confirm your possession of Konkan and the forts you now hold. I shall secure for you further distinctions and military equipment from our Government. If you wish to attend the Court, you will be welcomed. Or, if you want to be excused personal attendance there, you will be exempted'" (p 71).

Shivaji was now much perplexed and his followers seriously alarmed, tales of Afzal Khan's strength and ruthlessness having reached the Maratha camp. "This was the most critical moment in the career of Shivaji," but he appealed to his men's sense of honour and they resolved on war (pp 72-73).

To get a clear view of Shivaji's subsequent actions and of the story of his murder of Afzal Khan a long quotation from Mr Sarkar's book is necessary (pp. 74-79) —

"Then came Afzal's envoy, Krishnaji Bhaskar, with the invitation to a parley. Shiva treated him with respect, and at night met him in secrecy and solemnly appealed to him as a Hindu and a priest to tell him of the Khan's real intentions. Krishnaji yielded so far as to hint that the Khan seemed to harbour some plan of mischief. Shivaji then sent the envoy back with Gopinath Pant, his own agent, agreeing to Afzal's proposal of an interview, provided that the Khan gave him a solemn assurance of safety. Gopinath's real mission was to find out the strength of Afzal's army and other

useful information about it and learn for himself what the Khan's real aim was. Through Gopinath Shiva vowed that no harm would be done to Afzal during the interview, and Afzal, on his part, gave similar assurances of his honesty of purpose. But Gopinath learnt by a liberal use of bribes that Afzal's officers were convinced that 'he had so arranged matters that Shiva would be arrested at the interview, as he was too cunning to be caught by open fight'. On his return, Gopinath told it all to Shiva and urged him to anticipate the treacherous attack on himself by murdering Afzal at a lonely meeting and then surprising his army.

"Shiva, taking the hint from Gopinath, feigned terror and refused to visit Wai, unless the Khan met him nearer home and personally promised him safety and future protection. Afzal agreed to make this concession. By Shiva's orders a path was cut through the dense forest all the way from Wai to Pratapgarh and food and drink were kept ready for the Bijapur army at various points of it. By way of the Radtundi pass (below 'Bombay Point' of the Mahabaleshwar plateau), Afzal Khan marched to Par, a village lying one mile below Pratapgarh on the south, and his men encamped there in scattered groups, deep down in the valley near every pool of water at the source of the Koyna.

"Gopinath was sent up the hill to report the Khan's arrival. The meeting was arranged to take place next day. The place chosen for the interview was the crest of an eminence, below the fort of Pratapgarh, and overlooking the valley of the Koyna. On both sides of the forest path leading up the hillside to the pavilion picked soldiers were posted in ambush at intervals by Shivaji. Here he erected tents and set up a richly decorated canopy with gorgeous carpets and cushions worthy of a royal guest. Then he prepared himself for the meeting. Under his tunic he wore a coat of chain armour and below his turban he placed a steel cap for the protection of the skull. What offensive arms he had, nobody could see, but concealed in his left hand was a set of steel claws (*baghnakh*) fastened to the fingers by a pair of rings, and up his right sleeve lay hidden a thin sharp dagger called the scorpion (*bichwa*). His companions were only two, but both men of extraordinary courage and agility, — Jiv Mahala, an expert swordsman, and Shambhaji Kavji, the murderer of Hanumant Rao More. Each of them carried two swords and a shield.

"As the party was about to descend from the fort a saintly female figure appeared in their midst. It was Jiya Bai. Shiva bowed to his mother. She blessed him saying, 'Victory be yours!' and solemnly charged his companions to keep him safe, they vowed obedience. Then they walked down to the foot of the fort and waited.

"Meanwhile Afzal Khan had started from his camp at Par, with a strong escort of more than a thousand musketeers. Gopinath objected to it,

saying that such a display of force would scare away Shiva from the interview, and that the Khan should, therefore, take with himself only two bodyguards, exactly as Shiva had done. So, he left his troops some distance behind and made his way up the hillpath in a *palki*, accompanied by two soldiers and a famous swordsman named Sayyid Banda, as well as the two Brahman envoys, Gopinath and Krishnaji. Arrived in the tent, Afzal Khan angrily remarked on its princely furniture and decorations as far above the proper style of a jagirdar's son. But Gopinath soothed him by saying that all these rich things would soon go to the Bijapur palace as the first fruits of Shiva's submission.

"Messengers were sent to hurry up Shiva, who was waiting below the fort. He advanced slowly, then halted on seeing Sayyid Banda, and sent to demand that the man should be removed from the tent. This was done, and at last Shivaji entered the pavilion. On each side four men were present,—the principal, two armed retainers and an envoy. But Shiva was seemingly unarmed, like a rebel who had come to surrender, while the Khan had his sword by his side.

"The attendants stood below. Shiva mounted the raised platform and bowed to Afzal. The Khan rose from his seat, advanced a few steps, and opened his arms to receive Shiva in his embrace. The short slim Maratha only came up to the shoulders of his opponent. Suddenly Afzal tightened his clasp, and held Shiva's neck in his left arm with an iron grip, while with his right hand he drew his long straight bladed dagger and struck at the side of Shiva. The hidden armour rendered the blow harmless. Shiva groaned in agony as he felt himself being strangled. But in a moment he recovered from the surprise, passed his left arm round the Khan's waist and tore his bowels open with a blow of the steel claws. Then with the right hand he drove the *bichwa* into Afzal's side. The wounded man relaxed his hold, and Shivaji wrested himself free, jumped down from the platform, and ran towards his own men outside.

"The Khan cried out, 'Treachery! Murder! Help! Help!' The attendants ran up from both sides. Sayyid Banda faced Shiva with his long straight sword and cut his turban in twain, making a deep dint in the steel cap beneath. Shiva quickly took a rapier from Jiv Mahala and began to parry. But Jiv Mahala came round with his other sword, hacked off the right arm of the Sayyid, and then killed him.

"Meanwhile the bearers had placed the wounded Khan in his *palki*, and started for his camp. But Shambhaji Kavaji slashed at their legs, made them drop the *palki*, and then cut off Afzal's head, which he carried in triumph to Shiva."

The story is continued thus: "Freed from danger, Shivaji and his two comrades then made their way to the summit of Pratapggarh, and fired a cannon. This was the signal for which his troops were waiting in their ambush in the valleys below.

The carnage in the Bijapur army was terrible. 3,000 men were killed according to the report that reached the English factory at Rajapur a few days later. A grand review was held by Shivaji below Pratapggarh" (pp 79—82).

What is the impression caused by such a story? What can the only impression be? Here we have two unscrupulous foes each capable of any act to gain the object in view—in this case the other's destruction, whether by crafty diplomacy or direct murder. The most astute won. It reminds one of the answer given by a millionaire when asked how he managed to amass his fortune in the face of so many able opponents—"I suppose I was the best business man." This view is not only in accordance with the facts stated, but also in accord with the mediæval spirit of the time and place in which they lived, and of the condition in which they both had attained their high position in life.

For the crowning act of the tragedy—the meeting with Afzal Khan—Mr Sarkar's authorities are the fundamental *Sabhasad Bahar* of 1694 and the three unreliable accounts above mentioned the *Tarikh e Shivaji*, a Persian MS., "the work of a Hindu based on Maratha tradition" (p 505), i.e., on the same Maratha source as the *Shiva digvijay*, and so of doubtful value. Mirza Muhammad Kazim's *Alamgir namah*, Bhimsen Burhanpuri's *Nuskha e Dilkasha*, Khadi Khan's *Muntakhab ul Lubab*, *Rajapur Factory Records*, of the highest value for the facts they state, Fryer, the *Powadas*, Marathi ballads, collected by H. A. Acworth and S. T. Shaligram, 2nd (really 3rd) ed., 1911, "mostly legendary and of a much later date than Shivaji's life time. The Afzal Khan ballad is probably the oldest, and belonged to Shambhaji's reign touches only two incidents of Shivaji's life" (p 503).

It will be seen therefore that Mr Sarkar has again gone impartially to the best, as well as to the unreliable sources available on both sides—Marathi and Muhammadan.

I have now a suggestion to make to Mr Sarkar. These two acts by which Shivaji commenced his great career as a ruler of men, and the circumstances leading up to and attending them, are so important that it is worth while to collate them and relate them in full, and since he is able to approach the subject with the necessary detachment, has access to the best information and the linguistic knowledge and capacity to use them, I hope he will undertake the task. The pages of this *Journal* will always be open to him for the purpose and such resources as I possess for verifying facts and statements will be placed at his disposal.

I must add that the book has no index, which is a serious defect in a work of research and particularly annoying to the present writer, as he has shortly to deal with the MS. of an Englishman's wanderings in India covering Rajapur in Shivaji's time. Mr Sarkar's references will therefore be of value to him, but they will not be easy to use.

R. C. TEMPLE.

**Bhadra**—It is evidently the Yarkand river on which the town of Yarkand is situated it is also called Zairafshan (*Vishnu P*, Bk II, ch 2) It is one of the four rivers into which the Ganges is said to have divided itself (*Bhâgavata P*, V, 17)

**Bhadrakarna**—1 Kainapura or Karnâli, on the south bank of the Nerbada It contains one of the celebrated shrines of Mahâdeva (*Mahâ-Śiva-Purâna*, Pt 1, ch 15, and *Mahâ-bhârata*, Vana P, ch 84) See **Eraṇḍi** 2 A sacred *hrada* (lake or reservoir) in Trinetraśvara or modern Than in **Kathlawad** (*q v*) (*Kîrma P*, I, 34, *Skanda P*, Prabhâsa Kh, Arbuda, ch 8)

**Bhadrâvatî**—Bhatâla, ten miles north of Warora in the district of Chanda, Central Provinces Bhandak, in the same district and 18 miles north-west of Chanda town, is also traditionally the ancient Bhadrâvatî It was the capital of Yuvanâśva of the *Jaimini-Bhârata* Cunningham has identified Bhadrâvatî with Bhilsa (*Bhilsa Topes*, p 364, *JASB*, 1847, p 745) Buanî, an old place near Pind Dadan Khan in the district of Jhelum in the Punjab, also claims the honour of being the ancient Bhadrâvatî it contains many ruins (*JASB*, XIX, p 537) The *Padma-Purâna* (Uttara, ch 30) places Bhadrâvatî on the banks of the Sarasvatî In the *Jaimini-Bhârata*, ch 6, Bhadrâvatî is said to be 20 Yojans distant from Hastinâpura Ptolemy's Bardaotis has been identified with Bhadrâvatî he places it to the east of the Vindhya range (McCrindle's *Ptolemy*, p 162), and it has been considered to be identical with Bhârhut (*Arch S Rep*, XXI, p 92)

**Bhadrika**—Same as **Bhaddiya** (*Kalpasastra*, ch vi) Mahâvîra spent here two Pajjusanas

**Bhâganagara**—Hyderabad in the Deccan.

**Bhâgaprastha**—Bagpat, thirty miles to the west of Mirat, one of the five *Prasthas* or villages said to have been demanded by Yudhishtira from Duryodhana (see **Pâṇiprastha**) It is situated on the bank of the Jamuna in the district of Mirat

**Bhâgirathî**—Same as **Gangâ** (*Harivamśa*, I, ch 15)

**Bhâgvatî**—The river Bâgmâtî in Nepal Baggumudâ of the Buddhists (*Chullavagga*, Pt XI, ch 1)

**Bhaktapura**—Bhâtgâon, the former capital of Nepal It was also called Bhagatapattana Narendra Deyâ, king of this place, is said to have brought Avalokiteśvara or Simhânâtha Lokeśvara (Padmapâni) from Putalakâ-parvata in Assam to the city of Lalitapattan in Nepal to ward off the bad effect of a drought of twelve years The celebrated Shad aksharî (six-lettered) Mantra "*Om Mani padme hum*" so commonly used in Tibet is an invocation of Padmapâni it means "The mystic triform Deity is in him of the Jewel and the Lotus," i.e. in Padmapâni who bears in either hand a Jewel and a Lotus, the lotus being a favourite type of creative power with the Buddhists

**Bhâlînasah**—Bolan (pass) It is mentioned in the *Rigveda* (Macdonell and Keith *Vedic Index of Names and Subjects*, vol II, p 99)

**Bhallâta**—A country situated by the side of Suktimâna mountain it was conquered by Bhîma (*Mbh*, Sabhâ, ch 30) It is also mentioned in the *Kalki-Purâna* as being conquered by Kalki Bhallâta is perhaps a corruption of Bhar-râshtra The name does not appear in the other *Purânas*

**Bharadvâja-asrama**—In Prayâga or Allahabad, the hermitage of Rishi Bharadvâja was situated (*Râmâyana*, Ayodhya K, ch 54). The image of the Rishi is worshipped in a temple built on the site of his hermitage at Colonganj The hermitage was visited by Râmachandra on his way to the Dandakâraṇya

**Bharahut**—In the Central Provinces, 120 miles to the south-west of Allahabad and nine miles to the south-east of the Sutna railway station, celebrated for its *stûpa* said to belong to 250 B C

**Bhâratavarsha**—India India (Intu of Huen Tsiang, who travelled in India from 629 to 645 A D), is a corruption of *Sindhu* (*q v*), or *Sapta Sindhu* (Hafta Hendu of the *Vendidad*, I, 73) It was named after a king called Bharata (*Linga P*, Pûrva Bhâga, ch 47, *Brahma P*, ch 13,, and before Bharata, it was called *Himâhva-varsha* (*Brahmânda P*, Pûrva, ch 33, śloka 55) and *Hamavata-varsha* (*Linga P*, Pt I, ch 49) In the Pauranic period, Bhâratavarsha was bounded on the north by the Himalayas, on the south by the ocean, on the east by the country of the Kûrîtas and on the west by the country of the Yavanas (*Vishnu P*, II, ch 3, *Mârkandeya P*, ch 57) Bhâratavarsha represents a political conception of India, being under one king, whereas Jambudvîpa represents a geographical conception

**Bhârgava**—Western Assam, the country of the Bhars or Bhois (*Brahmânda P*, ch 49)

**Bhârgavi**—A small river near Puri in Orissa was called Dandabhângâ from the fact that Nityânanda broke at Kamalapura on the bank of this river the Danda or ascetic stick of Chaitanya and threw the broken pieces into the stream (*Chaitanya-charitâmrita*, II) It was also called Bhâgî .

**Bharttri-sthâna**—Same as *Svâmi-tîrtha* (*Pañcama P*, Svarga, ch 19)

**Bharu**—The name of a kingdom of which Bharukachchha was a seaport, see **Bharukachchha**

**Bharukachchha**—Baroach, the Barygaza of the Greeks (*Vinaya*, III, 38) Balî Râjâ attended by his priest Sukrâchârya performed a sacrifice at this place, when he was deprived of his kingdom by Vishnu in the shape of a dwarf, Vâmana, (*Matsya P*, ch 114) Sarva-varmâ Âchârya, the author of the Kâtantra or *Kalâpa Vyākharana* and contemporary of Râjâ Śâtavâhana of Pratishthâna was a resident of Bharukachchha (*Kathâ-sarîr-Sâgara*, Pt I, ch 6) The Jama temple of Śakunikâvîhâra was constructed by Âmrabhata in the reign of Kumârapala, king of Pattana, in the 12th century Bharukachchha was also called Bhṛigupura (Tawney *Prabandha-chintâmani*, p 136) In the *Suppâraka Jâtaka* (*Jâtaka*, Cam ed, iv, p 86), Bharukachchha is said to be a seaport town in the kingdom of Bharu

**Bhâsa**—Perhaps it is the Bhâsnâth hill, a spur of the Brahmayoni hill in Gaya see Gayâ [*Anugîtâ*, (SBE,) vol VIII, p 346].

**Bhâskara-kshetra**—Prayâga, see *Frâyâga* (Raghunârâya's *Prîtyâchîta-tattva*, Gaṅgâ-Mâhâtmya).

**Bhautika Lingas**—For the five Bhautika or elementary images of Maî âdeva, see *Chidambaram*.

**Bhavanînagara**—Same as *Tuljâbhavanî*.

**Bhîmâ**—Same as *Vidarbha* (*Devî P*, ch 46)

**Bhîmanagara**—Kangra.

**Bhîmapura**—1 Vidarbhanagara or Kundinapura, the capital of Vidarbha (see *Kundinapura*). 2 Same as *Dâkinî* (*Bṛihat-Siva P*, Uttara Kh., ch 3).

**Bhîmarathâ**—Same as *Bhîmarathî* (*Mârkandeya P*, ch 57).

**Bhîmarathî**—The river Bhîma which joins the Kṛishnâ (*Garuda P*, I, 55)

**Bhîmâsthâna**—Takht-i-Bhai, 28 miles to the north-east of Peshawar and eight miles to the north west of Mardan, containing the Yoni-tirtha and the celebrated temple of Bhîmâ Devî described by Hiuen Tsiang, the temple was situated on an isolated mountain at the end of the range of hills which separates the Yusufzai from the Luncoan valley. It was visited by Yudhishthira as a place of pilgrimage, and it is also mentioned in the *Padma P*, Svarga-Kh, ch 11, *Mahâbhârata*, Vana P, ch 82).

**Bhogavardhana-maṭha**—Same as Govarddhana-matha

**Bhoja**—See **Bhojapura** (*Padma P*, Svarga, ch 3)

**Bhojakata-pura**—The second capital of Vidarbha, founded by Rukmi, the brother of Rukminî who was the consort of Kṛishna. It was near the Nerbada (*Harivamśa*, ch 117). Bhojakatapura, or in its contracted form Bhojapura, may be identified with Bhojapura, which is six miles to the south-east of Bhilsa (Vidisa) in the kingdom of Bhopal containing many Buddhist topes called Pipaliya Bijoli Topes. Ancient Vidarbha, according to General Cunningham, included the whole kingdom of Bhopal on the north of the Nerbada (*Bhilsa Topes*, p. 363). The Bhojas ruled over Vidarbha and are mentioned in one of Asoka's Edicts (see Dr Bhandarkar's *Hist of the Dekkan*, III). In the Chammak Copperplate inscription of Pravarasena II of the Vākātaka dynasty, Bhojakata is described as a kingdom which coincides with Berar or ancient Vidarbha, and Chammak, i.e., the village Chalmānka of the inscription, four miles south-west of Elchpur in the Amraoti district, is mentioned as being situated in the Bhojakata kingdom (*Corp Ins Ind*, III, 236, *JRAS*, 1914, p 321). For further particulars, see **Bhojapur** (1) in Part II of this work.

**Bhojapāla**—Bhopal in Central India, which is a contraction of Bhojapāla or Bhoja's Dam which was constructed during the reign of Rājā Bhoja of Dhar to hold up the city lakes (Knowles-Foster's *Veiled Princess*, *Ind Ant*, XVII, 348).

**Bhojapura**—1 Mathurā was the capital of the Bhojas (*Bhāgavata*, Pt. I, ch 10). 2 Near Dumraon in the district of Shāhābād in Bengal (see **Bhojapur** in Pt II of this work) 3 Same as **Bhojakatapura**. It contains the temple of Bhojēvara Mahādeva and a Jama temple (*JASB*, 1839, p 814). The temple of Bhojēvara was built in the 11th century A.D. For further particulars regarding the temple and dam, see *JASB*, 1847, p 740, *Ind Ant*, XXVII, 348. Bhoja is mentioned in the *Brahmānda-Purāna* as a country in the Vindhya range. It is the Stagabaza (or Tataka-Bhoja or tank of Bhoja) of Ptolemy. 4 On the right bank of the Ganges, 30 or 35 miles from Kānyakubja or Kanauj (*Ep Ind*, Vol I, p 189).

**Bhota**—See **Bhotānga**

**Bhotānga**—Bhotan. Bhota according to Lassen is the modern Tibet (*Ep Ind*, Vol I, p 124). According to the *Tārā Tantra*, Bhota extends from Kasmîr to the west of Kāmariûpa and to the south of Manasa-sarovara.

**Bhotānta**—Same as **Bhotānga** (*JRAS*, 1863, p 71)

**Bhrîgu-âsrama**—1 Balia in the United Provinces, said to have been the capital of Rājā Bali. Bâwan, six miles west of Hardoi in Oudh, also claims the honour of being the capital of Bali Rājā, who was deprived of his kingdom by Vishnu in his

Vāmana-avatāra Bhrigu Rishi once performed asceticism at Balia there is a temple dedicated to the Rishi, which is frequented by pilgrims Balia was once situated on the confluence of the Ganges and the Saraju, it was called Bāgrāsan, being a corruption of Bhrigu-āśrama Bhrigu Rishi "is said to have held Dadri or Dardara on the banks of the Ganges, where he performed his ceremonies on the spot called Bhrigu-āśrama or Bhadrason (Bagerassan, Rennell)"—Martin's *Eastern India*, II, p 340 It was also called Dadri-kshetra Hence the fair there held every year is called Dadri-melā See *Dharmāranya* 2 2 Baroach was also the hermitage of this Rishi

**Bhrigu-kachehha**—Same as **Bharukachehha**, which is a corruption of Bhrigukshetra, as it was the residence of Bhrigu Rishi (*Bhāgavata P*, Pt 2, ch viii, *Shanda P*, Revā Kh, ch 182)

**Bhrigukshetra**—Same as **Bharukachehha**

**Bhrigupatana**—A celebrated place of pilgrimage near Kedarnāth in Garwal

**Bhrigupura**—Same as **Bharukachehha** (Tawney *Prabandhachintāmanī*, p 136) It contains a temple of the twentieth Jaina Tīrthankara Suvīata

**Bhrigu-tīrtha**—Bherāghāt, containing the temple of Chaushat Yoginīs, 12 miles to the west of Jabbalpur, on the Nerbada between the Marble Rocks it is a famous place of pilgrimage (*Padma P*, Svarga-Kh, ch 9, *Matsya P*, ch 192)

**Bhrigu-tunga**—1 A mountain in Nepal on the eastern bank of the Gandak, which was the hermitage of Bhrigu (*Varāha P*, ch 146) 2 According to Nīlakantha, the celebrated commentator of the *Mahābhārata*, it is the Tunganātha mountain (see his commentary on v 2, ch 216, Ādi Parva, *Mahābhārata*) which is one of the Pañcha-Kedāras (see *Pañcha-Kedāra*)

**Bhujaganagara**—Same as **Uragapura** (*Pavanadūta*, v 10)

**Bhūrisreshthika**—Bhūrit, once an important place of a Pargana in the sub-division of Armbāg in the district of Hooghly in Bengal (*Prabodhachandrodaya Nāṭaka*, ms "Notes on the District of Hooghly" in *JASB*, 1910, p 599)

**Bhushkhāra**—Bokhara it was conquered by Lalitāditya, king of Kāśmīr, who ascended the throne in 697 A.D., and reigned for about 37 years (*Rājataranginī*, Bk IV) The Khanat of Bokhara is bounded on the east by the Khanat of Khokand called Fergana by the ancients and also by the mountain of Badakshan, on the south by the Oxus, on the west and north by the Great Desert (Vambery's *Travels in Central Asia*). It was called Sogdiana

**Bibhāndaka-āśrama**—Same as *Rishyaśringa-āśrama*

**Biehhī**—Bitha, ten miles south-west of Allahabad, the name being found by Sir John Marshall in a seal-die at the place, in a sealing, it is called Vichhigrāma, *JRAS*, 1911, p 127) See **Bitabhaya-pattana**

**Bidarbha**—Berar, Khandesh, part of the Nizam's territory and part of the Central Provinces, the kingdom of Bhīshmaka whose daughter Rukmīnī was married to Krishna. Its principal towns were Kundīnanagara and Bhojakatapūra Kundīnanagara (Bidarbhanagara), its capital, was evidently Bidar Bhojakatapūra was Bhojapura, six miles south-east of Bhilsa in the kingdom of Bhopal The Bhojas of the *Purānas* lived in Vidarbha In ancient times, the country of Vidarbha included the kingdom of Bhopal and Bhilsa to the north of the Nerbada (Cunningham's *Bhilsa Topes*, p 363). See **Bhojakatapūra** and **Kundīnapura**.

**Bidarbhanadī**—The Pan Gangā

**Bidarbhanagara**—Same as **Kundinapura**

**Bidaspes**—The river Jhelum in the Punjab

**Bidegha**—Same as **Bideha** (*Śatapatha-Brāhmaṇa* I, 4, 1, 14)

**Bideha**—Tihut, the kingdom of Rājā Janaka, whose daughter Sītā was married to Rāmachandra. Mithilā was the name of both Videha and its capital. Janakpur in the district of Darbhanga, was the capital of Rājā Janaka. Benares afterwards became the capital of Bideha (Sir Monier Monier-Williams' *Modern India*, p 131). About a mile to the north of Sītāmārhi, there is a tank which is pointed out as the place where the new-born Sītā was found by Janaka while he was ploughing the land. Panaurā, three miles south-west of Sītāmārhi, also claims the honour of being the birth-place of Sītā. About six miles from Janakpur is a place called Dhenukā, (now overgrown with jungle) where Rāmachandra is said to have broken the bow of Hara. Sītā is said to have been married at Sītāmārhi. Bideha was bounded on the east by the river Kausikī (Kusi), on the west by the river Gandakā, on the north by the Himalaya, and on the south by the Ganges. It was the country of the Vajjis at the time of Buddha (see **Baisali**)

**Bidisa**—1 Bhilsa, in Malwa in the kingdom of Bhopal, on the river Betwa or Vetravati, about 26 miles to the north-east of Bhopal. By partitioning his kingdom, Rāmachandra gave Bidisā to Śatrughna's son Śatrughatī (*Rāmāyana*, Uttara, ch 121). It was the capital of ancient Dasārṇa mentioned in the *Meghadūta* (Pt I, v 25) of Kālidāsa. It is called Baidisā-dēśa in the *Devī-Purāṇa* (ch 76) and the *Rāmāyana*. Agnimitra, the son of Pushyamitra or Pushyamitra, the first king of the Sunga dynasty, who reigned in Magadha in the second and third quarters of the second century B C, was the viceroy of his father at Bidisā or Bhilsā (Kālidāsa's *Mālavikāgnimitra*, Act V). Agnimitra, however, has been described as the king, and his father as his general. The topes, known by the name of Bhilsa Topes, consist of five distinct groups, all situated on low sandy hills, viz., (1) Sanchi topes, five and a half miles south-west of Bhilsa, (2) Sonāri topes, six miles to the south-west of Sanchi, (3) Satdhāra topes, three miles from Sonāri, (4) Bhojpur topes, six miles to the south south-east of Bhilsa, and Andher, nine miles to the east south-east of Bhilsa. They belong to a period ranging from 250 B C. to 78 A D. (Cunningham's *Bhilsa Topes*, p 7). 2 The river Bidisā has been identified with the river Bes or Besah which falls into the Betwa at Besnagar or Bhilsa (Wilson's *Vishnu P*, Vol II, 150).

**Bidyanagara**—1 Bijayanagar on the river Tungabhadra, 36 miles north-west of Bellari, formerly the metropolis of the Brahmanical kingdom of Bijayanagar called also **Karnāta**. It is locally called Hampi. It was founded by Sangama of the Yādava dynasty about 1320 A D. According to the *Mackenzie Manuscripts* (see *JASB*, 1838, p 174) it is said to have been founded by Narasingha Rayer, father of Krishṇa Rayer. Bukka and Harihara were the third and fourth kings from Sangama. For the genealogy of the Yādava dynasty, see *Ep Ind*, vol. III, pp 21, 22, 114 and 223. It contains the celebrated temple of Vithoba (Meadows Taylor's *Architecture in Dharwar and Mysore*, p. 65) and also of Virūpāksha.

**Mahâdeva** The power of the Bijayanagara kingdom was destroyed at the battle of Talikot on the bank of the Kishnâ in 1565 Sâyanâchârya, the celebrated commentator of the Vedas and brother of Mâdhavâchârya, was the minister of Saugamarâja II, the son of Kamparâja, brother of Bukka Rai, king of Bijayanagara (*Ep Ind*, vol III, p 23)  
 2 Bijayanagara (see **Padmâvatî**) at the confluence of the Sindh and the Pâtâ in Malwa  
 3 Râjamahendri on the Godâvarî (*Journal of the Buddhist Text Society*, vol. V) At this place, Chaitanya met Râmananda Râya, who governed this place under Râjâ Pratâparudra Deva of Orissa (*Chaitanya-charitâmrta*, Madhyama, ch 8)

**Bijayanagara**—Vizianagiam in the Madras Presidency, visited by Chaitanya (*Chaitanya Bhâgavata*, Anta-kh, ch 11)

**Bijayapura**—It is said to be situated on the Ganges and was the capital of Lakshmana Sena (*Pavanadûta*, v 36) Hence Bijayapura was identical with Lakhnauti or Gauda which was also situated on the Ganges (see **Lakshmanâvatî** and **Gaur** in Pt II) It was perhaps called Bijayapura from Ballâla's father Vijaya Sena who conquered Bengal See **Ballâlapuri** - But Vijayapura has been identified with Bijayanagara on the Ganges near Godâgârî, in Varendra or Barind, in the district of Malda in the Rajshahi Division of Bengal The Senas, after subverting the Pâla kingdom, are believed to have made Bijayanagara their capital and subsequently removed to Lakshmanâvatî, which was afterwards called Gaud (*JRAS*, 1914, p 101)

**Bijavada**—Bezvada on the river Krishna It was the capital of the Eastern Châlukyas

**Bikramapura**—Same as **Ballâlapuri**. It was situated in Banga in the kingdom of Pundra vardhana (*Edilpur Copperplate Inscription of Keshava Sena*, Ananda Bhatta's *Ballâla-charitam*, Uttara Kh, ch 1)

**Bikramasilâ-vihâra**—The name of this celebrated monastery is found in many Buddhist works General Cunningham suggests the identification of Bikramasilâ with Silao, three miles from Bargaon (ancient Nâlandâ) in the sub division Bihar of the district of Patna (*Arch S Rep*, vol VIII, p. 83) and six miles to the north of Râjgu The river Pañchâna flowed by its side before It has a very large mound of earth which is being very gradually encroached upon by the cultivators and which is perhaps the remains of a monastery But it appears from Buddhist works that Bikramasilâ-vihâra was founded by king Dharmapâla in the middle of the eighth century A D, on the top of a hill on the right bank of the Ganges in Bihar it was a celebrated seat of Buddhist learning hence Cunningham's identification does not seem to be correct Its identification with the Jahngira hill at Sultanganj in the district of Bhagalpur by Dr Satishchandra Vidyâbhûshana [*Bhârati* (Vaisâkha) 1315] does not also appear to be correct, as there are no remains of Buddhism on that hill it is essentially a Hindu place of worship and the place is too small for such a celebrated Buddhist monastery But the Bikramasilâ-vihâra may be safely identified with Pâtharighâtî, four miles to the north of Kahalgâon (Colgong) and 24 miles to the east of Champâ near Bhagalpur in the province of Bihar (see my "Notes on Ancient Anga or the District of Bhagalpur," in *JASB*, X, 1914, p 342) It is the Silâ-sangama of *Chorapañchâśikâ* by Chora Kavî (Franklin's *Site of Ancient Palibothra*), which is evidently a corruption of Bikramasilâ saughârâma The place abounds with Buddhist remains, excavations and rock-cut caves of the Buddhist period The statues of Buddha, Maitreya, and Avalokiteśvara, some of which were removed to the

“Hill House” of Colgong by Mr Barnes and which may still be found there, were beautifully sculptured and can bear comparison with the beautiful sculptures of the Nālanda monastery. As the monastery was founded in the eighth century it has not been mentioned by Hsuen Tsiang, who visited Champā in the seventh century, though he refers to the excavations which had evidently been done by the Hindus. Śrībaddha Jñānapāda was the head of the monastery at the time of Dharmapāla. It had six gates, and the six gate-keepers were Pandits of India, and no one could enter the monastery without defeating these Pandits in argument. Bikramasīlā was destroyed by Bakhtiyar Khilji in 1203 (see Kern, *Manual of Indian Buddhism*, p 133). The Hindu Universities of Mithilā and Nadiā were established after its destruction. See *Durvasā-āśrama* (see my “Bikramasīlā Monastery” in *JASB*, 1909, p 1). On the top of the hill is the temple of Batesvaranātha Mahādeva which is celebrated in this part of the country, established perhaps after the destruction of the monastery.

**Binā**—1 The river Kṛishnā, the Tynna of Ptolemy. 2 Almorah in Kumaun. It is also called Benwā.

**Bināsana-tīrtha**—The spot in the great sandy desert in the district of Sirhind (Patiala) where the river Sarasvatī loses itself after taking a westerly course from Thaneswar. See *Sarasvatī*.

**Bināsini**—The river Banas in Gujarat on which Disa is situated (*Bṛihadgyotishārnava*).

**Bināyaka-kshetra**—Three or four miles from Dhanmandal above the Bhuvanesvar railway station on the top of a mountain in Orissa.

**Bināyaka tīrthas**—There are eight places sacred to Vināyaka or Gaṇeśa. 1 Moreśvara, six miles from Jajuri, a station of the South Marhatta Railway. 2 Ballāla, forty-six miles by boat from Bombay, it contains the temple of Vināyaka named Maruda. 3 Lenādri, fifty miles from the Telgaon station of the G I P Railway. 4 Sidhatek, on the river Bhīmā, ten miles from the Diksal station of the G I P Railway. 5 Ojhar containing the temple of Vināyaka Bighneśvara. 6 Sthevara called also Theura. 7 Rāñjanagrāma. 8 Mahāda. The last three are on the G I. P Railway. See *Ashtavināyaka*.

**Bindhyāchala**—1 The Vindhya range. The celebrated temple of Vindubāsini (*Devī-Bhāgavata*, VII, 30) is situated on a part of the hills near Mirzapur. It is one of the stations of the E I. Railway. The temple of the eight-armed Yogamāyā, which is one of the 52 Pīṭhas, where the toe of Satī's left foot is said to have fallen, is at a short distance from the temple of Vindubāsini (see *Śiva P*, IV, Pt I, ch. 21). Yogamāyā, after warning Kamsa, king of Mathurā, of the birth of his destroyer, came back to the hills, and took her abode at the site of the temple of Vindubāsini (*Skanda P*, Revā Kh, ch 55). It was, and is still a celebrated place of pilgrimage mentioned in the *Kāthā-sarit-sāgara* (I, ch. 2). The town of Bindhyāchala was included within the circuit of the ancient city of Pampāpura (Führer's *M A I*). The fight between Durgā and the two brothers Śumbha and Niśumbha took place at Vindhya-chala (*Vāmana P*, ch 55). See *Chandapura*. The goddess Vindubāsini was widely worshipped in the seventh century, and her shrine was considered as one of the most sacred places of pilgrimage (*Kāthā-sarit-sāgara*, chs. 52, 54). 2 Another Bindhyāchala has been identified by Mr. Pargiter with the hills and plateau of South Mysore (*Rāmāyana*, Kishk, ch. 48, *JRAS.*, 1894, p 261).

**Bindhya-pāda Parvata**—The Satpura range from which rise the Tāpti and other rivers (*Varāha P*, ch 85) It lies between the Nerbada and the Tāpti It is the Mount Sardonys of Ptolemy containing mines of cornelian, Sardinian being a species of cornelian (McCrimble's *Ptolemy*) On a spur of the Satpura range is a colossal rock-cut Jaina image of the Digambara sect called Bawangaj, about 73 feet in height on the Nerbada in the district of Burwani, about 100 miles from Indore (*JASB*, XVII, p 918) See **Sraavana-Belgola**

**Bindhyāṭavi**—Portions of Khandesh and Aurangabad, which lie on the south of the western extremity of the Vindhya range, including Nasik

**Bindubāsini**—The celebrated place of pilgrimage in the district of Mirzapur in the U P See **Vindhyaachala** (*Vāmana P*, ch 45)

**Bindu-sara**—1 A sacred pool situated on the Rudra-Himalaya, two miles south of Gangotri, where Bhagiratha is said to have performed asceticism for bringing down the goddess Gangā from heaven (*Rāmāyana*, I, 43, and *Matsya P*, ch 121) In the *Brahmānda-Purāna* (ch 51), this tank is said to be situated at the foot of the Gauda Parvata on the north of the Kailāsa range, which is called Maināka-Parvata in the *Mahābhārata* (Sabhā, ch 3) 2 In Sitpur (Siddhapura in Gujarat) north west of Ahmedabad it was the hermitage of Kardama Rishi and birth-place of Kapila (*Bhāgavata P*, Skanda III) See **Siddhapura**. 3. A sacred tank called Bindusāgara and also Gosāgara at Bhuvaneśvara in Orissa (*Padma P*.) Mahādeva caused the water of this tank to rise from Pātāla by means of his Trisūla (trident) in order to quench the thirst of Bhagavatī when she was fatigued with her fight with the two demons of Bhuvaneśvara, named Kirtti and Bāsa (*Bhuvaneśvara-Māhātmya*).

**Bingara**—Ahmednagar, seventy-one miles from Poona, which was founded by Ahmed Nizam Shah in 1494.

**Bintapura**—Katak in Orissa (*Ep Ind*, vol III, pp 323—359, *JASB*, 1905, p 1)

**Bipāsa**—The Bias, the Hypasis of the Greeks The origin of the name of this river is related in the *Mahābhārata* (Ādi, ch. 179). Rishi Vasiṣṭha, being weary of life on account of the death of his sons killed by Viśvāmitra, tied his hands and feet with chords, and threw himself into the river, which afraid of killing a Brāhmana, burst the bonds (*pāśa*) and came to the shore The hot springs and village of Vasishṭha Muni are situated opposite to Monali (*JASB*, vol XVII, p 209)

**Birajā-kshetra**—A country which stretches for ten miles around Jāipur on the bank of the river Baitarani in Orissa (*Mahābhārata*, Vana P, ch 85, *Brahma P*., ch 42) It is also called Gadā-kshetra, sacred to the Śāktas (*Kapila-saṁhitā*)

**Birāṭa**—The country of Jaipur The town of Birāṭa or Bairāt, 105 miles to the south of Delhi and 40 miles to the north of Jaipur (Cunningham, *Arch S Rep*, II, p 244) was the ancient capital of Jaipur or Matsyadeśa It was the capital of Virāṭa Rājā, king of the Matsya-deśa, where the five Pāndavas lived in secrecy for one year It is a mistake to identify Birāṭa with Dmappur whereat Kāntanagara, Virāṭa's Uttara-gogriha (northern cowshed) is shown, the Dakshina-gogriha (southern cowshed) being shown at Mīdnapur. This identification is not countenanced by the *Mahābhārata*, which relates that Yudhisṭhira selected a kingdom in the neighbourhood of Hastināpura as his place of concealment, from which he could watch the movements of his enemy Duryodhana, (*Mbh*, Virāṭa, ch. 1, and Sabhā, ch 30). See **Matsyadeśa** The Pāṇḍu hill at Bairāt, which has a cave called Bhīmaguphā, contains an inscription of Aśoka (*Corpus Inscriptionum Indicarum*, vol. 1, p 22).

## THE HISTORY OF THE NIZÂM SHÂHÎ KINGS OF AHMADNAGAR

BY LIEUT -COLONEL T W HAIG, C S I, C.M.G., C B E

*(Continued from p 128)*

## XIX—THE CHARACTER OF AHMAD NIZÂM SHÂH

Ahmad Nizâm Shâh was exceedingly chaste and continent. When riding through the city and the bazaars, he never glanced either to the right hand or to the left. One of his intimate companions one day asked him why he never looked around him on these occasions. The king replied that as he and his troops passed by, crowds of people, both men and women, assembled to see them pass, and lined the doors and walls, and crowded the streets and market-places. He could not look upon them without seeing somebody upon whom it was not proper to gaze, and as to let his glance rest on such a one would be displeasing to the Creator, he thought fit to refrain from looking about him.

Ahmad Nizâm Shâh was also noted for his austerity and piety. Once in the early days of his reign, while he was yet a young man, and at the age when the lusts of the flesh are predominant and most violent, he led an army against the fort of Râwîl and took it. Among the captives who fell into the hands of the royal army, was a most beautiful young woman whom Masnad-i-'Âli Malik Naṣîr-ul Mulk, on hearing of her beauty, summoned before himself. On seeing her, he considered that such a being should adorn none but the royal *haram*, and wrote to the king, proposing to send her to the *haram*. The king replied, commanding him to do so. When the king retired to his bedchamber in order to go in unto her, the woman came before him with blandishments and coquetry, but the king, before retiring, asked her whether she had a husband, or a mother, or a father. The woman replied that her husband and her parents were living, and the king at once extinguished the fire of lust and bade the woman be comforted, for he would send for her husband and her parents and hand her over to them. In this case it may be said that Ahmad Nizâm Shâh's chastity and continence excelled those of Joseph, for Zulâikḥâ, being the wife of Joseph's master, was not lawful to him, whereas this woman being a captive taken in war, was lawful to Ahmad Nizâm Shâh. On the following day Masnad-i-'Âli Malik Naṣîr-ul-Mulk came to pay his respects to the king and would have congratulated him on his enjoyment, but the king told him of what had passed, and of his promise to the woman. In accordance with the royal commands, the woman's husband and parents were produced and, after they had been royally entertained, the king handed the woman over to her husband.

One of Ahmad Nizâm Shâh's wise customs was this. If by chance in the day of battle he saw one of his men behave in a cowardly manner and turn his back on the enemy, he would send for him and ask him, kindly and gently, why he had behaved so. When the coward, in halting phrases, excused himself, the king would give him a quid of betel and allow him to depart to his post. When the fight was over, and those who had distinguished themselves, were brought up to receive robes of honour and royal favours, the king would first enquire for the coward and, when he had been found, would confer on him a robe of honour and other favours, and would afterwards bestow rewards on the brave. One day one of the king's more intimate associates made so bold as to say that it was not understood why the king thus gave to a coward precedence of those who had borne the burden and heat of the day, and had acquitted themselves valiantly. The king replied that the reason for this practice would be made known to him later. Shortly afterwards it so happened that the king's army was engaged with the troops of the enemy, and the man who had on a former occasion

fled from the battle, now charged the enemy more valiantly than the bravest of the army. The king, turning towards the courtier who had objected to his kindly treatment of the coward, said, 'Now the reason for my kindness to men of this class is apparent, and you know that to convert the cowards of the army into brave men by this device is wise policy.'

Another of the king's wise actions may be mentioned here. Dalpat Rai, a Brâhman officer in the army, was jealous of Masnad-i-'Âli Malik Na'îr ul-Mulk, as is often the case with officers whose sole aim and object is the acquisition of wealth, and who cannot bear to see anybody more prosperous than themselves. Dalpat Rai, prompted by his evil passions, forged a memorandum, purporting to be in the handwriting of Masnad-i-'Âli, in order to show that Masnad-i-'Âli received large sums as bribes from the officers and governors of countries on the borders of the king's dominions. Spies reported this matter to Masnad-i-'Âli and he, without thought of denying the charge, said, 'Dalpat Rai does not know the truth of this matter. Those who have given and he who has received the bribe must necessarily know more about the matter than Dalpat Rai.' He then drew up as a counterblast to Dalpat Rai's memorandum, another memorandum showing that he had received double the amounts mentioned in Dalpat Rai's memorandum. On the day on which the king held his court, Dalpat Rai came forward and presented to him his memorandum. The king turned to Masnad-i-'Âli and asked him to explain the accusation which had been brought against him by Dalpat Rai. Masnad-i-'Âli, after praying for the king's long life and prosperity, said, 'What can Dalpat Rai know of my outgoings and incomings?' and placed in the king's hand the memorandum which he had himself prepared. The king, on reading this memorandum, found that the sums mentioned therein were greater than the sums mentioned in Dalpat Rai's memorandum. Masnad-i-'Âli then said, 'All this money belongs to your majesty, and I have saved it against this day.' The king then tore up both memoranda and cast them from him and said, 'Men enter the service of kings for the sake of acquiring worldly treasure, not for the sake of laying up treasure in heaven, and as long as Masnad-i-'Âli Na'îr ul-Mulk is not convicted of treachery in the royal service, nor of extortion from the kingdom and its subjects, I shall be thankful and not displeased if the Sultâns of neighbouring countries send him gifts and presents for the sake of establishing and confirming mutual feelings of friendliness and averting strife, for this will show that God has favoured my servants with the opportunity of acquiring from others the means of power, and has so implanted in the hearts of all men the fear of me that they are willing to ingratiate themselves with my servants by sending them gifts and by comporting themselves with proper humility towards them.' The king then turned to Dalpat Rai and said to him, 'Henceforth do not dare to be guilty of such conduct, or to allow your envy to lead you into acts of enmity against my loyal servants, or you will incur my royal wrath. It is the part of faithful servants to live with one another in peace and amity, having for their object the furtherance of their lord's affairs and not their own personal and selfish ends, which they should put aside, in order that they may receive the rewards due to faithful service.'

Another of the merciful and clement practices of the king was the following. If any person was accused of an offence and the case came before the royal court of justice, the king would ask the prisoner whether he were guilty of the offence charged against him, or not. The object of the question was that the prisoner might deny his guilt and so be freed from imprisonment. If the guilty person divined the object of the question and denied the guilt, he was set at liberty, but if he confessed his guilt, the king, in his mercy and clemency and

in the desire of supporting the panel, would say '*mundâsâ panhara band*,'<sup>56</sup> that is to say, 'Tie your turban again' in order that that person might realize the object of the question and thus escape punishment

The following are the names of some of the officers of state, the *amîrs*, and the *vazîrs* of Ahmad Nizâm Shâh —

- (1) Malik Na'îr ul-Mulk Gujarâti, *Vakîl* and *Pishva*<sup>57</sup>
- (2) Dalpat Rai, *vazîr* of the Government
- (3) Qâ'î Khvând-i-Majlisî
- (4) Ustâd Khvâja bin Dabîr
- (5) Kâmil Khân
- (6) Zarîf-ul-Mulk the Afghân
- (7) Jalâl Rûmî Khân
- (8) Kadam Khân
- (9) Munîr Khân
- (10) Fûlâd Khân
- (11) Malik Râja Dastur-ul-Mulk
- (12) Sayyid Mu'izz-ud-dîn

XX.—THE ACCESSION OF AL-MU'AYYAD MIN'INDI-'LLÂH ABU-L-MUZAFFAR BURHÂN  
NIZÂM SHÂH TO THE THRONE OF SOVEREIGNTY, AND A BRIEF ACCOUNT  
OF THE EVENTS OF HIS REIGN

When the king Al-Musta'ân bi-'inâyati-'llâh Abûl Mu'azzar Ahmad Shâh (*bin* Muhammad Shâh *bin* Humâyûn Shâh Bahmanî) having cleared the land of his enemies and given fresh lustre to Islâm, died in A H 911 (A D 1505-06), his son, Abûl Mu'azzar Burhân Nizâm Shâh in the same year, viz, A H 911,<sup>58</sup> adorned with his person the crown and throne of sovereignty, and caused both the currency and the *khvâbah* of the Dakan to run in his name. In his reign the wolf herded the sheep and the hawk guarded the pigeon.

It is well known that the events in the reign of Burhân Nizâm Shâh were so numerous that they cannot easily be narrated, for, according to the best-known accounts, the king reigned for nearly fifty years, and of all those years there was not one in which his armies did not go forth to fight against his enemies, and as no historian has hitherto attempted to give a detailed and systematic account of his reign and many discrepancies are to be found between the accounts of those who lived in that fortunate reign, or shortly after it, especially with regard to the sequence of events, the author of this history trusts that he will not be severely censured for any errors or discrepancies that may appear in his account.

Burhân Nizâm Shâh, at the time of his accession, was not quite seven years of age, and Mukammal Khân, who had held the office of *vakîl* and *pishva* since the reign of the late king, A' mad Shâh Bahrî, took the whole administration of the army and the state into his own

<sup>56</sup> An expression taken from either Marâthî or Hindi. Firishta draws largely on this account of Ahmad Nizâm Shâh's character.

<sup>57</sup> This office was characteristic of the Muhammadan kingdoms of the Dakan and Sivaji followed the example of the Muhammadan kings. The powers attached to the officer were much greater than those of an ordinary minister.

<sup>58</sup> Firishta (ii, 198) gives the chronogram *دعوى حاريد* for the accession of Burhân Nizâm Shâh I. This gives the date 914 (A D 1508 09).

hands and governed the kingdom almost as an independent king. His son, Jamâl ud-dîn, who had received the title of 'Azîz-ul Mulk, had drunk from the cup of place and pomp until he was drunk with power and pride and so enmeshed in the lusts to which youth is prone, that he paid regard to none but himself. Owing to the power of the regent and his son, a party of the *amîrs* and chief men of the Dakan, moved by envy and the desire of stirring up strife, conspired to raise to the throne the king's younger brother, who was known as Râjajî, but since God had decreed the kingdom to Burhân Nizâm Shâh, the plot failed.

When the opponents of the Government realized that it was useless to attempt to reverse the Divine decrees, they submitted and made obeisance at the gate of the royal court.

XXI—AN ACCOUNT OF THE CAUSES OF THE QUARREL WHICH OCCURRED BETWEEN  
BURHÂN NIZÂM SHÂH AT THE BEGINNING OF HIS REIGN, AND  
SHAIKH 'ALA-UD DÎN 'IMÂD UL MULK

A.D. 1510-11 Early in the reign of Burhân Nizâm Shâh, the *amîrs*, the officers of state and the subjects generally were discontented, owing to the great power enjoyed by Mukammal Khân and the pride and arrogance of his son 'Azîz-ul Mulk. 'Azîz-ul-Mulk plunged into all sorts of immorality and wanton pastimes and used oppressively to violate men's honour, and this tyranny was unbearable to the men of the Dakan, so that a great outcry arose against him. Some of the *amîrs*, such as Rûmî Khân, Qadam Khân, Munîr Khân, and others, feared that he entertained designs against them, owing to the part which they had played in the attempt to raise Râjajî to the throne, and for this slight cause, making 'Azîz-ul-Mulk's enormities their excuse, left the court and took refuge with 'Imâd-ul-Mulk in Berar, where they made every effort to stir up strife. They persuaded 'Imâd-ul-Mulk that the rule of Mukammal Khân and his son, during the king's minority, were hateful to the people, and that the conquest of the country would be an easy matter, adding that it was not the part of a wise king to let slip an opportunity of this nature and give his enemies time. 'Imâd-ul-Mulk was beguiled by their words and was proud of the strength of his army. He collected his troops from all quarters of his country and marched towards Ahmadnagar.

When the news of 'Imâd-ul-Mulk's movements reached the king, he ordered Mukammal Khân to send swift messengers to all parts of the kingdom to summon the army, and to send the royal tents on towards Berar. These orders were carried out. The *amîrs* and officers were summoned with their troops, and the royal tents were sent forward towards Berar. When the army was assembled at the capital it marched rapidly towards the town of Rânûbarî,<sup>59</sup> where it encamped.

'Imâd-ul-Mulk also marched from the direction of Berar towards Rânûbarî and encamped over against the royal army.

On the following day, when the sun rose, the two armies were drawn up in battle array, facing one another.

Mukammal Khân divided the royal army into two divisions. The duty of one was to guard and protect the king, and the command of this division was given to Miyân Kâlâ

<sup>59</sup> Firsihta (u, 199) has Rânurî. From the similarity of the names as written in the Persian script, the site of the battle was probably Râhûrî situated in 19°22' N and 74°40' E. Sayyid 'Alî's account of this campaign does not differ materially from that given by Firsihta, but Firsihta names Mukammal Khân and his son 'Azîz ul Mulk for having by their hostility driven the *amîrs* from Ahmadnagar. The *amîrs* took with them 8,000 horse. The battle of Râhûrî was fought in A.H. 916 (A.D. 1510-11) and the victory of Burhân Nizâm Shâh's army was even more complete than Sayyid 'Alî represents it to be. 'Alâ ud dîn 'Imâd Shâh was so closely pursued through Berar that he fled to Burhânpûr, and it was 'Âdil Khân III of Khândesh that made peace between the belligerents.

Azhdar Khân As the king was too young to be able to manage a charger, Azhdar took him in front of him, and tied a sash round the king's waist and his own, lest the horse should become restive on hearing the noise of battle and unseat the king. The duty of the other division was to attack the enemy.

'Imâd-ul-Mulk also divided his army into two divisions, and appointed one to repel the attack of the second division of the army of Burhân Nizâm Shâh, while he led the other division against the division appointed to guard the person of the king.

The royal army marched out of the town of Rânûbarî and met the enemy, and a fierce battle was fought. While the battle was in progress, two of the fiercest of the king's elephants, named Barkhundâr and Buzurgwâr, were taken by their *mahouts* to a river which ran near the field of battle in order that they might be watered. At the river they met and fought and, so fighting, being beyond the control of their drivers, moved in the direction of the enemy. When the royal troops saw that two of the king's own elephants were going towards the enemy, they charged after them, fearing lest they might be seized by the enemy. It fortunately happened at this moment that 'Imâd-ul-Mulk was informed that the *amis* of Burhân Nizâm Shâh, who had joined themselves to him, were deserting him and joining the army of Burhân Nizâm Shâh. When 'Imâd-ul-Mulk heard this news and at the same time saw the bravest of the royal troops charging his army, he lost heart and fled, halting not until he had reached the midst of his own country. The victorious army pursued the enemy and slew very many of them, taking also large quantities of spoil, horses, elephants, arms and tents. It is said that on that day the army of 'Imâd-ul-Mulk was utterly dispersed and fled into all parts of the country, so that most of their horses and elephants fell into the hands of the country people by whom they were brought and presented to the king.

After this victory the king returned to Ahmadnagar.

## XXII. AN ACCOUNT OF THE DOMINATION OF 'AZÎZ-UL-MULK, OF THE GENERAL MISCHIEF CAUSED BY HIS ELEVATION TO THE OFFICES OF VAKÎL AND PÎSHVÂ, OF HIS AMBITIOUS DESIGNS FOR DEPOSING THE KING, AND OF HIS PUNISHMENT.

A short time after the defeat of the army of 'Imâd-ul-Mulk and the extinguishing of the fire of war, Mukammal Khân, who had been *vakil* and *pishvâ*, since the reign of his late majesty Sultân Ahmad Bahri, departed this life. After his death the king bestowed the offices of *vakil* and *pishvâ* on his son, 'Azîz-ul-Mulk, who had some hereditary claim to them. 'Azîz-ul-Mulk, who had an evil disposition, soon raised the standard of strife and turbulence, and the banner of tyranny and injustice, and got all power in the administration of the state into his own hands, ruling like an independent king, while to the king was left nothing but the name of a king.

When 'Azîz-ul-Mulk had thus seized all power, pride and folly established themselves in his disposition, and he conceived in his base heart the design of still further extending his power and of rebelling against the king. Moreover, he devoted the whole of his attention to undermining the foundation of the kingdom, and excluded from the royal service most of those who had been in close attendance upon the throne, and the king's old servants, and admitted to the king's presence nobody except three wet nurses who had nursed the king and brought him up, and three eunuchs who had been in the service of his late majesty. He also tried to overthrow the state altogether, and one day put some deadly poison into some milk of which the king was extremely fond, and sent it to the king. The king's nurses,

however, were on their guard and would not allow the king to drink the milk. They gave a little of it to a beast, in order to test it, and the moment that the beast drank it, it died. Then they thanked God, Who had spared the young king's life, and distributed alms to poor and holy men by way of a thankoffering. Thus 'Aziz-ul-Mulk forgot his duty of loyalty to the king, and became an ungrateful rebel. When a man of base nature attains worldly power, the blackness of his heart and the baseness of his nature become manifest in his acts.

The king's loyal servants, and those who were near his throne, wearied of the dominance and disloyalty of 'Aziz-ul-Mulk, and consulted together as to how this enemy of the faith and the state could be overthrown, asking assistance in the matter from all loyal servants of the king. At this time Dānayya (Hisan Jivū,<sup>60</sup> who was governor of the fort of Antūr, came to court to pay his respects, and had an audience of the king. When he ascertained the course of 'Aziz-ul-Mulk's conduct and his ingratitude and disobedience, he represented to the king that he had formed a design for overthrowing 'Aziz-ul-Mulk, and would disclose it if he had the king's leave. The king, by the mouth of one of his faithful servants, asked what the nature of his plan was, and he replied that he would return to his fort and there feign to rebel, in order that 'Aziz-ul-Mulk might be sent in person to quell the rebellion and the king might be relieved of his presence. Dānayya continued saying that he would fight against 'Aziz-ul-Mulk as the king's enemy and would do his utmost to remove him, and to relieve the king from his dominance. The king highly approved of this plan and gave Dānayya leave to depart, urging him to use his best endeavours to put 'Aziz-ul-Mulk out of the way. Dānayya, in accordance with the royal command, returned to Antūr, and there set up the standard of rebellion. When news of this rebellion was brought to 'Aziz-ul-Mulk, 'Aziz-ul-Mulk, who trusted none of the *amīrs* of the Dakan, sent his brother, Jahāngīr Khān, to crush the rebellion, and Jahāngīr Khān, with a numerous army, of the strength of which he was very proud, marched for Antūr and encamped before the fort. When Dānayya heard of the approach of Jahāngīr Khān he closed the fort against him, withdrew his men from the walls and bastions, and made no sign of offering resistance. Jahāngīr Khān attributed this conduct to Dānayya's pusillanimity and was emboldened to attack the fort, and with great assurance ordered his troops to attack the fort on all sides at once. The defenders waited until Jahāngīr Khān's troops had advanced to within a short distance of the walls, and then poured in upon them a deadly fire of artillery and musketry. The army of Jahāngīr Khān was broken; many were slain, and some fled. The sons of Jaya Singhji came forth from the fort with their brave army and pursued the fugitives like messengers of death. Jahāngīr Khān had the ill fortune to be taken prisoner by Dānayya's troops, but the rest of his army escaped, though with great difficulty. Dānayya ordered that Jahāngīr Khān should be paraded through his army on an ass, like a thief, as an example to all disloyal men, and that he should then be punished for his ill deeds, that all men might know that this was the reward of treason.

When 'Aziz-ul-Mulk heard that his brother's nose had been cut off, he raved like a madman, and went to the king and reported the matter to him, saying that if the king treated this matter lightly and did not set forth in person to put down Dānayya's rebellion, it would gain head and would soon be beyond repression.

The king, seeing no way out of the difficulty, ordered his army to assemble at the capital and sent his tents forward. 'Aziz-ul-Mulk, inflamed with pride, ordered the army to assemble from far and near, and the king set out with his troops towards the fort of Antūr.

<sup>60</sup> See The correct name is Jaya Singhji, which was Dānayya's father's name, following his own, as is usual in the Dakan. The sons of Jaya Singhji, mentioned later, were evidently Dānayya and his brothers.

Antūr was situated in 20° 27' N and 75° 5' E not far from the spot where the frontiers of Ahmadnagar, erar, and Khāndesh met.

In the course of the march, the king's loyal servants, seizing a favourable opportunity, advised the king to issue to the *amîrs* who had fled from the court for fear of 'Aziz-ul Mulk and had taken refuge with 'Imâd-ul-Mulk in Berar, a safe conduct to court, in order that by their aid he might be freed from the domination of disloyal and ungrateful subjects. The king acted on this advice and sent a safe conduct to the *amîrs* who, by great good fortune, joined the royal camp from that direction before the army reached Antûr, and, before they had even paid their respects to the king, entered 'Aziz ul-Mulk's tent, seized him, and blinded him with a red hot iron, thus freeing the world from the strife and confusion caused by that chief of the lords of oppression and injustice. They then went on to the king's presence and had the honour of making their obeisance. They were honoured with robes of honour, golden girdles, and other marks of the royal favour, in order that it might be made clear to the world that loyalty and obedience are rewarded and disloyalty and ingratitude punished.

After the blinding of 'Aziz ul Mulk, the king appointed no other person to the office of *pîshvâ*, but, in spite of his tender age, which was no more than twelve years, took the whole administration of the kingdom into his own hands and so apportioned his time that every moment was devoted to some affair of importance, and he never, for a long time, varied this arrangement. Like the sun, he never rested by day from attending to the wants of the numble and, like his own wakeful fortune, he scarcely slept at night for employment in the affairs of his subjects.

Meanwhile Mir Rukn ud din who was a faithful and pious man, was *vazîr* of the kingdom of the Dakan, Shauk Ja'far and Maulânâ Pir Muhammad Shîrvâna, who were companions of Mir Rukn ud din, having been admitted to the king's presence by the favour of the Mir, were appointed to be his companions.

Since, however, the dealings of Mir Rukn ud din with the king's subjects were not marked by justice and equity, complaints of him reached the royal threshold and he had been *vazîr* for a short time only, when the office was taken from him and given to Shaikh Ja'far<sup>61</sup>

### XXIII AN ACCOUNT OF THE WARFARE BETWEEN BURHÂN NIZÂM SHAH AND 'IMÂD UL-MULK, AND OF THE DEFEAT OF 'IMÂD UL MULK IN THE LAST BATTLE AND HIS FLIGHT TO GUJARAT

After 'Imâd ul Mulk had fled before the royal troops in the battle which took place in the neighbourhood of the town of Rânûbari, and had lost most of his elephants, horses and munitions of war, he was constantly overwhelmed with shame at the thought of the disgrace which had befallen him, and was again preparing for war in the hope that he might be able to retrieve his honour. He collected a large army of capable troops and marched for Berar with the object of making war on Burhân Nizâm Shâh.

<sup>61</sup> The death of Mukammal Khân shortly after the battle of Râhûrî, the appointment of his son 'Aziz-ul Mulk as *pîshvâ* and Dînayya's feigned rebellion in Antûr are not mentioned by Firishta, who says that Mukammal Khân was still in power in A.H. 924 (A.D. 1518) after the capture of Pâthri by Burhân Nizâm Shâh, when the king was seventeen years of age. Burhân, after his return to Ahmadnagar, became enamoured of a courtesan named Âmana or Amina, and was so infatuated with her that he married her and made her the chief lady of his seraglio. She led him into evil courses and taught him to drink wine, so that he neglected his royal duties and spent his time in riotous living. Mukammal Khân, now an old man, tendered his resignation of his office on the ground that the king had reached years of discretion. His resignation was accepted and Shaikh Ja'far the Dakanî was appointed *vakil* and *pîshvâ*. Mukammal Khân's son, perhaps 'Aziz ul Mulk, was made an *amîr*, but there is no mention of his being appointed to any particular office. Mukammal Khân lived henceforth in retirement, only occasionally attending at court (F. II, 200, 201).

It is impossible to reconcile these two accounts, but it is more probable that a youth of seventeen should give way to senility than that a boy of twelve should administer and rule a kingdom.

Spies reported to Burhân Nîâm Shâh the approach of 'Imâd-ul-Mulk with a large army, and the king immediately issued orders for the assembling of his forces, and the troops assembled at the capital. The king then summoned his *amirs* and the officers of his army and took counsel with them regarding the means of repelling the invader. Their reply was a request to be led against the enemy. The king highly approved their decision and set out with his forces to meet 'Imâd-ul-Mulk.

The king and his army marched from the capital and met 'Imâd ul-Mulk in the neighbourhood of the town of Borgâon,<sup>62</sup> where a desperate battle took place. The Yamani sword rested not from scattering heads, and Death's executioner stayed not a moment from cutting off hope of life, until the earth was clad in robes like those of the 'Abbâsids. Large numbers were slain on both sides and victory declared for neither. Each commander drew off his forces and made for his own country.

After the lapse of a short time, the two armies again marched against each other and met near the Deonati river, where a battle was fought. The officers who specially distinguished themselves on the Nîâm Shâhî side were, 'Âlam Khân, Rumi Khân, Qadam Khân, Munir Khân, 'Umdat-ul Mulk, Khanât Khân, Fûlâd Khân, Miyan Raja, Dânavya Rui Rai, and others.

The battle raged till sunset, when both armies retired to their own camps, and on the following day the two kings, neither having gained the victory, retired to their own countries.

In this warfare the great *amirs* of the kingdom of the Dakan, who were usually in attendance on the king, were Makhdûm Khvâja Jahân and 'Ain ul Mulk, who were of the number of his servants.

#### XXIV—AN ACCOUNT OF HIS MAJESTY'S THIRD CAMPAIGN AGAINST 'IMAD-UL-MULK ( 'ÂLA-UD-DÎN 'IMAD SHÂH )

Since the king had twice taken the field against the enemy, and had on neither occasion been victorious, he was inflamed with the spirit of emulation and with jealousy of his foe, and set himself to improve the condition of his army and to increase its strength. He then set out with a large army against 'Âlâ ud dîn 'Imâd Shâh of Berar.

When 'Imâd-ul-Mulk heard of the king's approach, he spared no efforts to collect his army, and, having collected a very numerous and valiant force, marched to meet the king.

The two armies met in the neighbourhood of the village of Vâlorân, where they encamped over against one another and threw out outposts for their protection during the night. On the following day they were drawn up in battle array against each other, and the battle began. The fight was fierce and bloody. At length victory declared for the king and the army of 'Imâd-ul-Mulk fled from the field, the king's troops pursuing them with great slaughter.

<sup>62</sup> Borgâon and Bargâon (Wadgâon) are common village names in Perar, and I have not been able to identify the Deonati river, mentioned lower down, but the village of Vâloran, mentioned in the following chapter, is Vâlor, situated in 19° 29' N and 76° 36' E. Tuzihta mentions neither of these campaigns against 'Âlâ ud dîn 'Imâd Shâh, and according to him the first hostilities between Ahmadnâgar and Perar, after the battle of Râhûrî, were those which resulted in the annexation of Pâthri by Burhân Nîâm Shâh I in 1518. From Sayyid 'Alî's mention, in his account of what he calls the third campaign of 'Âlâ ud dîn 'Imâd Shâh's fight to Gujarât, it is obvious that he has confounded the first and second capture of Pâthri. In 1526-27, as will be hereafter noted, 'Âlâ ud dîn recaptured Pâthri and Burhan then allied himself with 'Alî Burîd of Bîdar and not only captured Pâthri a second time but drove 'Âlâ ud dîn and his ally, Mubammad Shâh Fâruqî I of Klândesh, through Berar in such sorry plight that they were constrained to appeal or help to Bahâdur Shâh of Gujarât.

All 'Imâd-ul-Mulk's elephants, horses, arms, tents and camp equipage, and those of his army, both small and great, fell into the hands of the royal troops. 'Imâd-ul-Mulk, with great difficulty, and after suffering many hardships, contrived to escape, but was so overcome with shame, that instead of returning to Elchpûr, which was his capital, he made his way to Gujarât.

The king, when the pursuit had been pressed to the utmost, dismounted and took his seat on a mound in the neighbourhood, while his army presented before him the spoil which had been captured from the enemy, and congratulated him on the victory which had been gained. The king caused all this most abundant spoil, except the elephants, which are the perquisite of royalty, to be divided among his army.

#### XXV — AN ACCOUNT OF THE CAPTURE OF THE FORTRESS OF PÂTHRÎ

After the defeat of 'Imâd-ul-Mulk, the king marched towards Pâthrî, which is one of the greatest and strongest fortresses of Berar, and which he straightly besieged. The royal army surrounded the fortress and opened their batteries against it. The besieged made some efforts to defend the fort, but since they were, at the outset, overcome by fear of the besiegers, these efforts were of little avail. When the royal army saw that the spirit of the garrison was already broken, they stormed the fort, pouring into the ditch and mounting the ramparts. Some thus scaled the ramparts and bastions while others entered the fort by means of mines which they had run under its walls, and thus, by God's help, they captured this strong fortress and put the whole garrison, without exception, to the sword. They then proceeded to plunder all the goods in the fort and to make captives of the children, women and men (other than those of the garrison, who had been slain), and took possession not only of their persons, but of all their property, and destroyed their dwellings.

After Pâthrî had been captured, the king commanded that the fortress should be razed to the ground, and annexed the district dependent on the fortress, leaving a force there to occupy and protect it.

Some historians have said that the fort of Pâthrî was not destroyed as soon as it was captured, but that some time elapsed before the king ordered it to be destroyed. It would however seem that fate decreed that that fortress should be twice destroyed, and nobody has hitherto attempted to rebuild it.

Muhammâd Ghûrî, who had shewn great valour in the capture of the fortress and had distinguished himself above all his fellows, was honoured with the title of Kâmil Khân, and appointed to the government of the conquered district, and the king then returned to his capital, where he administered justice and caused peace and contentment to reign throughout the Dakan.

Meanwhile, however, Shaikh Ja'far's power had increased beyond all reasonable limits and complaints of his misconduct were laid before the throne. The king therefore issued an order depriving him of the government and of the office of *vazîr*, and, since he had observed in Kânghû Narsî, a Brahman of Shaikh Ja'far's, who had entered the royal service through Shaikh Ja'far's interest, signs of ability and fidelity, he appointed this Brahman to the vacant post of minister. Kânghû Narsî held the post of minister for a long time and performed his duty faithfully and well. During his tenure of the office, thirty strong fortresses were, in consequence of the plans matured by him, captured by the royal troops. I cannot, without

being tedious, turn aside from my narrative at this point, to describe the capture of these forts or even to give a list of their names, but they will be mentioned, please God, in the summary of the events of this fortunate reign, which I shall give at the conclusion of this record.<sup>63</sup>

#### XXVI—ACCOUNT OF THE ARRIVAL OF SHAH TAHIR IN THE DAKAN

At this time the learned pious, and eloquent *Shi'ah* sage, Shâh Tâhir, who had formerly been highly honoured by Shâh Ismâ'il bin Haidar, Safavî,<sup>64</sup> was slandered by some persons at Shâh Ismâ'il's court, and was advised by Mirzâ Shâh Husain Isfahânî to leave Persia. Shâh Tâhir, accordingly, taking with him his family and dependents, left Kâshân,<sup>65</sup> that abode of true believers, in A H 926 (A D 1520) for Hindûstân. He travelled speedily to the shores of the Indian Ocean and sailed from the island of Jarûn<sup>66</sup> in a ship bound for the port of Goa. It said that that holy man, after having his Friday prayers, embarked, and by God's blessing and help was enabled to say his prayers on the following Friday in the port of Goa, and this was one of the signs of the heavenly blessings which sprang from the visit of that holy man to Hindustan. On arriving in India, he wrote a letter, dated in the early days of Jamâdi-ul Avval, A H 926 (April 19, 1520) to one of his friends, informing him of the voyage which he had undertaken, and of his safe arrival in Goa.

As soon as the news of Shâh Tâhir's flight became known, the Shâh of Persia sent horsemen after him with instructions to turn him back wherever they should find him, but since it was God's purpose that the Dakan should profit by the presence of that holy man, he had embarked on his voyage to India before the Shâh's messengers came up with him. The Shâh soon became aware that the reports which he had heard against Shâh Tâhir were the fabrications of ill-disposed men and repented of having acted on them. He set himself to make amends to Shâh Tâhir, but was overtaken by death before he could carry his designs into effect. His son and successor, Shâh Tahmâsb,<sup>67</sup> did his best to make amends to Tâhir, as will be seen from the *farmâns* which he issued to him.

After landing at Goa, Shâh Tâhir went to Bijâpûr but, finding that the conditions of life in that city did not suit him, he went to Gulbarga, which was formerly the capital (of the Dakan) under the name of Ahsanâbâd. After having rested for some time in that city, he formed the design of performing the pilgrimage, and, having set out thence, reached the

<sup>63</sup> This account of the Pâthri campaign seems to have been utilized by Firishî (ii, 200), though he does not mention the source of his information. Firishî, however, recites Burhân Nizâm Shâh's reasons for desiring to possess Pâthri, which Sayyid 'Alî naturally omits. Burhân's great grandfather, Bharava, had been *kulkarnî* or *patwârî* of Pâthri but had fled to Vijayanagar to escape persecution. After the establishment of the Nizâm Shâhî dynasty those of their relations who had remained in Vijayanagar returned to their old home. Mukammal Khân, by Burhân's orders, wrote to 'Alâ ud din 'Imâd Shâh and begged him to cede to Burhân the *pargana* of Pâthri, offering in exchange another *pargana* more valuable than Pâthri. 'Alâ ud din refused to exchange Pâthri and, knowing the consequences of his refusal, fortified the town. Mukammal Khân protested against the establishment of a fortress so near the frontier but 'Alâ ud din completed the work and returned to his capital. The army of Ahmadnagar was assembled on the pretext that Burhân wished to tour in the hills above Daulatâbâd, and a forced march was made on Pâthri, which was carried by storm, as described.

Pâthri is situated in 19° 15' N and 76° 27' E.

<sup>64</sup> Shâh Ismâ'il (1502—1524), founder of the Safavî dynasty.

<sup>65</sup> The well known town in Persia, about 90 miles north of Isfahân.

<sup>66</sup> There is no island of this name in the Persian Gulf. Sayyid 'Alî probably means to say that he came to the Persian Gulf *via* Jahrum, in Fârs, about 90 miles south-east of Shirâz.

<sup>67</sup> Shâh Tahmâsb I (1524—1576), son and successor of Ismâ'il I.

town of Purenda which was on his way Makhdûm Khvâja Jahân, who was at that time governor of the fort and town of Purenda, on hearing of the holy man's arrival, made haste to wait on him, and he represented to him that as the rainy season was in progress and traveling was very difficult, he would do well to honour Purenda by staying there for some time. Shâh Tâhir accepted this invitation and remained in Purenda in comfort during that rainy season, employing his time in imparting religious instruction.

Meanwhile, Maulânâ Pîr Muhammad Shîrvânî, one of the learned men of that age and a companion of Burhân Nuâm Shâh, came from the capital to Purenda on an embassy to Makhdûm Khvâja Jahân, and, on learning of Shâh Tâhir's presence in the town, waited on him, and daily thereafter attended his lectures, profiting much by the religious instruction which he received. When the period of his embassy had expired, he returned to the capital and acquainted the king with the perfections of Shâh Tâhir. When the king heard of his learning and piety, he sent a *farmân* to Makhdûm Khvâja Jahân, the contents of which were communicated to Shâh Tâhir, who took offence, because a separate *farmân* had not been issued to him, and excused himself from attending at court. As, however, the king's desire to see Shâh Tâhir increased daily, he sent Maulânâ Pîr Muhammad Shîrvânî again to Purenda with a letter addressed to Shâh Tâhir, in which he gave utterance to his great desire of seeing him. Shâh Tâhir, on perusing this letter, set out at once for the capital in the months of the year — 65. On his arrival at Ahmadnagar he paid his respects to the king, who found that what he heard fell, in truth, far short of the holy man's perfections, and honoured Shâh Tâhir exceedingly.

(To be continued)

## INTER-STATE RELATIONS IN ANCIENT INDIA

(1)

By NARENDRA NATH LAW, M A, B L, P R S, CALCUTTA

(Continued from page 152)

Treaties of peace depending for their strength upon the solemn affirmation or oath of the parties were looked upon by some as mutable, but when accompanied by *pratibhâ*<sup>64</sup> or *pratigraha*,<sup>65</sup> as immutable. Kautilya is of opinion that the solemn affirmation or oath made the treaties as much immutable as could be done by any safeguards simultaneously for the purposes of this and the next world. The taking of hostages only added to their strength on their worldly side.<sup>66</sup>

<sup>63</sup> Blank in the original. The year should be either 927 or 928 (A D 1521 or 1522).

Fushta (ii, 213) gives a long account of the descent and antecedents of Shâh Tâhir, who claimed descent from the Fâtîmîd Caliphs of Egypt. His family had been settled in Khund, a village in the Qazvin province of northern Persia and on the borders of Gilân, for 300 years. Shâh Ismâ'il I was jealous of Shâh Tâhir owing to his illustrious descent and his reputation for sanctity and learning, and lent a ready ear to the accusation that Tâhir was a leader of the Ismâ'ilî heretics. A warrant for his execution was about to be issued when he escaped, owing to the timely warning given to him by Mirzâ Shâh Husain Isfahânî, *nâzir* of the *darwân* of Shâh Ismâ'il.

<sup>64</sup> *Pratibhâ* means the giving of great ascetics or nobles as hostages (Kautilya, Bk VII, ch 17, p 312).

<sup>65</sup> In *pratigraha*, the hostage given by the party suing for peace is a near blood relation (*Ibid*).

<sup>66</sup> Kautilya, Bk VII, ch 17, p 311.

In making a *solemn affirmation*, the parties only uttered the words 'samhitāssmah' (we are united), while they took *oaths* by fire, water, plough, wall (say, of a fort), clod of earth, shoulder of an elephant, horse-back, seat of a chariot, weapons, precious stone, seed of plant, fragrant substance, *rasa*,<sup>67</sup> gold coin, or bullion, saying this formula on the occasion "let it or these (naming the thing or things by which the oath is administered) desert and kill me if I transgress the oath"<sup>68</sup>

The kings of yore who put so much faith in affirmations used to enter into treaties of peace with the simple formula 'we are united' In case of breach of this affirmation, they took the oath, and when this oath was contravened, the hostages were demanded

Much discrimination had to be used by both the parties in the selection of the hostage, for a good deal depended upon the place occupied by him in the love or religious susceptibilities of the giver or his subjects It was the interest of the giver to make over the person for whom he cared least or who would prove troublous or ruinous to the taker, while the latter tried to have one to whom an injury, conditioned by a breach of the treaty, would affect the tenderest sentiments of the former or his people

Keeping these points in view, Kautilya dilates on the subject, which may be summarized as follows — Advantageous to the giver are the undermentioned hostages (1) a great ascetic or noble, able to trouble or ruin the foe, (2) a corrupt son, (3) a daughter, (4) a baseborn son, (5) a son devoid of *mantra śakti* (who does not follow, or has not at his disposal wise advisers), (6) a son devoid of *utsāha-śakti*<sup>69</sup> (i.e., capacity for the three kinds of hostilities), (7) a son unskilful in the use of weapons<sup>70</sup> and (8) one of many sons A king parting with his only son as hostage is unable, as a rule, to risk a breach of the treaty Should there be no chance of a second son being born to him, he should rather give himself up as hostage, installing his son on the throne<sup>71</sup>

In ancient inter-state relations, it was the power possessed by a state that determined, to a great extent, its conduct towards the other states A sovereign submitting to a humiliating treaty of peace might have, sometime after the exhaustion of the war, recouped his power so much as to be superior to the other sovereign to whom he was bound by the treaty under which he was smarting In such a case, the contrivance resorted to was to secure the escape of the hostage from the custody of the other party The matter was so managed that outwardly the hostage appeared to escape of his own free will<sup>72</sup> and without any help from his pledger although secret agents in the pay of the latter might actually assist in the matter The escape of the hostage unsettled the existing treaty, and gave rise to conditions in which

<sup>67</sup> As it signifies a variety of substances,—mercury, poison, milk, &c, it is not clear which of them is meant

<sup>68</sup> *Ibid*, Bk VII, ch 17, p 312

<sup>69</sup> Kautilya explains '*utsāha śakti*' by '*vikramaśakti*' and '*vikrama*' by *prahāḥ yuddha*, *kāta yuddha* and *tāshn in yuddha* (*Kautilya*, Bk VII, ch 2, p 259, and ch 6, p 278)

<sup>70</sup> Kautilya distinguishes the relative superiority or inferiority of sons by virtue of their nobility of extraction (on the mother's side), wisdom (from *mantra śakti*), bravery (from *utsāha śakti*), skilfulness in the use of weapons, and such other qualities The last passage at p 312 appears to be corrupt, and the significance of the expression '*lupta dāyāda santānatvāt*' as also its consistency with the last passage as it stands, are not evident (See *Kautilya*, Bk VII, ch 17, pp 312, 313)

<sup>71</sup> *Kautilya*, Bk VII, ch 17, pp 312, 313

<sup>72</sup> Although I have spoken of the hostage as masculine the above remarks might also apply to female hostages

the fresh demands of the pledgee might be either rejected point blank or refused on various grounds. This would lead to friction but as the circumstances are changed inasmuch as the aggrieved party has become inferior in power to the other,<sup>73</sup> he is not likely to declare a war specially as there is no direct proof of the pledger's assistance in the escape of the hostage. The act is in view of the latter's secret implication in it, really wrongful but concealed under a garb of innocence, and turned to advantage by a shuffling of what to an inferior state would have been brought home as its duty. The only argument that might be adduced in favour of the breach of the treaty is with reference to the exceptional cases in which, for instance, the very existence or the necessary development of the state bound by the treaty are hampered by its terms. The ground for the breach would then be this, that the latter are the primary duties of the state and, any obligations that hinder their fulfilment must be considered null and void.<sup>74</sup>

The hostage in effecting his escape took to various dodges and utilized the help provided by secret agents. The dodges were not always of a mild type but included, if needed, violent means that made light of losses of human life for achieving the end in view. A study of the *Kautiliya* leads to the inference that sacrifices of human lives caused through secret agents for state ends in inter-statal discords, in measures against sedition within the state or against enmity personally to the king and his own were not generally regarded as obstacles at which the state would stick, the interests of the kingdom and the monarch and their self-preservation being regarded as justifying the application of the means. The artifices used by and for the hostage for his deliverance were —

(1) Spies (*satrinah*) serving in the neighbourhood in the guise of artisans and craftsmen may remove the hostage surreptitiously through a tunnel constructed at night.

(2) Spies disguised as actors, dancers, singers, players of musical instruments, buffoons, bards, acrobats, jugglers, etc., may take service under the enemy and secure for themselves the privilege of free ingress, stay, or egress. They will also serve the hostage who may escape at night in the guise of one of these people. Women spies may also do the same, and the hostage dressed like one of them with a characteristic article in hand may effect his escape.

(3) The hostage may be concealed amidst commodities, clothes, vessels, boxes, beds, seats, and articles of luxury, and removed by spies serving the enemy as *sūdas*<sup>75</sup> (those who cook pulses or vegetables), *ārālīkas*<sup>76</sup> (those who boil rice), bathers, shampooers, spreaders of bed-clothes, barbers (*kalpaka*), toilet-makers, or drawers of water.

This reminds one of the memorable artifice by which Sivaji made his escape from Aurangzeb's custody.

<sup>73</sup> The text has "abhyuchchīyamānah samādhi moksham kārayet" (*Kautiliya*, Bk VII, ch 17, p 313).

<sup>74</sup> Cf. Dr. L. Oppenheim's *International Law*, Vol. I, p. 550.

<sup>75</sup> *Sūda* according to the *Vāchaspatya* is the same as *supa kartā*. Nilakantha in his comments on the *Mahābhārata*, Virāta Parva, ch. 2, sh. 9, states that a *sūpakāra* is one who cooks pulses like *mudga* (phaseolus mungo). According to others quoted by him, *sūpakartā* may also be one who cooks vegetables.

As explained by the scholiast in connection with the above passage, an *ārālīka* may mean (1) one who plays with or disciplines an infuriated elephant, or (2) one who boils rice. (This passage "ārālīko'na pāki syāt, sūpakartā tu sākakrit" is quoted as his authority.)

<sup>76</sup> These spies are named at p. 21 of the *Kautiliya*, Bk I (*guṇa'apurusha pranidhi*).

(4) The hostage may hold communion with Varuna at the entrance of a tunnel, or in a reservoir of water, accompanied with nocturnal *upahāra*, (oblations, or religious services consisting of laughter, song, dance, muttering *hubuk*, adoration and pious ejaculation),<sup>77</sup> and flee away at the opportune moment.<sup>78</sup> Spies in the guise of traders divert the attention of the sentinels by selling them fruits and cooked food.

(5) The hostage may give the sentinels food and drink mixed with poisonous preparation of *madana* plant<sup>79</sup> on the occasions of offerings to the gods, *śrādhahs*, or sacrificial rites,<sup>80</sup> and when the sentinels are under its influence he may flee away.

(6) The sentinels may be incited to set fire to buildings with valuable articles, or spies disguised as citizens, bards, physicians, or vendors of cakes may do the same. The sentinels may be persuaded to set on fire the stores of commercial articles, or spies disguised as traders may do so. In the tumult, the hostage may escape. To avert the chance of being pursued, the house occupied by the hostage may be set on fire and a dead body (procured previously) may be cast into the flames. The hostage may escape by making a breach in the wall, or through an air passage (*vāta surungā*).

(7) The hostage may escape at night in the disguise of a carrier of glassware, pitchers, or other commodities.

(8) He may enter the hermitages of the Shavelings (*mundas*) and the Braided-haired (*jatulas*)<sup>81</sup> and escape thence in the guise of one of these hermits.

He may also disguise himself as one suffering from a deforming disease, as a forester, or the like, and flee away.

(9) He may be removed as a corpse by spies, or may himself follow, as a widowed wife, a corpse carried by the spies as if to the crematorium.

(10) He may at night fall upon the sentinels with a concealed sword and run away with the secret agents stationed in the neighbourhood.

Spies in the apparel of foresters would misdirect the pursuers. The hostage may conceal himself under the enclosure of a cart driven along the way. The pursuers being near, he may hide himself in a bush. When there is no bush at hand, he may leave on both sides of the way gold coins or poisoned articles of food for the pursuers. If captured, he will apply to the captors conciliation and other means (bribery, dissension, and chastisement), or serve them with poisoned food. In case a corpse, supposed to be that of the hostage, had been put in as a dodge at the place where the aforesaid worship of Varuna was held, or at the house (set on fire) where the hostage stayed, the giver of the hostage may accuse of murder the sovereign who held him.<sup>82</sup>

<sup>77</sup> Monier Williams' *Sanskrit English Dictionary*

<sup>78</sup> Cf. *Kautilya*, Bk XIII, ch 1, p 393. The expression '*varuna yoga*' bears the implication that it is a trick by which the enemy is overreached.

<sup>79</sup> For *madana yoga*, see *Kautilya*, Bk XIV, ch 1, p 410.

<sup>80</sup> The Sanskrit word is '*pravahana*' which seems to be mistakenly put for '*prahavana*'. Pandit R. Śyāma Śāstri translates it by "sacrificial rite," implying that the word should be "*prahavana*". There seem to be other instances of confusion between the two words in the *Kautilya*, e.g. at p 401 (Bk XIII, ch 3).

<sup>81</sup> For these classes of hermits, see Dr. Rhys Davids' *Buddhist India*, p 145.

<sup>82</sup> For the above information about the dodges, see *Kautilya*, Bk VII, ch 17, pp 313—315.

(B) Of the several kinds of treaty of peace, the first three have been found to form a group called *Dandopanata Sandhis*, *danda* (army) being the chief subject-matter of their stipulations. The *dandopanata* of the Self submitter *Kautilya*, Bk. VII, chs 15, 16 appears to be a much more helpless sovereign than one who is compelled to sue for a treaty of peace in any of the above three forms. If the disparity in power between a sovereign and his invader be very great and the former sees no other means of saving himself except by throwing himself upon the latter's mercy, he becomes *dandopanata*. This self-submitter owes several obligations to the *dandopanāyin* (henceforth to be termed 'dominator') These obligations do not appear to be part and parcel of the three *dandopanata* treaties of peace, which points to the inference that the position of a self-submitter is not the outcome of those treaties but is rather caused by self submission before any fight takes place between him and the invader, who afterwards becomes the dominator.

For one who had enjoyed independence, the position of a self-submitter was no doubt humiliating. He had to demean himself towards his dominator rather like a government servant in the conventional ways, discharging his duties faithfully, but adapting himself to the moods of his master to continue in the latter's good graces.<sup>83</sup> He had, when ordered by the dominator or with his permission, to engage in the construction of forts or other works, invite (other kings), celebrate marriages, hold the installation ceremonies of a son, capture elephants for sale, perform sacrifices, march against foes, or start on excursions for amusement.<sup>84</sup> He could not enter into alliance with any kings<sup>85</sup> staying in his kingdom or secretly punish those who had backed out from such alliances.<sup>86</sup> If the citizens in his kingdom were wicked, he could not exchange it for lands with righteous people from another king, punish the wicked with secret punishments, or accept lands offered by a friendly king, without the aforesaid permission. Interviews with the chief councillor, royal priest, commander-in-chief, or heir-apparent without the knowledge of the dominator were prohibited.<sup>87</sup> It was incumbent on the self submitter to help the dominator to the utmost of his capacity and always express his readiness to do so. On the occasions of invocations of blessings on the dominator before the gods, he should promptly cause the ceremony to be observed in

<sup>83</sup> "Lavdha samsrayah samay-âchân vad bhartan varteta." *Kautilya*, Bk VII, ch 15, p 308, referring to *Ibid*, Bk V, ch 5 (*samayâchârîkam*), p 250

<sup>84</sup> Some of the items enumerated above may be on behalf of the dominator. The construction of forts, for instance, may be for the defence of the dominator's kingdom, while several of the remaining items may be intended for him as well.

<sup>85</sup> The word in the text is *prakṛti*. The reference is to *rāja prakṛti*. For a parallel use of the word, see the heading "*prakṛtīnām sāmavāyika viparekṣasah*" in which "*prakṛtīnām*" means "*rāja-prakṛtīnām*" (*Kautilya*, Bk VII, ch 5, p 272).

<sup>86</sup> For the treatment of the *apasritas*, see *Kautilya*, Bk VII, ch 6, pp 278—280 where *apasritas* has been dealt with.

<sup>87</sup> There has been an omission of a negative particle in the Sanskrit passage for this sentence (*Kautilya*, Bk VII, ch 15, p 308).

his territory. He had to dissociate himself from people hostile to the dominator<sup>88</sup> and hold his territory virtually as the latter's "warehouse"<sup>89</sup>

It seems from the above evidence that the self-submitter was allowed to live in his own territory but had to go over, when needed, to that of the dominator or elsewhere and stay there so long as the work in hand or the dominator's desire compelled his stay. It is to such stay that the advice embodied in the *Kautilya*<sup>90</sup> applies. The advice is that when he saw the dominator suffering from a fatal disease, or his (dominator's) kingdom from internal troubles, when the latter's enemies were growing (in number or prosperity) or his allies unwilling or unable to support him, creating thereby opportunities for the self-submitter to ameliorate his condition, then he (self-submitter) might, under some believable (*sambhāvya*) pretence of a disease or performance of some religious rites, leave the dominator's kingdom. If already in his own state, he might not, in view of the aforesaid opportunities, come to the dominator suffering as above, or coming nearer, he might strike at the vulnerable points<sup>91</sup> of the dominator's state<sup>92</sup>

Just as the self submitter owed a number of obligations to the dominator, so the latter also did to the former. The dominator's obligations to the devoted submitter were —

- (1) To help him to the best of his (dominator's) power in return for help received,
- (2) To give him wealth and honour,
- (3) To help him in calamities,
- (4) To grant him interviews whenever asked and accede to his requests,
- (5) To avoid using insulting, offensive, contemptuous, and harshly loud language towards him,

<sup>88</sup> For the above information regarding self submitter see *Kautilya*, Bk VII, ch 15, p 308. The *śloka* at p 308 of the *Kautilya*, Bk VII, ch 15, is

Samyukta valavatsevi viruddha saṅkitādibhiḥ,  
varteta dand opanato bhartary = evamavasthitaḥ

The self submitter should be united with (*samyukta*) those who fear to mix with people opposed to the dominator (*viruddha-saṅkitādibhiḥ*). Mallinatha quotes this passage from the *Kautilya* in connection with his comments on *Ragghuvamśa* sarga 17, ślk 81. The passage quoted by him shows some variations but the meaning remains unaltered.

Durvalo valavatsevi viruddhāchchhaṅkitādibhiḥ,  
varteta dand opanato bhartary evam = avasthitaḥ

<sup>89</sup> The king who has no other alternative than self-submission, is asked by the *Kautilya* (Bk VII, ch 15, p 308) to greet the envoy of the invader thus "This (i.e. this kingdom) is the king's (using of course appropriate expressions such as "His Majesty's) warehouse, it belongs to the queen and the princes (using appropriate epithets as before), the existence of this kingdom depends upon the words of the queen and the princes, I am but their reflector."

<sup>90</sup> *Kautilya*, Bk VII, ch 2, p 265

<sup>91</sup> The word in the text is 'chūdra'. Śaṅkarārya, in connection with *Kāmandakya*, VIII, 65, interprets this term by 'rakṣā-śaṅkhya'.

<sup>92</sup> *Kautilya*, Bk VII, ch 2, p 265

(6) To show him fatherly kindness, and ask him to feel secure from fear,

(7) Not to lay claim to lands or moveable properties of the submitter deceased, or put to death or injure his wife and children, to allow his distant relations to enjoy their belongings, and his son to succeed to his father's office after the latter's death

It is only such treatment as above that can ensure the devotion of the submitter and his heirs to the dominator and his heirs through generations. Humane treatment of the submitter was required by the opinion, not merely of the sovereigns of the time but also of the people. A warning in the *Kautiliya*, for this reason, especially cautions the dominator against the transgression of the last obligation, which happens to be the most important. Breach of this obligation, says the *Kautiliya*, agitates the whole statal circle to actions for the destruction of the dominator, and even excites his own ministers living within his dominion to attempt his life or deprive him of his kingdom.

A recalcitrant submitter however lost claim to the above treatment. He could be punished by the dominator secretly or openly, his guilt being made public in the latter case. If the open punishment put the dominator to the risk of rousing his enemies and of giving them a handle wherewith to work against him, he should have recourse to the secret means dwelt on in the *Kautiliya* in its chapter *Dāndakarmikam* <sup>93</sup>

<sup>93</sup> *Kautiliya*, Bk. V, ch. 1

*Kautiliya*, Bk. VII, ch. 16 (pp. 309-311), headed *Dand opādhyāyintam* begins rather obscurely with directions to the self submitter ordered by the dominator to start on a military expedition, as well as with advice as to the use of the four means of conciliation (*sāma*), bribery (*dāna*), dissension (*bheda*), and open assault (*danda*). A classification of the self submitters comes in next, the basis of classification being the nature of help given by him to the dominator.

The classes are thus named —

- (1) *chitra bhoga*
- (2) *mahābhoga*
- (3) *sarvabhoga*
- (4) *ekatobhogin*
- (5) *ubhayatobhogin*, and
- (6) *sarvatobhogin*

In the first three classes, the help rendered by the self submitter consists in giving the dominator men and wealth, while in the last three, it accrues from the self submitter remedying the evil arising to the dominator from his enemies or from the friends of those enemies. The passage bearing on *ubhayatobhogin* (p. 310) is corrupt, for unlike the preceding and the succeeding sentences relating to *ekatobhogin* and *sarvatobhogin* respectively, it has the verb "*upakaroti*" instead of "*pratīkaroti*"

The paragraph at p. 310, immediately following the above passages, is also intended for the guidance of the self submitter. Should he have to encounter a rear enemy, or other hostile parties conciliable by gifts of lands during the aforesaid military expedition carried on under the orders of the dominator, the lands given them for the purpose should be such as might put them to trouble or offer them minimum of military or other advantages of which they might be in need. The paragraph has also in view cases in which gifts of lands are to be made to parties like "*apavāhata*," and "*gatapratydgata*." The gift of land to the dominator (*bhartṛ*) alone is advised to be of advantage to the dominator, inasmuch as the land should be free from people inimical to him.

## EPIGRAPHIC NOTES

BY HEMCHANDRA RAYCHAUDHURI, M.A.

## 1 Pārijāta and Govardhana

THE Daulatābād plates of the Rāshtrakūṭa Śaṅkaragana<sup>1</sup> after referring to Krishnarāja I say 'His son was king Govindarāja who like Hari snatched away the glory of Śrī Pārijāta and supported Govardhana'. The Pārijāta allusion is clear enough. But the references in the case of king Govinda are not so certain. Professor D. R. Bhandarkar, who edited the plates, has suggested the identification of Govardhana with the province of the same name mentioned in several Nāsik Cave inscriptions. But the identification of Pārijāta is yet uncertain. I propose to identify it with *Pārichāta* (=Pāriyātra=the Western Vindhya<sup>2</sup>) mentioned in the Nāsik *prasasti* of Gautamīputra Śātākarni.<sup>3</sup> The change of 'j' into 'ch' is not unusual in southern India. For instance the Western Ganga king Rājānalla<sup>4</sup> was also called 'Rāchamalla'.<sup>5</sup>

## 2 Supratishthāhāra

This name occurs in the Poona plates of the Vākātaka Queen Prabhavatī Guptā, edited by Prof. Pāthak and Mr. Dikshī<sup>6</sup>. The editors do not make any suggestion regarding the identification of the place. In the *Kathāsarīt-sāgara*<sup>7</sup> mention is made of a city named Supratishthita in Pratihāna (modern Parthan), which was the ancestral home of Guṇādhyā. There can be no doubt that Supratishthāhāra was the district (*āhāra*) round the city of Supratishthita. The inclusion of this district within the Vākātaka territory proves that the Vākātakas were not merely a dynasty of Berar but ruled over a considerable part of Mahārāshtra. As the dynasty lasted from about A.D. 300 to 500,<sup>8</sup> it is no longer correct to say that "for some three centuries after the extinction of the Andhra dynasty, we have no specific information about the dynasties that ruled over the country," i.e. Mahārāshtra.

## 3 Vira and Vardhana

The Deopārā inscription<sup>9</sup> records that Vijayaśeṇa impetuously assailed the lord of Gauda, put down the prince of Kāmarūpa, defeated Kalunga and imprisoned four kings, namely, Nānya, Vira, Rāghava and Vardhana. Nānya has been correctly identified with Nānyadeva of Tirhut, who lived in A.D. 1097 and afterwards established the Karmāṭaka dynasty in the valley of Nepāl. Rāghava is the Kalunga prince of that name, who reigned about A.D. 1156.<sup>10</sup> Vira and Vardhana have, however, not been satisfactorily identified. Dr. Smith suggests that Vira was a Rājā of Kāmarūpa. Unfortunately the evidence of Saundhyākara Nandī's *Rāmācharita* has not been utilised. In the long list of princes who helped Rāmapāla to recover Varendī we find the following names:

- 1 Viraguna of Kōṭāṭavi<sup>10</sup>
- 2 Vardhana of Kausāmbī
- 3 Vijayarāja of Nidīāvala

<sup>1</sup> *Epigraphia Indica*, IX, p. 193.

<sup>2</sup> 'Pārijāta' may also refer to the Pāriyātra country mentioned by Bāna (Cowell and Thomas, *Harshacharita*, pp. 210-211).

<sup>3</sup> *Ep. Ind.*, VIII, p. 60.

<sup>4</sup> *Ep. Ind.*, XV, p. 39.

<sup>5</sup> V. A. Smith, "The Vākātaka dynasty of Berar," *JRAS*, 1914, pp. 317-328.

<sup>6</sup> *Ep. Ind.*, I, pp. 307-311.

<sup>7</sup> V. A. Smith, *The Early History of India*, 1914, p. 419.

<sup>8</sup> Race, *Mysore and Ooorg from the Inscriptions*, p. 12.

<sup>9</sup> Tawney's translation, p. 32.

<sup>10</sup> *Mem. ISB*, III, pp. 36-37.

Let us try to ascertain the date of these princes. We learn from the Trimalai Rock Inscription<sup>11</sup> of Rājendra Chola I that Mahipāla I was reigning in or about A D 1025. The Sarnāth inscription gives a date for him in A D 1026.<sup>12</sup> His son Nayapāla ruled for at least 15 years (as we know from the Krishnadevārikā temple inscription).<sup>13</sup> Nayapāla's son Vigrahapāla III could not therefore have come to the throne before A D 1026+15=A D 1041. He ruled for at least 13 years (see the Āmagāchhī Grant<sup>14</sup>) i.e. up to at least A D 1054. After him came his sons Mahipāla II and Śūrapāla II, and the Karvitas Divvoka, Rudoka and Bhūma and finally Rāmapāla who ruled for at least 42 years.<sup>15</sup> It is obvious that Rāmapāla reigned towards the close of the eleventh century and early in the twelfth century. The princes Vīra, Vardhana and Vijaya who helped him must have flourished about the same time.

We learn from the Nābhātī Grant<sup>16</sup> of Vallāla Sēna that his ancestors were ruling in South-west Bengal (Rādhā)<sup>17</sup> long before the establishment of their paramount sovereignty by Vijayasēna's victory over the Pāla king of Gauda. We know further from the Deopārā inscription that Vijayasēna was a contemporary of Nānyadeva who flourished about A D 1097. There can be no objection in identifying him with Vijayarāja of the Rāmacharita who lived about the same time and ruled over a principality in the Gauda empire.<sup>18</sup> If this identification be correct, then Vīra and Vardhana must be Viraguna of Kotāṭavi and Vardhana of Kausāmbī. It seems reasonable to conclude that during the weak rule of the sons of Rāmapāla, the kinglets of the Gauda Empire who helped Rāmapāla to regain his throne, engaged in a struggle for supremacy<sup>19</sup> in which Vīra, Vardhana, the rājā of Kāmarūpa and the lord of Gauda himself became worsted, and Vijayasēna established the supremacy of his own family.

The conqueror's authority was probably next challenged by Nānva and Rāghava, the rulers of the neighbouring kingdoms of Mithilā and Kahnga, who were also defeated and imprisoned.

## MISCELLANEA

### CORPORATE LIFE IN ANCIENT INDIA

I am thankful to Mr R. Shamasastry for having kindly reviewed my book *Corporate Life in Ancient India* in the February issue of this *Journal* and recommended it to the public in rather flattering terms. I may be permitted, however, to offer some remarks in reply to his specific objection to the title of my book, and my inference from and translation of, some Sanskrit passages contained therein.

Mr Shamasastry thinks that "Self governing institutions in Ancient India" would have been a more suggestive and attractive title. This very

point has been discussed at some length by Mr Pargiter in the course of his review of my book along with another dealing with the same subject but entitled *Local Government in Ancient India*. Mr Pargiter thinks that the title of my book describes its scope rightly, while the other has assumed too ambitious a title, for the title "Local Government" may hold good for large popular councils where they existed, but certainly does not apply to all the other corporate activities, social, economic and religious. I do not, of course, mean that Mr Pargiter's opinion finally decides the matter, but I quote his statement as

<sup>11</sup> *Ep. Ind.*, IX, pp. 229—232.

<sup>12</sup> Smith, *Early History of India*, 1914, p. 399.

<sup>13</sup> *Op. cit.*, p. 122.

<sup>14</sup> *Mem. ASB*, V, p. 92.

<sup>15</sup> *Pravāhām Rādhām-akāśitacharav-bhāṣayanto-mūhāvarā*.

<sup>16</sup> The identification was first suggested by Mr N. N. Vasu.

<sup>17</sup> The Kamauli Grant of Vaidyadeva, minister and general of Kumārapāla, son and successor of Rāmapāla, refers to wars and rebellions in South Bengal and Kāmarūpa (see *Gaudālekhamdā*, p. 128 *et seq.*). Vijayasēna's principality lay in South-west Bengal. Viraguna's principality also lay in the south (cf. *Mem. ASB*, V, p. 89).

<sup>18</sup> *Gaudālekhamdā*, p. 115.

<sup>19</sup> *Ep. Ind.*, XIV, pp. 156—163.

it clearly expresses my point of view in the matter I fully endorse Mr Shamasastri's view that the title he suggests would have been more attractive, but while writing the book, the sense of his torical accuracy has always weighed with me more than any ideas of currying favour with the public.

As regards the wrong translation of certain Sanskrit passages, Mr Shamasastri does not quote any specific instance, but refers to pages 16 17 22 and 89 of my book. Pages 16 17 contain three Sanskrit passages, of none of which I have offered any translation. Page 22 again contains three Sanskrit passages. There is no translation of the first of these, while that of the second is mainly based on that given in *SBE*, Vol XXXIII p 348, with slight modifications such as the substitution of 'guild' for 'company' as an English equivalent of the word *śrenī*, to which I believe no exception can be taken. The third is a simple prose passage which offers no difficulty at all. There is no translation of any Sanskrit passage on p 89, but it appears that Mr Shamasastri demurs to the interpretation of the word *vairāḍya* as denoting a non-monarchical form of government and takes it to mean foreign rule on the authority of a passage in *Arthasāstra*, p 323. It must be remembered, however, in the first place, that the responsibility for the particular interpretation attaches to Mr Jayaswal and not to me as it is clearly stated in the text that "the term *vairāḍya* which has been explained by Mr Jayaswal as 'King-less states' has been taken by Messrs Macdonell and Keith as denoting some form of royal authority." In the second place, the use of the term *vairāḍya* in a particular sense in *Arthasāstra* is no decisive argument against taking it in a quite different sense in an earlier text like *Awareya Brāhmaṇa*, specially when the later sense is hardly applicable to the earlier text. Any one who reads the particular passage quoted on p 89 of my book will probably find it difficult to offer any consistent interpretation of it, if the word *vairāḍya* is taken in the sense of a foreign rule, as Mr Shamasastri proposes.

Then, as regards wrong inference Mr Shamasastri thinks that the expression *viśām pati* does not at all imply the importance of the popular element in the government as inferred by me. But as I have already pointed out in the text, the substitution of the expression 'king of the French' for the old 'king of France' indicated a considerable difference in the importance of popular element in the government, and there is no reason why similar implications may not be inferred from similar phrases in the Vedic literature. It is true that such expression is apt, in course of time, to be converted into stereotyped designation of the king, but it is not unreasonable to assume that, to begin with, it actually corresponded to some real political notion.

Mr Shamasastri thinks that there is no reference in the Cow-hymn, quoted on p 45, to any assembly, as stated by me. He has apparently overlooked verse 15 of the hymn which contains the word *samiti*. Both Bloomfield and Whitney have rendered it by 'assembly,' and their translations are given in my book the passage in question being put in italics (p 16, ll 10 11). It is just possible however, that Mr Shamasastri takes the word *samiti* in the passage in a different sense. But, even then, in view of the undeniable fact that *samiti* is used in other hymns in the sense of assembly and has been rendered as such in the passage in question by scholars like Whitney and Bloomfield it appears to me to be somewhat dogmatic to assert that 'there is no reference in the Cow hymn to any assembly.'

Mr Shamasastri observes that the word *sabha* was in many places used in the sense of a gambling rather than a political meeting." But I have stated this on p 17, paragraph 6.

Mr Shamasastri observes that in noticing the corporate activities in religious life I have confined my attention only to the Buddhistic and omitted the Brahmanic and other communities. This is not a quite correct statement of facts. On pp 123 24 I have drawn prominent attention to the fact that religious corporations existed before Buddha's time and have cited evidence to show that religious corporations were already a well known factor of society in Buddha's time, and the celebrated *samgha* of the latter was not a new creation but merely a development upon the existing institutions. I have again pointed out on p 142 that other religious communities too led corporate lives, and have referred to a number of such corporations on pp 123, 124 and 142. It is true that I selected Buddhist *samgha* alone for detailed description, but for this I have assigned reasons on pp 124 and 142.

Lastly Mr Shamasastri remarks that my description of the evolution of caste is somewhat confused for want of a clear chronological analysis of the subject. I do not wish to meet such a general charge and shall therefore content myself by merely pointing out that I have arranged the texts bearing upon caste according to distinct literary periods and have fully discussed their chronological order in the Introduction.

In conclusion I beg to submit that although it is unusual for an author to reply to the criticism of his book, it becomes necessary in the present case as the points involved are mainly of scholarly interest and also of general importance to the students of Indian history. Besides, I have a good precedent in the reply of the late Dr V. A. Smith to Prof Sten Konow's review of his *Early History of India* in this *Journal* (1918, pp 178, 371).

chîm (da) 9 agreeable smell ôt-âu-bêringa (da) 10 disagreeable smell ôt âu-jâbag (da)

**smile**, (v i) ôko-môchri (ke), ôko-mûchri (ke), kêmria (ke)

**smite**, (v t) See strike, kill

**smoke**, (v t) . mō'la l'en-ōyu (ke)  
(v 1) 1 of a fire or volcano mō'la-  
ōyu (ke), mō'la-tūpu (ke) 2 s tobacco  
tūpu (ke), ōyu (ke) (s) 1 mō'la  
(da) [Compare with words for string,  
egg and straight] 2. column of smoke  
wîludanga (da) (p p) blinded by  
smoke 11-mûjûre

**smooth**, (v t) 1. lingati (ke)  
2 s a planed surface pûlau (ke)  
(adj) 1. s of a calm sea lia (da)  
2. s of a plain surface lingriya (da)  
3. s of a polished surface gêligma  
(da) See polish

**smother**, (v t and v 1) See suffocate

**smut**, (s) See soot

**snail**, (s) êrem-ôla (da)

**snake**, (s) jôbo (da)

**snap**, (v t) 1. break short tōp  
(ke), tōpati (ke) 2. snap a bowstring  
against the bow chirana (ke)  
3 snatch See snatch 4. try to bite, as  
a dog ig-kârap (ke) (v 1) 1 owing  
to strain ôyun tēmar-tōp (ke) 2.  
owing to force applied with the teeth  
11-kârap (ke)

**snatch**, (v t) jûr-baring'1 (ke)

**sneer**, (v 1) express contempt by a sneer  
or sniff 11 ingri (ke)

**sneeze**, (v 1) chiba (ke) (s)  
chiba (da)

**sniff**, (v 1) 1. as when smelling  
nû-ruch (ke) 2. when expressing contempt  
See sneer

**snivel**, (v 1) run at the nose ig-  
fîlhb-l'âkâ-nat (ke) (s) from the nose  
ig-fîlhb (da)

**snore**, (v 1) gōrawa (ke)

**snout**, (s) ig-chōronga (da)

**snuffle**, (v 1) breathe hard through the  
nose ôko-ōrōija (ke)

**so**, (adv) 1. thus, in this way .  
kian-âri (da), in that way ekâra (da),  
kian-ûba (da) I stitch so (in this way),  
but he in that way dô kianâri jâtke, dôna  
ôl ekâra (da) 2. on account of this or that,

consequently kian châ (da), ngâ (da)  
See Ex at carry (correl) châ (da) See  
Ex at as and App 1. 3 so (or this) much  
kian, kian-wai (da) so big (lit  
this-much-big), indicating by means of the  
hand kianwai-dôga (da) so small  
kianwai-kêta (da) 4 so (or this)  
many kian-chaia (da) 5 so much  
(correl) ûchu-tûn (da) See as

**much** (rel) in App 1 As much honey as you  
give me, so much resin will I give you  
kâ-tûn âja ngô den mân ûchu-tûn iim dô ngen  
mân (ke) 6 so many (correl) ûchichâ-  
tûn (da) See as many (rel) in App 1.  
7 extremely bōtaba The water is  
so cold ina wai rîtpa bōtaba See very 8  
(Phr) Just so! ûba (da), kichikan-ûba (da) !  
See of course Is it so? an ûba (da)? So  
it is! an a-keta !

**soak**, (v t) ig-yōp (ke) (perf ig-  
yōbre) as wood or jack-fruit seeds to soften  
them (v 1) ôto pi (ke)

**soar**, (v 1) fly aloft i-tâj (ke) See  
ascend

**sob**, (v 1) ônaba (ke), nōrot (ke)

**sociable**, (adj) ig-lōringa (da)

**socket**, (s) of pig-arrow or harpoon  
âkâ-chânga (da) See spear

**soft**, (adj) 1. of cotton, sponge, wax, etc  
ôt-yōb (da) 2. of flesh ab-yōb  
(da), takes prefix of part of body referred to  
See App 11

**soften**, (v t) . yōp (ke)

**softly**, (adv) See quietly

**soil**, (v t) gûj (ke), lada (ke) (s)

1. ground, earth gara (da) 2 mould  
pâ (da) 3 stony s el-ôt tâ  
(da)

**sojourn**, (v 1) poli (ke), pâli (ke)

**sole**, (s) of foot ông-elma (da) See  
App 11

**sole**, (adj) See alone and only

**solely**, (adv) See only

**solemn**, (adj) ab (or ôko)-mûku-  
ringa (da)

**solen vagina**, (s) . jûruwin-l'âka-  
bang (da)

**solitary**, (adj) See **alone, lonely, and only**  
**solid**, (adj) not hollow âr lûa-ba (da)  
**some**, (adj) of indeterminate quantity  
 ûtan-ârek (da), ânek (da) Give me  
 some food *ûtan-ârek yât den â*

**some**, (pron) certain persons known or  
 unknown . ed-îkpōi (da) Some like  
 hunting pigs, but (some) others prefer har-  
 pooning turtles *ed-îkpōr ût'-len yâmalike,*  
*dôna ôkot-tôrobûya yâdi-lôbinga-len i-târ bûi*  
 (ke) some of us . med'îkpōi (lit we two)  
 some of you . . . nged ikpōi (lit you two)  
 some of them . ed-îkpōr (lit they  
 two) The day before yesterday some of  
 us jungle-dwellers, squatting ourselves in  
 the canoe, went with the coast-men in order  
 to see them harpoon turtles *târdîlêu med'*  
*îkpōr êremtâqa, ôdam len arat-ûchu-blanga*  
*bêduq, âryôto l'ôtot-pachalen yâdi-dût-yâte*  
*l'itig-bâdîngga l'eb âkangave* Some of them  
 died, but the remainder (the others) recov-  
 ered *ed-îkpōr oko-lire, dôna arat-dûlu tîgbôre*

**some-body**, (s) some one . ûchin (da)  
 See ' somebody is coming this way *war*  
*gêlib ' ûchin kach onke*

**somehow**, (adv) in some way or other  
 ûchin-ârek (da) Do it somehow *ngôl*  
*ûchin-ârek ôyoke*

**some more**, (adj) additional (of anything)  
 ôt-ñâ (da)

**some other**, (adj) . ôko-tôro bûya  
 (da) Bia took some other bow *bîa kârama*  
*l'ôko-tôro-bûya enure.*

**something**, (s) mîn (da) He is in  
 the habit of giving me something when he  
 pays me a visit here *kârin ar-lônga len ôl*  
*ôko-jaranga den mîn mânke*

**some one** See **somebody**

**some time or other**, at (adv) (a) in the  
 indefinite past âchin-baiya (b) in  
 the future â-rêringa (len), târôlo  
 (-len), ñgâtek At some time or other God  
 lit a fire at Barren Island (there is a volcano  
 there) *âchin-baiya pûluga môla-târchôna*  
*len châpa l'ôko-jôire* The modern name of  
 this island is taili-châpa (lit stone-fuel)

**sometimes**, (adv) (a) in the past  
 âchin-ya (b) in the future ñgâtek-  
 ñgâtek He was sometimes indolent *ôl*  
*âchinya ab-wêlab l'edâre* We will sometimes  
 visit your encampment *ñgâtek ñgâtek nqûa*  
*bâray len marat lôr (ke)*

**somewhere**, (adv) 1. kâtin-êr-len,  
 ôt-êra len 2. somewhere there, thereabout  
 ûchum (da), ûchumen (da) It is  
 not with me, it is somewhere there *d'ôl*  
*pachalen yâba (da), ûchumen (da)* 3 some-  
 where or other ûchum ânek He is  
 hunting turtles somewhere or other *ôl*  
*ûchum-ânek yâdi lôbîke* 4. somewhere near  
 . ûchum-ya-pâlen

**son**, (s) 1. under three years of age  
 ôta (da), (lit testes) 2. over three years of  
 age (a) in relation to the father ar-  
 ôdire, ar-ôdi-yâte (da) See **beget** (b) in  
 relation to the mother ab-êtire, ab-  
 êti-yâte (da), ab-wêjine, ab-wêji-yâte (da) His  
 (honorific) son and her (honorific) daughter  
 are coming tomorrow morning with my father  
 and younger brother *lûtiya mar (a)-l'arôdire*  
*chân(a) l'abêti-yâte-parl d'ab-marola d'âka-*  
*kâm itik onke* Whose sons are returning to  
 their homes today? *mîyî arat-ôdire kawai uîy*  
 (ke)? See App VII and VIII

**son-in-law**, (s) ôlôniya (da) See  
 App VIII for terms denoting relationships

**song**, (s) râmîd (da) (in construc-  
 râmît), râmît-pâkîta (da) Wologa's song  
*u ôlog'ia râmît (da)*

**soon**, (adv) 1. shortly See **by**  
**and by, presently, later on** 2. as soon as  
 (whenever, at such time as) iel . kîan-  
 êrûbahk See **Ex at time** and App I

 (da) 12, s of crunching hard food, as nuts,  
 crackling, etc ôt-kât walangi (da)  
 13, s caused by singeing hair or feathers,  
 etc ôt-êr-êchanga (da) 14 s of  
 bamboo cracking in the fire, or any explosive  
 sound tûchungâ (da) (adj) without  
 defect ôt-gôro-jum (da)  
**sounding-board**, (used to mark time in  
 dancing) pûkuta-(l'ôt-)yemnga (da)  
 See App xii

**soundly, sleep.** See **sleep**  
**soup**, (s) ab (-dama)-rai (da).  
**turtle-soup** yâdi-l'ah rai (da).  
**sour**, make or cause to become (v t)  
 ig-mâka (ke) (v i) be or become  
 iji-mâka (ke) (adj) ig-mâka-  
 nga (da) of unripe fruit tiripa  
 (da) See **unripe**  
**sourness**, (s) ig-mâka-yôma (da)  
 See **quality**  
**source**, (s) See **spring**  
**south**, (s) eliglâ (da) south-west  
 wind dêria (da) south-west mon-  
 soon gûmul-tâ (da)  
**sow**, (v t) seed yât-bûguk (ke)  
 lit food-bury  
**sow**, (s) female pig rôgo (da) See  
**pig** 2, that has had one or more litters.  
 rôgo chôn-châu (da) 3, of unusual bulk  
 rôgo-l'ông-chûn (da) 4 barren  
 rôgo-lûga (da).  
**space**, (s) 1, area, tract, place  
 êr (da) in construc sometimes el, see **Anda-**  
**man Islands** cramped, narrow space  
 êr-chôpaua (da)  
**spacious** See **roomy**  
**spade**, (s) gara-jêrlanga (da).  
 This term is applied to the “wôlo” (see **adze**,  
 when used for scooping earth See App  
 xiii  
**span**, (v t) measure with the extended hand  
 ôko-dûgap (ke) (s) space between  
 outstretched thumb and little finger  
 ôko-dûgap (da)  
**spare**, (v t) 1 bestow, allow ar-lôda  
 (ke) (reflex) See Ex at **much** As you have no  
 yolba fibre I will (therefore) spare you all  
 this *ngôt-parchalen yôlba yâba l'edâre kianchá*  
*dô kian ârdûru d'arlôdake* Can you spare  
 me so much? *an ngô den kian ng'arlôdake*?  
 2 spare from injury ôt-tid-dûbu (ke).  
 See Ex at **although**, **crush**, **hut** (adj) See  
**thin**  
**spark**, (s) from burning wood  
 châpa-l'ig-bêia (da), bûbra (da) See **dust**  
**sparkle**, (v i) bêtêl (ke), kar (ke)  
**spawn**, (s) (yât-l'ia-) bêtêl (da)

**speak**, (v t) declare, address words  
 yâbnga târchî (ke) God spake these words  
 (lit thus words said) *pûluga kîan-âi yâbnga*  
*târchîre* (v i) utter words, talk yâp  
 (ke) Is my father speaking? *an d'ab-*  
*châbul yâpke*? See read  
**speaker**, (s) yâbnga-târchî yâte (da)  
**spear**, (v t) 1 turtle, skate, etc (a) only  
 one jêrali (ke), (b) more than one  
 dût (ke) We speared many turtles, I  
 killed two and Punga and Bia the others  
*meda yâdi jibaba dûtire, dô ikpôr tôlgare,*  
*pûnga ôlbédig bia l'ôtoi-dûlu* (da) 2 pig  
 êr-dût (ke) (s) 1 turtle-spear (harpoon)  
 kowala-l'ôko-dûtnga (da) The thick  
 end of the long bamboo haft is called âr-  
 bôrod (da) and the socket end âkâ-chângâ  
 (da) This harpoon consists (a) of the tóg  
 (da), a long bamboo haft at the thin end  
 of which a socket is provided for the (b)  
 kowala (da), which is a short iron harpoon  
 deeply notched or barbed These two parts  
 are connected by means of a long line (c)  
 bêtmo (da) See Ex at bow of canoe 2.  
 pig-spear êr-dûtnga (da), galâm (da)  
 See App XIII  
**speckled**, (adj) î tōna taninga (da)  
 bâratnga (da)  
**spectator**, (s) ig-bâdig-yâte (da),  
**spectators** idal-ârdûu (da), ig-bâdig-  
 yâte-l'ông-kâlak (da)  
**spectre**, (s) ghost See spirit

## THE HISTORY OF THE NIZÂM SHÂHI KINGS OF AHMADNAGAR

BY LIEUT-COLONEL T W HAIG, CSI, CMG, CBE

(Continued from p 167)

XXVII—AN ACCOUNT OF THE COMING OF SULTÂN BAHÂDUR OF GUJARÂT TO THE DAKAN,  
AND OF HIS RETURNING WITHOUT ACCOMPLISHING HIS OBJECT

It has already been mentioned that when 'Imâd-ul-Mulk, the governor of Berar, was defeated by the royal army at Vâlor and fled before them, he found it difficult to escape from them, and therefore in his terror fled and took refuge with Sultân Bahâdur, the king of Gujarât, who at that time excelled all the kings of Hindûstân in the strength of his army and the state which he maintained, and appealed to him for assistance, doing his utmost to stir up strife by representing the conquest of Burhân Nizâm Shâh's dominions as an exceedingly easy matter. For a long time Sultân Bahâdur hesitated and neglected to return an answer to 'Imâd ul-Mulk's request, or to further his object, but at length he was deceived and beguiled by 'Imad ul-Mulk's tales and the desire of conquering the Dakan took possession of his heart, and he collected a very numerous army.<sup>69</sup>

Sultân Bahâdur then marched from Gujarât to Daulatâbâd and encamped before the fortress. His *amirs* and officers of state incited him to capture the fortress by saying that as soon as it was in his hands the submission of the Nizâm Shâhi dominions would follow as a matter of course, as Daulatâbâd was the stronghold and the greatest fortress of that country. Sultân Bahâdur accordingly laid siege to the fortress, but though the siege was

<sup>69</sup> Sayyid Ali has confused the sequence of events and has thus failed to explain the circumstances which led to the invasion of the Dakan by Bahâdur Shâh of Gujarât.

In 1526-27 (see note 62) 'Alâ ud din 'Imâd Shâh of Berar, encouraged by Ismâ'il 'Âdil Shâh of Bijapur and assisted by Sultân Qulî Qutb Shâh of Golconda, recovered Pâthri, which he had lost in 1518. Burhân Nizâm Shâh allied himself with 'Ali Barid of Bidar and again captured the place, after a siege of two months. They then advanced to Mahûr, captured that fortress, and marched towards Lichpûr. 'Alâ ud din' who was not strong enough to withstand them, fled to Burhânpûr and sought help of Muhammad Shâh I of Khândesh, who joined him and marched with him to meet Burhân and Amîr 'Ali Barid. A battle was fought in which Muhammad and 'Alâ ud din were defeated. They fled to Burhânpur, after losing 300 elephants. From Burhânpûr they sent envoys to Bahâdur Shâh of Gujarât, entreating him to assist them, and Bahâdur, seizing the opportunity of intervening in the affairs of the Dakan, set out in 1528, marching by way of Nandurbar. He drove Burhân and Amîr 'Ali Barid out of Berar, but lingered so long in that country as to excite the apprehensions of 'Alâ ud din, who urged him to hasten on towards the Ahmadnagar dominions.

Burhân was much alarmed and appealed to Ismâ'il 'Âdil Shâh and Sultân Qulî Qutb Shâh to assist him in repelling the invaders. He even wrote to Bâbur, who had recently conquered Delhi, for help. Sultân Qulî was too much occupied with a campaign against the Hindûs to be able to spare any troops, but Ismâ'il sent 6,000 good cavalry, which force was joined by Amîr 'Ali Barid of Bidar with 3,000 horse of his own.

Bahâdur advanced, but his objective was Burhân's army, encamped in the hilly country about Bîr, not Daulatâbâd. Amîr 'Ali Barid inflicted two defeats on his army between Parthian and Bîr, but he continued to advance, and Burhân retired from Bîr to Parendâ, and, being pursued thither, to Junnâr. Bahâdur then occupied Ahmadnagar, where he remained for forty days, and built, in this time, the large platform known as the *Kâla Chabûtra* or 'black platform'. Meanwhile, Burhân's army was engaged in cutting off Bahâdur's supplies and it was when the army in Ahmadnagar had already begun to feel the pinch of hunger that his *amirs* urged him to complete his conquest by reducing Daulatâbâd and he accordingly marched thither, and opened the siege. Burhân, who had obtained another contingent of 500 horses from Ismâ'il, and Amîr 'Ali Barid encamped in the hill above Daulatâbâd. See *ZW*, i, 151.

It was now that Shaikh Ja'far was dismissed from the office of *vakil* and *pishâ* and Kânih Narsi the Brâhman, perhaps a relation of Burhân, appointed in his place. See *ante*, p 165.

prosecuted with the utmost vigour and caution, there appeared to be no prospect of the reduction of the fortress, for Manjan Khân, son of Khairât Khân, who was at that time the *kotwâl* of the fort, was a valiant and energetic soldier, and devoted all his energies to the defence.

At this time Malik Barîd, ruler of the country of Bidar, who was noted among the *amîrs* of the Dakan for his bravery and valour, wrote to 'Imâd Shâh, with whom he was connected, saying that although there might be some cause for the quarrel between him and Nizâm Shâh, he had shown little wisdom in undermining the foundations of his own house and of his own sovereignty, for it was evident to anybody with any sense, that if Sultân Bahâdur conquered the Nizâm Shâh kingdom, 'Imâd Shâh would not reign long in Berar. He advised 'Alâ ud-dîn 'Imâd Shâh to settle his quarrel with Burhân Nizâm Shâh peaceably, so that by this means the enemy might be induced to abandon his design of conquering the Dakan.

'Alâ-ud dîn 'Imâd Shâh, on thinking over the matter realized that his alliance with Sultân Bahâdur was not likely to bring him anything in the end but ruin and repentance, and he therefore began to play Sultân Bahâdur false. He withdrew his camp to a short distance from that of the Gujarâtis and secretly sent a message to Manjan Khân, saying that although he had cause of quarrel with Burhân Nizâm Shâh, he would not leave him defenceless, and would never permit the conquest of his dominions by the ruler of Gujarât. He encouraged Manjan Khân to resist the besiegers boldly, promising him that when the time came, the army of Berar would fight for him and not for the Gujarâtis.

Manjan Khân was much cheered and encouraged by the receipt of this news and opposed the Gujarâtis more stoutly than before, making daily sorties from the fort and killing many of them. At last the Gujarâtis grew heartily weary of the siege and all of them clearly showed that they were disheartened, for they had realized that the attempt to capture that fort could bring them nothing but shame. Sultân Bahâdur then summoned 'Imâd ul-Mulk and all his *amîrs* to his presence, and after they had made their obeisance, he consulted them as to the best method of capturing the fort. 'Imâd ul-Mulk, who was now most anxious that Sultân Bahâdur should retire, said that he had been opposed to the siege from the first, but that as the Sultân had ordered it, he did not like to say anything against it, lest he should be suspected of having some purpose of his own to serve. Now, however, that he was consulted, he made bold to offer his opinion as to what was the best course. He said that nothing was to be gained by allowing the army to waste its strength in attempts to capture the rock fortress, that the best thing was to abandon the field and bring Burhân Nizâm Shâh to battle, for it was certain that he could not withstand Sultân Bahâdur's army in the field, and his defeat would be sufficient to cause the surrender of all the forts in the Dakan.

As all were sick of the siege, 'Imâd ul-Mulk's advice was generally approved, and Sultân Bahâdur, by the advice of his *amîrs* and officers, abandoned the siege and turned his attention to the conquest of the district of Bîr.<sup>70</sup>

<sup>70</sup> Sayyid 'Alî has placed the campaign in the Bîr district after the siege of Daulatabad. This is not correct. The *amîrs* of Burhân and Amîr 'Alî Barîd descended from the hills on one occasion and attacked the army of Gujarât. They gained an initial advantage, but on the arrival of reinforcements sent by Bahâdur were defeated and driven back into the hills. They now opened secret negotiations with 'Alâ ud dîn 'Imâd Shâh of Berar and Muhammad Shâh of Khandesh. With the former, who already bitterly regretted having brought Bahâdur to the Dakan, they had not much difficulty, and he readily agreed to change sides. He first sent large quantities of supplies into Daulatabad and then, leaving his camp standing, retired suddenly into Berar.

‘Imâd-ul-Mulk then sent a message to Manjan Khân, saying that he had, by the exercise of no little ingenuity, succeeded in persuading the Gujarâtis to abandon the siege, and urging Manjan Khân to sally from the fortress as they departed, attack the rearguard, and plunder the baggage, in order that Sultân Bahâdur might be convinced of the bravery of the Dakanis and might abandon the attempt to conquer the Dakan. ‘Imâd-ul-Mulk also sent a message to Burhân Nizâm Shâh saying that love and friendship had always existed between them and that he was at one with Burhân Nizâm Shâh in the endeavour to drive the strangers forth from the Dakan, the rulers of which were, in fact, all of one family. He advised Burhân Nizâm Shâh to march, together with Malik Barid, towards the Gujarâtis and to attack them, and promised that he could draw his army off from Sultân Bahâdur’s and attack the enemy in flank when the battle was at its height, so that the strangers would be overpowered.

When Sultân Bahâdur marched from under the walls of Daulatâbâd, Manjan Khân, with a force from the fortress, fell upon the Gujarâtis and put very many of them to the sword, and this daring act created a great impression on Sultân Bahâdur and his army.

When the news of Sultân Bahâdur’s march reached Burhân Nizâm Shâh, who was already apprized, by the letter which he had received and by the news of what had taken place at Daulatâbâd, of ‘Alâ-ud-dîn ‘Imâd Shâh’s change of sides, he summoned Malik Barid and all the *amîrs* and the officers of his army, and ordered them to assemble their troops. A very large army assembled, and the king marched with it to attack the army of the enemy. Burhân Nizâm Shâh placed Malik Barid in command of the advanced guard and followed him with the main body of the army.

The armies met in the neighbourhood of Bîr, and Malik Barid, with the advanced guard, fell at once on the Gujarâtis, and a fierce battle began to rage. Malik Barid drove the advanced guard of the Gujarâtis back on their main body, and when he found that the main body under Burhân Nizâm Shâh had not arrived, he fell back and joined it, and the whole army then marched against Sultân Bahâdur’s army.

A fresh battle now began. Some divisions of the army of Gujarât, which had advanced beyond the rest, could not withstand the attack of the Dakanis and fled crabwise from the field, escaping sideways. One half of the Gujarâtis was thus put to flight, and of the Dakanis, ‘Alam Khân the elder, tasted martyrdom on this day. The battle continued until darkness put a stop to the fighting and the two armies retired to their camps.<sup>71</sup>

It now began to dawn upon Sultân Bahâdur that ‘Alâ-ud-dîn ‘Imâd Shâh, who had constantly incited him to attempt the conquest of the Dakan by representing that the army of the Dakan was contemptible and of no account, had played him false, for he had seen what havoc the headlong valour of Malik Barid and his small force had wrought among the brave *amîrs* of Gujarât and he bethought himself that if Malik Barid alone could shew such bravery, the whole army of the Dakan under Burhân Nizâm Shâh would not be easily dealt with. He began, therefore, to repent of his expedition to the Dakan and thought of laying hands on ‘Imâd-ul-Mulk, but ‘Imâd-ul-Mulk had anticipated this intention and had withdrawn himself and his army to the distance of one stage from Sultân Bahâdur’s camp. He sent a message to Sultân Bahâdur, reminding him that he had formerly told him

<sup>71</sup> This is evidently a garbled account of the battle fought in the neighbourhood of Daulatâbâd, in which Burhân and Amir ‘Alî Barid were driven back into the hills. ‘Alam Khân the elder, who was killed, was probably Ahmad Nizâm Shâh’s former candidate for the throne of Khândesh.

that if the two armies (that of Burhân Nizâm Shâh and that of Malik Barîd) united, matters would assume a very serious aspect, and that he now, knowing how affairs stood, had purposely withdrawn from Sultân Bahâdur's camp, for he was certain that his presence there could not fail to increase the resentment of the Dakanis against the invaders. He advised Sultân Bahâdur to retreat on Chânak Deo. Sultân Bahâdur had no alternative but to march, and when he reached Chânak Deo he heard that 'Imâd ul-Mulk had retired to his own country. This news caused him much anxiety and he bitterly regretted that he had been deceived by 'Imâd ul Mulk's words and had been induced to invade the Dakan. He now resolved to return to his own country, and prepared to march from the Dakan.

When news of Sultân Bahâdur's movement reached Burhân Nizâm Shâh, he returned with Malik Barîd to his capital.<sup>72</sup>

XXVIII—AN ACCOUNT OF THE MEETING BETWEEN BURHAN NIZAM SHAH AND SULTAN  
BAHADUR OF GUJARÂT, BROUGHT ABOUT BY SHAH TAHIR AND MAHMUD SHÂH OF  
BURHÂNPUR

It has already been mentioned that Sultân Ahmad Shah Bahri went to war with Sultân Mahmûd of Gujarât in defence of Mahmûd Shâh of Burhânpûr, and that the presence of his army prevented any damage from being inflicted on the state of Burhânpûr by the Gujarâtis.

Now, therefore, Mahmûd<sup>73</sup> Shâh of Burhânpûr, who was related to Sultân Bahâdur, was impelled by the gratitude which he owed to Ahmadnagar to make peace between Sultân Bahâdur and Burhân Nizâm Shâh, and to put an end to the strife and enmity which had been fomented and increased by 'Imâd-ul Mulk. He therefore sent an envoy to Ahmadnagar and besought Burhân Nizâm Shâh to send a wise, faithful, and experienced ambassador to Sultân Bahâdur's capital for the purpose of strengthening the bonds of peace. In like manner he sent an envoy to Sultân Bahâdur, imploring him to terminate the dispute and to open negotiations for peace.

Burhân Nizâm Shâh, with the concurrence of Mahmûd Shâh Fârûqî, sent Shâh Tâhir with numerous and valuable presents as an ambassador to Sultân Bahâdur. Before Shâh Tâhir arrived, Sultân Bahâdur had heard that he was the most learned man of the age, and that the emperor Humâyûn, when he wrote to him, used to seal his letter on the back of it,

<sup>72</sup> This is a very imperfect account of the circumstances in which Bahâdur withdrew from the Dakan. His situation there gave him some cause for anxiety. One ally, 'Alâ ud din 'Imâd Shâh, had deserted him; the other, Muhammad of Khândesh, had nothing to gain by a continuance of hostilities and was anxious for peace, and the rainy season of 1527 was approaching, so that if he remained where he was, retreat would be difficult, if not impossible, and he would be exposed to a combined attack by the five kings of the Dakan. Muhammad of Khândesh therefore opened negotiations for peace, and the terms on which it was granted were sufficiently humiliating to Burhân. Both he and 'Alâ-ud din were to cause the *Khutbah* to be recited in their dominions in Bahâdur's name, Pâthri and Mâhûr were to be retroceded to Berar, and the elephants captured from 'Alâ-ud-din and Muhammad were to be returned. Burhân, in order to rid himself of the invaders, caused the *Khutbah* to be recited once in Bahâdur's name, and Bahâdur retired, but he fulfilled none of the other conditions. Some time afterwards Muhammad of Khândesh called upon him to return the elephants, and he returned those which he had taken from Muhammad, but retained 'Alâ-ud-din's. Muhammad, having got all that he wanted, made no further attempt to obtain satisfaction for 'Alâ ud-din, but entered into an alliance with Burhân, and Pâthri, and, for a time, Mâhûr remained in the possession of Burhân.

<sup>73</sup> Mahmûd appears to be Sayyid 'Alî's stock name for the Khâns and kings of Khândesh. Having applied it to Dâ'ûd he now applies it to his successor Muhammad. Firishia says that Shâh Tâhir was sent to Gujarât in A. H. 936 (A. D. 1529-30).

out of respect for him, and he therefore considered how he could fitly receive so learned a man who was so much honoured by the kings of the earth, for he feared that if he received him in a manner suitable to his eminence in learning, the honours paid to him might be regarded as honours paid to the ambassador of Burhân Nizâm Shâh, while if Shâh Tâhir's reception fell short of this, he might be suspected of not paying due respect to learning and excellence. At last he decided to receive Shâh Tâhir unceremoniously while walking in his garden.<sup>74</sup>

After Shâh Tâhir had thus been honoured with an interview with Sultân Bahâdur, he was treated with the highest honour and consideration, and, since Sultân Bahâdur delighted in his company, he would not give him leave to depart, and thus Shâh Tâhir remained for three years, or according to another account, for one year, with Sultân Bahâdur, and within this period Sultân Bahâdur formed the design of conquering the country of Mâlwa, and marched for Mâlwa with a numerous army. Shâh Tâhir accompanied him. He besieged the fortress of Mândû but the siege was prolonged and the Gujarâtis lay surrounding the fortress, for nearly six months. At length Mândû was captured by Sultân Bahâdur, and Shâh Tâhir then represented to the Sultân that he had been in attendance on him for a long while and had been treated with every kindness, but that the object of his mission was not, as yet, accomplished. Sultân Bahâdur asked him what that object was, and he replied that it was to arrange a meeting between him and Burhân Nizâm Shâh, in order that peace might be firmly established between them. Sultân Bahâdur asked whether His Majesty Burhân Nizâm Shâh would indeed meet him, and Shâh Tâhir replied that he certainly would, since that had been the object of the embassy. Sultân Bahâdur asked where he would meet him, and Shâh Tâhir replied that he would come as far as Burhânpûr. Sultân Bahâdur asked Shâh Tâhir to go at once to Burhân Nizâm Shâh and conduct him to Burhânpûr, promising to proceed thither in a leisurely manner, hunting by the way, so as to meet Burhân Nizâm Shâh there.<sup>75</sup>

Shâh Tâhir at once set out for Ahmadnagar and, on his arrival, told Burhân Nizâm Shâh that Sultân Bahâdur had promised to meet him in Burhânpûr. Some of the courtiers, who were jealous of Shâh Tâhir, discredited this statement and said that it was not likely that Sultân Bahâdur would come to Burhânpûr to meet Burhân Nizâm Shâh. Shâh Tâhir, however, insisted that his information was correct and urged Burhân Nizâm Shâh to go to Burhânpûr. Burhân Nizâm Shâh consented, and proceeded to Burhânpûr, while Sultân Bahâdur approached that city from the opposite direction and encamped in the garden of Mahmûd Shâh. When Burhân Nizâm Shâh reached the environs of Burhânpûr, Shâh Tâhir hastened on to wait on Sultân Bahâdur. He entered the garden and knocked at the door of the house where Sultân Bahâdur lodged. Sultân Bahâdur, perceiving who was

<sup>74</sup> This is not quite a correct account of Shâh Tâhir's reception. At first Bahâdur refused to receive any envoy from Burhân Nizâm Shâh on the ground that the latter had not fulfilled the terms of the treaty of Daulatâbâd, but had had the *Khutbah* recited only once in the name of the king of Gujarât and had then reverted to the practice of having it recited in his own name. Muhammad of Khândesh made excuses for Burhân, saying that he was bound to consider the susceptibilities of the other kings of the Dakan, and Bahâdur then consented to receive Shâh Tâhir, but showed him scant consideration. It was not until Khudâvand Khân of Gujarât had warmly eulogized Shâh Tâhir's piety, learning, and personal merits that Bahâdur received him with respect.

<sup>75</sup> Firishta says that the meeting between Sultân Bahâdur and Burhân Nizâm Shâh I took place after the capture of Mândû by Sultân Bahâdur and at the end of the rainy season. Mândû fell on March 28, 1531, and the two kings met, therefore, in October, 1531. F. II. 208, 431, 530 'Muhammad' should be read for 'Mahmûd' throughout this section.

there, asked whether Burhân Nizâm Shâh had arrived. Shâh Tâhir replied that he was in the environs of the town and was ready to do homage to Sultân Bahâdur. Sultân Bahâdur then told Shâh Tâhir to tell him that he would receive him that evening and also sent a message to Mahmûd Shâh saying that as the meeting between himself and Burhân Nizâm Shâh would take place in his dominions, it behoved him to attend to his duties as host, and to prepare a banquet for them in order that they might dine when they met. Mahmûd Shâh then prepared a splendid banquet.

Accordingly near sunset, Burhân Nizâm Shâh set out with a body of his most learned courtiers and a detachment of his army to pay his respects to Sultân Bahâdur, as it were the moon approaching the sun, and when they met, Sultân Bahâdur received him with all love, friendship, and honour. Burhân Nizâm Shâh then presented his *pîshkash* and gifts, consisting of elephants, horses, and valuable merchandise and stuffs of Khurâsân and Hindûstân. After that a sumptuous feast was spread for the two kings and food was distributed to all the troops.

[According to some accounts, Sultân Bahâdur, puffed up with the pride of his royal power and dignity and of the strength of his army, paid but little attention to Burhân Nizâm Shâh at their first meeting and did not even command him to be seated. Burhân Nizâm Shâh, observing the etiquette of the royal court, stood patiently where he was, and Sultân Bahâdur requested Shâh Tâhir to sit on his right hand. But Shâh Tâhir said that it would be improper for him to sit while his master remained standing, and the Sultân then, turning to Burhân Nizâm Shâh, asked him why he did not take his seat. Burhân Nizâm Shâh then sat down beside Sultân Bahâdur and entered into conversation, and in a short time all unpleasantness between the two kings was at an end. But this account can hardly be credited.]<sup>76</sup>

After that Sultân Bahâdur commanded that a green umbrella and *aftabqir*, such as are only used by kings, should be brought, and bestowed them on his guest, whom he addressed as Nizâm Shâh Bahrî. The Sultân's chief *amîrs* also praised Burhân Nizâm Shâh Bahrî, giving him the royal title, and all the other *amîrs* and those who were present in the assembly, offered him their congratulations on the honour that had been shewn him.<sup>77</sup>

They say that on that day Sultân Bahâdur said jestingly to Maulânâ Pîr Muhammad "*Tumhârî bazân kyâ kartî hai*," for the word *bazân* often occurs in the speech of the Dakanîs,—and Maulânâ Pîr Muhammad replied in the same vein, "*Tumhârî 'andâvalî 'kaun du'â kartî hai*?"<sup>78</sup> Sultân Bahâdur was much pleased with Maulânâ Pîr Muhammad's answer.

<sup>76</sup> Nevertheless it appears to be the correct one. According to Firishtâ the ceremonial arranged was that Sultân Bahâdur should be seated on his throne and should receive the homage of Burhân Nizâm Shâh. Burhân was minded, when he understood how he was to be humiliated, to turn homewards, regardless of the consequences, but Shâh Tâhir counselled patience and submission and told Burhân that he had a device for modifying the most humiliating part of the ceremony. He had, he said, a copy of the *Qur'ân* in the handwriting of 'Alî, the cousin and son-in-law of Muhammad. He would carry this with him, and Sultân Bahâdur would be obliged to rise and descend from his throne in order to do reverence to the sacred book. Accordingly Shâh Tâhir carried the copy of the *Qur'ân* on his head, and when Bahâdur, in answer to a question, was told what it was that he was bearing, he at once descended and did reverence to the sacred book.

<sup>77</sup> This was apparently regarded, by all present, as a formal investiture of Burhân with the royal title and insignia.

<sup>78</sup> These two questions mean "What is the meaning of your *bazân*?" and "What prayer does your *andâvalî* make?" *Bazân* seems to have been a common Dakanî corruption of *ba'd az ân*, 'after that,' but I have not been able to ascertain the meaning of *andâvalî*, which is probably some Gujarâtî word or Gujarâtî corruption of an Arabic or Persian word.

and rewarded him by giving him two horses, an Arab and a Turki. Burhân Nizâm Shâh then obtained leave to depart and returned to his own camp, but Shâh Tâhir stayed in the assembly for a short time after his departure and Sultân Bahâdur said to him, 'I dismissed Burhân Nizâm Shâh thus early lest fear should enter his mind.' Shâh Tâhir replied, 'His Majesty has never in any juncture known fear, nor does he know it now, but out of respect to the royal assembly he would not speak unceremoniously.' Sultân Bahâdur then asked whether His Majesty Nizâm Shâh could play polo, and Shâh Tâhir replied that whenever Sultân Bahâdur took a fancy to see a game of polo, he would see that Burhân Nizâm Shâh excelled all the soldiers and horsemen of the world in soldierly accomplishments, horsemanship, and boldness. Sultân Bahâdur then asked him to tell Burhân Nizâm Shâh that he would go out early the next morning to amuse himself by watching some polo and that Burhân Nizâm Shâh should also come out and watch the play of the valiant men. Shâh Tâhir then took his leave, hastened to the presence of Burhân Nizâm Shâh, and told him what had passed between himself and Sultân Bahâdur, saying that Sultân Bahâdur's object was to make trial of him, and advising him to disregard etiquette and to join manfully in the game and to do his best.

Early the next morning Sultân Bahâdur rode out towards the open plain, and Burhân Nizâm Shâh also, mounting his horse, rode out with a band of his warriors towards the plain. Here the two parties met and played polo. Burhân Nizâm Shâh distinguished himself above all others in the game, so that all spectators applauded, and Sultân Bahâdur and all his warriors were astonished at his quickness, dexterity and boldness, and dash, and, withdrawing from the game, watched him in admiration, praising and applauding him loudly.

When the game was over, both Sultân Bahâdur and Burhân Nizâm Shâh went to the former's camp and Sultân Bahâdur ordered his attendants to bring forth abundant gifts, cash, goods, horses, elephants, and whatever else might be worthy of the acceptance of Burhân Nizâm Shâh. These were produced by Sultân Bahâdur's order and were presented to Burhân Nizâm Shâh, who then asked for leave to depart. Sultân Bahâdur embraced him and gave him permission to depart, and he returned to his own camp. After his departure, Sultân Bahâdur summoned his singers and ordered them to go to Burhân Nizâm Shâh's camp and delight him with their singing, and also to make trial of him and see whether he was of ready understanding and quick in the uptake. They obeyed the order, and when they sang, Burhân Nizâm Shâh put questions to them and made apt interpolations in each couplet and each song that they sang, and the singers were astonished at the quickness of his wit and loudly praised him. He then gave them numerous presents and dismissed them. When the singers returned to Sultân Bahâdur's camp, they were loud in their praises of the ready wit and the generosity of Burhân Nizâm Shâh. So much did they dilate on them that some of the courtiers rebuked them and told them that it was both disrespectful and foolish to praise another than their master so extravagantly for wit and generosity. But Sultân Bahâdur acted justly and said that the singers spoke the truth, and that Burhân Nizâm Shâh excelled him both in understanding and generosity, for his own language was much the same as that of Gwalior, in which the poetry was written, while the language of the Dakan did not so much resemble that of Gwalior, and that his own treasure far exceeded that of Burhân Nizâm Shâh. Therefore, he argued, Burhân Nizâm Shâh's understanding every song and every couplet as it was sung, and his generosity in giving the great gifts which he had bestowed, though his treasure was but small, were sufficient proofs of the quick understanding and great generosity of that great and most generous king.

In truth, in respect of these two matters, the Sultân said no more than justice and truth demanded and was guilty of no distortion or exaggeration.

Some historians have related that the meeting of these two kings took place in a village near Daulatabâd and without the intervention of Shâh Tâhir, but by the advice and intervention of Khvâja Ibrâhîm, the councillor, and Sâbâjî, and that these two men were rewarded for the service which they had performed, the former with the title of Latîf Khân, and the latter with that of Partâb Râi, but the story told here at length is the correct account.<sup>79</sup>

After this meeting Burhân Nizâm Shâh returned to his capital, and Sultân Bahâdur returned to Gujarât.<sup>80</sup>

XXIX —AN ACCOUNT OF THE ESTABLISHMENT OF THE IMAMÎ RELIGION BY BURHÂN NIZÂM SHAH IN THE DAKAN, IN PLACE OF THE HANAFI RELIGION

It has already been mentioned that Burhân Nizâm Shâh spent much of his time with doctors of the faith of Muhammad and devoted all his attention to acquiring learning and spiritual excellence. He occupied himself in listening to the discussion of religious questions, and to the adducing of proofs, in order that he might acquire knowledge of God and an insight into the holy law and he was ever a seeker after the straight way, which is the means of pleasing God.

His object in thus associating with learned doctors of the faith was discrimination between truth and error, in order that the rust of doubt might be scoured from the mirror

<sup>79</sup> Sayyid 'Alî seems to be confounding two meetings, for it is highly probable that there was a meeting between Bahâdur and Burhân before the former retired from the Dakan, and there seems to be no doubt that this meeting took place at Burhânpur after Bahâdur's conquest of Mâlwa. Firishṭa says (ii, 431) that Bahâdur's object in conciliating Burhân was to obtain him as an ally in a scheme which he had formed for wresting the empire of Dihlî from the Taimurids, and this is highly probable. Bahâdur had recently added the kingdom of Mâlwa to that of Gujarât, Muhammad of Khândesh was his vassal, and it would have been strange if ambitious schemes had not been generated by his success. With Burhân and 'Alâ'ud-dîn of Berâr as his allies, he might not unreasonably hope for the success of such a scheme as he had formed, but a stronger than he was in the field, and Burhân was not won over. Firishṭa says that he even instigated Humayûn to attack Gujarât.

<sup>80</sup> Sayyid 'Alî omits all mention of the events which followed Burhân's return to his capital, probably because they reflect little lustre on Burhân's reputation. Amîr 'Alî Barîd had promised to cede Kaljyân and Kandhûr to Ismâ'il 'Adil Shâh, but had failed to keep his promise. Ismâ'il accordingly prepared, in 1531-32, to capture the two fortresses by force of arms, Burhân, at Amîr 'Alî Barîd's request, wrote to Ismâ'il asking him to desist, and Ismâ'il replied, with some warmth, that he had not interfered when Burhân had taken Mâhur. He added that he was going to inspect his frontier posts of Naldrug and Sholapur, and trusted that Burhân's officers would not be alarmed. Burhân's reply was couched in a haughty and menacing tone, and when Ismâ'il next wrote, he desired to know the reason for Burhân's change of tone. Was it the second-hand umbrella and tents of the kings of Mâlwa conferred on him by Bahâdur, or was it the title of Shâh by which Bahâdur had addressed him? If so, let him know that the royalty of the kings of Bijapur was recognized by a greater monarch, the King of Kings of Persia. The letter concluded with a challenge.

Burhân and Amîr 'Alî Barîd marched on Naldrug with an army of 25,000 horse and were utterly defeated by Ismâ'il, who had but 12,000. Three thousand of Burhân's army were slain and he fled from the field. In the following year (1532-33) Burhân and Ismâ'il met on the frontier of their kingdoms and, concluded a treaty, in accordance with the terms of which, Ismâ'il was to be allowed to annex the kingdom of Golconda and Burhân that of Berâr, but Ismâ'il died in 1534 and the treaty was held to have lapsed. F ii, 44, 45, 46, 211.

of his heart, which was a repository of divine mysteries. He did not, however, attain this object from association with the learned men who were in the service of the court. On the contrary, the discrepancies between their words and their deeds confused his mind and threw him into great perplexity. Since those learned men had no love for, nor devotion to, the king of saints (‘Alî) who is in Madinah the banner of God’s prophet and the guide to the path of true guidance, their learning was not profitable to the faith nor did it raise the pinnacle of assurance, nay rather, in its avoidance of setting forth the truth it was worse than compound ignorance, for their object in following that learning was not the discovery of the way of orthodoxy, and consequently their learning led them many stages away from what should have been their object.

When Shâh Tâhir gained admission to the royal court, he joined in the discussions on religion and the sacred law, in spite of the fact that he was compelled by circumstances to perform *taqiyyah*<sup>81</sup> and to conceal his true faith, but he would cite Shî‘ah authorities and attach all the importance to them that he could. Burhân Nizâm Shâh, by means of his natural acumen, suspected that the faith of Shâh Tâhir was not that of the folk of *Sunnat* and *Jamâat*,<sup>82</sup> and by means of God’s guidance began to realize that the religion of that true Sayyid was the true one and acceptable to the prophet of the ‘Arabs’. The king therefore called Shâh Tâhir to himself in private and straitly questioned him on all religious questions, and Shâh Tâhir returned such answers as left no doubt in the king’s mind as to his religious belief. The king then asked him straight out what his religion was, and Shâh Tâhir at first observed *taqiyyah* and dissembled, but the king said that it was perfectly evident that he was a Shî‘ah and asked what it profited him to conceal the fact. Shâh Tâhir said that he could not reveal a matter, the concealment of which had (in the circumstances in which he was placed) been decreed by the king of the saints, and that on this matter he could not make paper the confidant of the pen. The king then solemnly swore that his question was in no way connected with bigotry or obstinate preference for one form of religion, but was prompted by a sincere desire to discover the way of truth and release from ignorance and strife. He bade Shâh Tâhir to be in no way anxious, as nothing could be said or done that might be in any way distasteful to him. He said that he had long been perplexed by the differences between sects, and that none of the doctors at court had been able to free his mind from his doubts. When Shâh Tâhir had received these assurances he spoke more freely. He said that inquiry after the truth was incumbent on all men, and on none more than kings, who were the shadow of God on earth. On the king’s urging him to proceed, Shâh Tâhir revealed all that was in his mind. He reminded the king that Muhammad had said that among all the numerous sects of Islâm one should follow the way of salvation and the rest the way of damnation. He then pled the king with arguments to prove that the Shî‘ah religion was the way of salvation. He told him that ‘Alî *bin* Abî Tâlib was the undoubted successor of the prophet, and was followed by his son, Hasan, who was succeeded by his brother, Husain, and that they were succeeded by ‘Alî Zaimu l-‘Âbidîn, and that their descendants followed in succession, the last of them being the lord of the age, Abû-l-Qâsim

<sup>81</sup> A practice permissible according to the tenets of the Shî‘ah sect of Muslims. It consists in concealing one’s religious belief in order to avoid persecution or molestation and may, with the same object, extend even to reviling it.

<sup>82</sup> “The traditional law and the congregation,” in the following of which, orthodoxy, according to Muslims of the *Sunnî* sect, consists.

Muhammad *bin* Al-Hasan al-Mahdî He gave the king their names, 'Alî, Hasan, Husain Zain-ul 'Abidîn, Bâqir, Ja'far, Mûsâ Kâzîm, 'Alî Musâ Rîzâ, Taqî, Naqî, Hasan Askarî, Abû-l-Qâsim, al Mahdî,<sup>83</sup> who is still living He also set forth the absurdity of the belief of the Sunnîs The king then praised God for having decreed that the truth should be unfolded to him, and God appointed Mustafâ, Murtazâ, and the Imâm's to reveal to him the true faith;

XXX —AN ACCOUNT OF THE EVENT WHICH CONFIRMED THE KING IN THE TRUE RELIGION  
OF THE TWELVE IMÂMS

When Shâh Tâhîr left the king's presence and went to his bedchamber, the king also retired to rest, and saw a vision He dreamt that he saw Muhammad with 'Alî on his right hand and Hasan and Husain on his left with Muhammad Bâqir, while Shâh Tâhîr was standing at a little distance from them, prepared to execute their orders When Burhân Nîzâm Shâh realized in whose presence he was, he made his obeisance, and Muhammad Bâqir said to him, "The prophet commands that you should follow the guidance of Shâh Tâhîr and lay hold on the true faith of love for the prophet's descendants " The king, who was highly pleased at being addressed, bowed his head to the ground in acquiescence, and opened his lips to praise the Imâm Just then the morning broke, and the king awoke, full of joy, and praised God for the vision which he had seen He then sent for Shâh Tâhîr and began to relate to him the dream which he had seen It so happened that Shâh Tâhîr had seen the same dream and had been ordered by the prophet, through the mouth of Muhammad Bâqir, the Imâm, to guide Burhân Nîzâm Shâh into the path of truth He stopped the king's narrative and first told his own, thereby convincing the king of the genuineness of his vision The king then told his story, and Shâh Tâhîr said that he ought to be surely convinced of the truth of the Shî'ah religion and ought to regard the hatred of the opponents of the prophet's descendants as a religious duty The king admitted that all his doubts were removed and that he was a firm believer in the truth of the Shî'ah religion and hater of all its opponents, but said that he could not proceed further in the matter without Shâh Tâhîr's help, which would be necessary for the convincing of the doctors of the law about the court of the truth of that faith and for the removal of their opposition and also for leading the people generally into the way of truth This was, indeed, proof of the king's justice, that he would not proceed violently against such as had not a knowledge of the truth Shâh Tâhîr undertook the duty of arguing with the doctors of the faith and of reducing them to silence

<sup>83</sup> These are the names of the "Twelve Imâm's" of the Shî'ah sect The fundamental difference between the Sunnîs and the Shî'ahs is well known The former maintain that the succession to Muhammad as God's vicegerent on earth was properly determined by the popular choice, and that the first four Caliphs, Abu Bakr, 'Umar, 'Uthmân, and 'Alî, who were elected, were Muhammad's lawful successors The Shî'ahs maintain that the succession depended on natural descent from Muhammad through his daughter Fâtimah, who was married to his cousin 'Alî, that Muhammad in his life time designated 'Alî as his successor, and that 'Umar, who was present on the occasion and acknowledged 'Alî's right to succeed, concealed the fact after Muhammad's death They revile the first three Caliphs as usurpers and maintain that 'Alî's right to the succession depended not upon his election after the death of 'Uthmân, but was inherent in him, so that he should have succeeded on Muhammad's death The Imâm's, for the Shî'ahs do not use the word Caliph (*Khalifah*) are the lineal descendants of 'Alî and Fâtimah, and the last, al Mahdî, is supposed to be living, but concealed.

Mustafâ is an epithet of Muhammad and Murtazâ of 'Alî Muhammad Bâqir, mentioned in the next section, is the fifth Imâm

XXXI—AN ACCOUNT OF THE CONTROVERSY OF SHÂH TÂHIR WITH THE SUNNÎ DOCTORS,  
AND OF HIS VICTORY OVER THEM

By the king's command an assembly, which the king graced with his presence, was convoked, and before that assembly Shâh Tâhir conducted a controversy with the following Sunnî doctors —

(1) Maulânâ Pir Muhammad, (2) Shaikh Ja'far, (3) Maulânâ Abdul Awwal, (4) Qâ'î Muhammad Nâyata entitled Afzal Klân, (5) Qâ'î Zain ul-'Abidîn, camp Qâ'î, (6) Sayyid Ishâq, the librarian, (7) Qa'î Wilâyat Ambar (Abtar)

Shâh Tâhir began by quoting the *Ahâdîth* to the effect that of the seventy-three sects of Islâm, one was in the way of salvation and the rest in the way of damnation. He then twitted the Sunnîs successfully with the differences between their four sects and continued his arguments at great length, basing all his arguments on *Ahâdîth* accepted by the Sunnîs or passages from Sunnî books, observing that it was useless to cite authorities not accepted by both parties. He concluded this portion of his argument by challenging his opponents to shew that he had misquoted anything or misplaced any quotation, calling for the books, the chief of which was the *Shâhîh-i-Bukhârî*,<sup>84</sup> from the royal library, and promising to desist for ever from upholding the Shî'ah faith if it could be shewn that the passages quoted by him were not in the books. Qâ'î Zain-ul-'Abidîn, however, forbade Sayyid Ishâq, the librarian, to produce the books. It so happened that the king had brought with him a copy of the most important, the *Shâhîh-i-Bukhârî*, which was produced, and the passages quoted by Shâh Tâhir were found therein, to the shame of the Sunnî doctors, who then shifted their ground. The argument continued, and Shâh Tâhir having followed the Sunnîs over their change of ground, continued his argument and again beat his opponents on their own ground. They were confuted and, as they could not meet his arguments, had recourse to abuse. Shâh Tâhir then appealed to the king to say whether he had not utterly confuted his opponents, and whether their taking refuge in abuse were not an admission of defeat. The king replied that the confutation of the Sunnîs was as clear to him as the sun in the heavens and that all who had ever contended that 'Alî was not the rightful immediate successor of the prophet were worthy of being cursed, and furthermore that the Imâms after 'Alî were the infallible and only guides to the truth.

When the king announced his acceptance of the Shî'ah religion, the Sunnî doctors cried out with one accord that it was unworthy of his royal dignity that he should, on the unfounded statements of anybody, abandon the faith of his fathers and the religion which was accepted by so many famous kings, and should accept the arguments of any unauthoritative stranger. When the king heard what they had said, his wrath burst into flame, and he said,

<sup>84</sup> The *Shâhîh ul-Bukhârî* is the great collection of *ahâdîth*, the sayings or 'traditions' of Muhammad, accepted as authentic by the Sunnîs. The four sects of the Sunnîs here mentioned are the Hanafîs, the Hanbalîs, the Shâfi'îs, and the Malîkîs, the followers of the four great doctors of the law, whom the Sunnîs call the four Imâms, Abû Hanîfah, Ibn Hanbal, ash Shâfi'î, and Mâlik. The differences between these sects are unimportant and each regards all the others as orthodox.

" O lords of error and insolence. Know that we, in our search after the truth, have set aside all obstinacy and bigotry and have followed the way of truth in sincerity and faith, and but now, by way of proof, we decreed that Shâh Tâhir should hold a controversy with you in order that you might be convinced, and that the people might not say that we have without good grounds and sufficient proof abandoned the faith of our fathers. Now that you have been overcome in argument and are in that respect helpless, you take up a new line, and say that it is not right to forsake the faith of our fathers. But this is unreasonable, and is merely the speech of fools whom God has refuted in the *Qur'ân*. The excuse that a particular religion was the religion of one's ancestors will never be accepted on the day of resurrection. Now, if you wish for prosperity in this world and salvation in the next, abandon your errors and accept the true Shî'ah faith, or the punishment that we shall decree for you will empty the cage of the birds of your souls, and the sword of our wrath shall remove your heads to a distance from your bodies "

Notwithstanding the king's efforts to guide these men into the way of truth, fate had decreed that they should obstinately adhere to error, and Qâzi Abrar, the most obstinate bigot of all, was beheaded. Maulânâ 'Abdul Awwal was punished with torture and with every species of affliction and was compelled to eat the flesh of dogs, and the others were punished in various ways. The power of the sword in a short time established the true religion of the infallible Imâms in the remotest part of the country of the Dakan, and love for the family of the prophet was established in the hearts of both enemies and friends, so that the other Sultâns of that land, that is to say 'Âdil Shâh and Qutb Shâh, followed the king's example and accepted the Shî'ah religion.<sup>85</sup> Thus the Shî'ah religion became the religion of the land, the titles of the Imâms were heard from the pulpits, and adversaries of the faith were rooted out from the land. After this the king's power and prosperity grew and increased.<sup>86</sup>

(To be continued.)

<sup>85</sup> Sayyid 'Alî is most inaccurate here. Sultân Qulî Qutb Shâh and all his successors in Golconda were Shî'ahs. Yûsuf 'Âdil Shâh, founder of the Bijâpûr dynasty, was so zealous a Shî'ah that he nearly lost his throne by prematurely establishing that religion in his kingdom. His son Ismâ'il was also a Shî'ah, but Ibrâhîm 'Âdil Shâh I, Ismâ'il's son, who had lately succeeded to the throne of Bijâpûr, was a Sunnî, but all other kings of this dynasty were Shî'ahs. Thus, after the conversion of Burhân, the three principal dynasties in the Dakan, those of Ahmadnagar, Bijâpûr, and Golconda were Shî'ahs, while the rulers of the two small kingdoms of Berar and Bidar were Sunnis. But Berar was annexed by Ahmadnagar in 1574 and Bidar by Bijâpûr in 1619, so that the Shî'ah faith became the established religion of the Dakan. This furnished the bigot Aurangzîb with a scarcely needed pretext for the annexation of Bijâpûr and Golconda.

<sup>86</sup> Firishtâ's account of Burhân's conversion to the Shî'ah religion is similar to this but contains some additional particulars. According to him, Shâh Tâhir first took advantage of a dangerous illness of 'Abdul Qâdir, Burhân's favourite son, to broach the subject of the Shî'ah religion, suggesting that if the king accepted it, the prince would recover. It was while watching by his son's bed that the King fell asleep and dreamed a dream, in which he saw, according to Firishtâ, Muhammad surrounded by the twelve Imâms. Muhammad promised him that his son should recover and bade him follow the teaching of Shâh Tâhir. The king's conversion followed as a matter of course. Firishtâ, who was a Sunnî, does not relate the story of the conversion so sympathetically as the Shî'ah, Sayyid 'Alî.

## A CHRONOLOGY OF THE PĀLA DYNASTY OF BENGAL

BY DINESH CHANDRA BHATTACHARYYA, M. A.

THE history of the great Pāla dynasty of Bengal has during the last ten years cleared up remarkably, and we have now a fairly accurate chronology for it established by the working of a number of happy synchronisms. Scholars however disagree in some of the minor details. In the present article an attempt has been made to show that we can arrive at a definitely certain chronology for a major part of the dynasty from the available materials. The publication of Mr. R. D. Banerji's elaborate monograph on the Pālas of Bengal<sup>1</sup> which mostly embodies the recent researches on the subject, saves the present article from being burdened with full references.

We start from the reign of Mahīpāla I, for whom we have a certain date in the Sarnath inscription of A. D. 1026. Hitherto the inscription was referred by all scholars to the actual reign of Mahīpāla, but Mr. R. D. Banerji contends<sup>2</sup> that it might have been incised soon after his death. In support of his contention he seems to put forth two facts, viz (1) a MS. from Nepal was written in 1076 *Samvat* when a "सोमवशोद्भव गौडध्वज गंगेयदेव" was reigning in Tirhut. According to Bendall, this is Gāngeyadeva *Uhedā*. The date of the MS., A. D. 1019 (referring it to the Vikrama era) fell, therefore, before the brass plates of Mahīpāla from Imadpur in Tirhut, dated in his 48th year, and as the longest period assigned to Mahīpāla is 52 years (Taranath), he must have been dead in A. D. 1026. (2) Besides, the absence of any elocutionary epithets before the name of Mahīpāla in the above inscription and the use of the past tense in *akārayat* may point to its being a posthumous record. It should however be noted that Mahīpāla was still living in A. D. 1023 when Rājendrachola invaded Bengal,<sup>3</sup> and even assuming that he died soon after, his 48th year hardly falls before A. D. 1019. Besides, there is no clear reference in the Kalachuri inscriptions of this not very insignificant conquest of Tirhut (and Gauda) by Gāngeyadeva.<sup>4</sup>

We are thus inclined, with Mons. Lévi, to reject Bendall's interpretation and to accept Mr. Chandra's suggestion that the colophon refers to a local *Sāmanta*.<sup>5</sup>

The Sarnath inscription, again, is in verse, and as such, the single epithet श्रीमान् is sufficiently expressive of the king's life and honour. Moreover, the use of the *proximate* past tense, लङ्, very fairly refers the inscription to the actual reign of Mahīpāla I, who may therefore be taken to have been still reigning in December, A. D. 1026.

The date of Mahīpāla's accession to the throne can now be definitely settled, for fortunately we have a verifiable datum referring to his reign. A MS. of *Ashtasahasrikā* was copied in the sixth year of his reign सम्बत् ६ कार्तिक कृष्णचयोदश्यां मंगलवारेण. "Kārtika vadi 13" fell on a *Tuesday* on the following possible dates.—

*Purnimānta* —

(1) October 21, A. D. 979

(2) September 27, A. D. 992.

<sup>1</sup> *Mem. ASB.*, Vol. v No 3

<sup>2</sup> p. 76.

<sup>3</sup> *ASR.*, 1911-12, p. 173.

<sup>4</sup> वीसौगलक्ष्मीचर्यै: in the Goharwa plate of Karnaśadeva (*EL.*, XI, p. 143) taken to refer to an invasion of Anga, should perhaps more correctly be constructed with the previous word, *anga* meaning rather the seven functionaries of a kingdom (of Kīra).

<sup>5</sup> *Gaudarajamālā*, p. 42. It is indeed possible, referring the year to the Śaka era A. D. 1154, that the prince is no other than Gāngeyadeva, the son and successor of the famous Nānyadeva of Nepal and Tirhut—an identification which will also explain the otherwise inexplicable connection with Gauda conveyed by the epithet *gauḍadhvaja*, though it should be noted at the same time that later Nepalese kings refer the dynasty as of *solar* lineage.

*Amānta* —

(1) November 2, A D 986

(2) November 18, A D 990

(3) November 14, A D 993

We have given both *Pûrṇimānta* and *Amānta* calculations. It is always very difficult to ascertain which particular system was prevalent at that period in particular places. Here also fortunately we have a definite epigraphic evidence to show that the *Amānta* system was prevalent in Bengal about that time. The Badkāmṭā Nartesvara image inscription of the reign of Layaḥachandra gives a date—Āshādhā vadi 14 with Thursday and Pushyā nakshatra.<sup>6</sup> Any one versed in Indian chronology will see that the data, making an impossible combination under the *Pûrṇimānta* system, clearly refer to the *Amānta* system. We have ventured, therefore, to make our selection from dates calculated under the *Amānta* system. Of all the calculated dates, 979 is rather too early, dating Mahīpāla's death in A D 1025 at the latest, after full 52 years. On the other hand, both A D 992 and 993 are somewhat too late, carrying us to about A D 1038. We know from Tibetan sources that the celebrated Buddhist missionary Dīpankara left for Tibet in A D 1042 under King Nayapāla whose association with the Buddhist sage must have extended to a number of years. Of the two dates remaining, 986 is certainly the most convenient one. So Mahīpāla ascended the throne in A D. 981, November 981 falling within his first year. His predecessor Vigrahapāla II's date is also hereby settled, dating his accession not later than A D 955, a MS having been copied in his 26th year. The date of Kamboja usurpation (A D 966) as gathered from the Dinajpur pillar inscription,<sup>7</sup> fits in well during Vigrahapāla's reign. The date, A D 966, however, already falls too early in his reign to admit any later date for Mahīpāla's accession than the one we have selected. Mahīpāla died therefore in circa A D 1030 after a reign of about 50 years.

Before settling the dates of the immediate successors of Mahīpāla I, we shall try next to settle a date which is likely to evoke very far-reaching consequences, namely, that of the Kamauli grant of Vaidyadeva. It records a grant made on a विषुवन् day coinciding with a हरिवासर (verse 28 वैशाखे विषुवत्पञ्चाङ्ग स्वर्गार्थं हरिवासरे). Dr. Venis, who first edited the inscription, from the then meagre state of Pāla chronology, selected A D 1142 from among the possible dates calculated by him.<sup>8</sup> Moreover, he calculated only vadi dates though there was no reason to exclude sudi ones, which equally make a हरिवासर. The possible dates for our immediate purpose are the following—1096, 1100, 1104, 1115, 1119, 1123. Of these, 1096 is too early, as we shall presently see. In 1104 there was दशमी both at sunrise and the moment of Sankrānti on the Sankrānti day. It is thus rejected, as is also 1115, when there was द्वादशी at sunrise but त्रयोदशी later on, and such a combination does not make a हरिवासर. 1123 is rather too late. So we have only two dates, A D 1100 and 1119, for the fourth year of Vaidyadeva. Let us see what comes out of the earlier date. It is clear from the epithets परमेश्वर etc., used in the inscription, that Vaidyadeva became independent, and it has been rightly conjectured<sup>9</sup> that he “declared his independence after the murder of Gopāla III,” probably by his uncle Madanapāla. The latest inscription of the reign of Rāmapāla is dated “Samvat 42 Āshādhā dīne 30.”<sup>10</sup> That of the reign of Vigrahapāla III is dated “Samvat 13 Mārgga

<sup>6</sup> JASB., 1914, p 88<sup>7</sup> Mem., p 69<sup>8</sup> EI., II, p 349<sup>9</sup> p. 102<sup>10</sup> p. 94

A glance at the above genealogy will show that Madanapâla was a contemporary of Govindachandra, and if there was any alliance at all, it was not with *Chandra-deva* but with *Govinda-chandra*. The whole question, however, rests on very doubtful grounds, as the *Râmacharita* is there unelucidated by any commentary. Possibly the campaigns of Madanapâla on the banks of the Yamunâ were *against* and not *on behalf* of the king of Kanauj, whoever he may be. चन्द्रेण like वर्मणः should perhaps better be taken to refer to a king of the "Chandia" dynasty of Bengal.

Thus March 1119 falls within the fourth year of Vaidyadeva, so that the date of Kumârapâla's death easily works out to be A D 1115. Râmâpala's date can now be fixed with greater accuracy. In the legendary work called *सखशुभोदया*, there occurs the following verse recording the death of Râmâpala —

शाके शुम्भकशानुरन्ध्रकुमिति (२) कन्या गते भास्करे  
कुष्णे वाक्पतिवासरे यमतिथौ यामद्वये वासरे ।  
जाह्नव्या जलमध्यतस्त्वनशानैर्ध्यात्वा पद् चक्रिन्  
हा पालान्वयमौलिमण्डनमणि श्रीरामपालोमृत ॥

(Vide *Gaudarâjamâlâ*, Introd., p. 9)

This fine *Śārdūlavikrīḍita* stanza occurring in a mass of bad prose and worse Sanskrit has been justly taken by the late Mr. Batavyal to be a genuine record of Râmâpala's demise.<sup>18</sup> Besides, the latter part of the stanza bears a remarkable corroboration from the *Râmacharita* where also Râmâpala is reported to have drowned himself in the Ganges. Unfortunately, the reading of the year has been corrupt beyond rescue. The details that follow, *Āśvina vadi 2* (*yama* means 2) corresponding with a Thursday, however, yield the following date — September 21, A D 1111. The corresponding Śaka year 1033 actually ends in a शुभ (an emendation may accordingly be suggested शाके शुम्भकशानुरन्ध्रकुमिति etc.) The date moreover fits in marvellously with our determination of Vaidyadeva's date. Râmâpala therefore died on September 21, A D 1111.

The next date we mean to work out, is, we confess, based on very doubtful assumption, but we have the authority of the late Dr. Kielhorn. The *Angachhā* plate of Vīgrahapâla III is dated the ninth day of Chaitra in the 13th year of his reign and grants a village on the occasion of a *lunar eclipse*. Dr. Kielhorn assumed that the date of the plate was coincident with that of the lunar eclipse and calculated A D 1086 as the date in question.<sup>19</sup> This year is now unsuitable. There was, however, a lunar eclipse on March 3, A D 1067 corresponding to 10th or 9th Chaitra.<sup>20</sup> As the date does not conflict with our chronology we may be justified in accepting it as marking the last period of Vīgrahapâla III's reign.

The following chronological table may now be placed before scholars —

	Date of accession,	Date of death,
Vīgrahapâla II	<i>Circa</i> 955	981
Mahîpâla I	981	<i>Circa</i> 1030
Nayapâla	<i>Circa</i> 1030	1054
Vīgrahapâla III	1054	1067

<sup>18</sup> *Sāhitya*, a Bengali monthly, of the year 1301 B. S. pp. 1—10

<sup>19</sup> *Ante*, XXII, p. 108

<sup>20</sup> The previous *Sankrānti* occurred near about, though not exactly at midnight (7227 after Sunrise). If taken practically for midnight, the moment yields 9th Chaitra as the date of the eclipse, by the application of the well-known Bengal rule of counting civil days.

	Date of accession	Date of death
Sūrapāla II and Mahipāla II	1067	1069
Rāmapāla .	1069	Sept 21, 1111
Kummapāla	1111	1115
Gopāla III	1115	1115
Madanapāla	1115	?

Except those of the accession of Vīgrahapāla II and Nayapāla, all the dates are almost definitely settled

Of the first seven kings of the dynasty, we have unfortunately no clue to definite dates except in a single inscription of Dharmapāla's time. A votive inscription from Bodh-Gayā is thus dated

षड्विंशतितमे वर्षे धर्मपाले महीभुजि  
भाद्रपदशुक्लपञ्चम्या सुनंभस्मिन्स्थाहनि ।

(Vide *JASB*, 1908, p. 102)

Between A D 760 and 780 we have arrived at the following possible dates of Dharmapāla's accession by verifying according to *mean* calculations the date given above, viz Bhādra vadi 5, Saturday

Under the *Amānta* system—A D 764, 768, 771 and 788

Under the *Pūrmamānta* system—774, 777, 781 and 794

The discovery recently of two new inscriptions, one dated in the 54th year of Nārāyanapāla and the other in the 24th year of Rājyapāla,<sup>21</sup> makes it impossible to place Dharmapāla's accession later than A D 788, as the following tentative chronology will show.

Dharmapāla .	788—820 (just 32 years).
Devapāla	820—853 (33 years)
Vīgrahapāla I (or Surapāla I)	853—860 (7 years)
Nārāyanapāla	860—915 (55 years)
Rājyapāla .	915—940 (25 years)
Gopāla II	940—955 (15 years)
Vīgrahapāla II	955—981

Thus, with 788 as the date of Dharmapāla's accession, the chronology fits in almost too closely with the one fixed above. For it allows only seven years to Sūrapāla I, while, according to Dr V. Smith,<sup>22</sup> he reigned for at least 13 years.<sup>23</sup> Moreover, according to the Manahali inscription of Madanapāla, Gopāladeva I was “चिरतरमवनेरेकपत्न्या इवैक्री, भर्ता” which means, if anything, that he reigned long enough, if not, literally, longer than his predecessor, Rājyapāla. Fifteen years, on the other hand, make one of the shortest reigns of the dynasty. We are inclined, therefore, to look for the date of Dharmapāla's accession not later than the sixties of the 8th century, either A D 764 or 768

<sup>21</sup> See *ante*, Vol XLVII, pp. 110-111

<sup>22</sup> See *ante*, Vol XXXVIII, p. 235

<sup>23</sup> We are unable, however, to verify Dr. Smith's statement

## BOOK-NOTICE

LALLĀ VĀRYĀNI OR THE WISE SAYINGS OF LAL DED, A MYSTIC POETESS OF ANCIENT KASHMIR, by SIR GEORGE GRIERSON and DR L D BARNETT Asiatic Society Monographs London RAS 1920 pp vi and 225

I should like to say at the outset that within the compass of this short book there is contained philological and religious knowledge of the highest order, which is a credit to the well known authors and to the Society which has published their very valuable labours.

Lallā or Lal Ded was a female wandering Śaiva ascetic (*yōgini*) of Kashmir in the fourteenth century A.D., and her verses are of extreme value for two reasons. They form the oldest known specimen of the Kāshmiri Language and they represent the teaching of the Śaiva Yoga as it presented itself through her to the ordinary Kāshmirī followers of that religious system. To any one therefore, who, like myself, endeavours to ascertain the effects of the philosophic teaching of the Hindu sects on the public at any given period, the book is of the highest interest.

One criterion of the importance of this book is shown by a reference to Dr J. N. Farquhar's admirable *Outline of the Religious Literature of India*, also dated 1920. At p. 352 all he has to say about "Kashmir Śaivism" is "Kashmir Śaivism still exists but it shows very little vitality. Yet scholarly pandits are not wanting: their work, clothed in English, may be seen in Chatterji's *Kashmir Śaivism*. Sir George Grierson refers to 'a wise old woman known as Lal Ded' who lived in Kashmir in the fourteenth century, "whose apophthegms in short verses are still freely quoted in the happy valley" and he quotes and translates one of her stanzas. Mr Chatterji names only a single writer belonging to this period [Muslim Influence 150—1700], Śivopādhyāya of the eighteenth century, who wrote a commentary on the *Vijñāna-Bhairava Tantra*. But the Introduction to *Lallā Vākyāni* now under consideration goes much further and describes it as giving "an account, often in vivid language, of the actual working out in practice of a religion [Śaivism] previously worked out in theory. As such it is a unique contribution to the body of evidence that must necessarily form the basis of a future history of one of the most important religious systems of India."

On p. 286 Dr Farquhar, in his bibliography, dates Lal Ded as "c. 14th century" on the faith of Sir George Grierson's article in *JRAS*, 1918, p. 157. It is therefore with some pride that I note that the editors of Lal Ded's poems resort for a good deal of their legendary and historical

information about her to *Punjab Notes and Queries*, which I started as long ago as 1883 and maintained for some years.

Dr Farquhar seems to be quite right in describing Lal Ded as belonging to the period of Muslim Influence on Hinduism. She is consistently described by tradition not only as a contemporary, but as a friend, of Sayyid 'Alī Hamadānī, the Muslim apostle of Kashmir in 1380—1386, and one of her verses (No. 8) runs as follows—

Let Him bear the name of Śiva, or of Kēśava,  
or of the Jina, or of the Lotus born Lord—  
whatever name he bear

'May He take from me, sick woman that I am,  
the disease of the world

Whether He be he or he, or he or he."

The commentary on this (and how admirable so many of the authors' commentaries are) is—'By whatever name the worshipping may call the Supreme, He is still the Supreme and He alone can give release. Kēśava means Viṣṇu by the name of 'Jina' is indicated both a 'Jina', the Saviour of the Jains and also the Buddha. I suspect that here it is confused with the Arabic Jinn, the Genies of the Arabian Nights. The Lotus born Lord is Brahma.' I would like to go much further than the author and to state from what follows that the confusion is undoubted, though no doubt the Pandit Rājānaka Bhaskara in his Sanskrit translation of this verse, thought the reference was to the Indian Jina only. The importance of this particular verse is enhanced by the fact that the version given by the editors' authority is practically identical with that in Sir Aurel Stein's Collection at the Oxford Indian Institute showing the hold it has had on the people.

But is not Lal Ded here forestalling Kabir (1440—1518), who followed and improved on Rāmānanda (1400—1470) who preached "a compromise between theism and strict monism," and the roots of whose teaching go much further back in the then old Hindu doctrine of *bhakti* or devotional faith, whether the Sects professing it were Śūva or Vaiṣṇava. Lal Ded could never have heard of Rāmānanda and his doctrines and she must have died before Kabir was born, but Rāmānanda was not the first, without giving up his caste to take all castes and conditions of men into his personal following, even Muhammadans, and to be on terms of mutual respect with the last. In fact, in this respect he adopted a fashion that was then springing up among both Hindu and Muhammadan teachers under Muslim influence. What was this influence? Was it not Sufi mysticism? Though a Muhammadan at bottom, the Sufi was not

orthodox and was imbued with outside influences, European and Asiatic and even Indian thought. He tended to identify himself with God like the early Hindu, and to lose his individuality after death in eternal companionship with God. His object in this life was to escape from individuality, in order "to realize that God is the only reality." His practice to this end came very near to the Hindu Yoga, and to him all religious systems tended to become united and of equal value. It is not difficult to understand that a *gopi* of the fourteenth century in contact with Muhammadism should quickly absorb such a line of thought. And the interesting point in Lal Ded's life and popular teaching is that we here seem to get a glimpse into the trend of the Hindu mind that gave Ramananda, and more largely his great pupil Kabir, the enormous sway they have wielded over the religion of India of their own and even the present day.

How deeply the general idea conveyed in Lal Ded's verse above quoted has struck its roots into the every-day Indian mind is shown in a couplet taught to my own children when very small by their nurse though long completely lost by them. She was an Outcaste, a Mehtarâm.

*Ram nam laddu Gopal nam ghi*

*Har Ja nam misri ghol ghol pi*

The name of Ram is the sweet, Gopal's name is the butter.

Har's name is the sugar mix up well and take

The form of the couplet is purely Hindu, Ram nam, Gopal nam, Har nam, referring back to the age-old doctrine "of the eternity of sound and the indefeasible connexion between the sound of a word and its meaning," and thence between the attributes of a god and his name, but the sentiment is medieval Hindu, like Lal Ded's. In fact, if we take Ram and Gopal (Krishna) to represent the Vaishnava hero gods and Har to represent Siva, we get very near to Lal Ded's teaching. If we take the couplet to be of Ramanite origin and to mean that Gopal and Har (Krishna) are subordinate to and absorbed in Râm, the verse is Vaishnava but non-sectarian. In the Mehtarâm's mind, however, I feel sure it conveyed the equality of the Supreme by whatsoever name He was called, because he was the wife of the chief priest (as one may say) of the Lalbegi Mehtars of Ambala. This man had a *Ms. karsindma* or 'Genealogy' of his Sect, of which I got the loan about 1880 and published it *in part* in the *Legends of the Punjab*, which, in its turn, led to the subsequent publication in the *Indian Antiquary* of a somewhat extensive Lalbegi Literature. The 'Genealogy' turned out to be hagiolatry pure and simple—an eclectic worship of anything deemed to be holy, whatever its source. Sectarian Hindu, Muhammadan or Christian—in the form of *mantras*, i.e.

mystic formulæ of apparently meaningless sounds—in this case difficult to dissect and more than probably actually meaningless, but no doubt in the minds of the users all the more holy and efficacious on that account. The idea of the equality of all in religion would, however, sink readily and deeply into human beings situated as are the Mehtars.

Lal Ded enforced her doctrines by wandering about singing and dancing in a nude or nearly nude condition. This was nothing new in Saiva, or indeed in other forms of Hinduism, or in Judaism or Islam. In verse 94 she defends the practice—

"My teacher spoke to me but one precept

He said unto me 'from without enter thou  
the inmost part'

That to me became a rule and a precept,  
And therefore naked began I to dance."

The authors' gloss on this is—

"The Guru or spiritual preceptor, confides to his disciple the mysteries of religion. Lalla's account is that he taught her to recognise the external world as naught but an illusion, and to restrict her thoughts to meditation on her inner Self. When she had grasped the identity of her Self with the Supreme Self, she learnt to appreciate all externals at their true value. So she abandoned even her dress and took to going about naked. Here she says that she danced in this state. Filled with supreme rapture, she behaved like a madwoman. The dance, called *tandava*, of the naked devotee is supposed to be a copy of the dance of Siva, typifying the course of the cosmos under the god's rule. It implies that the devotee has wholly surrendered the world, and become united with Siva."

Lal Ded was essentially nothing more than the product of her race and time and incapable of founding a Sect or organised following, and it is quite possible that her popularity was founded on her reputation as a dancing ascetic coupled with her capacity for stating in fascinating verse the doctrines taught her. The emotional dancing would draw the necessary attention to her and the quality of her verse would remain in the public memory. A century after her time we have a strong instance of this in a very different Hindu personage, teaching a doctrine in some aspects as poles apart from hers—the Bengali Brahman Visvambhara Misra (1485—1533), known to fame as Chaitanya. A Vaishnava of the general Bhâgavata community, he practised the passionate variety of devotional faith (*bhakti*), concentrating in his case on the story of the loves of Krishna and Râdhâ in hymns, and enforcing his doctrine by the public dancing of himself and his followers with extra

ordinary fervour and emotion. Although in his case he founded an important Sect, he was, like Lal Ded, no organiser, but his religious emotion was real and clean, and he turned the tale of Râdhâ Krishna, not very savoury from the point of general morality, into something that held the imagination of a vast public to their good. The dancing and the music soon died away after his death, but they had done their work, for they attracted general attention, and the contents of the hymns and the teachings of the Sect, with much deterioration, alas! in certain instances, were left to their inherent value for success and permanence.

Lal Ded purported to popularise the highly anthropomorphic doctrines of the Śaiva Yoga. This was no easy task, for the Yogic philosophy was so abstruse and difficult to follow and so full of technicalities, that obviously the workaday unlettered population could never grasp it, and the technicalities, which would come to be repeated glibly enough, must have largely appeared to the public like 'the blessed word Mesopotamia.' In his illuminating discourse on *Yôga*, Dr Barnett starts by saying "The object of the discipline called *Yôga* is to emancipate the individual soul from its bondage to the material universe" including "the mental organism . . . The emancipation is effected by a mental and bodily discipline culminating in a spiritual transformation, in which there comes into existence a permanent intuition revealing an essential distinction between the individual soul and the material universe. This is the state of isolation which is salvation." As the bondage of the material universe includes the bondage of the mental organism, the *Yôgi* attempts by ascetic exercises, into which metaphysical contemplation largely enters, to attain such power over his own mental organism that "all sense of objectivity disappears from the matter of thought, leaving only the intuition of the distinction between the individual soul and the material universe, wherein the individual soul shines for ever in its perfectly pure still radiance."

Dr Barnett explains that from the first the Yogic method of gnosis "presupposes certain mystic conceptions of the natural and spiritual world" which "may be classified broadly under two heads: (1) the theory of Nature and of salvation by means thereof; (2) the practice of physical means supposed to be efficacious in attaining the latter object. In Yogic theory the human body is conceived as a miniature copy or replica of the world without it: the forces by which this microcosm is controlled at the same time operate upon the macrocosm outside and thus by certain physical and mental processes the *Yôgi* can win for himself not only supernatural powers over his own body and mind but also a

miraculous control over the universe culminating in the complete translocation of his soul into the highest phase of Being, the Absolute (usually conceived as the Supreme Śiva) for ever and ever." The Yogic theory of the microcosm contained in the human body involves a description thereof which has to be learnt, as it has no counterpart in the ordinarily observable facts of its anatomy.

"As the object of metaphysical contemplation is to merge the individual soul into the absolute All Spirit, so the object of Yogic contemplation is to absorb [the Creative Force of the Phenomenal Universe, personified as] Kundalinî in the microcosm, representing the microcosmic Energy, into [the highest of the circles supposed to be attached to the spinal cord at the base of the palate and called] *Sahasrâra*, typifying the Absolute whereby the Cosmos is merged into the infinite bliss of the Supreme (Paramesvarî)." While the absorption is being effected there occurs the Elemental Sound in his body audible to the *Yogi*, the subject of further extremely complicated and obscure theories of cosmic evolution, but they are of importance because as the Creative Force "reveals herself in sound Word or Logos, the elements of Speech namely syllables and their combinations have a profound mystic significance in Śaiva doctrine."

To teach the details of such a doctrine by a mass of technical terms in, or based on, a conventional tongue, such as Sanskrit has been for a very long time, add to it fragments of other striking doctrines current at the period, and the people will be puzzled, and so it is with some justification that Granny Lal's editors point out the importance of her songs from "the fact that they are not a systematic exposé of Śaivism on the lines laid down by the theologians who preceded her, but illustrate the religion on its popular side." How much Lal Ded actually taught the people of what she herself understood her editors have not worked out, but it would be worth doing.

I have been so absorbed in the philosophical side of this remarkable book that I have almost omitted to mention Sir George Grierson's invaluable Appendices on Lallâ's Language and Lallâ's Metrics and the Vocabulary. Especially would I draw attention to the extremely informing footnote on p. 128, based on the experience gained by the fact that her songs have reached us as handed down by word of mouth from generation to generation, and are therefore now found in practically modern Kâshmirî. His footnote says: "So also the Vedic hymns were for centuries handed down by word of mouth and Lallâ's songs give a valuable example of the manner in which their language must have changed from generation to generation before their text was finally established."

R. C. TEMPLE

**Visakhā**—Oudh was called by this name during the Buddhist period. Visakhā was the capital of Fa Hian's Sha-chi or Sāketa. Dr Hoey, however, identifies it with Pasha (Pi-so-kia of Huen Tsiang) in the district of Gonda in Oudh, near the junction of the Sarajû and the Gogra (*JASB.*, vol. LXIX, p. 74). It has been identified by Dr Burgess with Lucknow (*Cave Temples of India*, p. 44).

**Visakhā-pattana**—Vizagapatam in the Madras Presidency

**Bisālā**—1. Besād, in the district of Mozaffarpur in the Bihar Province, the Baisālī of the Buddhist period (see **Baisālī**). At the time of the *Rāmāyana* (Ādi, ch. 45), the town was situated on the northern bank of the Ganges and not on the Gandak, at the time of Kshemendra in the 11th century, it was on the river Balgumati (*Ava Kalp*, ch. 39). 2. Ujain, the capital of Avanti (*Meghadūta I*, 31, *Hemakosha*, *Skanda P*, Revā kh., ch. 47). 3. An affluent of the Gandak in Baisālī (*Mbh*, Vana, ch. 84).

**Bisālā-badārī**—See **Badarikāśrama**

**Bisālā-chhatra**—Same as **Bisālā**. Hajipur was included in the kingdom of Baisālā. Rāmchandra, Lakshmana and Visvāmītra, on their way to Mithilā, are said to have halted at Hajipur for one night on the site of the present temple called Rāmachandra, which contains the image of Rāmachandra and the impression of his feet. Haji Shamsuddin, king of Bengal, established his capital at Hajipur in the middle of the 14th century, and from him the name of Hajipur has been derived. It still contains a stone mosque said to have been built by him close to the Sonpur Ghât. The celebrated Rājā Todar Mal lived at Hajipur when he made the settlement of Bengal and Bihar and is said to have resided in the fort (*killā*), the ruins of which still exist and contain the Nepalese temple. Sonpur, situated at the confluence of the Gandak and the Ganges, was also included in Bisālā-chhatra. It was at Sonpur (Gajendramoksha-tīrtha) that Vishnu is said to have released the elephant from the clutches of the alligator, the fight between whom has been described in the *Varāha-Purāna* (ch. 144). They fought for five thousand years all along the place from a lake called Kāṅkdā-Tālāo, five miles to the north-west of Sonpur, to the junction of the Gandak and the Ganges. Vishnu, after releasing the elephant, established the Mahādeva Hariharanātha and worshipped him. Rāmachandra, on his way to Janakapur, is said to have stopped for three nights on the site of the temple at Sonpur, hence in his honour, a celebrated fair is held there every year.

**Bisālya**—A branch of the Nerbada (*Kūrma P*, ch. 39).

**Bishnu-g ya**—Lenar in Berar, not far from Mekhar, it is a celebrated place of religious resort.

**Bishnugriha**—Tamluk. Same as **Tāmralipti** (*Hema-kosha*).

**Bisvāmītrā**—The river Bisvāmītrā in Gujarāt on which Baroda is situated (*Mahābhārata* Blishma, ch. 9).

**Bisvāmītra-āśrama**—Buxar, in the district of Shahabad in Bihar. It was the hermitage of Rishi Visvāmītra, where Rāmachandra is said to have killed the Rākshasi Tādakā. The Charitra-vana at Buxar is said to have been the hermitage of the Rishi (*Rāmāyana*, Bālakāṇḍa, ch. 26), and the western side of Buxar near the river Thora was the ancient Siddhāśrama, the reputed birth-place of Vāmana Deva (see **Siddhāśrama**). The hermitage of Rishi Visvāmītra is also pointed out as Devakunda, 25 miles north-west of Gayā. Same as **Bedagarbhapurī**. The hermitage of the Rishi was also situated on the western bank of the Sarasvatī opposite to Sthānu-tīrtha in Kurukshetra (*Mbh.*, Śālya, ch. 43). It was also situated on the river Kauśiki, modern Kusi.

- Bitabhaya-pattana**—Bithā, eleven miles south-west of Allahabad on the right bank of the Jamuna (*Vira-charitra* of the Jainas quoted by General Cunningham in *Arch S Rep*, vol 3) But from seals found by Sir John Marshall at Bhitī, the ancient name of the place appears to be Vichhi and Vichhi-grāma, and not Bitabhaya-pattana (*JRAS*, 1911, p 127)
- Bitamsā**—Same as Bitastā
- Bitastā**—The river Jhelum, the Hydaspes of the Greeks (*Rigveda* X, 75), and Bitamsā of the Buddhists ("Questions of King Milinda," *SBE*, p xlix)
- Bodha**—The country round **Indraprastha** (*qv*) which contained the celebrated Tirtha called Nigamod bodha, perhaps briefly called Bodha (*Mbh*, Bhīshma ch 9, *Padma P*, Uttara, ch 66)
- Bolor**—Baltistan, or little Thibet, a small state north of Kāsmīr to distinguish it from Middle Thibet or Ladakh and Great Thibet or Southern Tartary
- Brahma**—A country in Eastern India, perhaps Burma (*Rāmāyana*, Kishkindhā, ch 40)
- Brahmagiri**—1 A mountain in the Nasik district, Bombay, near Tryambaka, in which the Godāvarī has its source (*Padma P*, Uttara, ch 62) 2 A mountain in Coorg, in which the Kāverī has its source (see *Kāverī*)
- Brahmakunda**—The *Kunda* from which the river Brahmaputra issues it is a place of pilgrimage (see *Lohitya*)
- Brahmanada**—The river Brahmaputra (*Brhat-Dharma-Purāna*, Madhya kh, ch 10)
- Brahmanala**—Manikarnikā in Benares
- Brāhmaṇī**—The river Bahmni in Orissa (*Mbh*, Bhīshma, ch 9, *Padma P*, Svarga, ch 3)
- Brahmapura**—Garwal and Kumaon (*Brhat-Samhitā*, ch 14)
- Brahmaputra**—Same as *Lohitya* See *Brahma P*, ch 64
- Brahmarshi**—The country between Brahmvartta and the river Jamuna it comprised Kurukshetra, Matsya, Pañchāla and Śūrasena (*Manu-Samhitā*, ch 2, v 19)
- Brahmasara**—1 Same as Ramahrada (*Mbh*, Anusāsana, 25) 2 In Gaya (*Agni P*, ch 115) see *Dharmāraṇya* 3 Same as **Brahmatirtha** (*Padma P*, Sūkti, ch 19)
- Brahma-tirtha**—Pushkara lake, near Ajmir in Rajputana (*Kāśīma P*, Pt II, 37)
- Brahmvartta**—1 The country between the rivers Sarasvatī and Drishadvatī, where the Aryans first settled themselves From this place they occupied the countries known as Brahmarshi-deśa (*Manu-Samhitā*, ch 2) It was afterwards called Kurukshetra It has been identified generally with Sirhind (Rapson's *Ancient India*, p 51) Its capital was Karavīrapura on the river Drishadvatī according to the *Kālikā Purāna*, chs. 48, 49, and Barhishmatī according to the *Bhāgavata*, III, 22 2 A landing ghāt on the Ganges at Bithur in the district of Cawnpur, called the Brahmvartta-tirtha, which is one of the celebrated places of pilgrimage
- Braja**—Purāna Gokul, or Mahāvana, a village in the neighbourhood of Mathurā across the Jamuna, where Krishna was reared by Nanda during his infancy (*Bhāgavata P*, X, ch 3) The name of Braja was extended to Brindāvana and the neighbouring villages, the scene of Krishna's early life and love At Mahāvana is shown the lying-in room in which Mahāmāyā was born and Krishna substituted for her This room and Nanda's house are situated on two high mounds of earth Nanda's house contains a large colonnaded hall in

which are shown the cradle of Krishna and the spots where Putanâ was killed and where Siva appeared to see the infant god. At a short distance from the house of Nanda are the mortal which was overturned by the infant Krishna, and the place which contained the twin Arjuna trees broken by Krishna. Gokul or new Gokul was founded by Ballabhâ-charyya in imitation of Mahavana or Purâna (old) Gokul and contains also the same famous spots that are shown in Mahavana. The shrine of Syâm Lala at new Gokula is believed to mark the spot where Yasodâ, the wife of Nanda, gave birth to Mâyâ or Yoga-nidrâ, substituted by Visudeva for the infant Krishna. Nanda's palace at Gokul (new Gokul) was converted into a mosque at the time of Aurangzeb. Outside the town is Putnâm-khar, where Krishna is said to have killed Putanâ. Growse identifies Mahavana with Klisoboras of the Greeks and supposes that the modern Braja was the ancient Anupa desa (Growse's *Mathura*), Ashvarama was the birth-place of Râdhikâ (*Adi P*, ch 12) See Gokula and Braja-maṇḍala

**Braja-maṇḍala** It comprises an area of 84 kos containing many villages and towns and sacred spots associated with the adventures of Krishna and Râdhikâ. The 12 Vanas and 24 Upa-Vanas are specially visited by pilgrims in their perambulation commencing from Mathurâ in the month of Bhâdra. At the village of Maholi is Madhûvana, the stronghold of the Daitya named Madhu, at Taisi is Tâlavana where Balarâma defeated the demon Dhenuka, at Râdhâkunda are two sacred pools called Syâmakunda and Râdhâkunda, where Krishna expiated his sin after he had slain the bull Arishta, at the town of Gobardhan which contains the celebrated hill of that name on the bank of the tank called Mânas Gangâ, is the ancient temple of Hanu Deva, at Patho, the people of Braja came to take shelter from the storms of Indra under the hill uplifted by Krishna (see Govardhana), at Gantholi, the marriage knot was tied which confirmed the union of Râdhâ and Krishna, at Kambana, the demon Aghâsura was killed by Krishna, at Barsana, Râdhikâ was brought up by her parents Vrishabhânû and Kîrat, at Rithora was the home of Chandrâvalî, Râdhikâ's faithful attendant, at Nandagâon was the abode of Nanda and Yasodâ, at Pansarovara, Krishna drove his cattle morning and evening to water, at Charan Pâhâl, Indra did homage to Krishna, at Chirghât on the Jamuna, Krishna stole the bathers' clothes, at Vaka-vana, Vakâsura was slain by Krishna, at Bhatroni, some Brahmanas' wives supplied Krishna and his companions with food (rice), notwithstanding that their husbands had refused to do so, at Bhândira-vana, Balarâma vanquished the demon Pralamba, at Raval, Râdhikâ was born and passed the first years of infancy before her parents went to live at Barshâna, at Brahmânda Ghât, beyond the village of Hathora, Krishna showed Yasodâ the universe within his mouth, at Mahavana, Krishna passed his infancy and killed Putanâ, at Mathurâ, he killed Kamsa and rested at Bistrânta Ghât (*Bhâgavata P*, and Growse's "Country of Braj" in *JASB*, 1871) See Braja

**Briddha-kâsi**—A celebrated place of pilgrimage now called Pudubeh-Gopuram in the presidency of Madras. It was visited by Chaitanya, who defeated here the Buddhists in controversy (Syâmlâl Goswâmi's *Gaura-sundara*)

**Brikasthala**—At a short distance to the south of Hastinâpura (*Mbh*, Udyoga, ch 86)

**Brikshakhaṇḍa**—See Chitabhûmi

**Bindavana**—Bindâban in the district of Mathurâ, where Krishna showed to the world examples of transcendental love through the Gopîs. The original image of Govindajî was removed to Jaipur and that of Madanamohana to Karauli in anticipation

of the raid of Aurangzeb. The splendid and magnificent pyramidal old temple of Govindajī with its elegant carvings and sculptures was built by Man Singh in the thirty fourth year of Akbar's reign (Growse's *Mathurā* and *Brahmavavarita P*, ch 17 and *Bhāgavata P* X, ch 12). The Nidhuvana and Nikūṇjavana the celebrated bowers of love, Pulna, the place of the rāsamandala, the Bastrahavana-ghât the Kālīya-daha-ghât,—all situated in Brindāvana were the scenes of Kṛṣṇa's love and adventures. Brindāvana appears to have attained celebrity at the time of Kāldāsa (*Raghuvamśa*, VI, 50). Brindāvana was visited by the poet Bilhanā who composed his *Bikramāṅkadeva-charita* about A.D. 1085 (see canto XVIII, v. 87). The cenotaph of Harilās is situated in his hermitage, whence Akbar in his visit to Brindaban took away his disciple, the celebrated musician Tānasena to his court. The predominance of the Buddhist religion for several centuries served to efface all traces of the sacred localities or Brindāvana, but were again restored by the explorations of Rūpa and Sanātana, the celebrated followers of Chaitanya. But the identification of modern Brindaban with the Brindāvana of the Purāṇas is extremely doubtful for the following reasons: (1) Modern Brindaban is six miles from Mathurā, whereas it took Akbar the whole day from sunrise to sunset to drive from Brindāvana to Mathurā in a car drawn by swift horses (*Vishnu P*, Pt V, ch 18, vs 12 and 33, and ch 19, v. 9 *Bhāgavata P* Pt X, ch 39, v. 30, and ch 41, v. 4). (2) Nanda, the foster-father of Kṛṣṇa, removed from Gokula which is six miles from Mathurā, across the Jamuna to Brindāvana to escape molestations from the myrmidons of Kamsa, king of Mathurā (*Vishnu P*, Pt V, ch vi, vs 23-25, and *Bhāgavata P*, Pt X, ch xi, vs 10-14). It is therefore not likely that he should select for his sojourn modern Brindāvana which is also six miles from Mathura and on the same side of the Jamunā, leaving the natural barrier of a river. (3) Brindivan does not contain any mountain, whereas ancient Brindāvana is described as mountainous (*Bhāgavata P*, Pt X, ch xi, v. 14). (4) Ancient Brindavana and Mathura seem to have been situated on the opposite sides of the Yamunā (*Vishnu P*, Part V ch 18, v. 33 and *Bhāgavata P*, Pt X, ch 39, v. 34).

**Brishabhānupura**—Same as **Barshāna**.

**Bitraghnī**—The Vātrak, a tributary of the Sabarmati in Gujarāt (*Padma P*, Uttara, ch 60, *Mārkaṇḍ P*, ch 57). Same as **Betravatī** (2) and **Bartraghnī** (cf *Padma P* Uttara, chs 53 and 60).

**Buddhavana**—Budham, about six miles north of Tapovan in the district of Gaya.

**Bukephala**—Jalālpur in the Punjab (Cunningham's *Anc Geo*, 176, 177). This was the place where Alexander the Great's favourite horse was interred. For Alexander's route to India, see *JASB*, X (1842), "Note on the Passes to Hindoostan from the West and North-west" by H. T. Prinsep, *JASB*, XXI (1852) p. 214.

**Byāghrapura**—1. Same as *Koli* (*MB.*, p. 139). 2. Same as **Bedagarbhapurī** (*Skanda P*, Sūta-Saṁhitā, IV, Yajña kh, ch. 24).

**Byāghrasara**—Buxar in the district of Shahabad. See **Bedagarbhapurī**.

**Byāsa-āsrāma**—Manal, a village near Badrināth in Garwal in the Himalayas. It was the hermitage of Rishi Vyāsa, the author of the *Mahabharata*, and the reputed author of the *Purāṇas*.

**Byāsa-kāśī**—Rāmnagar, opposite to Benares across the Ganges. The temple dedicated to Vyāsa Rishi is situated within the precincts of the palace of the Mahārājā of Benares (*Skanda P*, Kāśī-kh).

## C

**Chaltiyagiri**—Same as **Chetiyagiri**

**Chakranagara**—Koljhar, 17 miles north-east of Wardha in the Central Provinces (Cousen's *Arch S Rep*, "Central Provinces and Berar," p 10, *Śiva P*, Sanat kumāra-Samhitā, ch 17) It is perhaps the Chakrānkanagara of the *Padma Purāna*, Pâtāla kh ch, 13)

**Chakrānkanagara** See **Chakranagara**

**Chakra-tirtha**—1 In Kurukshetra, same as *Rama-hrada* 2 In Prabhāsa in Gujarāt on the Gomati (*Dravaka mātmya*) 3 Six miles from the village called Tryamvaka, which is near the source of the Godāvari 4 In Benares a kundā or reservoir enclosed by an iron railing in the Manikarnikā-ghāt 5 In Rāmesvara (*Skanda P*, Brahma kh, Setu Mahāt, ch 3)

**Chakshu**—The river Oxus or Amu Daria (*Matsya P*, ch 120, *Asiatic Researches*, VIII, p 330) The *Brahmanda P* (ch 51) mentions the names of the countries through which it flows It is mentioned by Bhaskarāchāryya as a river which proceeds to Katumāla (*Siddhānta-siro-man*, Bhubana kosh, 37, 38) The *Mahābhārata*, Bhīshma P, ch 11 says that it flows through Sāka dvipa It rises in the Pamir lake, called also the Sari-kul or yellow lake, at a distance of 300 miles to the south of the Jaxartes (McCrindle's *Ptolemy*, p 278)

**Chakshushmati** Same as **Ikshumati** (cf *Varāha P*, ch 85 with *Matsya P*, ch 113)

**Chamatkārapura** An udapura or Baranagara in the district of Ahmadabad in the province of Gujarāt, anciently called Ānarita deśa, where Linga worship was first established and the first Linga or phallic image of Mahādeva was called Achalesvara But according to other Purānas, Linga worship was first established at Devadāru-vana or Daru or Daruka-vana in Garwal (see **Devadāruvana**) Chamatkārapura was also called Nagara the original abode of the Nāgara Brāhmins (*Skanda P*, Nagara kh, chs 1—13, 114) See **Hataka-kshetra** and **Ānandapura** The Nāgara Brāhmins are said to have invented the Nagri alphabet [see my paper on the "Origin of the Bengali Alphabet (*Banga-lipir utpatti*)" in the *Suvarṇabanik Samāchār*, Vol II] See **Daruvana**

**Champa**—1 Same as **Champāpurī** 2 Siam, according to Hsuen Tsiang it was the country of the Yavanas (Beals *Life of Hsuen Tsiang Introduction*) 3 Tonquin and Cambodia (Col Yule's *Marco Polo*, Vol 11, p 255 note) 4 The river Champā was between the countries of Anga and Magadha (*Champeyya Jātaka* in the *Jātakas*, Cam Ed IV, p 281) 5 Champā was also the name of the territory now called Chambā which comprised the valleys of the sources of the Ravi between Kangra, the ancient Trigartta, and Kashthavāta (Dr Stein, *Rājataranginī*, II, p 431)

**Champakā**—Same as Champarānya 5 miles to the north of Rajm in Central India It was the capital of Rājā Hansadhvaia (*Jamini-bhārata*, ch 17)

**Champakarānya** Champarian see **Champarānya** (*Padma P*, Svarga, ch 19).

**Champā-nadī**—The river formed the boundary between Anga and Magadha (*Champeyya-Jātaka* in the *Jātakas*, Cam Ed, IV, No 506) It was a place of pilgrimage (*Padma P*, Śrīṣṭi, ch 11).

**Champānagara**—1 Chāndniā or Chāndmaya, after the name of Chānd Sadāgar, about 12 miles north of Bogra, and five miles north of Mahāsthānagar in the district of Bogra in Bengal. It is said to have been the residence of Chānd Sadāgar of the famous tale of *Manasār-Bhāsān*, and it is associated with the story of the devotion of Behula to her husband Nakhindhara, the youngest son of Chānd Sadāgar There are two marshes called Gori and Sauri, on either side of the village, which are said to be the

remains of two great rivers. It is now situated on the river Karatoyâ (Hunter's *Statistical Account of Bengal*, vol VIII, p 196). The Kâldaha Sagar, a large lake outside the rampart of Mahasthana fort is the Kâldaha of the story [*JASB*, 1878, p 94 (Beveridge)]. But Chând Sadâgar's residence is also pointed out at Champānagara near Bhagalpur, where a fair is held every year in honour of Behulâ and Nakhindhara. See, however, *Ujâni* 2. Same as **Champâpuri**.

**Champâpuri**—Same as **Champâ**. Champānagara, situated at a distance of about four miles to the west of Bhagalpur. It was also called Mâlni and Champâ-mâlni (*Matsya P*, ch 48, *Hemakosha*). It was the capital of ancient Anga, of which the king was Râjâ Romapâda or Lomapâda who adopted Dasaratha's daughter Śantâ (*Râmâyana*, Âdi, ch 10). Lomapâda's great-grandson Champâ is said to have founded the town of Champānagara which was formerly called Mâlni, but it is mentioned in the *Mahâbhârata* (Vana P, ch 112) that Champâ was the capital of Lomapâda. At the time of the *Mahâbhârata* it was the capital of Karna, the ally of Duryodhana. It is also described as a place of pilgrimage in the *Mahâbhârata* (Vana P, ch 85). The Karnagad which is included in Champānagara, contains the remains of a fort which is pointed out as the fort of Karna, who was brought up at this place. But it has been thought by some that Karnagad in Champānagara and Karnachanda in Monghu have been named after Karnasena, king of Karnasuvârna, who had conquered Anga and Banga. There is a temple of Mahadeva called Manaskâmanânâtha, which is said to have been set up by Râjâ Karna, but which appears to have been built on the site of an ancient Buddhist temple. Just outside the temple on the southern side there are many Buddhist statues. The vestiges of the ramparts of the fort on all sides still exist. Champānagara was visited by Huen Tsiang in the seventh century as a Buddhist place of pilgrimage. Champâ was the birth-place of "Bhârja-Jina," the author of the celebrated Buddhist work *Lankavatara Sutra* (ch 10), and also that of Palakâpya Muni, the author of the *Hastyaîpurveda* (a treatise on the diseases of elephants). Sona Kolavisa, the author of one of the *Theragathâs* was a resident of Champâ (*Mahāvagga*, V, 1). Many Buddhist statues and remains of ancient pillars are still found scattered over the town. The remains of the mound, on which the surrounding wall of the town was situated, as mentioned by Huen Tsiang, may still be seen close to the Nathnagar Railway Station. Spence Hardy, on the authority of Cosma Korosi, states that a king of Anga (Brahmadatta), whose capital was Champâ, had conquered Magadha before the birth of Buddha, but when Bimbisâra, then a prince, grew up, he invaded Anga and caused the king to be slain after which he resided at Champâ till the death of his father Kshatranîjas, when he returned to Rajagriha (*Hardy's Manual of Buddhism*, p 166, second ed., *Duff's Chronicle*, p 5). Since that time, Anga remained subject to Magadha. Champâpuri is also a very sacred place to the Jânas, inasmuch as it was visited by Mahāvîra, the last Tîrthankara who spent here three Parjusanas (rainy season retirement) (*Kalpasûtra*, ch vi), and it is the birth-place and the place of death of Bâsupûjya, the twelfth Tîrthankara, whose symbol is the buffalo. He was the son of Bâsupûjya and Jayâ (Buchanan's *Observations on the Jânas Asiat Res*, IX, 30). The temple of Bâsupûjya was erected by a Jaipur chief, Sungree Snee Dhata and his wife Sungvin Snee Surjaee in the Yudhishtira era 2559 (see the Inscription in Major Francklin's *Site of Ancient Palibothra*, pp 16, 17. Yudhishtira Era 2559 corresponds to 541 B.C.). At Nathnagar, which is a quarter (*mahallâ*) of Champānagara exists this beautiful temple of the Digambara sect, which is dedicated to Bâsupûjya, who is said to have lived and died at the site of this

temple From the inscriptions on some Jaina images exhumed from the neighbourhood of an old Jaina temple at Ajmer, it appears that these images, which were of Bâsupûjya, Mallinâtha, Pârivanâtha, and Vardhamâna were dedicated in the thirteenth century A D, i.e., ranging from Samvat 1239 to 1247 (*JASB*, 1838, p 52) The *Uvâsagadasâo* mentions that a temple called Chaitya Punnabhadda existed at Champâ at the time of Sudharman, one of the eleven disciples of Mahâvîra who succeeded as the head of the Jaina sect on his death (Hoernle's *Uvâsagadasâo*, p 2, notes, *Jñatâdharma-sûtrapâtha*) The town was visited by Sudharman, the head of the Jaina hierarchy, at the time of Kunika or Ajâtasatru who came barefooted to see the Ganadhara outside the city where he had taken up his abode Sudharman's successor Jambu and Jambu's successor Prabhava also visited Champâ, and Prabhava's successor Sayambhava lived at this city where he composed the *Daśavakṛdika Sûtra* containing in ten lectures all the essence of the sacred doctrines of Jainism (Hemchandra's *Sthavirâvali or Parisiṣhtapannam*, Cantos IV, V) After the death of Bimbisâra, Kunika or Ajâtasatru made Champâ his capital, but after his death, his son Udâym transferred the seat of government to Pâtaliputra (Canto VI) On the northern side of this old temple of Bâsupûjya, there is another temple dedicated to him, but it has been newly built At Champânagara proper, there is another temple of the Jainas belonging to the Svetâmbara sect, containing the images of many Tîrthankaras Champâ has been described in the *Daśakumâra-charita* as abounding in rogues From the *Champaka-Śreshṭha-Kathâ*, a Jaina work, it appears that the town was in a very flourishing condition In the opening lines, the castes and trades of the town are enumerated There were perfumers, spice-sellers, sugar-candy sellers, jewellers, leather-tanners, garland-makers, carpenters, goldsmiths, weavers, washermen, etc The name of the king is mentioned as Sâmantâ Pâla his minister was Briddhadatta (*Catalogue of Sanskrit Manuscripts* by M M Haraprasâda Śâstri, 1892) Champânagara is also traditionally the abode of Chând Sadâgar, the story of whose son Lakhundara and his wife Behulâ is so graphically related in the poem called *Manasâr-Bhâsân* The place where he was bitten by the snake and the Ghât where his dead body was launched are still pointed out close to the East Indian Railway bridge It is still called Behulâ Ghât and is situated at the junction of the Ganges and the Chandan, where Behulâ is said to have put the corpse of her deceased husband on a raft and carried it to different places till it was miraculously restored to life A great fair is held here every year in the month of Bhâdra in honour of Behulâ, the devoted wife of Lakhundara The Ganges flowed by the side of the town, but, within the course of the last fifty years, it has receded about a mile to the north Of all the places claimed as the residence of Chând Sadâgar, (as Champâ in the district of Burdwan near the river Gangur or Behulânadî and Chandma or Chandmaya in the district of Bogra), this place has the most preferential claim, inasmuch as it is situated on the Ganges, on which the story and the tradition place the Champânagara of Chând Sadâgar, and there was, according to the Hindu and Buddhist works, no other Champânagara on the Ganges except the Champânagara near Bhagalpur At the time of Buddha, Champâ was one of the six great cities of India, for Ânanda exhorted him to die in one of these great cities Champâ, Râjagriha, Srâvastî, Sâketa, Kauśâmbî and Benares, and not in the insignificant town of Kusinâra (*Mahâparinibbana-suttanta*, ch V) Subhadrângî, the mother of Asoka, was born at Champâ Her father was a poor Brâhman, who took her to Pâtaliputra and presented her to Bindusâra called also Amitraghâta, king of Magadha (347 to 319 B C), in consequence of a prognostication that she would be a great queen The jealous queens, however, employed her in menial work, but she attracted the attention of the king, who made her his

queen. She became the mother of Asoka and Vitāśoka. The artificial lake excavated by Queen Gaggārā mentioned in Buddhist works, containing groves of Champaka trees on its banks, where wandering monks (*Pabbajikas*) used to reside at the time of Buddha (Rhys Davids' *Buddhist India*, *Mahāvagga*, IX, 1, *Sonadanda Sutta*, I, with Dr Rhys Davids' notes), may be identified with the large silted-up tank now called Sarovara, from the depth of which Buddhist statues were recovered. Champā was surrounded by groves of Champaka trees even at the time of the *Mahābhārata* (*Anuśāsana P* ch 42). The king of Champāpuri had two beautiful palaces, one called Gandatā, at Kuruchattar, now called Karpāt, seven miles east of Bhagalpur at the confluence of the Ganges and the Jamuna near the Gogha-nālā, and the other called Kridāsthali near Pātharghātā was situated at the confluence of the Ganges and the Kosi (Franklin's *Site of Palibothra*, pp 28, 29. See my "Notes on Ancient Anga" in *JASB*, X (1914).

**Champāranya**—1 Five miles to the north of Rajm in Central India. It is a place of pilgrimage to the Buddhists and Jainas. Same as Champaka of the *Jaimini Bhārata*. 2 Champaran in the Patna division (*Śaktisangama Tantra*, ch 7).

**Champavati**—1 Champauti, the ancient capital of Kumaon. It was also called Champā-tīrtha and mentioned after Badarekā (*Mbh*, Vana, ch 85). For the history of the kings of Kumaon, see *JASB*, 1844, p. 887. 2 Semylla of the *Periplus of the Erythraean Sea* and Saimur of the Arabs. modern Chaul, 25 miles south of Bombay. It is now also called Revadanda (ancient Revāvanti of the inscription, *JRAS*, Vol III, p 386) or Revatikshetra. It is situated in the Kolaba district in Northern Konkan, and is said to have been the capital of an independent kingdom situated in Paraśurāmakhōstra. Perhaps it is the Champāvati of the *Skanda P* (*Brahmottara kh*, ch xvi). Chaul was a noted place of trade (Da Cunha's *History of Chaul and Bassein*, pp 3—11).

**Chandanā**—1 The river Sabaimati in Gujarāt (*Padma P*). 2 The river Chandan in the Santal Pergana in the presidency of Bengal; it falls into the Ganges (*Rāmāyaṇa*, Kishkindhā, XL, 20).

**Chandana-giri**—The Malaya-giri—the Malabar Ghats (*Trikāṇḍaśeṣa*).

**Chandanāvati**—An ancient name of Baroda in the Gaekwar's territory (Balfour's *Cyclopædia of India*, Vol I, p 138).

**Chandanāvati**.—See Chandrapura (*Jaimini-Bhārata*, ch 54).

**Chandapura**—Chayenpur, five miles to the west of Bhabuā in the district of Shahabad in Behar. The celebrated battle described in the *Chandī* between Kālī and the two kings Śumbha and Niśumbha, is said to have been fought at this place. The *Mārkaṇḍeya P* (ch 85), however, places the scene of the battle in the Himalayas; the *Vāmana P* (ch 55) places it at Bindhyāchala. The name of Chandapura is derived from the name of one of the two brothers, Chanda and Mun'a, who were the generals of the kings. The Chaumukhi Mahādeva and Durgā in a temple at Mun'e-vari are said to have been established by the other brother Munda. Mundeśvari is seven miles south-west of Bhabuā; the temple, according to Dr Bloch, is very old, the carving being of the Gupta style (Bloch's *Arch. Rep.*, 1902). The temple bears a date which is equivalent to A D 635 (Sir John Marshall's *Arch. S. Rep.—Eastern Circle*, 1913-14, p. 38). The *Vāmana P*. (chs. 19 and 55), however, says that they were the generals of Mahiśāsura and were killed by the goddess Bindubāsinī on the Vindhyā Mountain.

**Chandelgada**—Chunar. The name of Chandelgada has been derived from the Chandels, a tribe of Kshatriyas who had established their sway between Mirzapur and the districts of Shahabad. They originally came from Mahoba (modern Bundelkhand) and took possession of the fort after the Pāla Rājās. See Charanādri.

## THE HISTORY OF THE NIZAM SHÂHÎ KINGS OF AHMADNAGAR

BY LIEUT. COLONEL T W HAIG, CSI, CMG, CBE

(Continued from p 188)

## XXXII—AN ACCOUNT OF THE RISING OF MAULÂNÂ PIR MUHAMMAD, AND OF WHAT FOLLOWED

As the king of the race of Bahman had before this, from the great kindness which he had towards Maulânâ Pîr Muhammad, sworn that he would never on any account, attempt to injure that foolish man, the Maulânâ escaped the punishment which overtook most of the Sunnî doctors. He now came forth with 3,000 horse, ready for war, and encamped before Ahmadnagar, his bigotry having led him to entertain the design of dethroning the king. He therefore entered into an undertaking with the officers of his army to take 2,000 cavalry soldiers into the king's court, and seize and imprison the king, and then to raise the young prince, Mirân 'Abdul Qâdir, to the throne, and to crown him king, while the remaining thousand horse surrounded the dwelling of Shâh Tâhir and put him and his family and followers to death. It is, however, useless to plot against what has been decreed by God, or to attempt to overthrow a king He has chosen.<sup>87</sup>

Husain Abdûl Rûmî, who was a sincere lover of the family of the prophet and was the king's master of the horse, discovered the plot and informed Shâh Tâhir of it. He at once hastened to the king and informed him of the conspiracy, who asked him for his advice in the matter. Shâh Tâhir said that there was no remedy but the sword, but the king told him of the promise which he had given to Maulânâ Pîr Muhammad. Shâh Tâhir said that it was necessary that the rebel should at least be imprisoned and the king summoned Pîr Muhammad and ordered Zâbit Khân, *sarpardadar*, to arrest him when he appeared. Maulânâ Pîr Muhammad was afterwards confined, under the charge of some trusted officers, in the fortress of Pâli,<sup>88</sup> and the rebellion, owing to the imprisonment of its chief soon subsided.

Maulânâ Pîr Muhammad remained imprisoned in the fortress of Pâli for about a year, when the king, having gone to war with Ibrâhîm 'Âdil Shâh, gained a victory over him in the neighbourhood of Kutal Hatîyâli and Shâh Tâhir advised him, in gratitude for his victory, to set all prisoners free. The king followed this advice and the prisoners were released, among them Maulânâ Pîr Muhammad, who was permitted to attend at court, but was not restored to his former rank. Shortly after this Maulânâ Pîr Muhammad died.

## XXXIII—AN ACCOUNT OF THE APPOINTMENT OF SHAH TÂHIR AS VAKÎL, AND MINISTER.

The king considered that it would be to the interest of the kingdom to appoint Shâh Tâhir minister, and he therefore honoured Shâh Tâhir by going to his house to make this proposal to him. On entering the house, Shâh Tâhir led him to a private room where they could talk apart, and the king then asked him to undertake the whole administration of the state. Shâh Tâhir at first declined the honour, but afterwards, seeing that the king had set his heart on his having the appointment, accepted it.

<sup>87</sup> According to Firîshî, Pîr Muhammad's rising was much more serious than it is here represented to be, and he had at his disposal 12,000 horse ready to fight in defence of the Sunnî religion while the king had only 400 horse, 1,000 foot and five elephants. Most of the army, however, joined the king when summoned to return to their allegiance, and Pîr Muhammad fled to his house accompanied by only a small force.

<sup>88</sup> A fort in the Western Ghâts, about twenty miles east of Chaul.

The king then proceeded to complain of the perpetual quarrels of the Sultans of the Dakan, saying that they were always plotting against one another and quarrelling among themselves, whence it happened that both their countries and their subjects were ruined, and a land which was by nature an earthly paradise, was being depopulated while both the armies and the people were suffering.

Historians say that Burhân Nîâm Shâh, in the early days of his reign, observed moderation in his giving of alms and free grants and avoided excessive expenditure. As this policy was not in accordance with the views of those who desired to subsist on alms and free grants, they accused the king of stinginess, and Shâh Tâhîr had long been considering how he could represent this matter to the king without giving offence. He now seized the opportunity, and said to the king that God created generous and open-handed rulers for the relief of the poor, the indigent, and the oppressed, and that generosity was wise policy, as it pleased those who had benefited by it and prevented them, by means of the fear of losing what they had gained, from plotting against the state, while it aroused hope in others, while all loved a generous ruler. Charity, he said, covered the multitude of sins.

When Shâh Tâhîr had made an end of speaking, the king answered him not a word, but went off to the *Bâgh i Kârîz* and remained there for three days, during which time none of the *amîrs* nor officers of state saw him. At the end of three days he sent for Shâh Tâhîr and told him that he had for three days been fighting with his own inclinations, and had at last subdued them. He had decided, he said, never to depart from the advice of Shâh Tâhîr and to place in his hands the whole administration of the country and the government of the subjects, giving him complete control over all the treasure. Shâh Tâhîr then advised the king to have all alms distributed to the poor and to religious mendicants through the princes, as by this means the princes would be taught to be generous and would also become objects of love to the people, while Shâh Tâhîr himself would not be exposed to the criticism of the people.

The king followed this advice and caused the princes to distribute alms. Of the princes Mirân Husain and Mirân 'Abdul Qâdir were more generous than the rest. Mirân Husain's generosity was such that when he had distributed all of his own share of the alms, he would seize his brother's share and distribute that too, and in this way he so endeared himself to the army and the people, that the crown ultimately came to him. The result of the king's liberality was that peace, prosperity and plenty reigned throughout the land and the strong no longer oppressed the weak. Deserving men came from all countries and profited by the king's bounty. Every year shiploads of treasure, carpets, lamps, and other offerings were sent to Makkah, Madinah, Najaf, Karbalâ, and other shrines of the infallible Imâms, and the gates of joy were opened before all descendants of the prophet.

One of the results of this policy was that the enemies of the state were everywhere overthrown and rendered powerless while the king's officers were everywhere gladdened by victory, and the glory and prosperity of the kingdom increased day by day. The giving of effect to Shâh Tâhîr's advice had its rewards from God, for many Sayyids of high degree and religious leaders of great fame came to the Dakan and met with the fulfilments of their hopes from the king's bounty. The chief of them was Amîr Sayyid 'Alî Shadgham (*sic*) Husainî Madani who was among the most noble among the descendants of Husain in Madinah and was distinguished by pre-eminence in learning. When he arrived at Ahmadnagar the king sent one of his courtiers to inquire what was the object of his coming, and the Sayyid

replied that he was so desirous of performing a pilgrimage to his grandfather's tomb that he wished to recite the evening prayer at the head of Mu tafâ's grave. The king was much affected by this speech and gave the Sayyid 12,000 *hûns* <sup>89</sup>. He also bestowed on his son, Sayyid Hasan, in marriage, one of his daughters who, as she had been born at the time when the king gained one of his famous victories, was named Fath Shâh Begam. Fath Shâh Begam performed the pilgrimage with her husband, but when the latter wished to return to the Dakan, she refused to accompany him, even to her own country, saying that she was not the woman to leave the prophet's tomb for the sake of worldly advantage. At length she died there and was buried near Muhammad's tomb. After her death, Sayyid Hasan came again to the Dakan, and died and was buried in Junnâi.

Another Sayyid who came to the Dakan was Sayyid Mu'hammad Husamî, Madanî Wu'âdî, who was received with honour both by Shâh 'Iâhir and by the king. Sayyid Muhammad, having gained his object, returned to 'Irâq, and there made a report to Shâh 'ahmâsb, son of Shâh Isma'il Safavî, of all that he had seen and heard of Burhân Nî'âm Shâh, of his attachment to the Shi'ah faith, and of the controversy with the Sunnî doctors. This report led to the opening of friendly communications, fostered by Shâh 'Iâhir, and to the bestowal of many favours by Shâh 'ahmâsb on Burhân Nî'âm Shâh, between whom and Shâh 'ahmâsb letters constantly passed. Among these communications was a *farmân* dated in the month of Muharram, A H 949 (April-May 1542) addressed to Shah 'Iahir, which, when it was read, infused joy into the hearts of all loyal friends, and grief into the souls of all crying enemies (of the Shi'ahs).

Shah 'Iahir showed this *farmân* to the king and represented that it would be advisable to send a reply thereto, by means of an ambassador worthy of the task, but preferably by the hands of one of the princes, in order that the bonds of friendship with the Court of Persia might be more tightly drawn. The king approved of this advice and selected Shâh Haidar, the most learned and accomplished of his sons, as his ambassador to Persia. The prince bore a letter <sup>90</sup> to the Shâh of Persia, and when he reached the Persian court and paid his respects to the Shah, he was received with great honour and special favour and became one of the Shâh's most intimate courtiers, and devoted all his endeavours to promoting friendship between the Safavî and Nî'âm Shâhî families, the results of which may be seen in the correspondence which passed between the two kings, for when the Sayyid Mîr Nî'âm-ud-dîn Klur Shâh came from the Persian court to India and waited on Burhân Nî'âm Shâh, he brought a *farmân* <sup>91</sup> from the Shâh of Persia. The *farmân* was dated Rabi I, A H 954 (April-May 1547).

About this time Mihtar Jamâl arrived from Persia with another communication from the Shâh, but after his departure from Persia, was found to have been guilty of some unfitting words and deeds, and some officers were sent after him to arrest him, but he, becoming aware of this, made off before their arrival, and having reached one of the ports, embarked on a ship and thus escaped from danger. Burhân Nî'âm Shâh then wrote an answer to the letter which Mihtar Jamâl had brought, and asked, among other things, that a body of troops might be sent from Persia to the Dakan to help him against his enemies.

<sup>89</sup> A gold coin, worth four rupees or eight shillings when the rupee was worth two shillings.

<sup>90</sup> Sayyid 'Alî reproduces this letter. I have not translated it. It is very long, very fulsome, and contains nothing of historical interest.

<sup>91</sup> This *farmân* also is reproduced. I have not translated it, for the reasons given in the preceding note.

XXXIV—AN ACCOUNT OF THE KING'S EXPEDITION TO MURHÎR, IN ORDER TO CONQUER IT, AND AN ACCOUNT OF THE EXPEDITION TO, AND CAPTURE OF, THE FORTRESS OF GÂLNA

As the king was ever desirous of exalting the banner of Islam and of uprooting unbelief, he now determined to capture the fortress of Gâlna,<sup>92</sup> which is one of the famous fortresses of the land of Hind, and is situated in the country of Râja Baharjî,<sup>93</sup> which lies between the kingdom of Ahmadnagar and the country of Nandurbâr<sup>94</sup> and Sultânpur. He therefore marched against that fortress and laid siege to it. The infidels who garrisoned the fort made some attempt at defending it although they had lost heart at the sight of the royal army, but their schemes were like the schemes of a fox against a raging tiger. They, therefore, soon came forth and humbled themselves before the king who had pity on them and granted them their lives, but destroyed all their temples and dwellings, and built mosques where idol-fanes had stood. Large quantities of plunder were seized by the victorious army and the king, having appointed one of his great *amirs* to the command of the fortress, returned to his capital in triumph.

At this time the king determined to capture the fortress of Murhîr<sup>95</sup> which is situated in the borders of Gujurât and the Dakan, and was then held by an infidel named Bhîrdama. He therefore assembled a very numerous army and marched on that fortress, which was second only to Khanbar in strength.

When the army reached Murhîr they at once attacked the fortress and drove the garrison from the outer fort into the inner, slaying many of them. They then besieged the inner fort and made several attempts to carry it by escalade, slaying many of the garrison at each attempt.

When Bhîrdama perceived that he could not long withstand the royal army he appealed to Sultân Bahâdur of Gujurât for help. Sultân Bahâdur wrote to Burhân Nizâm Shâh, informing him that Bhîrdama was a vassal of Gujurât, and requesting him not to proceed to extremities against him. Burhân Nizâm Shâh graciously acceded to Sultân Bahâdur's request and returned towards his capital.

XXXV—AN ACCOUNT OF THE CAPTURE OF THE FORTRESS OF PARELDA

While Burhân Nizâm Shâh was returning from Murhîr towards Ahmadnagar Ratan Khân, brother of Mir Khidûm Khvâja Jahân<sup>96</sup> (Dakanî), aided by God's grace, sought refuge at the foot of the king's throne and complained of his brother's cruelty to him. The king encouraged Ratan Khân to hope that his wrongs would be righted and marched to capture Parelâ.<sup>97</sup>

<sup>92</sup> A fort situated in 20° 46' N and 74° 32' E. It is built on a circular detached hill 2316 feet above sea level and 800 feet above the surrounding plain.

<sup>93</sup> This was the honorific title adopted by the Râthor rajas of Baglana, a hilly tract now represented by the Baglân and Kâshvân *talukas* of the Nark district of the Bombay Presidency.

<sup>94</sup> Nandurbâr town is situated in 21° 22' N and 74° 14' E. The district of which it was the capital was always a bone of contention between the three Muhammadan states of Gujurât, Mâlwa, and Khândesh. Akbar assigned it to his *suba* or province of Mâlwa.

<sup>95</sup> This is the fortress of Murhîr in Belûch, situated in 20° 16' N and 74° 4' E.

<sup>96</sup> This was Fâshî ul Mulk the Dikanî entitled Khvâja Jahân, to whose lot the fortress and district of Parelâ fell at the partition of the Bahmani dominion. He is often found in alliance with Ahmadnagar but did not regard himself as a vassal. At one time he cherished the design of declaring himself independent, but his neighbours of Ahmadnagar and Bijâpur were too strong for him.

<sup>97</sup> This is evidently intended to be an account of the last war between Burhân Nizâm Shâh I and Ismâ'il 'Adil Shâh, and should have preceded the account of Burhân's conversion. It is incorrect, for that war began and ended with the total defeat of the army of Ahmadnagar near Naldurg and the flight of Burhân to his capital.

When Makhdûm Khvâja Jahân heard that Burhân Nizâm Shâh was marching against him he realized that he could not hope to withstand him, and vacated Parenda and fled to Bijapur. Burhân Nizâm Shâh placed a garrison of his own in Parenda and returned to Ahmadnagar.

ʿĪsmâʿil ʿĀdil Shâh resolved to assist Makhdûm Khvâja Jahân and sent some troops with him to Parenda with orders to capture it and to hand it over to him.

When it was reported to Burhân Nizâm Shâh that Makhdûm Khvâja Jahân was coming with an army of Bijapuris to recapture Parenda, he appointed Hasan and Daulat, the sons of Jirân Khân Khân and *ghulam ʿâdas* of the Nizâm Shâhi house, to the command of an army to march to Parenda and meet Makhdûm Khvâja Jahân.

When the two armies met, a fiercely contested battle was fought, and the army of Ahmadnagar was obliged to retire backward but the fortune of the day changed, and at length Makhdûm Khvâja Jahân and the Bijâpûris were utterly defeated. All their camp equipage and other belongings fell into the hands of the victors who pursued them with great slaughter. Makhdûm Khvâja Jahân escaped from the field with great difficulty, and now he could no longer, for very shame, show his face in the Dakan; he fled to Gujarât.

The army of Ahmadnagar returned after this victory to the capital, and Hasan Khân and Daulat Khân who had covered themselves with glory in the battle, were royally rewarded.

Makhdûm Khvâja Jahân after spending a long time in affliction in Gujarât, made interest with one of the courtiers of Burhân Nizâm Shâh and received a safe conduct, which enabled him to come to Ahmadnagar and pay his respects to the king. He still further secured his position by giving one of his daughters in marriage to Mirân Shâh Hasan, after which marriage the king replaced him in Parenda, as will be related in its place.

#### XXXVI THE DEATH OF ʿĪSMĀʿIL ʿĀDIL SHĀH, AND AN ACCOUNT OF THE EVENTS

##### WHICH HAPPENED THEREAFTER

A.D. 1531-32. In this year and while these events were in progress ʿĪsmâʿil ʿĀdil Shâh died<sup>98</sup> and Mallû Khân his eldest son ascended the throne, but he had scarcely had time to taste the sweets of sovereignty, when Asad Khân, who was the most powerful of the *amirs* of Bijapur and was all content that Mallû should be king, with the assistance of the rest of the *amirs* and officers of state deposed Mallû, caused him to be blinded with a hot iron and threw him into prison, and then raised his younger brother Ibrâhîm to the throne. ʿĀdil Khân then made himself regent of the kingdom of Bijâpûr.

A.D. 1537-38. Meanwhile it became known that Râm Râj ʿalî of the king of Vijayanagar had rebelled against, and overcome his lord, and having imprisoned him, had usurped the kingdom.<sup>99</sup>

<sup>98</sup> ʿĪsmâʿil ʿĀdil Shâh died on Safar 16, A.H. 941 (August 27, 1534). His eldest son, Mallû, was raised to the throne, but so disgusted the people by his shameless debauchery that he was deposed and blinded. His grandmother, Pamr Khâtûn, was the prime mover in his deposition, and Asad Khân Larî merely obeyed her orders. ʿĪsmâʿil's second son, Ibrâhîm ʿĀdil Shâh I, was raised to the throne in March, 1535.

<sup>99</sup> This is a garbled and misleading account of Ibrâhîm's expedition to Vijayanagar. Venkatarâya, whom ʿĪsmâʿil and Sayyid ʿAlî call Râm Râj, had attempted to usurp the throne in Vijayanagar, but finding that he was unable to command the all-gance of the leading men of the kingdom, had been obliged to place on the throne, as a puppet king, a scion of the old royal house, appointing the boy's maternal uncle Hoj Nirmal Râj, on whom he thought he could rely, tutor to the king. But Hoj Nirmal, who was a lunatic, put his nephew to death during Venkatarâya's absence from the capital on an expedition, and usurped the throne. His treachery so disgusted his supporters that they turned again towards Venkatarâya, and Hoj Nirmal, alarmed for his safety, sought help of Ibrâhîm ʿĀdil Shâh. Venkatarâya

While the success of Râm Râj was yet doubtful and the whole of the army of Vijayanagar had not joined his standard, Asad Khân, regarding the state of affairs in Vijayanagar as an opportunity not to be lost, assembled the whole of the army of Bijâpûr and, taking Ibrâhîm 'Âdil Shâh with him, invaded Vijayanagar with the intention of conquering the country.

When Râm Râj learnt that Ibrâhîm 'Âdil Shâh was invading Vijayanagar he, having regard to his own uncertain position in the country, was compelled to seek safety, at the expense of his honour and reputation, in flight.

Ibrâhîm 'Âdil Shâh, finding that his enemy had fled before him, encamped in Vijayanagar and remained there for a considerable time. This easy occupation of an enemy's country turned the young king's head, and he several times said, in the presence of Asad Khân and the rest of the *amîrs*, "My house has hitherto been extremely ill served by its slaves, and as soon as I have done with Vijayanagar, I will, by God's grace, see to this matter, and will take vengeance on all who have not done their duty, and will have done with them." These words made Asad Khân and the other *amîrs* apprehensive, and they sent a messenger to Râm Râj, charged with this message, "What has come to thee that thou hast brought shame on thyself by flying without striking a blow, and hast thus branded thyself as a coward and a craven? Even now, if thou wilt set forth we will so arrange matters that Ibrâhîm 'Âdil Shâh shall avoid a fight and take the road, and even if the affair should end in a battle we will stand aloof so that the day shall be thine. In any case it behoves thee to shake off despondency and to come to battle."

XXXVII.—AN ACCOUNT OF THE KING'S EXPEDITION FOR THE PURPOSE OF SUBDUING  
SOME OF THE TRACTS ABOUT PARENDA, AND OF THE EVENTS WHICH HAPPENED  
DURING THAT EXPEDITION

A.D. 1540-41. While Burhân Nizâm Shâh had been engaged in his dispute with Sultân Bahâdur of Gujarât, which had been fomented by Imâd-ul Mulk, 'Âdil Shâh, taking advantage of the opportunity, had annexed some of those districts of the Almadnagar kingdom which lay on his frontier and had refused to comply with Burhân Nizâm Shâh's request for their restoration. Now that Ibrâhîm 'Âdil Shâh had invaded Vijayanagar and was encamped there, awaiting the army of Râm Râj, Asad Khân wrote a letter to Burhân Nizâm Shâh, advising him to seize this opportunity of recapturing his lost districts, as Ibrâhîm 'Âdil Shâh could not leave Vijayanagar, and the Turks, who were the flower of his army, were friendly towards Burhân Nizâm Shâh. Burhân Nizâm Shâh therefore assembled his army and marched towards the 'Âdil Shâhî dominions. At this time a close alliance existed between the king and Daryâ 'Imâd Shâh, and the latter was summoned to join the royal camp. He came, but disapproved of the campaign against Bijâpûr, telling Burhân Nizâm Shâh that the 'Imâd Shâhî and the 'Âdil Shâhî families were united both by marriage and by the ties of long-standing friendship, and that he conceived that it would be both ungenerous and unkindly to attack the kingdom of Bijâpûr now that 'Imâd 'Âdil Shâh was dead and the government was in the hands of a boy. But in spite of the views urged by Daryâ 'Imâd Shâh, Burhân Nizâm Shâh, whose apprehensions had been entirely set at

wrote to Hoj Nirmal, pointing out to him the danger of introducing a Muhammadan army into the country and promising to serve him faithfully if he would induce Ibrâhîm to retire. Hoj Nirmal paid Ibrâhîm 4,400,000 *huns* to retire, and Venkatarâya then marched on Vijayanagar. Hoj Nirmal committed suicide and Venkatarâya ascended the throne. Ibrâhîm then sent Asad Khân Lâri to capture Adoni, but Asad Khân was defeated by Venkatâdrî, brother of Venkatarâya. He retrieved his defeat by a victory and then, with the approval of Ibrâhîm 'Âdil Shâh, made peace. (I. ii, 49—52.)

rest by Asad Khân's letter, continued his march towards Bijâpûr, moving, however, in a very leisurely manner. Daryâ 'Imâd Shâh, who was annoyed by Burhân Nizâm Shâh's persistence and disregard of his remonstrances, and also strongly disapproved of his change of religion, marched on rapidly and was several stages ahead of the army of Burhân Nizâm Shâh.

When news of the movements of Burhân Nizâm Shâh reached Ibrâhîm 'Âdil Shâh in Vijayanagar, he was much perturbed, and consulted Asad Khân and his other officers, who had actually brought about the invasion,<sup>100</sup> as to the best means of meeting the situation. They unanimously advised him that the only wise course was to make peace with Râm Râj and to return to his own country. This advice was followed, and Ibrâhîm 'Âdil Shâh, on his return, wrote to Daryâ 'Imâd Shâh, imploring his assistance against the powerful army of Burhân Nizâm Shâh. As he had outstripped the army of Burhân Nizâm Shâh in its advance, he was enabled to press on and meet Ibrâhîm 'Âdil Shâh, and he and Ibrâhîm then marched together against the army of Ahmadnagar.

At the same time the loyalty of some of Burhân Nizâm Shâh's officers, such as Sayyid 'Umdat-ul-Mulk, Jîman-i-Khairât Khân, his brothers Hasan Khân and Daulat Khân, who were the sons of Khurât Khân the African, and the other chief officers of the army, who resented the king's change of religion, was doubtful, and the king was disturbed by the thought that he could not trust them.

At this time the army of Ahmadnagar was encamped at Ghât Apar Ganga near the Qutbi tank and the armies of Ibrâhîm 'Âdil Shâh and Daryâ 'Imâd Shâh were near Bakasî at a distance of two *gans* from the *ghât*. Hasan Khân and Daulat Khân, the brothers of Jîman-i-Khairât Khân, who were the best officers in the army, descended the Ghât and thus excited the suspicions of Burhân Nizâm Shâh, who ordered them to return. They replied that their retreat in the face of the enemy would only serve to encourage him, and offered to attack the enemy and break his spirit. Ibrâhîm 'Âdil Shâh, having learnt of the dissension of the army of Ahmadnagar, was anxious to march forward and attack it, but Daryâ 'Imâd Shâh restrained him and sent a message to Burhân Nizâm Shâh, telling him that the best thing he could do would be to desist from making war on Bijâpûr in order that Daryâ 'Imâd Shâh might persuade Ibrâhîm 'Âdil Shâh to surrender the districts about Parenda and induce him to return to Bijâpûr. Burhân Nizâm Shâh agreed to make peace, as these districts were the only cause of the quarrel, and then seized Jîman-i-Khairât and blinded him. 'Umdat-ul-Mulk then fled from the camp and sought refuge with Daryâ 'Imâd Shâh.

One night Daryâ 'Imâd Shâh came in disguise to the tent of 'Ain-ul-Mulk Kan'ânî, one of the officers of Burhân Nizâm Shâh who, like the rest, resented the king's change of religion, and told him that he had come thus as he had a request to make, which he hoped 'Ain-ul-Mulk would grant. 'Ain-ul-Mulk replied that it was granted before it was asked, and Daryâ 'Imâd Shâh then produced 20,000 *hûns* and handed them over to 'Ain-ul-Mulk, promising him other 30,000 for the trouble of joining Ibrâhîm 'Âdil Shâh's camp to get them. 'Ain-ul-Mulk agreed, and marched that night and joined Ibrâhîm 'Âdil Shâh, whose

<sup>100</sup> This accusation is without foundation, and peace had already been concluded with Vijayanagar before Burhân Nizâm Shâh invaded Bijâpûr. Asad Khân Lârî, who was on his estates at Belgaum, was in disgrace at Bijâpûr owing to the slanders of an enemy, Yûsuf the Turk, who with the permission of Ibrâhîm 'Âdil Shâh, made more than one attempt to have him poisoned or assassinated. Yûsuf told Ibrâhîm that Asad Khân was annoyed at the re-establishment of the Sunni religion and wished to surrender Belgaum to Burhân Nizâm Shâh, who was a Shi'ah king. The accusation was false, but Asad Khân feared to appear at court, and when Burhân Nizâm Shâh reached the neighbourhood of Belgaum, joined him with 6,000 horse, but was afterwards reconciled to his master and deserted Burhân.

army thus became the stronger of the two, for 'Am-ul-Mulk had always with him three or four thousand of the best cavalry, and it is evident that a change of sides by such a commander must always strengthen the side which he joins.

A.D. 1542 As Daryâ 'Imâd Shâh was anxious to put an end to the strife and wished well to both sides, he went to Ibrâhîm 'Adil Shâh and did his best to persuade him to surrender the *peths* of Parenda. These were surrendered to him, and he made them over to Burhân Nizâm Shâh and then persuaded Ibrâhîm 'Adil Shâh to return to Bijâpûr. After this, Daryâ 'Imâd Shâh himself returned to his own country, and Burhân Nizâm Shâh set out on his return march. When the army started for Ahmadnagar Burhân Nizâm Shâh considered it unwise to pay any attention to Hasan Khân and to Daulat Khân, who were below the *ghât*, and they, being apprehensive of his intentions towards them, went to their *jâgîrs*, Parenda and Â-lûf and thence made their way to Gujarât, where they had been assured of a favourable reception.

According to some historians, Barîd-i-Mamûlik (Amir Ali Barid) who accompanied Burhân Nizâm Shâh on all his expeditions, died on the return march to Ahmadnagar, while some say that his death occurred just after the meeting of Burhân Nizâm Shâh with Sulţân Bahâdur of Gujarât, but whichever account be true, it is certain that he met his death while serving the king.<sup>101</sup>

The king grieved sorely for the death of Malik Barîd (even 'Ali Barid) who had ever been obedient to him and had never for any reason disobeyed him or crossed him, and after his return to Ahmadnagar he honoured his eldest son, who had accompanied his father on his expedition, by bestowing on him one of his daughters in marriage, and granted to him a royal robe of honour, an umbrella, and an *âflabgîr*, set him up in his father's place, and distributed both to him and to his army very large rewards both in cash and in kind.

When Malik Barîd (Âlî Barîd Shâh I) obtained permission to depart and returned to Bidar, his two younger brothers, who were in Bidar, rebelled against him and blinded and imprisoned him, and then took the kingdom for themselves, one of them taking the title of his father and the other that of Khân Jahân. Such is fate.

After this, the sons of Malik Barîd, following the guidance of good fortune, remained loyal for a time to the Nizâm Shâhî house and were honoured accordingly, but afterwards, their enmity and opposition to the royal house bore their own fruit, as will be mentioned hereafter in its proper place.

At this time the love and friendship that existed between the king and Daryâ 'Imâd Shâh were strengthened by the marriage of one of the daughters of Daryâ 'Imâd Shâh to Mîrân 'Abdul Qâsim, and the two families were long united in the bonds of friendship until the traitor Tufâl Khân rebelled against the children of Daryâ 'Imâd Shâh and took possession of the country of Berar, until time brought home to him the punishment of his misdeeds.<sup>102</sup>

(To be continued)

<sup>101</sup> Amir 'Ali Barid, the second of the Barid dynasty of Bidar, died in 1542 near Daulatâbâd, whether Burhân Nizâm Shâh had been driven by Ibrâhîm 'Adil Shâh I. Sayyid 'Âlî's account of this campaign is most misleading. The true version will be given later. Amir 'Ali was succeeded by his son of the same name who, having been the first of his line who ventured to assume the royal title, is known as 'Ali Barid Shâh. The statement that his two younger brothers rebelled against him and deposed and blinded him is entirely incorrect. He reigned in Bidar until his death in A.H. 987 (A.D. 1579) and was succeeded by his eldest son, Ibrâhîm Barid Shâh.

<sup>102</sup> That is to say, the annexation of Berar by Murtazâ Nizâm Shâh I in 1574 and Tufâl Khân's imprisonment and death.

## ON THE HISTORY OF THE INDIAN CASTE-SYSTEM

BY HERMANN OLDENBERG

(Translated by H. C. Chakradar, M.A. Calcutta)

A STRONG reaction has developed against the attitude of unsuspecting confidence with which a past generation of scholars approached the ancient Indian tradition about religion, custom, law and the state. There is an ever-increasing tendency to regard the simplicity and the rigid and straight lines of the picture furnished by that tradition as a product of art, even as a fabrication of ancient theorists, wherever there appears to have been some success in lifting a little of the veil spread by these authorities over the real state of things, it is believed that there may be perceived instead of that simplicity, an endless complexity of numberless forms crossing one another, intertwining with one another, running into and then again vanishing out of one another. There is nothing more hazardous, so we are told by powerful voices, than when the scholar who is faced by such a chaos is carried away—to speak with Senart<sup>1</sup>—by the anxiety for great clear cut lines, for a fixed framework,” thus one attains to an ‘ orthodoxy a little too hasty ’ which at the bottom is nothing but a perilous illusion and, to speak frankly, somewhat of a pedantry. If I am not mistaken, the above indicated tendencies and counter tendencies that characterise a modern profitable direction of Indian antiquarian research, are strengthened by a second, and no less powerful tendency of modern investigation by the predilection for interrogating the India of the later literature nay even the India of the present day, as the best witnesses with regard to the condition of older India. We are now fond of examining, in the light of the *Mahâ-bhârata*, and even in the light of what is perceived by the present day observer of living Indian life the culture of the *Rigveda* the specific Indian stamp of which, one would fear, might be obliterated by bringing in the occidental point of view. no wonder then, that the inexhaustible diversity and labyrinthine intricacy of present day conditions make the affairs of antiquity inasmuch as they are illuminated by those of the modern times appear in quite another light than that in which they would appear to the philologist who had drawn from the ancient sources such a simple, clear picture of the times of the *Lola* and of *Manu*. (One is not so clear with impunity. ’ (Senart)

No doubt the sort of speculation indicated above widens most effectively the narrow, old horizon in a hundred directions, has yielded the most gratifying and profitable results to research, and, we may here set down without hesitation promises to be still further fruitful. But new branches of science are threatened more than those that are of older standing, and richer in respect of well-attested facts, by the danger that principles and ideas correct in themselves may be strained beyond all measure. So I intend to note here the signs and indications that warn us that we are in danger of running from one extreme, that of unsuspecting reliance on the picture of Indian antiquity which, it had been believed, could be discovered all too easily from a study of the sources—to a hardly less hazardous extreme of mistrust. The ever-growing and ever-strengthening preference for the complicated, the incommensurable, for the infinite gradations of shades and nuances, hovering in cloudy uncertainty, imposes upon us the duty of emphasizing the claims of positive well-ascertained facts, of fixed and sure lines drawn from tradition—the duty of

\* From the *ZDMG* Band LI, pp. 267—2901 In his introduction to Minayeff, *Recherches sur le Bouddhisme*, p. II fig

emphasizing, in opposition to the dragging in of the incalculable diversity of present day Indian life into investigations about antiquity—the claims of this intimacy itself, so that it may not be deprived of its character of old world simplicity.

In this sense I would like to make a few observations on a work which, in spite of differences of opinion in which I feel myself opposed to the author, appears to be one of the most prominent works of the new Indian research—Senart's book, *Les Castes dans l'Inde, les faits et le système* (Paris 1896)<sup>2</sup> I enjoy a substantial advantage over Senart, inasmuch as I am now in a position to avail myself of the excellent compilations and researches which R. Fick has embodied in his book, *The Social Constitution of North-Eastern India in Buddha's Time* (Kiel 1897). I can by no means suppress the observation that the sources upon which Fick has drawn, were already accessible before, and that in my opinion, they must, without fail, have been approached for the solution of the questions that Senart has to deal with.

Senart proceeds to describe the *modern* castes—it is impossible to do this with greater mastery than his. With the picture that he has thus made up he next approaches the ancient tradition, in order to investigate it thoroughly with regard to the more or less clear traces therein of the same state of things.

We endeavour to reproduce here the substance of his exposition of the subject.

The modern caste—if its typical form is kept in sight and the exceptions numberless, as may easily be conceived, they are—be left out of consideration represents a corporation, to which the members belong hereditarily, by virtue of their birth. This corporation has its organisation with a chief and a council at the head. It exercises partly through this organ, partly direct, a certain control over the affairs of its members, a certain jurisdiction—it inflicts penalties and expulsion. They marry especially so far as it concerns the first marriage which is associated with special sanctity in the regulations about polygamy inside the caste because only a mother of the same caste can bear children who inherit the caste of the father. On the other hand they marry outside a certain narrower section of the caste outside the family or the clan. They avoid community of meals with persons of lower caste, and also other forms of contact, of course under closer restrictions of the most varied kind. Many kinds of special customs, especially in relation to food and married life, serve to characterise the caste and to fix its superior or inferior position in the social order. Certain restrictions about food, the abstention from spirituous liquors, the marriage of girls in childhood, the prohibition of widow-marriage, and so forth. Similarity of occupation and profession amongst the members of a caste is the rule, but this is broken by innumerable exceptions, and also inversely, the followers of the same profession do not in any way belong to *one* caste but to more or less numerous and distinct castes—thus the Baniyās or traders in the Punjab are split up into sections with geographical names such as the Aggarwals, the Oswals etc., and these sections, characterised by endogamy, must be taken as even so many separate castes. Such castes, larger and smaller, occupy the stage in an immense crowd, in an inextricable tangle. Constantly new castes spring up into existence, now the introduction of a new custom, of a new rule of purity, calls a new caste into being, and now again, religious or even geographical separation has the same

<sup>2</sup> Cf. Jolly, *ZDMG.* 50, 507ff., Barth, *Bulletin des religions de l'Inde (Revue de l'hist. des Religions)*, XXX, p. 76 ff. of the separate reprint.

<sup>3</sup> An apology is necessary that this fresh summary makes its appearance here, after Jolly has already given an excellent *résumé* of Senart's book elsewhere in this Journal. Yet it is indispensable for me to give in my own way the necessary foundation for the criticism which follows.

effect, illegitimate children of one caste bind themselves together into a new caste, groups of aborigines, stepping into the sphere of Hinduism and embracing the customs of the Hindus, form new castes, old castes, which renounce this or that lower occupation, take up the names and attributes of castes standing higher. So there prevails a constant transformation into separate units hardly comprehensible in their incalculable diversity, whilst over the whole, as a conservative, stabilising power, rules the hierarchical principle of the supremacy of the Brahman's position which impresses its stamp upon everything.

Here is described the caste as it appears at the present day, and no one can call in question the correctness of the picture drawn by Senart,—so now the question arises how the ancient literature stands in relation to this picture. Senart investigates this as he gradually ascends, with the help of that literature, from the modern strata to the ancient and still more ancient ones, at first he occupies himself with the Dharmasāstras and the Epics, next with the Sūtrās and the Brāhmaṇas, and finally with the Hymns of the *Rigveda*.

The law-books, like that of Manu, draw a picture of a society rigorously organised according to castes (*Senart*, p. 111 fg.). Every caste has certain occupations allotted to it. Marriage has to be concluded, at least for the first wife of a man, within the limits of his caste, and on the other hand, outside the limits of his *gotra*. Interdining and various other kinds of contact with people of lower castes are strictly prohibited. Spirituous drinks are tabooed, detailed prescriptions separate the permitted food from the unpermitted. The marriage of maidens in infancy is proscribed, widow marriage interdicted. Every serious violation involves the loss of caste.

Thus the data drawn from this literature have a striking agreement with the state of things to be observed at the present day (p. 113). The great difference that strikes the eye lies only in the well-known fourfold division of the ancient castes as against the numberlessness of the modern ones. However, a thorough examination of the ancient ordinances themselves shows us that the simplicity is only apparent. There is no fifth caste, it is said. And yet, beside the four castes, there are the mixed castes and the innumerable mixtures of these mixtures, besides, there are the various categories of the *Vrātyas* who have lost their caste, because in their childhood the necessary sacred initiation had not been effected. Even the strict demarcation of the occupations of the four principal castes proves itself to be as illusory as the fourfold enumeration. Every caste is expressly given the right to adopt, in need, the occupation of the next following caste. And the list of Brahmans who are considered to be unworthy of taking part in a funeral feast, includes thieves, butchers, actors and the followers of many other professions, this shows that there was no less diversity of occupations amongst the Brahman-class formerly than there is today. Lastly, the law-book of Manu shows expressly too the elastic character of its own rules, inasmuch as it declares that the usage of each caste, family and province is to be considered as the decisive and final authority. Thus is revealed the endlessly complicated condition of the actual life behind that apparently so simple system of four castes, which system in reality is only a product of the passion for theorising and schematising in the Indian mind. Everything, however, is intelligible, the inconsistencies are solved by local differences, the improbable symmetry is explained by the endeavour for clear systematisation, if it is taken for granted, that, behind the ancient tradition, there exist circumstances which were perfectly analogous to the modern ones and which are reproduced in that tradition only in a false perspective, with generalisations and distractions which are sure to be produced by the peculiar predisposition of the Indian mind and also by the all-dominating deference to the interests of the Brahmanical class (p. 128).

From the Dharmasâstras the investigation goes back to the Sûtras and further back to the Brâhmanas (p 131, ff) No doubt this entire literature moves upon the same ground as the later texts Here also are the same four castes with the very same fixed limits as later, the same prestige of the Brahman caste, the same ordinances about marriage, about the avoidance of defilement, the same condemnation of the indulgence in spirituous liquors, and so forth Here too are the same traces that the real facts of life are not exhausted by the few simple and straight lines of the system By the side of the well-known four castes stand innumerable mixed castes And, as far as the principal castes are concerned, have we not reasons to doubt that there ever existed a caste of the Kshatriyas or of the Vaiśyas ? Categories like these are certainly much too wide to be consistent with that corporate organisation with which we are acquainted in the living castes. We should speak not of one Brahman caste, but of Brahmanical castes One should be very clear about this, that it is but a generic name which covers innumerable single caste-units, each endowed with its own individuality The modern Rajputs who claim to represent the Kshatriyas of the system—do they form one caste ? They form innumerable castes, and we see before our eyes how small castes are ever laying claim anew to one of those great titles, which means for them an elevation to a higher social standing Would it not have been exactly so in ancient times (p 140) ?

Thus have we inferred Senart, arrived at the conclusion, that those four great categories of the ancient system represent in reality not four *castes*, but four *classes* As such they are very ancient, they correspond to the four classes of the *Avesta* The old theoretical doctrine has extended the form of these classes to the true castes—to those castes which are to be thought equal to, or, at least, analogous to the modern ones In point of fact these latter organisms are absolutely distinct in their nature from the former (pp 140-142)

The four classes Senart finally traces back to the oldest literary monument of India, the *Rigveda* (p 145, ff)

First of all, he proceeds to that well-known hymn *Iv* X, 90 which makes the Brâhmana proceed from the mouth of the primordial being, the Râjanya from his arms, the Vaiśya from his loins, and the Śûdra from his feet as is well known it is the only passage in the *Rigveda* where are found the later designations of the four varnas<sup>4</sup> However, this passage belongs to a hymn about the late origin of which in comparison with the main body of the Rigvedic poesy, there can be no doubt<sup>4</sup>

But how are the relations of the classes represented in the main body of that poem ?

In the foreground stands the distinction between the Ârya varna and the Dâsa varna The former corresponds to the first three castes of the later system, and the latter, to the fourth It is clear that it has to do with the antagonism of nationalities Aryan and non-Aryan,—characterized by the bright and the dark colour of the skin (*varna*) Next, amongst the Aryans, the Hymns of the *Rigveda* further distinguish distinctly three great—in the oldest time not yet called varna—categories, the priests, the chieftains and the folk, with the Vedic words Brahman, Râjan and Vis It has to be assumed, that already in those days the priestly functions were guarded against a far too easy penetration by a foreign element, and that the military nobility had here, as elsewhere, the tendency to make itself hereditary (p 149, ff) But castes in the proper sense, castes like the modern ones, those classes in the *Rigveda* have never been None of the characteristics that make up a caste is mentioned about them (p 150)

<sup>4</sup> Senart, p 136 I differ here slightly from the method that Senart has followed

It is nevertheless evident that those three categories answer to the three higher castes of the Brahmanical theory. But over against the designations *Brāhmaṇa*, *Rājanya*, *Varṣya*, of this theory, the *Rigveda*<sup>5</sup> employs the word *Brahman* mostly and always Rājan and Viś. Thus the linguistic usage already discloses—inasmuch as it allows learned derivatives to step in, in place of the old technical words—that the system of the later texts does not represent “the simple prolongation, spontaneous and organic, of the situation reflected in the *Veda*,” we have to do with a deliberate system adapted to the conditions, either entirely new or at least very different from that whence the primitive triple division originates. “This is to reverse the true relation, to interpret the Vedic evidence by the Brahmanical theory of a more recent age” (p. 152). The gulf between the old and the new conditions betrays itself further in this, that the old texts, beside the Aryan people, speak only of the hostile body of the *Dasyus*, the *Dāsa vana*, but the later texts know the *Sūdras*, aborigines by descent, who were on the one hand indeed excluded from the Aryan community, but on the other were united with them by certain bonds—“fresh proof that the system is quite a different thing from the normal development of the Vedic situation” (p. 153).

What has then happened between the oldest and the more recent stages of the tradition? In the *Rigveda* is represented a primeval class organisation. On the one hand the later texts had before their eyes<sup>6</sup>, the castes standing forth in full living activity, and on the other they were bound up with an inheritance of the old tradition. “Souvenirs of the past and realities of the present were blended together in a hybrid system, the living régime of the castes was inserted into the old divisions of races and classes which tended to produce this effect” (p. 155). Here we have the starting point in Senart's conception of the Vedic conditions and the traditions relating to them: the system of the *Brāhmaṇa* texts and of the law-books—the system of four classes which possess all the characteristics of castes—have proceeded out of an artificial contamination—carried out by an unscrupulous speculation, of the primeval classes and of the modern castes which resemble them in their essence.

I shall not reproduce the disquisitions of Senart upon the origin of the caste institution. If the following discussions succeed in crushing his view of the more ancient history of caste, then the basis for the discussion of that question will be materially removed, so that a detailed criticism going into details will no longer be necessary here.

Our examination of Senart's conceptions may commence with what he says about the relation of the *Rigvedic* data with those of the *Brāhmaṇa* times. There in the *Rigveda* we are said to have<sup>7</sup> genuine, perfectly valid evidences about the primitive organisation of classes, and here, in the *Brāhmaṇas*, a hybrid system which is founded upon an

<sup>5</sup> Irrespective, of course, of Hymn X, 90.

<sup>6</sup> The question whether those castes go back to the time of the *Rigveda*, is treated by Senart as a problem unsolved and probably incapable of solution (p. 160, fg.). Evidently X, 90, has not been taken into account (cf. p. 171).

<sup>7</sup> I find myself entirely in agreement with Senart with reference to the much discussed question about the previous existence of the threefold organisation of the Aryans (*Brahmanas*, *Kshatriyas*, *Visas*) in the *Rigveda*—whether one prefers to speak of three classes or of three castes (we shall come to it later on). Here I may be permitted to say a few words only on the matter. Just as it has become ever clearer to me that the sacrifice and the sacrificial poetry of the *Rigveda* represent not the naive effusions of primitive religious feelings, but that the Soma ritual of the later Vedas was already at that time in agreement with the *Rigvedic* litanies, at least in the leading and basic features, similarly, in my opinion, it admits of no doubt that the *Rigveda* has a priestly class which is to be considered as essentially the same as that

artificial mixture of the class-system and the caste system. Does this antagonism really exist? Is it not by looking with too suspicious an eye at the tradition that this antagonism is discerned? On my part I must confess my inability to discover anything of moment that would prove its existence.

That in the *Rigveda*, *Brāhman* appears more frequently than *Brāhmana* that only the names *Rājānah* and *Viśah* are found and not as yet *Rājanyāh* and *Varsyāh*—what does it prove at all? Does not the change undergone by these expressions correspond, in the most unobjectionable way, to the passing transformation of the character of the language?

Does the fact that in the *Rigveda*, besides *Dasyu*, there is the expression *Dāsa vana* and not *Śūdra*, prove in reality that the *Brāhmanas* contain “quite another thing than the normal development of the Vedic situation?” Already in the ancient times of the *Rigveda*, the dark skinned aborigines were known not merely as enemies, but also as dependants attached to the Aryan community—this follows from the positive appearance of the word *Dāsa* in the *Rigveda* in the sense of “slave” or “menial.”<sup>8</sup> Certainly it is possible, nay, probable, that in the course of time non-Aryan elements of that kind increased in importance, and it is not less probable that with this process is connected the introduction of the new expression *Śūdra*, whatever might be its origin. However, is there anything here other than a perfectly normal—I would like to say self-evident—development?<sup>9</sup>

of the *Brāhmana* times, and certainly the priestly craft had already at that time evidently become the property of certain families like the *Vasishthas* etc., and thus been connected with birth. The difference between the priestly and non priestly persons or families could not be explained—at least not in the first place—according to the modern idea, by the intricacy of the technical business to be carried out by the priest, but above all, in accordance with the conception of life of the primitive age, by the qualification of having a certain mysterious attribute pervading the whole person and necessary for the hazardous intercourse with gods and spirits, with what is expressed by the Indian word *Brahman*. The *Brahman* however, dwells not in the son of a man, who himself is destitute of it, and as such can communicate to one born of him a *Brahmanless* nature alone, according to the ideas of that time, the life of the individual had not as yet been dissociated from the life of the family in which his whole being lives and moves. No doubt the same conception as in the case of the *Brahman* held good also for the *Kshatra*. It is naturally conceivable that in particular cases human arrogance and pride should break through this order, but it is hardly essential for a critical estimate of the order as such. Moreover, I cannot admit as valid the particular proofs that are usually brought forward in favour of the contention that in the olden times the sacred prerogatives of the *Brahmans* had not as yet been acknowledged or properly acknowledged. Senart (p. 165) says of the occupation of the *Purohita*: “In many cases the sons of the nobles performed this function,” and he refers to Zimmer, *Alt ind. Leben* 196. There I find a single case adduced in support, viz. that of *Devāpi*, but it does not appear from the *Rigveda* that this latter came from a royal family, it is based upon nothing better than the authority of an exegetical narrative given by *Yāska*. Zimmer gives (on p. 195) another case in which “a king managed a sacrifice alone without a *Purohita*,” the case of *Ati Bra VII, 27*. It is necessary only to read carefully the passage referred to, in order to see that here there is a mention not of a sacrifice without a priest, but of a sacrifice without calling in a particular family that laid claim to participation in it. Further, Senart (p. 165) refers to the well known testimony which is offered by the fact that several kings were regarded as greater adepts in the sacred science than the *Brāhmanas*, and that *Kshatriyas* or even *Vais'yas* were the authors of Vedic hymns (cf. Zimmer, 190). When Klopstock composed religious songs and Schelling construed the Trinity in a philosophical way, was it really readily acquiesced in, in ecclesiastical circles? Moreover, would the one or the other have been acknowledged as qualified for the performance of the religious duties of an official minister?

<sup>8</sup> We may compare also the name *Divodāsa*, *ZDMG*, 49, 175.

<sup>9</sup> Incidentally it may be noted that I cannot also believe that the use of the word *Ārya* for *Vaiśya*, (Senart, 153 fg.) signifies anything which would enable us to arrive at a conclusion about the contrary usage of the two ages—of the ancient age when the *Vaiśya* “formed in reality the whole of the class of free men, the body of the nation,” and of the later times when, instead of this “vague grouping,” a “veritable caste”

In fact everything, in my opinion, speaks in favour of the acceptance of such a development between the *Rigveda* and the later Vedic literature. One may perhaps follow up the religious data—one may pursue above all the history of the ritual—the functions of the priesthood, the composition of the *Soma* sacrifice, etc.—one may investigate in whatever department one likes the connection between the Rigvedic and the subsequent age, everywhere one will find a continuous development, and nowhere such a gap, bridged over by a deceitful appearance or by such a curious hybridity, as Senart here assumes. Just as the *Hotar* or the *Uthvarya* of the Brâhmana texts is certainly not very different from the *Hotar* or the *Uthvarya* of the *Rigveda*, but stands very close to him and is evolved out of him in a direct line—so have we also every right to consider the *Brâhmana* or the *Utsava* of the later Vedic texts as developed in a direct line without the intervention of falsehood and deceit from the *Brâhman* and the *Utsava* of the *Rigveda*. The later materials fit in with the older with the closest conformity and elucidate them especially, as perhaps the Brâhmana and Sûtra texts elucidate the fragmentary ritualistic data of the *Rigveda*.

This is to reverse the true relation which interprets the Vedic evidences by the Brahmanical theory of an age more recent. Says Senart (p. 152) I believe however that such an interpretation is less open to objection than the abrupt importation of present day conditions without any intermediate links of connection such as Senart has attempted to do.

Moreover, if I am not mistaken, with Senart the real motive for his assumption of that great difference between the *Rigveda* and the later literature lies in no way in those comparatively non-essential considerations, with the criticism of which we have occupied ourselves, but in something else. Senart conceives, as we have seen, the system of the *Brâhmana Sûtra* and *Dharmaśâstra* as an artificial veil which has, in the interest of a theory been, spread over a caste-system which is really analogous to that of the present day. On the other hand, he cannot obviously get rid of an impression that the terms the concepts, in which the *Rigveda* so apparently approximates those texts, have, on the ground of its being the oldest Veda, a real importance untouched by any artificiality. Hence, according to him, between the one and the other stage of that process of change must have taken place, it may be said, that falsification of the significance of the respective data—to affirm which the external form alone of these data would hardly have given any occasion.

So we turn to our examination of the point which is obviously at the same time the most questionable and the most conclusive about the whole question—the assumption that in the Brâhmanas, the Sûtras and in Manu behind the four *varnas* there was a real and actual fact approximating very closely to the modern caste system.

Senart points out, as has already been shown here once (cf. above, p. 270) that the laws which regulate the *varnas* of the old theory are quite similar to those which govern the life of the modern castes. If, however, the plain and straightforward simplicity of the four great divisions appears to stand in the way of our carrying back to those old times the multiple forms of the modern castes, we have, on the other hand, those ancient statements about the numerous mixed castes, about the *Vrâtyas*, about the great diversity of

— makes its appearance. It was quite as pertinent for the system of the later texts as for the *Rigveda*, that the *Utsava* must have made up the body of the people, and therefore, as the entire grouping was merely a vague one, that designation seems to me to decide nothing either on the one side or on the other. Besides, after a survey of the materials that relate to the word *Anyas*, I cannot but suspect the truth of the statement that the use of the same for *Utsava* delineates a relatively late artificiality based upon an erroneous interpretation of old passages, — in reality, however, that word has been a synonym of *Anyas* from the beginning.

occupations which a Brâhman could follow and so forth which show that that simplicity is only artificial, the society being in reality under the domination of a complicated tangle of many castes as at the present day.<sup>10</sup>

We begin, on our part, with the last of the points alluded to. When the Brâhmanas are asserted by Manu to be the followers of quite diverse professions some of which were hardly honourable, does it follow therefrom that—as Senart concludes (p. 139)—that one should rather have to speak of innumerable Brahmanical castes instead of one caste of Brâhmanas? Quite certainly, beside the Brahmanas who performed sacrifices and upon whom Veda-study was incumbent, there were, in fact, also such as maintained themselves, for example, by the butcher's trade or by theft. About them Manu says, that they are unworthy of being invited to funeral feasts. Are we to hold that the ancient texts here disclose the existence of a special caste—or rather, perhaps, local separate castes—of thief-Brâhmanas, butcher-Brâhmanas, etc., who had their chiefs and councils, who married only among themselves and so forth? It is, I suppose, clear that there are here two quite different things: the one, namely, to state as a fact certain interesting, as well as intelligible deviations in actual life from the ideals of Brahmanical life—and, on the other hand, to discover out of such data the existence of those positive structures that belong peculiarly to the modern times, but which are by no means betrayed in those alleged traces as belonging to antiquity.

Further, the theory of the mixed castes. When by a particular admixture of Vaidya, a Mâgadha, and by others a Chandala or Nishâda, is said to have been produced, then everyone naturally sees that here the origin within the caste system of non-Aryan as also of remote, less important Aryan peoples or tribes depends upon purely fictitious methods. How could these tribal communities standing in different degrees of remoteness outside the fully recognised sphere of cult and culture prove anything at all—and upon this indeed everything depends—in favour of the contention that inside the bounds of this sphere itself there predominated such an intricacy of innumerable castes as Senart has taken to be the groundwork of the modern conditions? And those few other so-called<sup>11</sup> mixed castes which appear in the law books and which bear the names of their occupations, such as the *Rathakâra*,—what do they prove? I think only this that outside the fully qualified people of the three Aryan Varnas, be it amongst the non-Aryans, or be it amongst Aryans of no unobjectionable origin, there existed individual groups amongst whom people of a particular extraction had associated themselves more or less closely with one of the distinguished professions which were more or less hereditary,<sup>12</sup> amongst these groups we see that that of the Rathakâras—while their pure Aryan descent was denied, yet perhaps in consequence of the respect which was enjoyed by their craft possessed privileges of a sacred character by virtue of which they were brought nearer to the position of the fully

<sup>10</sup> The name of these true castes in the law books, as against the four great *varnas* is said to have been *jâti* (p. 155). It is true that *varna* is used regularly as the technical expression for the four great divisions, the dominating categories of the entire system, and only exceptionally for the mixed castes (Jolly, *ZDMG*, 50, 518). It is therefore but natural that the mixed castes that were founded upon birth and did not represent any *varnas*, were designated by preference as *jâti*. However, it does not mean that this term corresponded, as against *varna*, to the “true castes such as we see living and moving” and I could not discover any trace of this. About the use of *jâti* in the Pâli texts, cf. *Fick*, 22.

<sup>11</sup> It is liable to question whether the tracing back of these castes to certain admixtures is to be taken seriously, as in the case of the Mâgadha, etc.—I refer here to p. 282 below, note 4, on the caste admixtures alluded to in Buddhist literature.

<sup>12</sup> The way it happened may have been, as surmised by Fick (*Die Sociale Gliederung* etc. 209, ff.), viz., that the Indian Aryans pushed hard upon an autochthonous tribe who possessed special skill in coach-building and so forth, and was consequently employed by the conquerors for this craft.

qualified Aryans.<sup>13</sup> But what a long stride it would be from the formation, on the one hand, of groups of this kind, which to all appearance extended over the whole sphere of culture under discussion, to the breaking up, on the other hand, of the entire people, and in the third place, of the three great Aryan castes, into those multitudes of small locally circumscribed bodies.<sup>2</sup> As regards the offspring of mixed marriages, it has to be taken into consideration that they, through continued marriages inside one of the *varnas* which lay at the foundation of the mixture, got back, after a certain number of generations, into that *mana*.<sup>14</sup> Certainly no intimation this that the children of such mixed marriages formed among themselves a particularly close and compact community.

And lastly the *Viâtyas*. If the offspring of the *Brahminia*, the *Kshatriya* or the *Vaisya* could lose their caste through the neglect of certain sacred duties, then does the existence, I might ask, of such a detritus as may fall off from those great castes, entitle us to conceive of the main bodies of those castes in a totally different way from what the tradition indicates?<sup>2</sup> Nothing more natural, than that the actual circumstances in the course of time obliterated the old simplicity of that threefold division where, so to speak, on the border of the structure new formations were annexed to the old stock—and here, beside the actual facts, the Indian passion for theorising has also played its part without question, as Senart so strikingly delineates. However, it is one thing to set in their proper places individual supplements of the ancient structure which annex themselves naturally to it as it progresses, which even grow out of it,—and it is something different to attribute to the entire organisation a new inner structure fundamentally different from the old one.

Moreover, the direct tradition which is comparatively abundant, especially with regard to the Brahman class, has preserved concrete materials that may furnish a means of estimating the worth of the great Senartian transformation of our fundamental principle. Senart would substitute numerous Brahman castes for a single Brahman caste. Now traditions, of which the authenticity is hardly questioned, enable us to find out with the greatest precision the sections into which the Brahman caste really broke up in ancient times. They inform us about the system of the marriage regulations depending upon these classifications, about the endogamous and exogamous circles which had to be taken into account, about the marriage of the *Brâhmanas*. Where is then Senart's dismemberment of the great classes into crowds of endogamous castes?<sup>2</sup>

Any one who takes into consideration the ethnological standpoint here referred to will naturally only find that the *varnas* were separated from one another by barriers of the *connubium*, by rules about cleanness and so forth.<sup>15</sup> No less natural is it that the modern castes should obey a multitude of similar regulations, certainly in part as an inheritance

13 Cf. *Indische Studien* X, 12 fg.

14 *Gautama* IV, 22, etc.

15 It, however, may I ask in passing, ethnology accepted, in the opinion of Senart, as a probable explanation about the origin of these barriers and limitations? The endogamy of the Indian caste is said to be based upon the "Aryan conception of marriage," upon the community of sacrifice of the "sacrificing couple attached to the fire altar of the family." I believe, that he who follows up the study of the whole range of the conception of endogamy, throughout the full course of its development, will be led by this study to much remoter origins which have to be measured with the logic of the savage and not with that of the Aryan. Similarly I differ from Senart (212) with regard to the prohibition of interdining with persons of another caste and of taking food prepared by persons of a lower caste. To Senart this is "one of the bizarre usages that take us by surprise," it is explained, he thinks, by the Aryan conception of

of that ancient round of ideas and customs, and partly perhaps as introduced from the aborigines among whom—where on earth are such things not found?—rules of a similar nature might have been in existence. However, should one on that account transfer into ancient times the entire structure of modern caste-intricacy, then I can only hold it for an inference that by no means follows from the premises. If we have proved and established certain points of contact between the ancient and the modern state of things we do not, indeed, on that account, cease to take into consideration the great divergences also between the old and the new just as we would not deny to the religious system of the *Vedānt*s antique Vedic appearance, even though there were found a number of pious or superstitious customs which the Vedic times have in common with modern Bihar or Bengal. In my opinion one has only to look with unprejudiced eyes at the copious evidences especially of the Brāhmaṇa texts, in order to receive the most convincing impression that here without any lies and frauds, without a hybrid admixture of disparate elements, an unbiassed picture of the actual state of things is given, pervaded by a breath of the feeling which filled and moved that atmosphere—a picture that gives authentically, although of course not all the elements, yet the broad outlines of the real circumstances.

(To be continued.)

#### MISCELLANEA.

##### A JOURNEY IN MONGOLIA IN 1908

The following anonymous account, in the humble form of a letter to *The Times* of the 17th September 1919, of what must have been a remarkable journey over a very long stretch of some of the most difficult country in the world, gives a view of the life of the petty Mongol chiefs scattered over it and of their surroundings that is well worth preserving for students of Asiatic peoples. The accompanying map has been specially prepared to illustrate the journey.—[Ed.]

"Kings o'er their flocks the sceptre wield" is an excellent translation of an extract from the immortal Horace wherewith to describe the tribal chieftains in Mongolia, chieftains who are dignified with the title of "Prince," or even "King," though their functions are far more limited than those of the ordinary English gentleman.

Let me tell you of three. I will begin with Wushin.

There is a sandy waste of country lying to the south of the Yellow River as it flows past Ninghsiafu to near Kweihsuacheng. Its northern boundary is the muddy stream, and its southern limit the Great Wall of China. Mongolia, properly speaking, begins on the other side of the river. In this most inhospitable stretch of country "reign" seven Mongol kings, one of whom is the Prince of

Wushin the others are called Jassak, Jangar, Ottok, Wang, Harkin, and another whose name I have forgotten, but we need not trouble about them.

It was not easy to find the residence of His Highness of Wushin, but what mattered that when there was such excellent sport, after crossing the Yellow River near Kweihsuacheng, among the antelope haunts, pheasants, partridge, geese, and Mandarin duck which abounded in the labyrinth of sandhills and scrub covered hillocks through which we and our train of camels meandered.

However, we did arrive though some of our camels foundered *en route*—and found a series of low buildings in the Chinese style surrounded by a low wall. Outside the entrance was a line of tall poles from which fluttered strings of rags covered with Tibetan characters—prayer flags. His Highness was away from home, and the population of his camp only consisted of three souls, relatives of His Highness, who allowed us to do exactly as we pleased, so we commanded the princely "gourt" (or Mongol tent) pitched in the inner courtyard, and stayed two days in order to renew our strength before continuing the journey to (?) Borabolgassan and Ninghsiafu.

The "gourt" was unusually comfortable (the average Mongol gourt is filthy). It was lined with in and without with felt (an agreeable change from

the community of meal, as the family union linked together about the sacred hearth. He goes even so far as to trace back the impurity of the dead, "without doubt in part," to the same cause, that the dead can no more take part in the family meal and the family rites (p. 218). I can here only repeat that in my opinion, ethnology leads to an entirely different conclusion about these conceptions for they are in no way startling peculiarities, and ethnology proves them to have been long anterior to the special development of the family regulations of the Aryans. It is, of course, not possible here to go into this matter *in extenso*.

my "gourt" of the night before which had only been lined with semi liquid camel's dung), while inside there was an additional lining of thin dark red silk. In summer the felt is all removed so that the breeze may enter freely. The flooring was of stone (as a rule it is of animals' droppings), covered with a heavy and beautiful Ninghsia carpet, and low cushions of the same make were scattered about profusely, while in front of each was a low, delicately adorned stool as a table. A few small cabinets and some brass Buddhas completed the furniture. The end farthest from the door was slightly raised to form a *dais*.

The Prince's pet Pekingese was scampering about, much distressed at the absence of his master, and was doing great damage to the fine carpets.

M. rotnau spent the whole of the first day teasing this Highness's pet monkey, which got a bit of his own back when we retired to rest, for, like an over excited child, he refused to sleep, and spent the night on the tiles, over which he scampered, dragging a 6 ft chain behind him. As our only object in halting at this local "Buckingham Palace" was to get rest from the hardships of the journey, I had to issue an ultimatum respecting the capture of the animal.

And so to Ninghsiafu, and, after climbing the Alashan range, a day's journey to the west of his town up an exceedingly picturesque pass, which is nothing more than the rocky bed of a stream, and so steep that our camels nearly collapsed during the climb, we enjoyed from the top an extensive view over the Sandy Mongol Kingdom of Alashan, with its capital, Fumafu, or Dinyuaning, nestling in a little oasis below us. The town is visible during the whole descent from the top of the range, and the patch of tall trees afforded a pleasant change to the eye from the bleak monotony of the rest of the landscape. But on reaching the town one finds little water trickling below the trees. However, the fact that there is water at all has brought about the cultivation—mostly by Chinese—of a small amount of ground near the town. At the time of my visit there had been a seven years' drought, caused, according to popular opinion, by the presence at Fumafu of the exiled Prince Tuan, of Boxer notoriety. This drought was causing real uneasiness, and a change of capital had been mooted. The difficulty was that there was no suitable spot in the "kingdom" to which the "capital" could be moved. However, if the Court ever is forced to go, the population will doubtless accompany it, and in course of time Fumafu will be added to the list of sand buried cities of Central Asia.

The town is divided into two parts, the smaller portion being surrounded by high walls in an excellent state of repair. In it is the king's palace, a small collection of ordinary Chinese houses of the meanest description huddled under the southern

wall. History has, indeed, shown the necessity for a walled town, for in 1889 the Dungares [?Dungans or Jungaris] attacked and destroyed all the buildings outside the walls, but failed to capture the "citadel." The chief weapons of defence were stones, and to this day piles of these lie at various points on the walls in readiness for another defence. A feature of the walls are the numerous shrines, visited once a year in procession by the Lama priests carrying the sacred books.

The government [in 1908] of this capital, the population of which probably consisted of some 4,000 souls, of whom 1,500 were Chinese traders, was carried on by a "King"—so his subjects styled him—and they considered him the strongest potentate on earth. Although he was said to have a violent temper and a strong aversion to foreigners, I craved an audience. His Majesty's family have married a succession of Manchu princesses, and consider themselves now more Manchu than Mongol at any rate they prefer to speak Chinese *en famille*. The arrival of these Manchu consorts had probably much to do with the comparative civilization of the capital, for even the Mongols there live in ordinary houses like the Chinese, and have ceased to be nomads.

The "King" was supposed to visit Peking once in three years, but the visit was so costly (the retinue always included *inter alia* a theatre) that it was frequently deferred, and His Majesty would send his annual tribute (in kind) instead, at the hands of his son, the "Duke."

It was at Fumafu that I met Colonel Kozloff's expedition into Central Asia *en route* for Kokonoor and Szechuan, and it was here that I was privileged to spend an evening in the company of this distinguished Russian explorer. His party, which consisted of several friends and a small Cossack guard, were lodged in the premises of a Russian Buriat, who probably exercised over the King of Alashan as much influence as the famous Dornjeff did at one time over the Dalai Lama. But, although our only language in common was Mongol, I am happy to think that I have nothing but pleasant memories of the gallant colonel, who entertained me in a most friendly manner in a spot far removed from European civilization. I met him again the following year in St. Petersburg, where he lectured on this very journey before the Imperial Geographical Society and opened a small collection of manuscripts, etc., brought back from Central Asia.

And so back to Kweihsuacheng, across the Gobi to Urga, and westwards by caravan to Uhasutai and Kobdo, and over the snows of the Altaishan to the new Chinese colony of Sharasume (?). Here we got fresh camels to proceed by Buluntogoi to Chuguchak, and after a week's march westwards from Sharasume arrived at the camp of the Tourgont [Torgot] (Mongol) Prince, lying close under a

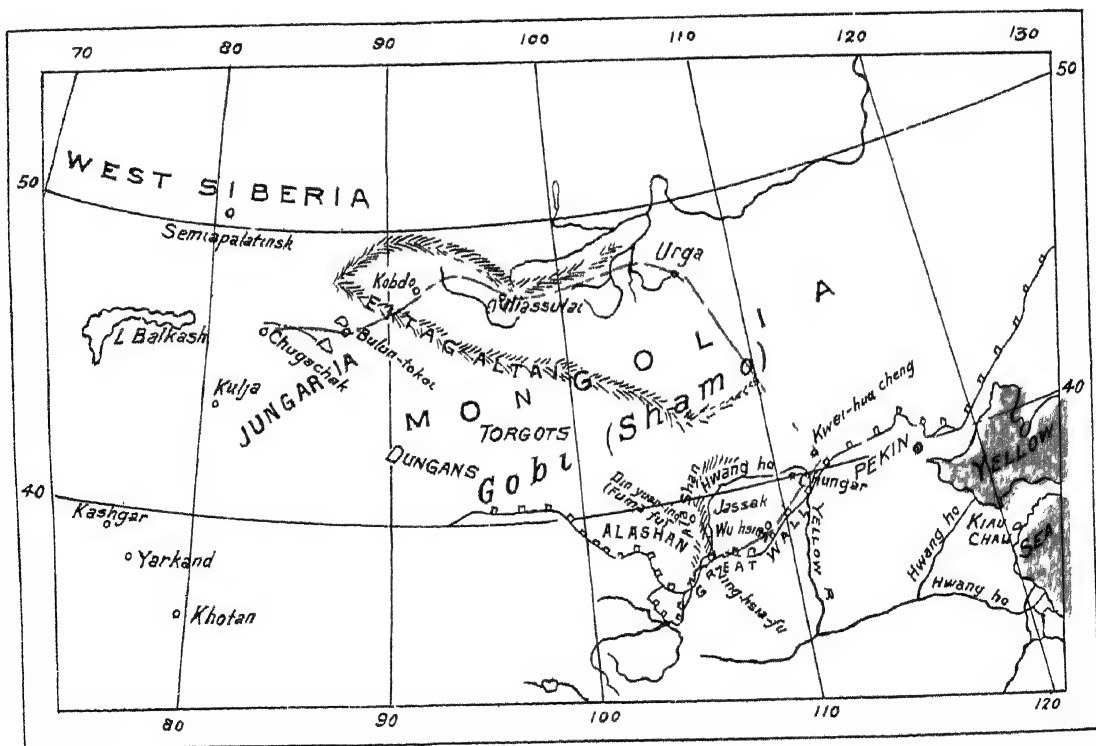

mountain range called the Baynzarkanaderik, from which trickles a small stream past the camp.

This latter consisted of a group of "gourts" lying round a tribal temple built half way up a large natural mound, the latter being surmounted by a "joss" of the ordinary pattern and a large "obo" of sticks to which white and yellow streamers were suspended. The Prince Ochingwang lives in two white "gourts" in summer, and in a low mud house behind them in winter in this latter he is able to have a Russian stove. His Highness sent me his greetings on arrival, and kindly caused two "gourts" to be erected specially for us. I called on him in state in the afternoon, and found a fat lad of some 20 years of age, rather shy, but with agreeable manners. He had never been to Peking, and I gathered that the trouble and expense of getting there and back were the reasons. He had visited Chuguchak several times to pay homage to the Imperial tablet, and had come into contact with Russians there, which explained why his rooms were full of photographs, watches, clocks, and the inevitable gramophone. He told me that no foreigner had previously visited this his "capital," and seemed very gratified that one had come. He said his favourite amusement was fox hunting with an eagle, and that he indulged

in this sport five days a week in winter. The huge bird was brought into the room during our conversation, and made such a din that I had to beg it should be removed.

The Prince was dressed in a dark red silk robe and wore huge spectacles, and the usual Chinese pork pie hat with peacock feather and red button.

After he had agreed to furnish fresh camels for the six days' journey westwards to Chuguchak we spent two idle days at his camp, and were treated with the utmost hospitality possible in those parts. His Highness was indeed almost embarrassed in his attentions from morn till night. He was constantly sending over Tartar couriers and meals from the princely kitchen for myself, whilst gold, silver and money presents kept coming for my Chinese boy. As each meal consisted of a whole bucketful of soup and half a dozen dishes of meats prepared in different ways, it was difficult to dispose of it without giving offence. However, the two days soon passed, and we were thankful to have found such a comfortable lodging, for "sleep knows no pride and scorns not coats of village hinds," and if the village hinds do assume the semblance and rank of royalty, well so long as they are prepared to show their neighbour a kindness nothing is matters.

**swelling**, (s) 1. tumour . . . *bûta* (da) with prefix, *ab*, *ông*, *ig*, etc, according to part referred to *See App n* 2. s from a blow . . . *i-gûdal* (da).  
**swift**, (adj) fleet, (a) of a runner or swimmer . . . *ar-rinma* (da), *âr rêwa* (da), *âr yêre* (da) (b) of an animal, bird or fish . . . *rinma* (da), *yêre* (da), *rêwa* (da) (c) of a canoe . . . *pûdya* (de)  
**swiftlet**, (s) (*Collocalia linchi*) . . . *bilya* (da) edible nest of this bird . . . *bilya-l'âr-râm* (da).  
**swim**, (v i) 1. . . . *ar-pît* (ke) 2. s on one's back . . . *ad-rôko* (ke). *See canoe* 3 s under the surface . . . *tik-patemi* (ke) *See dive*. (s) swimmer . . . *ar-pitnga* (da).  
**swindle**, (v, t) *See cheat*.

**swine**, (s) . . . . reg (da)  
**swing**, (v.t) cause to (or sway) to-and-fro . . . . ar (or ig)-lêla (ke) (v 1) 1. swing while suspended . . . . ara (or ɪɪ)-lêla-(ke) 2. as a hanging creeper . . . . âkan-gîrîma (ke)  
**swoop**, (v 1) as a bird on its prey . . . . chalya (ke)  
**sympathetic**, (adj) compassionate . . . ep-tông-itnga (da), itâ-bûlabnga (da)  
**sympathise**, (v 1) condole . . . itâ-bûlap (ke), See assist, mourn, ep-tông-it (ke)

**T**

**tabooed**, (adj) (a) of food . . . tûb (da) (b) place . . . cl-ôt-chôa (da) This word is applied to sites regarded as undesirable for habitation on account of much sickness or unaccountable deaths having occurred there  
**tadpole**, (s) . . . lèdek-bā (da), rôpan-bā (da) See frog, toad  
**tail**, (s) . . . ar-pîcham (da) (a) of sting-ray . . . nîp-l'âr-bûl (da) See ray  
**take**, (v t) 1. lay hold of . . . eni (ke) See feel, hold, touch 2. t away (a) any animate object . . . ab-îk (ke) (b) any inanimate object . . . ik (ke) He took it away himself yesterday *wai ôl ôyun-lêmar dîlêa(len)îkre*. Take away thither! *kârk îk!* 3. t. down from higher position . . . (a) (â-) rôl (ke). (b) t. d. a honey-comb from tree, etc . . . . (kânga-) ûp (ke). 4. t off (a) lift off, as a pot from the fire . . . yûk (ke) The food is cooked, take the pot off the fire. *wai yât la rôchre, bûj yûk (ke)* (b) of personal ornaments, etc . . . . lûpuɪ (ke); lûp (ke). See waistbelt 5 t. out, (a) extract . . . lôti (ke) See Ex. at extract (b) pick out . . . . karepa (ke); (c) from hole, bag or other receptacle . . . ôyu-wâlyâ (ke). Take the prawns out of the net: *kûd tek au l'ôyu-wâlyâ (ke)*. See out. 6. t. outside, (a) with ref. to animate object . . . . wâlâk-l'ab-îk (ke); (b) with ref. to inanimate object . . . wâlâk-îk (ke). 7. t. up. See pick up. 8. t care of,

protect . . . ab (or ig)-gôra (ke). 9. t notice of, observe . . . id-ngô (ke) (v i) 1. t. breath . . . charathî (ke) 2 t care, t precautions . . . . êr-gêlep (ke) See that (conj). 3. t leave. See leave. 4. t. one's ease, rest . . . . barmî (ke) See stay 5. t place See happen, occur. 6. t. a stroll See stroll, walk

**tale**, (s) story . . . yâbnga-l'ig-lâb (da) See story.

**talk**, (v 1) speak, utter words . . . yâp (ke) What is Wologa talking about? *micha-l'eb wôloga yâpke?* Hush! don't talk *mâla, yâpke dâke!* 2. t together, converse ɪɪ yâp (ke) îjên (ke) They are talking together about us *eda mebet yɪt-yâpke* 3 t secretly See whisper

**talkative**, (adj) . . . ed-winga (da), yâbnga-tâpa (da)

**tall**, (adj) 1. of a human being . . . ab-lâpanga (da), ab tâbanga (da), ig-gara (da) Why are your country-men taller than ours? *michalen ngung bûdwa marat-dûru tek attâbanga (da)?* 2. of any animal . . . tâbanga (da) 3. of an inanimate object . . . lâpanga (da)

**taller**, (adj) of human beings . . . âkâ-jana (da), ɪɪ (or tek)-ab-lâpanga (da). See than

**tallest**, (adj) of human beings . . . ârdûru-tek-âkâ-jana (dâ), ab-lâpanga l'iglâ (da)

**talón**, (s) . . . ông-kôro (da)

**tamarind**, (s) . . . pêma (da).

**tame**, (v t) . . . i-dûbu (ke) (adj) . . . . i-dûbunga (da)

**tangled**, (adj) of harpoon lines, etc. . . . ôto-chôre

**tank**, (s) . . . ina-l'ig-bang (da)

**tap**, (v t and v 1) . . . tai-chowa (ke). 2. as a woodpecker . . . . êr-tôro (ke). 3. tap the ground with the foot, as in their dances See stamp.

**tapeworm**, (s) . . . . bôlob (da).

**tardily**, (adv) . . . ig-nilya (da)

**tarry**, (v 1) See linger, stay, stop.

**taste**, (v t) 1. test flavour . âkà-mûj (ke) 2. partake of . âkà-râr (ke)  
*See tit-bit* (v i) have a flavour of . . . .  
 âkan-mûj (ke) *See Ex at like*

**taste**, (s) flavour, (a) of simple unmixed food  
 âkà-râja-mach (da) (b) of mixed food  
 âkà-yâro (da)

**tasteless**, (adj) gôloga (da)

**tasty**, (adj) of food âkà-rârnga (da)

**tattoo**, (v t) prick and mark the skin in some design  
 yîti (ke) One who is tattooed is styled "â-bôrtâ (da)," and one who is not tattooed "ab-lûta (da)" The prefix *ig*, *ab*, *ar*, etc., is employed to denote the part of the body to which reference is made

**tattoo a pattern**, (v t) . . . oyo (ke)  
*See carve*

**teach**, (v t) i-tai (ke) *See explain, instruct* He taught me *ôl den i taire*, (a) t how to swim . . . ar-pînga-l'itaike (b) t how to dance . kônga-l'itai (ke) (c) t how to tattoo yînga-l'itai (ke), ôl-yîti (ke) (d) t a language . âkà-tegi-l'itaike (e) t to pronounce (a word) i-tâ-yâp (ke) *lit* "assist-speak"

**teal**, (s) kûla (da), kûlal (da).

**tear**, (v t) 1 rend pârata (ke)  
 2. t a bough from a tree . . . tōp (ke), (âkà) tōpatu (ke) 3. t a piece of cloth, leaf, etc kajûl (ke) (v i) 1. . . ad-pârata (ke), târali (ke) 2. as a palm leaf when pulled or by force of wind ad-yîti (ke), ôyun-têmar (or âkan)- târali (ke) (s) rent jâg (da)

**tear**, (s) drop from eye t'i (da)

**tease**, (v t) . . . ig-nêda (ke)

**teat**, (s) ig-kâm-l'ôt-chêta (da)

**teeth**, (v t) pick the . âkan- karepa (ke) *See pick*

**tell**, (v t) 1. say, state târ chi (ke) 2. describe, explain . i tai (ke)  
*See Ex at boar* 3. inform, acquaint badali (ke) 4. t the whole story (relate) yâbnga-l'âr-lôr (ke) Tell us the whole story, where you went, what you

saw and what you did *mînya ngô kânk-yâte, ng'ig-bâdig-yâte, ng'ôvyo-yâte bédig, yâbnga-l'âr-lôrke* 5 t the gist of a story . . . yâbnga-l'âr-ûla (ke) How tiresome you are! tell us at once the gist of what occurred *badî dūrumaba ' ngô kâ-gô: yâbnga-l'âr-ûla (ke)* 6 t about, inform against . ôt-bâm (ke)

**tempestuous**, (adj) of weather . . . .  
 kôûlo (da)

**temple**, (s) of the head . ig-tîmar (da)

**tempt**, (v t) . . . . ôt-ig-ûju (ke)

**tender**, (adj) 1. of meat . . . nêtemo (da) 2. as an old wound . . . ab-gêringa (da)

**tendon**, (s) . . . yînga (da) with prefix *ar*, *âkà*, etc according to part of person referred to 2. tendon Achilles (s)  
 ab-yînga (da)

**tepid**, (adj) lukewarm . . . ûya-bâ (da), êlenga (da)

**Teredo navalis**, (s) jûru-win (da)

**terminalia**, (s) 1. T. bialata êmeg (da) 2. T. citrina . . . bîbî (da) 3. T. procera . . . baila (da) 4. T sp . . . châp (da) 5. T trilata . . . tâlapa (da)

**terminate**, (v i) as a season . . . ôto-jônli (ke) The rainy season will terminate next moon *ôgar-lu idôutinga gûmul-wâb ôto-jônlike*.

**termite**, (s) white ant . . . bêlera (da).

**terra firma**, (s) 1. land as distinguished from sea . . . el-ôt-gôra (da) 2. the shore . . . tot-gôra (da). *See coast, shore*. We were glad when we reached land (terra firma) *elôt-gôra len kâgalnga bédig meda môtôt-kûk-béringare*

**terrify**, (v t) . . . ig-wâ (ke).

**territory**, (s) . . . ôr (da)

**test**, (v t) prove . . . yôgo (ke) Only this bow has been tested, the others are as yet untried "ôgun ûcha kârama yôgongata, akat-lôgluk nîgâkâ yôgonga-ba (da) 2. test the strength of a cord . . . tînap (ke), têtup (ke)

**testes**, (s) . . . âr-ôta (da)  
**than**, (conj) . . . ɿɿ, tek He is taller  
 than you *ôl ng'yɿ* (or *ngôl-tek*) *ablâpanga*  
 (da) My home is more distant than yours  
*ia bûd ngia bûd tek elarpâla* (da)  
**thank**, (v t) . . . êlet (ke) See Ex.  
 at much. (exclam) Thank goodness! . . .  
*yêlo*  
**that**, (adj and dem pron) . . . ôlla

**though**, (conj) *êdara* See Ex at recognize

**thrash**, (vt) See beat and chastise.

## THE HISTORY OF THE NIZÂM SHÂHÎ KINGS OF AHMADNAGAR

By LIEUT COLONEL T W HAIG, C S I, C M G, C B E

*(Continued from p 204)*

## LXXVIII — AN ACCOUNT OF THE BATTLE OF ARCHAN BETWEEN BURHÂN NIZÂM SHÂH AND IBRÂHÎM 'ÂDIL SHÂH, AND OF ITS RESULTS 103

It has already been mentioned that Asad Khân, who surpassed all the other 'Âdil Shâh *amîrs* in power and in strength of the forces under his command, was apprehensive of Ibrâhîm 'Âdil Shâh's intentions towards him and was therefore ever sedulous in stirring up strife, considering that his safety lay in Ibrâhîm 'Âdil Shâh's pre-occupation with his enemies. He now stirred up strife between Burhân Nizâm Shâh and Ibrâhîm 'Âdil Shâh until the matter ended in bloodshed. Both kings assembled their armies in order to do battle with one another, and Burhân Nizâm Shâh, having sent Mahmûd Nafir to summon Malik 'Barid and his brother Khân Jahân, marched rapidly to meet the enemy. Malik 'Barid and Khân Jahân joined the king near the town of Kalam, and the opposing armies met at Arjan, where a fierce battle was fought. The battle raged long with great vehemence and among those slain on the side of Ibrâhîm 'Âdil Shâh, was 'Ain ul-Mulk Kan'ânî, who, as he had behaved treacherously on the former occasion by deserting Burhân Nizâm Shâh and joining Ibrâhîm 'Âdil Shâh at the instigation of Daryâ 'Imâd Shâh, may be said to have met with the due reward of his treason and ingratitude. Râm Shiva Deva, a Brâhman of the court of Burhân Nizâm Shâh, who enjoyed great intimacy with the king, left the heaven which he had occupied in this earth for hell. The battle lasted until sunset, but at last victory was declared for Burhân Nizâm Shâh and the Bijâpûrîs fled, leaving the whole of their baggage, tents, and camp equipage in the hands of the victors. The army of Ahmadnagar pursued the fugitives and put large numbers to the sword, and the survivors made their way, with much difficulty, to Bijâpûr.

Burhân Nizâm Shâh then marched to Sholâpûr, a very strong fortress situated on the frontier of the Bijâpûr kingdom, and then held by an officer for Ibrâhîm 'Âdil Shâh. Here he encamped while his army besieged the fortress. The garrison, finding themselves unable

103 The accounts of campaigns between Bijâpûr and Ahmadnagar in this and the following five sections are incorrect. The course of the war between Ahmadnagar and Bijâpûr was briefly as follows — In 1540-41 Burhân Nizâm Shâh, encouraged by reports of the estrangement between the Sunni Ibrâhîm 'Âdil Shâh I and his most powerful subject, the Shi'ah Asad Khân Lârî, believed that the time had come for the recovery of the Sholâpûr district, which had at one time been a fief of the Ahmadnagar kingdom, but had been annexed by Bijâpûr during the war between Burhân and Bahâdur Shâh of Gujarât. He therefore formed an alliance with Amîr 'Alî Barid and Daryâ 'Imâd Shâh of Berar, invaded the Bijâpûr kingdom, re-annexed the Sholâpûr district and advanced to Belgaum, the fief of Asad Khân. Asad Khân was loyal to his master but could not withstand the invaders and was obliged to make a show of complying with Burhân's demands by joining him with his contingent of 6,000 horse. Ibrâhîm, on learning of this accession of strength to Burhân, fled from Bijâpûr to Gulbarga while Burhân and Amîr 'Alî Barid entered Bijâpûr and besieged the citadel. Daryâ 'Imâd Shâh who had disapproved of the expedition from the first and was awaiting an opportunity of changing sides, was employed by Asad Khân Lârî to make his peace with Ibrâhîm and both he and Daryâ joined Ibrâhîm who was now strong enough to attack Burhân. As Ibrâhîm and Daryâ advanced, Burhân and Amîr 'Alî retired, first on Bîr, and, on being pursued thither, to the hills above Daulatâbâd leaving Ahmadnagar at the mercy of the invaders. Amîr 'Alî Barid died near Daulatâbâd (see note 101) and Burhân was forced to sue for peace, which he obtained by the retrocession of the Sholâpûr district and a promise never again to molest Bijâpûr.

The "battle of Archân" was probably a battle or skirmish fought at Charchân, about 32 miles south-west of Sholâpûr, during Burhân's advance to Belgaum.

to hold the fortress against the besieging army, and being well aware that Ibrâhîm 'Âdil Shâh could send them no assistance, resolved to surrender, and the commandant came forth and submitted himself to Burhân Nizâm Shâh, to whom he presented the keys of the fortress, thus obtaining exemption from the fate of the garrison of the fortress taken by storm. Burhân Nizâm Shâh then appointed one of his officers commandant of the fortress and returned to Ahmadnagar.

Some historians say that Burhân Nizâm Shâh, after capturing Sholâpûr, marched to Bijâpûr, and besieged Ibrâhîm 'Âdil Shâh, who shut himself up in the citadel and sent an envoy to Burhân Nizâm Shâh, promising that if the latter would pardon his misdeeds and leave him in peace, he would ever be obedient to him. According to this account, Burhân Nizâm Shâh acceded to the request of Ibrâhîm 'Âdil Shâh and returned from Bijâpûr to Ahmadnagar. But God knows the truth of the matter.

XXXIX—AN ACCOUNT OF IBRÂHÎM 'ÂDIL SHÂH'S EXPEDITION FOR THE RECOVERY OF SHOLÂPÛR AND OF BURHÂN NIZÂM SHÂH'S MARCH TO MEET HIM

When Burhân Nizâm Shâh had returned to Ahmadnagar after the capture of Sholâpûr, or, as other historians say, after the siege of Bijâpûr, Ibrâhîm 'Âdil Shâh assembled his army for the purpose of recovering Sholâpûr, and, having marched to that fortress, besieged it. He directed his army to throw up lines of contravallation as a defence against the army of Ahmadnagar when it should march to the relief of Sholâpûr.

When Burhân Nizâm Shâh heard that Ibrâhîm 'Âdil Shâh was besieging Sholâpûr, he assembled a very large army and sent it to Sholâpûr, where it encamped near the ground occupied by the army of Bijâpûr. Every day skirmishes took place and the troops of Ahmadnagar were usually victorious over those of Bijâpûr.

One day about forty valiant horsemen of Ahmadnagar, among whom were Ashraf Khân, Farang Khân, Firûz Khân, Sayyid Muhammad Qâsim, Miyân Tund, Khalji Khân, Shaikh Mukhtâr, Miyân Afghân, Shaikh Khanus, Farhâd Khân, Anwar Chata Khân, 'Azîz-ul-Mulk, Sayyid Ibrâhîm, Sayyid Uwais and others, while out reconnoitring passed near the laager of Ibrâhîm 'Âdil Shâh. Qadam Khân and Mustafâ Khân of Bijâpûr, with 3,000 horse and several elephants, were employed in constructing this laager, and when they saw how few there were of the army of Ahmadnagar, they lay in wait for them and suddenly attacked them. The forty horsemen, however, threw themselves upon their assailants and at length overcame them and dispersed them, pursuing them nearly as far as Ibrâhîm 'Âdil Shâh's tents. Just then Ikhlâs Khân, one of Burhân Nizâm Shâh's *amîrs*, came up with fifty horse, and when he saw that forty horsemen had defeated a large body of the enemy, he too, fired, with the spirit of emulation, attacked a force under Qabûl Khân 'Âdilshâhî, which was without the laager, defeated it, and put it to flight.

When Ibrâhîm 'Âdil Shâh saw that his army was unable to meet that of Ahmadnagar in the field, he lost heart, left Sholâpûr at night and returned to Bijâpûr, whereupon Burhân Nizâm Shâh returned to Ahmadnagar.

XL—AN ACCOUNT OF IBRÂHÎM 'ÂDIL SHÂH'S SECOND ATTEMPT TO RECOVER SHOLÂPÛR, OF THE EXPEDITION OF BURHÂN NIZÂM SHÂH TO MEET HIM AND OF THE LATTER'S VICTORY

After a while Ibrâhîm 'Âdil Shâh was again moved with the desire to recover Sholâpûr, and marched thither with a large army and besieged it as before, constructing lines of contravallation and a strong laager, within which he took up his quarters. Burhân Nizâm Shâh then marched from Ahmadnagar with a large army and encamped over against

Ibrâhîm 'Âdil Shâh, and, as before, skirmishes took place daily. One day Bahâdur Khân, brother of 'Âlam Khân and one of Burhân Nizâm Shâh's officers, attacked the enemy and performed great feats of valour, but since the enemy greatly outnumbered him, they were able to surround him, and he was very nearly taken prisoner, but reinforcements were sent from the army of Ahmadnagar and freed Bahâdur Khân from his perilous position. Afterwards Ibrâhîm Muhammad Khân, with the small force under his command, attacked the 'Âdilshâhî army and fought most bravely, but was at length taken prisoner and carried before Ibrâhîm 'Âdil Shâh, who highly praised him for his valour and, giving him a robe of honour and a reward, allowed him to depart.

After that the king commanded Mushîr-ul-Mulk the Afghân, to attack the enemy and ordered Firûz Khân to support him, but although Mushîr-ul-Mulk displayed great valour on that day, the attack was unsuccessful, and Firûz Khân, who was envious, reported to the king that Mushîr-ul-Mulk had not behaved well before the enemy. The king, in his displeasure with Mushîr-ul-Mulk the Afghân, deprived him of his command and transferred it to Allâh Dâd Daulat Khân, but Daulat Khân informed the king that Mushîr-ul-Mulk had behaved very bravely in the fight and that Firûz Khân's report was false. The king then sent for Daulat Khân's brothers, who had been with Mushîr-ul-Mulk in the battle, and asked them for an account of the fight. They insisted that Mushîr-ul-Mulk had shewn great bravery, and the king then restored Mushîr-ul-Mulk to his command and honoured him before his fellows; but Firûz Khân, who had made a lying report, fell from favour.

One day at about this time Nûr Khân 'Âdilshâhî made an attack on the royal army and Kâmil Khân, one of the *amîrs* of Ahmadnagar, was wounded with an arrow. Burhân Nizâm Shâh sent Shujâ'at Khân, Azhdahâ Khân, and Daulat Khân to the assistance of Kâmil Khân with instructions to punish Nûr Khân. These *amîrs* attacked Nûr Khân, who, being unable to withstand them, took to flight. Some of the Ahmadnagaris pursued him and slew several Bijâpûris, and returned with their horses and arms.

Ibrâhîm 'Âdil Shâh again found that his troops were not able to withstand those of Ahmadnagar and, as he had done before, returned to Bijâpûr by the road by which he had come and thus made an end of the strife. Burhân Nizâm Shâh then returned in triumph to his capital.

#### XLI.—AN ACCOUNT OF THE BATTLE OF SÂLBA, BETWEEN BURHÂN NIZÂM SHÂH AND IBRÂHÎM 'ÂDIL SHÂH AND OF OTHER EVENTS WHICH HAPPENED ABOUT THAT TIME

Some months after the retreat of Ibrâhîm 'Âdil Shâh from Sholâpûr to Bijâpûr and the return of Burhân Nizâm Shâh to his capital, Asad Khân 'Âdilshâhî, who was always at heart a faithful servant of the kingdom of Ahmadnagar, and shewed his fidelity in all campaigns and battles between Ahmadnagar and Bijâpûr, took ill, and in his sickness it occurred to him that as Ibrâhîm 'Âdil Shâh was always suspicious of him he might take advantage of this opportunity to get rid of him. He therefore wrote secretly to Burhân Nizâm Shâh, urging him to invade the kingdom of Bijâpûr, in order that Ibrâhîm 'Âdil Shâh being perturbed by the invasion of his country, might abandon his design against him.

As Ibrâhîm 'Âdil Shâh, unlike the rest of the *amîrs* of the Dakan <sup>104</sup> who were usually submissive and obedient to the king, attended at court when called upon, and attended him in his wars (and if occasionally one of them were disloyal or disobedient, he became the object of the king's wrath and speedily met with his deserts), was constantly at enmity

<sup>104</sup> This is a very impudent attempt to represent an independent sovereign as one of the *amîrs* of Burhân Nizâm Shâh's court.

with Ahmadnagar and opposed the king on every possible occasion, Burhân Nizâm Shâh made it his principal object to overthrow this promoter of strife, to take vengeance on him and to deliver the people of the country from his oppression and tyranny. He also sent Shâh Tâhir to win over Malik Barîd, who was just now not on good terms with Ahmadnagar, and with instructions to go on, after he had sent Malik Barîd to Ahmadnagar, to Telangâna and to attempt to induce Sultân Qulî Qutb-ul-Mulk to enter into an offensive alliance with Ahmadnagar, for at this time Sultân Qulî Qutb-ul-Mulk followed his usual policy of keeping himself to himself, and of avoiding both enmity and alliance with the other Sultâns of the Dakan.

Shâh Tâhir had an audience of Malik Barîd ('Alî Barîd Shâh) and stated the case to him. It is said that Khân Jahân, the brother of Malik Barîd, set himself dexterously to annoy Shâh Tâhir and uttered words regarding him which bore a contemptuous signification. Shâh Tâhir was very angry and returned angry answers. Malik Barîd was much annoyed at his brother's conduct and did his best to pacify Shâh Tâhir, and actually punished his brother, but Shâh Tâhir never forgot the insult. This matter ended in Malik Barîd joining Burhân Nizâm Shâh at Ahmadnagar, and Shâh Tâhir went to Telangâna.

When Shâh Tâhir waited on Sultân Qulî Qutb Shâh he soon persuaded him not to oppose, but to further, the designs of Burhân Nizâm Shâh. Sultân Qulî Qutb-ul-Mulk set out with his army to aid Burhân Nizâm Shâh, and sent on in advance a force which accompanied Shâh Tâhir. Burhân Nizâm Shâh, when all his forces had assembled, marched towards Bijâpûr.

Daryâ 'Imâd Shâh and 'Alî Barîd Shâh paid their respects to the king at about the same time and the army moved forward and crossed the Bhînur. When the troops thus entered the Bijâpûr dominions, Burhân Nizâm Shâh sent his artillery on towards Bijâpûr by the main road, while he, with the rest of his army, marched rapidly on Bijâpûr by another and less well-known road.

When Ibrâhîm 'Âdil Shâh learnt that Burhân had separated his artillery from the main body of his army, he, with a picked force, moved on the artillery by forced marches. The *amîrs*, who were with the artillery, defended the guns manfully and, since they had a large force with them, they beat off the attacking force and wounded many and made many prisoners. They loaded some of the guns to the muzzles, so that they burst when fired.

Meanwhile the main body of the army, marching rapidly by the other road, had arrived before Bijâpûr, and the king encamped there and opened the siege. A messenger now came from Asad Khân to say that the prospect of the success of a siege of Bijâpûr was not very hopeful, and to advise the king to march on Belgaum, as that fortress would more easily all into their hands.

The king then marched from Bijâpûr, and halted at Miraj,<sup>105</sup> the distance from which place to Belgaum is three *gâûs*. Here he heard that Asad Khân had died and that Ibrâhîm 'Âdil Shâh had reached Belgaum and was prepared to defend the place. He therefore turned aside and, instead of marching on Belgaum, marched on Panhâla,<sup>106</sup> a very high and strong fortress, and besieged that fortress. The army besieged it vigorously for three days, in the course of which Râjan Mahaldâr, one of the king's intimate associates, was slain. It soon became manifest that the army would not be able to capture that fortress, and the king

<sup>105</sup> Miraj is situated in 16° 49' N and 74° 41' E. Sayyid 'Alî's geography is as bad as his history. The distance from Miraj to Belgaum is not three *gâûs* (twelve miles) but about sixty eight miles.

<sup>106</sup> Panhâla is about thirty five miles west of Miraj. I have not been able to find Pâmîn, but perhaps we should read "the lower fortress."

abandoned the siege and marched on the fortress of Pâmîn, and laid siege to it. The army of Ahmadnagar, after having laid siege to Pâmîn for no more than a day and a night, took the fortress by storm, and Burhân Nizâm Shâh caused its fortifications and the dwellings of its inhabitants to be levelled with the ground.<sup>107</sup>

Burhân Nizâm Shâh then marched to Satâra,<sup>1</sup> a very strong fortress situated in the hills, and, in spite of its strength, his troops attacked it resolutely and continued their attempts to take the place by storm for five days, at the end of which time Burhân Nizâm Shâh heard that Ibrâhîm 'Âdil Shâh was marching to attack him. He therefore detached several thousand horse under the command of some of the bravest *amîrs* of his army to advance to meet Ibrâhîm, for the ground about Satâra, where Burhân was encamped, was very hilly and unsuited for battle. The *amîrs* marched to meet Ibrâhîm 'Âdil Shâh, and when they fell in with his advanced guard, attacked it, and slew many. But the main body of the army of Bijâpûr arrived on the field and attacked the *amîrs*, defeated them, and put them to flight.

Then Burhân Nizâm Shâh, seeing that he could not fight in the position before Satâra, marched to the *ghât* of Sâlpa, where he encamped. But the position here also was very cramped, owing to the density of the jungle, and Ibrâhîm 'Âdil Shâh sent 3,000 infantry of his army into the jungle surrounding Burhân's camp, in order that they might harass and annoy the army of Ahmadnagar. The enemy's infantry, trusting to the density of the jungle, carried out these orders, but Burhân Nizâm Shâh ordered Dilâvar Khân and Daryâ to attack the infantry and they fell on them and at once slew three hundred of them, and carried the heads to Burhân Nizâm Shâh, by whose orders they were built up into pillars.

As Pâr<sup>108</sup> was too cramped a position for the army, Burhân Nizâm Shâh marched on and encamped on the river of Pâr. On the following day Ibrâhîm 'Âdil Shâh descended the *ghât* and encamped over against the royal army, and the two armies lay that night opposite to one another.

On the following morning the two armies were drawn up in battle array and the fight began. Ibrâhîm 'Âdil Shâh fought in person with the utmost valour, and several times threw both the right and the left wings of the army of Ahmadnagar into confusion. Burhân Nizâm Shâh was astonished at Ibrâhîm's bravery and loudly praised it, although parts of his own army were scattered. He himself, however, in the assurance that victory would at last be his, firmly held his ground, and Shâh Tâhir, who was supernaturally enlightened regarding the result of the day, confirmed him in his resolution. The battle lasted till sunset, when Ibrâhîm 'Âdil Shâh, with two or three thousand of his best cavalry took up his position on some rising ground on the flank of the army of Ahmadnagar. Burhân Nizâm Shâh then opened a fire of rockets on the enemy and scattered them, while Kâmil Khân and Zahir-ul-Mulk, two *amîrs* of the army of Ahmadnagar, attacked Ibrâhîm 'Âdil Shâh and dispersed the force of cavalry which was with him. Ibrâhîm 'Âdil Shâh then fled from the field, and the army of Ahmadnagar, pressing forward, pursued and slew many of the fugitives and captured their camp equipage, goods, arms and elephants, and also Ibrâhîm's umbrella and other insignia of royalty.

Among the spoils were forty elephants, including Asad Khân's own riding elephant and Ibrâhîm 'Âdil Shâh's umbrella and *âftâbgîr* and all his insignia of royalty. Burhân Nizâm

<sup>107</sup> This is the famous fort of Satâra, once Sivajî's capital, and now the headquarters of a British district, situated in 17° 41' N and 74° E.

<sup>108</sup> The Pâr Pass, situated about thirty-four miles north-west of Satâra.

Shâh's scribes then wrote accounts of the victory and dispatched them to all places in the king's dominions

Burhân Nizâm Shâh then returned in triumph to his capital and devoted his attention to the administration of his kingdom and to the needs of his army and his subjects

#### XLII —AN ACCOUNT OF IBRÂHÎM 'ÂDIL SHÂH'S THIRD EXPEDITION TO SHOLÂPÛR

##### AND OF ITS CAPTURE

After Ibrâhîm 'Âdil Shâh had suffered at Sâlpâ such a defeat as he had never in his life suffered before, he devoted his attention to the strengthening of his army, to collecting material for war, and to preparing for reprisals. He also, by diplomatic arts, gained over to his side Barîd-i-Mamâlik and then marched to Sholâpûr with a large army. When he reached Sholâpûr he opened a regular siege and, in accordance with his usual custom, constructed lines of contravallation against a counter-attack from the army of Ahmadnagar and carried a flying sap towards the fortress on all sides.

When Burhân Nizâm Shâh received news of Ibrâhîm 'Âdil Shâh's siege of Sholâpûr, he assembled his army and asked Daryâ 'Imâd Shâh for help, and Daryâ 'Imâd Shâh came to his assistance. He then marched to Sholâpûr and encamped in the neighbourhood of the army of Ibrâhîm 'Âdil Shâh, and skirmishes took place daily between the two armies. This intermittent fighting went on for a long time, and meanwhile provisions began to fail in the fort and the garrison were reduced to great straits, for Ibrâhîm 'Âdil Shâh besieged them so strictly that no communication between those within the fort and those without was possible. Moreover Daryâ 'Imâd Shâh wearied of the long strife and had no heart for fighting, but devoted all his efforts to attempting to make peace. Meanwhile, the rainy season began very suddenly and caused great hardship in the army of Ahmadnagar. Burhân Nizâm Shâh now sent a messenger secretly to Barîd-i-Mamâlik to detach him by any means from his alliance with Ibrâhîm 'Âdil Shâh, in the hope that his defection would so weaken the besiegers that they would be compelled to relinquish the siege. Barîd-i-Mamâlik replied that the fortress of Sholâpûr could hardly pass from the possession of Burhân Nizâm Shâh, and that his defection from Ibrâhîm 'Âdil Shâh would make no difference. He also said that it was not the practice of his kingdom to forsake an ally before a campaign had been brought to a conclusion, and that if he now abandoned Ibrâhîm 'Âdil Shâh he could hardly hope to be trusted by Burhân Nizâm Shâh in future. He advised Burhân Nizâm Shâh to abandon Sholâpûr for that year to Ibrâhîm 'Âdil Shâh and to return the next year with a large army to recapture it, promising him his aid in the following year, when he would be free from his engagement with Bîjâpûr. Daryâ 'Imâd Shâh supported Amîr 'Alî Shâh and advised Burhân to make peace with Bîjâpûr. For these reasons therefore, Burhân Nizâm Shâh made peace with Ibrâhîm 'Âdil Shâh, surrendered Sholâpûr to him, and returned to Ahmadnagar.

#### XLIII —AN ACCOUNT OF THE DEATH OF SULTÂN QUTB-UL-MULK, AND OF JAMSHÎD'S ACCESSION TO THE THRONE

After the affair of Sholâpûr, Malik Sultân Qulî Qutb-ul-Mulk,<sup>100</sup> the governor of the country of Telingâna, was assassinated by one of his courtiers and his eldest son, Jamshîd

<sup>100</sup> Sultân Qulî Qutb-ul-Mulk, the founder of the Qutb Shahi dynasty of Golkonda, declared his independence in 1512, but had already been virtually independent for twenty-two years. From his epitaph it does not appear that he used the royal title, though his descendants did. He was murdered on September 3rd, 1543, in the ninety-eighth year of his age, by his second surviving son, Jamshîd, who succeeded him. This account of 'Alî Barîd Shâh's attempt to annex Telingâna appears to be entirely imaginary, for it was only towards the end of Jamshîd's reign that his brothers Haidar and Ibrâhîm fled to

Khân, who had been imprisoned in Golconda by his father's order, was released by his father's murderer and ascended the throne. His brothers, Haider Khân and Ibrâhîm Khân, who were not content that he should be king, fled with part of the army and forty elephants and took refuge with 'Alî Barîd Shâh. 'Alî Barîd Shâh then conceived the foolish notion of capturing Telangâna for himself, believing that its conquest would be easy with the help of Haider Khân and Ibrâhîm, who were the heirs to the kingdom, and of the army of Telangâna, most of which was well affected towards them. He therefore assembled his army, marched into Telangâna, besieged Golconda, and entered on a campaign.

Shâh Tâhîr, in whose heart Khân Jahân's witticisms still rankled, when he heard that 'Alî Barîd Shâh had invaded Telangâna, warned Burhân Nizâm Shâh that the dissatisfaction of Haider Khân and Ibrâhîm with the elevation of their brother Jamshîd to the throne, and their taking refuge with 'Alî Barîd Shâh had inspired the latter with the ambition of becoming king of the whole of the Dakan, and that he had invaded Telangâna as a step towards the attainment of this object. He said that if 'Alî Barîd Shâh gained possession of Telangâna, his power would be more than doubled and that it behoved the king not to treat this matter as one of no importance but to act at once, as 'Alî Barîd Shâh would certainly plunge the whole of the Dakan into war as soon as he found himself strong enough to be able to do so with a chance of ultimate success and that it would not be easy to overthrow him after he had conquered Jan shîd and annexed Telangâna. The king therefore assembled his army, summoned Daryâ 'Imâd Shâh, and marched towards Telangâna to the assistance of Jamshîd Qutb Shâh, sending on before him a force under some of his *amîrs* to render immediate aid to Jamshîd.

The road taken by the king with the main body of the army lay by the fortress of Kohîr,<sup>110</sup> which is in the country of 'Alî Barîd Shâh, but is near the borders of Telangâna. Here the king halted and besieged the fortress. The garrison, seeing that there was no hope of successfully defending the place and that the fort was so surrounded by the army of Ahmadnagar that no way of escape remained, surrendered, and by the king's order the army refrained from molesting them, their property, or their wives and children.

When the *amîrs*, with the force which had been sent forward to the aid of Jamshîd Qutb-ul-Mulk, entered Telangâna, and 'Alî Barîd Shâh and his brother heard of the fall of Kohîr, they were greatly alarmed, and retreated rapidly from Telangâna towards Bijâpûr, and took refuge in the dominions of Ibrâhîm 'Âdil Shâh. Jamshîd Qutb-ul-Mulk then came to pay his respects to the king, and to thank him for the help which he had given, and the king bestowed on him a royal robe, an umbrella and *âftâbgîr*, and honoured him with the title of Qutb Shâh. Some historians say that, although the king offered Jamshîd Qutb-ul-Mulk an umbrella and *âftâbgîr*, he refused to receive them, saying that all the *amîrs* of the Dakan had assumed umbrellas and *âftâbgîrs* and that it behoved him to serve the king faithfully as a soldier. He also said that he was the loyal slave of the king and would carry out any orders that were given to him, or attack any enemy against whom he was sent, and hoped that he should be able to perform his duties to the king's satisfaction.

Bidar, where all that 'Alî Barîd Shâh did for them was to give them a safe asylum. Haider died in Bidar and Ibrâhîm went on to Vijayanagar, whence he started, after Jamshîd's death, on the expedition which gained for him the throne of Golconda. The true course of events after Jamshîd's accession seems to have been as follows. Burhân, eager to recover Sholâpûr, instigated Jamshîd to invade Bijâpûr from the east and Sadâshivarâya of Vijayanagar to attack Râichûr, and himself invaded the Sholâpûr district and several times defeated the troops of Ibrâhîm 'Âdil Shâh. Ibrâhîm conciliated Burhân by the cession of Sholâpûr, induced Sadâshivarâya to withdraw his troops from Râichûr, and then sent Asaf Khân Lâri against Jamshîd Qutb Shâh, who was utterly defeated and driven back to Golconda.

<sup>110</sup> Kohîr, famous for its mangoes, is about twenty five miles south by east of Bidar.

Although 'Alī Barīd Shāh had sought refuge with Ibrāhīm 'Ādil Shāh, he expressed repentance for his ill-advised action, and by fair words and submissive messages attempted to excuse himself to Burhān Nizām Shāh. He sent a letter, couched in humble terms, to Shāh Tāhūr, expressing his contrition.

When Jamshīd Qutb Shāh waited on the king before Kohīr and received special honour, Burhān Nizām Shāh took counsel with Daiyā 'Imād Shāh and Jamshīd Qutb Shāh regarding the recapture of Sholāpūr, and then marched, accompanied by them towards Sholāpūr.

When Ibrāhīm 'Ādil Shāh became aware of Burhān's design and realized that he could not hope to confront him successfully in the field, he and 'Alī Barīd Shāh marched to Parenda and besieged it, and when Burhān Nizām Shāh heard of this, he abandoned the siege of Sholāpūr and marched to meet Ibrāhīm 'Ādil Shāh, encamping at the village of Khāsspūrī. Ibrāhīm 'Ādil Shāh likewise left Parenda and marched on Khāsspūrī to meet Burhān Nizām Shāh, and at that place a battle was fought. The opposing forces were drawn up in the morning and the battle raged till sunset, when victory was declared for Burhān Nizām Shāh, and Ibrāhīm 'Ādil Shāh and his army fled from the field, leaving all their camp equipage and Ibrāhīm's insignia of royalty in the hands of the victors, who plundered them.

Jamshīd Qutb Shāh, who had been nursing his wrath against 'Ālī Barīd Shāh, now seized his opportunity and pursued the army of Bīdar 'Ālī Barīd Shāh, in his fear of Jamshīd, fled precipitately, leaving his umbrella and *āftābgīr* and all his insignia of royalty in the hands of Jamshīd Qutb Shāh.

After the armies of Ibrāhīm 'Ādil Shāh and 'Ālī Barīd Shāh had been thus defeated, Jamshīd Qutb Shāh received leave to depart, and returned to Telingāna, and Daiyā 'Imād Shāh returned to Berar. The royal army then returned to Ahmadnagar.

*(To be continued)*

## ON THE HISTORY OF THE INDIAN CASTE-SYSTEM

By HERMANN OLDENBERG

*(Translated by H. C. Chakladar, M.A., Calcutta)*

*(Continued from p. 214)*

These outlines appear to me, expressed briefly, to be the following, —

Amongst the Aryan people, the boundary-line separating whom from the non Aryans is perceived to be growing sharper and sharper, a twofold aristocracy rises into prominence—the one characterised by the possession of the priestly power of magic and the other by secular dominion. In the third position is the mass of the non-aristocratic Aryans. Then outside the Aryan community, the non-Aryan plebeians and slaves, finally, further outside, the wild or half-wild tribes untouched by civilisation. Evidently there are admixtures of these elements, there is nothing to disprove that those great categories are perceived and recognised as fundamentally governing the social life and demonstrating their power at every step. Shall we find it necessary now to speak here only of "classes" and avoid the word "caste?" But it is just this fixedness, I might say animal fixedness, of character based upon birth and hardly surmountable by human endeavour, that is usually denoted by the word "caste." When Śramanas came into being, they formed only a class and not a caste, the class of the Brāhmanas, a social organisation of the ancient style, was a caste, the Brāhman might, as economic necessity often enough made him,<sup>16</sup>

<sup>16</sup> Cf. the remarks of Ibbetson in his excellent description of the castes in the Panjab *Report on the Census of the Panjab*, 1881, Vol. I, 173, 174 ff.

carry on other than a priestly profession, he might become a cultivator, a butcher or a thief then he was perhaps treated with contempt, but he remained a Brāhman <sup>17</sup> Under these great caste divisions stood the organisation of the gens and of families, but no castes in the sense of the castes of modern India

I believe that we may point out a number of other considerations, that will fully strengthen and add to the importance, of what has been enunciated above

‘It is not the theory which can account for the facts, it is the facts that help us to see the theory in its true light,’ says Senart Now, however, the theory is separated from the facts which are said to elucidate them, by thousands of years is it necessary to say in such a case what dangers threaten the interpretation? These dangers must impose upon the investigator the categorical duty of not taking a leap from antiquity to modern times, without first of all devoting the most careful attention to the series of positive facts nearer that remote period of antiquity—facts which in reality have the first claim to be taken into account, if it is intended to explain the theory in the light of the facts

I have already asserted above (p 268) that to me the information given in Pāli literature and, in particular, in the *Jātakas*, that “great thesaurus of Indian antiquity both in respect of state lore and private life” (Bühler) seems to deserve, in connection with the problems before us, a consideration that they have not received from Senart We endeavour, with the assistance of the excellent work of Fick, to formulate some of the principal points which can be gleaned from them

At the head may be placed the statements in the canonical Pāli text with the help of which it will be possible to discuss whether they also on their side are not to be taken into account as facts coming within the scope of the theories I believe, indeed, that they are clearly enough marked by a close correspondence with actual life, and that whatever theory may underlie the social pictures in the Pāli texts, it is so far independent, at least, of the Brāhmanical theory, that we shall be entitled throughout to make use of these evidences as a proper authority for checking the other one

In connection with the prohibition of mutual insults (*Suttavibhanga*, *Pācittiya* II, 2; *Vimaya Piṭaka*, Vol IV, p 6 ff), it is related how one may insult another by giving him a low, or, in an ironical manner, a high designation This may be done *jāṭiyā*, *gottena* *hammeti*, *sappena* and in other ways, and here are specified the principal cases of higher and lower *jātis* &c The lower *jātis* are enumerated as *Chandālayāti*, *Venajāti*, *Nesādayāti*, *Rutthakārayāti*, *Pukkusajāti*, and the higher ones as *Khattiyajāti* and *Brāhmanajāti* No indication is given that any other case of *jāti* might be looked upon as low or high, the respective possibilities are manifestly looked upon as exhausted, but, of course, the existence of middle *jāṭiyō*, that lie between the high and the low cannot be denied Of *gotta*, there are named several well-known Brāhmanical *gottas*, some as low (e.g., the *Bharadvājagotta*, the horrible Brahman *Jūjaka* in the *Vessantara* story is, for example,

<sup>17</sup> Senart (123 ff) says ‘The Brahman caste pursues its destiny under our eyes Under what conditions? Not at all as a veritable caste, as we have seen, but as an agglomeration of innumerable castes’ And of the *Kshatriya* and the *Vaiśya* (he says) “Here again we can see nothing but some generic names, a very vast cadre intended to comprise within itself, to conceal, a division into fractions, really infinite” Of this ‘infinite division into fractions’ at least the beginnings may have already existed in reality in the early times But the respective fractions were neither called castes, nor were they castes What there was, was a fast increasing break up of the occupations into fragments Thus, however, did not hinder the great old castes (*varna*, *jāti*) from continuing to live in the Indian consciousness as expressive of a natural division of the individuals

a Bhāradvāja, cf Jāt, Vol VI, p 532)—and others as high (e.g. the *Gotamagottam* to which Buddha belonged) Low *Kamma* *Koṭṭhakammam*, *Pupphachhaddakammam* High *kamma* *kaṣi vāṃjyā gorakkhā* Low *sippa* *Nalakārasippam*, *Kumbhakārasippam*, *pesakārasippam*, *Chammakārasippam*, *Nahāputasippam* High *sippa* *muddā ganānā lekḥā* <sup>1</sup> With regard to *gotta*, *kamma* and *sippa*, it has to be added that beside the examples mentioned above as high or low, we have to take into consideration what may, *tesu tesu janapadesu*, be regarded as high or be looked upon with contempt

Now, does here the *jāti*—according to Senart the proper word for caste in the sense in which he understands the word, that is, something similar to the modern caste—appear in any way to differ from the castes or classes of the ancient Brāhmanical system? I confess I am unable to discover anything that might justify Senart's transformation of the concept referred to. One is Brāhmana or Kshatriya by virtue of his *jāti*, or one belongs by virtue of his *jāti* to the despised people, the Chandālas, Nishādas, &c. Everything fully corresponds to the ancient system in the sense in which we are accustomed to understand it from the remotest times. Moreover, that the trade of the *Rathakāra* consolidated itself as a *jāti*, or associated itself with a particular *jāti*, corresponds to what is otherwise known (see above, p 277 ff), *Vena* (*Varna*) also stands in a line with the *Rathakāra* in the Dharma literature<sup>19</sup>—not, of course, so far as is known to me, in the ritual literature of the Veda. However, apart from such origins whereby several crafts assumed the form of *jāti*, the bulk of the crafts are summed up under the category *sippa*. The merchants also represent not a *jāti* but a *kamma* <sup>20</sup> As regards the narrow divisions inside the *jāti* of the Brāhmana, &c, what are mentioned are not the small, perhaps local, castes in the Senartian sense, but the ancient *gotras*

Now what this passage of the Suttavibhanga expresses in a theoretical form, appears to me to be confirmed by other data in the Pāli text, so far as I am in a position to see up till now, and especially by the data of the Jātakas so carefully worked out by Fick. Where people are characterised as *jāti*, they are either Brāhmanas or Khattiyas or Chandālas and so forth,<sup>21</sup> but we do not find that immense variety of *jātis* which is peculiar to the caste system at the present day. Often we read<sup>22</sup> that there were four kinds of assemblies: assemblies of Khattiyas, Brāhmanas, Gahapatis, Samanas—i.e., of the three ancient higher castes<sup>23</sup> and beside them, those of the new class of ascetics freed from the bonds of caste. Similarly it is often said<sup>24</sup> that there were four *kulas*—the *kulas* of Brāhmana, of Khattiya, of Vessa and of Sudda, or that three kinds of important *Kulas*<sup>25</sup> were distinguished—the

<sup>18</sup> Cf *Mahāvagga* I, 49 (*Vinaya Pitaka*, Vol I, p 77)

<sup>19</sup> Cf Fick, p 209 ff about *Rathakāra* and *Vena*

<sup>20</sup> The difference between *Kamma* and *Sippa* seems to me to be that the former represents an independent means of living pursued only for one's own benefit, and the latter, on the other hand, denotes work done as a rule for others and dependent upon some manual skill

<sup>21</sup> Mixed castes like those that play such an important rôle in the Brāhmanical legal literature, appear to be unknown to the Pāli texts. Opinions appear to have differed as to whether a child descended from parents of whom one came from the Brāhman, and the other from the Khattiya caste, was to be allowed to have the quality of a Brāhman or a Khattiya. I am unable, however, to discover any statement about the proper categories for the children of such marriages. Cf *Assaḍḍyanasutta*, p 15 (Pischel), Fick, p 35 ff, 57 ff

<sup>22</sup> E.g., *Mahāparinibbānasutta*, p 11 (Childers), *Mahāvagga*, VI, 28, 4, &c

<sup>23</sup> We shall come back to the meaning of the term *gahapati*

<sup>24</sup> E.g., *Suttavibhanga*, *Samghādisesa*, XIII, 2

<sup>25</sup> *Chullavagga*, VI, 6, 2

*Kula* of the *Khattiya*, of the *Brāhmaṇa*, and of the *Gahapati*.<sup>26</sup> Everywhere it is patent that in the period of the Pāli text the old framework did in no way cease to govern the actual life, and to represent its condition adequately. Where the Jātaka stories turn upon questions of cleanness and defilement, the reference is to the old categories such as *Khattiya*, *Brāhmaṇa* (*Udāchhabrāhmaṇa*) and *Chandāla*.<sup>27</sup> "A breaking up of the Brāhmaṇ caste into several sub-castes," says Fick pertinently (p. 125 A. 1), "a coalition of those expelled from caste into new castes, as it exists in modern India, is, I believe, not met with in the older Buddhistic period, because nowhere in the Pāli text do we find a trace of it." There is no reason to suppose that we have to think of a narrow caste-like union of a local nature inside the Brāhmaṇ caste, when the expression *Udāchhabrāhmaṇa* is used<sup>28</sup>; the word itself signifies nothing more than this, that the Brāhmaṇa families that came from the north-west — as well known historical circumstances prove easily — were held in particular esteem.

So far as the castes *Khattiya*, *Vessa* and *Sudda* are specially concerned, I believe that Fick (pp. 55, 163, 202) is far too sceptical with reference to their real significance during the period of which the Pāli texts furnish an account.<sup>29</sup> When it is admitted that the families of Gautama, Bhāradvāja, &c., were all grouped together in the caste of Brāhmaṇas, as being pervaded all of them by the mystic potency of the *Brahman*, I cannot see why, just in the same way and answering to exactly similar modes of expression in the texts, it should not be held that families like those of the Śākya, Licchavis, &c., all of whom felt in themselves the potency of the Kshatra nobility, all of whom said "*Mayam pi Khattiyā*,"<sup>30</sup> are to be reckoned as belonging to a single caste of the Khattiyas — a single caste of which the members, when they said to each other "I am a Khattiya," "I too am a Khattiya,"<sup>31</sup> knew and acknowledged each other as persons of the same kind and nature.

There might indeed be some hesitation about the real existence of a caste of *Vessas* in the Buddhist period. Turns of expression like those, so abundant in the Brāhmaṇa texts, speaking about the relation of the *Kshatriya* and the *Varīya* as the oppressor and the oppressed, are not to be found in the Pāli texts. Again, it could hardly, at least not often, happen that any person who appears in a story as engaged in trade, should be designated as a *Vessa*, because the denomination Brāhmaṇa actually appears in numberless cases. It is not therefore to be wrongly supposed that here there is a positive withdrawal from our former position. The causes of this apparent anomaly are, methinks, clear as day. In the Rigvedic age the Varyas formed a union, which, however comprehensive it might be, was, none the less, a real, tangible union, not a union of Aryans raised above the general level, through spiritual or temporal nobility, by virtue of the inherent potency of the *Brahma* or *Kshatra*, but a union, we might say, of the Aryan peasants carrying on agriculture and cattle breeding. In the Buddhist period, the advance of civilisation had dissolved the ancient union. Big

<sup>26</sup> Fick (p. 22 n. 1) deduces wrongly from such passages, that *kula* there signifies "caste." It everywhere signifies "family," and those passages show that the generic notion of the family is split up into specific ideas like Brahman family and so forth.

<sup>27</sup> Fick, 26 ff. Cf. Jāt., Vol. VI, p. 422 *evareṇṇa pi nāma khattiyā chandāliya saddhūna iṣaṇa kappeṇ*.

<sup>28</sup> Bühler, in Jolly *ZDMG*, 50, 515. Cf. Fick, 138 ff.

<sup>29</sup> Cf. about the rôle of the *Varīya* and the *Sudda* in Sanskrit literature, the analogous conceptions of Grosse in Schlagintweit *ZDMG*, 33, 554, and L. von Schroeder, *Indiens Literatur und Kultur*, 419.

<sup>30</sup> *Mahāparinibbāna Sutta*, p. 68 ff.

<sup>31</sup> See the account by Fick, p. 26. The Buddhistic materials should not be forgotten, if one wishes to appreciate the theory set up by Senart (p. 24) — of course in relation to the literature of the Sanskrit law books — As regards the Kshatriyas hardly their name itself has survived in some traces, they are rare."

towns now formed the centre of life. In the towns or before the doors of the towns lay the great, perhaps the greatest, part of the scenes of the transactions that the Buddhist texts relate. In these cities there had grown up a rich and highly respectable merchant class.<sup>32</sup> They were the residences of a highly progressive artisan class ramifying into many branches, and it may be considered as probable that the force of circumstances had driven masses of persons of Aryan descent into the arts and crafts, which at one time probably were as a rule the occupations of the Śūdras.<sup>33</sup> Under such conditions, many of the categories that had governed life in ancient times must have faded under the altered circumstances of the new age.<sup>34</sup> It is natural that where pretensions of spiritual or temporal nobility came into play, as among the Brāhmaṇas and Kṣatriyas, the ancient ways of viewing things held out with a tenacity different from that in the sphere of burgher life. In this sphere, however, guilds or corporations of merchants and artisans—just as in mediæval Europe they acquired a great importance in connection with the flourishing of city life, similarly also in India,—stepped into the foreground as adequately representing the actual situation and its living interests, pushing into the background such concepts as those of the Vaiśya or the Śūdra.<sup>35</sup> Moreover, we are entitled to maintain that although these last mentioned concepts had been pushed into the background in comparison with the others, yet they had by no means gone out of existence. A tradesman was of course in the first place designated a tradesman, but the distinction that the people made between the *Vessakulam* and the *Suddakulam*, makes us adopt the view that on that account, the fact was not lost sight of, that a particular merchant was a *Vessa* or that an artisan was possibly a *Sudda*.<sup>36</sup> And the important rôle that the *Gahapati* plays in the Pāli text justifies the conclusion that here it represents a still living thing rather than a mere decayed reminiscence of an institution nearing extinction. I believe, in fact, that we may take the *Gahapatikula* of the Pāli text as a synonym for *Vessakula*.<sup>37</sup>

<sup>32</sup> I may so express myself, without the fear of being misunderstood, that I deny that there were any merchants in the R̥gvedic times.

<sup>33</sup> This was not considered as normal in the Buddhist times, a touch of inferiority was always attached to the handicrafts. Cf. the above quoted (p. 282) passage of the *Suttavibhanga* as also the observations of the *Majjhima Nikāya* (Vol. I, p. 85, ed. Tröckner) about the *sippathānas* which were suitable for the *Kulaputta*. In this connection we may take into consideration what the *Dasabrahmana Jātaka* says (see Fick, 142) about the Brāhmaṇas who followed agriculture and trade, tended goats and sheep, they resemble the *Ambattha* and *Vessa*, for the *Vessa*, even then agriculture, cattle breeding and trade, and not the handicrafts, were characteristic occupations [yet of the modern *Banya* (merchant) says Ibbetson, *op cit*, p. 291 "he is generally admitted to be of pure Vaiśya descent"]. It may be observed as singular that the *Kumbhakdra* appearing in *Jāt*, I, p. 80 bears the *gotra* name *Bhagga*.

<sup>34</sup> This is explained very clearly in certain interesting verses of the *Bhuridattajātaka*, *Jāt*, Vol. VI, p. 208, verses 151, 153.

<sup>35</sup> Moreover, as regards the spiritual class, we may, I think, compare this, at least distantly, with the fact that by the side of, partly perhaps in preference to, the spiritual class of the old style—if I may use this expression—the Brāhmaṇ caste which was falling off from its old character, the spiritual class of the new style, corresponding to the ideas of the new age, that is, the sects of the *Grāmaṇas* stepped up to the foreground.

<sup>36</sup> I here refer in passing to the *Vessānam vithi* which is mentioned in *Jāt*, Vol. VI, p. 185. Cf. also p. 418, verse 1477, as also p. 142, verse 636. *Rathakdrakulesu vā pukkusakulesu vā vasesu vā*.

<sup>37</sup> The frequent mention side by side of the three categories of *khattiya*, *brāhmaṇa* and *gahapati* shows that we have to think of the *gahapati* as a category different from the two higher castes, and yet of the same kind. The conspicuous and respectable position, on the other hand, that is assigned to the *Gahapatis* (Fick, 164), seems to preclude the idea that *suddas* were included among them. I cannot admit a mode of expression like the *Jātaka* passage (II, 241) cited by Fick (*op cit*), as sufficiently adequate for the purpose of establishing a difference between *vessa* and *gahapati*. This holds good also of *Jāt*, I, 152.

In the observations made above we have already touched upon the passages in the Pali text bearing on the concept *Sudda*. Here also Fick (p. 202) denies the real existence of a caste. And certainly it is correct that endlessly heterogeneous elements were comprised together under that designation, about which the only definite thing was that it denoted the position of these individuals below the three higher castes, and that people had no interest in having a clear comprehension of its proper positive character and no enquiry was made in that direction. However, I would not like to express it as my opinion that the concept *Sudda* appertained to mere theoretical discussion. No matter what exactly those designated as *Sudda* were, to the living consciousness<sup>38</sup> of the generality of people as it is reflected in the Pali text, the *Suddas* appear, I think, to have been a category of men who were homogeneous at least when looked at from a particular point of view and were united among themselves by this common feature. The *Ambatthasutta* (*Digha Nikāya*) compares the Brahman who mechanically repeats the hymns of the ancient *Rishis*, to a *Suddo vā Suddadāso vā*, to a man who stations himself at the place from which a king has spoken, who talks in the same words and then fancies himself to be a king, a clear proof, I think, that the concept *Sudda* had its existence not merely in the theoretical framework of society, but that the *Sudda* had not vanished out of the daily life, and that people were accustomed to say, „So and so is a *Sudda*”<sup>39</sup>

If we are not yet entitled to contest that the concepts *Varṣya* and *Śūdra* had parted with an essential part of their ancient significance in the Buddhist age, even then Pāli literature enables us, I think, an occasional glimpse of the newly-forming organisations which drove them out and installed themselves in their place. I think that here we see before us a bit of the previous history of the modern system of caste, inasmuch as we meet with organisations that were predestined later to become castes, at a stage which evidently preceded that development.

A passage in the formulæ of confession of the Buddhist order of nuns — as given in one of the oldest texts of the Pāli literature — enumerates the courts, especially the corporate assemblies, which possessed a sort of magisterial dignity. The veil of the nun should not be bestowed upon a *Chori*, without the authorisation of the respective court, it says, *anapaloketuṃ rājānam vā saṃgham vā ganam vā pūgam vā senim vā*<sup>40</sup>. The old commentary<sup>41</sup> observes here *rājā nāma, yathā rājā anuśāsati rājā apaloketabbo, saṃgho nāma bhikkhunīsaṃgho vuccati, bhikkhunīsaṃgho apaloketabbo. Gano nāma* (then in the same way *pūgo nāma, seni nāma*), *yathā gano (pūgo, seni) apaloketabbo*. It will be seen that in this enumeration there is no mention of caste associations (*jāti*). Here probably we meet with

(Fick, 165) when it is said there that one should behave properly to Brāhmanas and Gahapatis, toward the *Negamas* and the *Jānapadas*, it does not manifestly follow that the *negamas* and the *jānapadas* stood on the same level as the *gahapatis*.

is (Of course, not to the critical consciousness as it prevailed in the Buddhist monastic order itself, which maintained the essential equality of all men (cf. say, the *Assaḍḍyanasutta*) — which consciousness, moreover, was sometimes much wanting in consistency, as when the proposition was started that a Buddha could be born only in a Brāhman or a Kshatriya family.

38 Here I refer also to the parable of the man who when hit by an arrow, instead of getting himself attended to by the physician, enquires first of all, who it is that has hit him, whether a *Khattiya* or a *Brāhman*, or a *Vessa* or a *Sudda* (*Majjhima Nikāya*, Vol. I, p. 429) in my opinion, a satisfactory evidence that people in their daily life had not ceased to mind whether a person was a *Vessa* or a *Sudda*.

40 *Bhikkhunī Pātimokkha*, *Saṅghādisesa* 2 *Vinaya Pīṭaka*, Vol. IV, p. 226

41 See *Vinaya Pīṭaka*, Vol. I, p. XX ff

associations, namely the *senis*<sup>42</sup> in which, to all appearance, the tendency to develop into castes in the modern sense, was inherent. Tradition<sup>43</sup> defines *śreni* as an association of people of the same or of different *jātis*, who carried on the same trade. Thus the legal literature enumerates by way of examples, *śrenis* of horse dealers, betel-sellers, weavers and shoemakers<sup>44</sup>. The inscriptions also furnish materials, not infrequently, those of the Buddhist cave temples of Nāsik Junnar, &c., where we find a *dhaññikaseni*, a *tilapishakasreni* and so on (see Archaeological Survey of Western India, IV, pp 94, 96ff, 102, 104). Also an inscription of Gwalior (Samvat 933) mentions a *śreni* of oil pressers (*tailika*), as also one of gardeners (*mālika*)<sup>45</sup>, this last one appears also in an inscription of Samvat 1343 coming from Somanātha in Sorath,<sup>46</sup> and so on. The Epic leaves no doubt that *śrenis* acquired an important political significance<sup>47</sup>. We learn from the legal literature that the *śrenis* had their own ordinances and a certain jurisdiction<sup>48</sup>. Their presidents or elders are mentioned in the Jātakas or in other places<sup>49</sup>. It is said of everyone who calls together an assembly of the people, *sabbā samyo sannipāteivā*<sup>50</sup>. It is, however, quite clear that for the time of which the Jātakas furnish a picture, the conception of caste has to be excluded from the *seni*. *Seni* is neither *vanna* nor *jāti*, the professions in which the corporation of *seni* is found to exist, fall, as the Suttatibhanga has shown us, under the category of *Nippam*, perhaps also that of *Kammam*, never under that of *Jāti*. On the other hand, however it is no less clear that there are occasions when the *senis* approach the nature of caste. The hereditary character of the professions is of course, not an inviolable law,<sup>51</sup> although in fact it is a very important rule<sup>52</sup>. There can be no doubt that the heterogeneous character, the greater or lesser degree of defilement which was associated with particular vocations according to the nature of the work, produced an aloofness mixed with contempt among the members, nay, a split among themselves, the frequent local isolation of particular professions in fixed streets or special villages<sup>53</sup> — perhaps wholly, or in part, in consequence of that defilement — must have contributed to the erection of barriers between them. Now, if from ancient times onwards, the thought and life of the nation, accustomed to the conception of caste as a natural differentiation by birth, was connected — though not indissolubly and not without exceptions — with difference of occupation with such restrictions as were produced by the fear of defilement by intercourse with persons of lower birth, was it not then perfectly natural that out of these guilds or corporations, there should grow up organisations more and more like the castes, and ultimately the castes themselves<sup>54</sup>. We learn of guilds of the *Mālikas* from a

<sup>42</sup> *Pāṇini* seems not to have been taken into account here according to the definition quoted by Jolly *ZDMG*, 50, 518, n. 2 from the *Vīramitrodaya*, the *pāṇi* is a corporation *bhinnagātindm bhinnavittindm ckaśhānāśindm grāmanagarādāsthānādm*. In the *Vinaya Pitaka* may be compared perhaps *Chulla vagga*, VIII, 4, 1, *Nissaggiya* 30, 1, *Pācittiya* 33, 5, 2, 82, 1, *Bhikkhuni Nissaggiya* 8, 1, cf. also Foy, *Königliche Gewalt*, p. 15, n. 1.

<sup>43</sup> See Jolly, *op cit* p. 518.

<sup>44</sup> Jolly, *Recht und Sitte*, 136.

<sup>45</sup> *Epigraphia Indica*, Vol. I, p. 160. Cf. the guild of the *mālākāra* of whom *jetthaka* is mentioned in *Jāts*, III, p. 405.

<sup>46</sup> *Ep Ind*, I, 285.

<sup>47</sup> Hopkins, *Ruling Caste*, 81 ff.

<sup>48</sup> Fick, 172, Jolly, *Recht und Sitte*, 136, Foy, *Königliche Gewalt*, 14.

<sup>49</sup> Fick, 182.

<sup>50</sup> *Dhammap Attā*, p. 239.

<sup>51</sup> One is here reminded of the parents who pondered upon the question whether they should make their son learn *lekhd*, *ganand* or *vāpa*, *Mahāvagga*, I, 49.

<sup>52</sup> Fick, 179.

<sup>53</sup> Fick, 180 ff.

<sup>54</sup> An instructive example how, in the atmosphere of India, organisations of a quite different nature readily develop the tendency of resembling organisms of the form of caste, is afforded by the fact that at the present day there exists no commensality, or at least, no commensality between the Brāhmins of the various Vedic schools, such as the Rīgvedis, Mādhyandins, Āpastambis, etc., Jolly *ZDMG*, 50, 515. Senart,

Jâtaka and also from inscriptions, at the present day there is a caste of the *Māh* <sup>55</sup> This transition from one stage of development to another becomes specially clear, if it be observed that what in one place is a guild, corresponds in another to a caste <sup>56</sup> So I think there can be no doubt left — and here I find myself fully in agreement with Fick, <sup>57</sup> who has anticipated me in arriving at this conclusion, viz that the guilds which the Pāli literature shows us to have been in such a flourishing condition, are the predecessors, in a very essential part, of the present day castes, and in as much as we see before us the previous stage of the modern castes in the Buddhist literature, therefore we are again convinced that there is no justification for transferring these modern castes themselves back to the period of the texts referred to

Though in the course of these observations I have allowed myself to be induced, by the original materials discussed, to cast an occasional glimpse at the origin of modern castes, at least from a particular point of view, yet it will not be possible for me here to attempt a comprehensive treatment of the problem in question, which would evidently have to be approached from a good many different directions <sup>58</sup> It would require a thorough investigation of sources, practically immeasurable in their dimensions, to enable us to bridge over the wide gulf between antiquity and modern times, so far as it is possible for it to be bridged over

Senart attributes the blame of the errors which he thinks he has discovered in the traditional conception of ancient Indian caste, to the credulity of the philological school who have been carried away, without question or opposition, by the Brāhmanical theory, and it has tended to shroud an unprejudiced vision of the real state of things I am the last person to pronounce the picture of antiquity which has been built up by the philologists working in their studies from the ancient texts alone, to be the best and the only possible picture that research may succeed in drawing But it would be a matter of immense regret, if amongst those interested in Indian research, certain narrownesses and one-sided views of the philologists should be made too much of, and so discredit the philological method in general — certainly this is not the intention of Senart, but the danger that his book will actually be utilized for this purpose, cannot be overlooked The philological method, when rightly understood, imposes upon those who follow it no blind credulity with regard to the sources, nor does it in any way prevent them from observing the living present and thus sharpening their insight for a better comprehension of these sources and of those past times for which these sources furnish evidence What the philological method is expected really to prevent, is the far too rash, far too unrestrained projection of the picture of the present day into the past, and the overlooking, or the disregard, of all that by which the texts prove, without leaving any room for doubt, the existence of forms of ancient institutions differing from the picture before our eyes In the investigations of Senart are there not points where one could wish that the distinguished scholar had more closely maintained his connection with the “*école philologique*?”

who believes castes and guilds to be separated from each other by a considerably wider gulf than I do, looks upon the guild — as contrasted with the caste comprehending and over-ruling the entire social being — as “confined in its action to the economic functions, the needs or the interest of which have created it” (p 196) If any importance be attached to the analogy with the guilds of the Middle Ages of western countries which Senart himself has appealed to, then it will be seen that this analogy, far from making that limitation to the purely economic interests appear probable, rather goes, most positively, against such a conclusion

<sup>55</sup> Nesfield, *Brief View of the Caste System*, § 33

<sup>56</sup> *Ibid.*, § 158 Attention may be drawn to the fact that (according to L von Schroeder, *Indiens Literatur und Kultur*, 425) that Sonnerat did confound the castes directly with the guilds

<sup>57</sup> Pp. 179, 183, 214 ff

<sup>58</sup> Beside the castes of the *Śreni* character, evidently the “ethnic castes” (Fick, 208) might at the same time be subjected to a specially exhaustive investigation.

## BOOK NOTICE

LEEN ONBEKEND INDISCH TOONEELSTUK (GOPĀ LAKELICANDRIKĀ) Tekst met inleiding door W. Caland, Amsterdam, Johannes Mueller, 1917, 4, 158 pp 8<sup>o</sup> = Verhandelungen der Koninklijke Akademie van Wetenschappen te Amsterdam Afdeling Letterkunde Nieuwe Reeks Deel XVIII No 3

The Gopālakelīcandrikā is a Sanskrit play, which has been discovered by Dr Caland among the manuscripts collected by the late Professor Kern and deposited in Leiden. Other manuscripts of the work are not known to exist. The text is not exact, and the manuscript, which is not quite complete, cannot always be read with certainty. In such circumstances, it is not possible to judge with confidence about every detail, but the main features are clear enough, and as the work itself is of considerable interest, we have every reason for being thankful to the editor for making it known to us. It is superfluous to remark that he has accomplished his task with great skill and in an admirable way. Nobody would expect anything else from a scholar of the rank of Dr Caland. We may disagree with him—and even try to correct him in minor points. On the whole however every sound critic will acknowledge that he has been successful in his readings and interpretations. Moreover he has added to the usefulness of his work by prefixing a valuable introduction, in which he gives a careful analysis and ably discusses the various problems which this new work raises.

The author of the play was a worshipper of Kṛṣṇa, carrying the not uncommon name Rāma kṛṣṇa. His father the Brahmin Devajit hailed from Gujarat and was a follower of Rāmānuja. The play mentions the Hanumannātaka and contains a reference to the Bhāgavata Purāṇa. It is therefore possible to state with confidence that Rāmakṛṣṇa cannot be older than the 12th century. On the other hand, we have nothing to show how much later he should be placed. The only terminus *ante quem* is offered by the date of the manuscript, which, according to the editor, is about two hundred years old.

The author is not known from other sources, and no other work of his has been preserved. He gives no additional information about himself in the *prastāvanā*. Here the *natī* asks the *sūtradhāra* if Rāmakṛṣṇa hails from the lineage of Daṇḍin<sup>1</sup>. Bhavabhūti or Bhāravi, since his work is

worthy of being represented before a royal audience. The *Sūtradhāra* in his reply does not say anything about any previous literary compositions of the author, and the most probable inference is that the Gopālakelīcandrikā was his earliest, and perhaps his only work.

The play was intended to be acted in the presence of some king, before a *nṛpamaṇḍala* (p. 45). The name of the king is not, however, mentioned. We are further informed that the spectators were not ordinary courtiers (*sarhān anarāgasamāga*, p. 41), but devotees of Kṛṣṇa (*hārībhaktanīyaka*, *ibidem*). From these and other indications the editor rightly infers that the Gopālakelīcandrikā was prepared for representation on the occasion of the *rāsayātrā*, the autumnal festival in honour of Kṛṣṇa. It is not, however, a popular play, and it is expressly stated that, out of consideration for the high class audience, it has been written only in Sanskrit. As a matter of fact, there is only one short sentence in Prakrit quite in the beginning where the *natī* starts addressing the *sūtradhāra* in the usual way in Sauraseni, but is interrupted and told to go on in Sanskrit. We may here compare Bhāsa's *Pañcarātra*, where Bhānnalā starts speaking Sanskrit when describing the fight. A similar state of things is also found in Bhāsa's *Dutavākya*, where Sanskrit is the only language used, and, as mentioned by the editor, in the *Hanumannātaka*.

The contents are in agreement with the occasion of the representation, having been taken from the Kṛṣṇa legend. The play thus belongs to that class of dramas which owes its existence to the later development of Hinduism and especially of the popular cult of Kṛṣṇa and Rādhā. In § 106 of my sketch of the Indian drama in the *Encyclopedia of Indo-Aryan research* I have mentioned a long series of such plays, and also the Gopālakelīcandrikā which I had not, however, then seen, wherefore I wrongly supposed that it may have been a *chāyā nataka*. I shall have to return to this question later on. In this place I shall only remind the reader of the fact that all the *krānta*-plays whose date can be ascertained, with the only exception of Bhāsa's *Bīlacūṭa*, are late works.

On the other hand, the common opinion of Sanskrit scholars used to be that popular representations of various episodes of the Kṛṣṇa legend, such as the slaying of Kamsa, were one of the chief

1. Dr Caland thinks that the mention of Daṇḍin in this connection characterises him as a playwright and adds probability to Professor Pischel's view that Daṇḍin was the author of the *Mecchakārikā*. I am unable to see how the mention of Daṇḍin's name should prove anything more than that of Bhāravi's.

sources from which the classical Indian drama has sprung. This opinion cannot any longer be upheld, since Professor Luders, in his masterly study on the Śaṅkhukas, has proved that the famous passage in the Mahābhārata, on which this opinion was based, has been thoroughly misunderstood and does not refer to real dramatic performances but to recitations of epical poems accompanied by shadow pictures or some sort of dumb play.

On the other hand, there can be no doubt that dramatical processions and performances of some sort at an early date played a prominent rôle in the worship of Kṛṣṇa.

At the present day such performances are quite common. Much useful information about them has been brought together in William Ridgeway's highly interesting book, *The dramas and dramatic dances of non-European races*. Cambridge 1915. We here learn among other things, that Brahman actors of the Vallabhacarya sect in Mathurā, the so-called Rāsdhārīs, earn their livelihood by giving dramatic performances of Kṛṣṇa's exploits, and that they also go to Gujarat and perform such episodes there. The language used is Braj.

The performances of the Rāsdhārīs are also mentioned by Growse in his book on Mathurā (second edition, pp. 75 ff.). I regret not to be able to consult that work here in Kustana. Di Caland, however, gives a quotation which is of especial interest. We learn that the real actors are children, who do not, however, speak the dialogue, but only act in a dumb show, while one of the Rāsdhārīs is declaiming in set recitation.

There can be no doubt about the character of the performances of these Rāsdhārīs. We have to do with a popular drama, and we may safely add that such plays have their roots in a distant past.

Just the same is the case with the old Yātrās of Bengal. These have been described<sup>2</sup> as "a sort of melodrama, the dialogues being mainly conducted in songs." The master singer is generally expert in the theological lore of the Vaiṣṇavas. He comes frequently into the midst of the performers and interprets their love as divine love, making a little commentary aside. "When the singers had sung this song, the master singer would approach and draw the attention of the audience to the description."

The rôle here played by the master singer recalls the similar state of things in the so-called "Bhāva or popular drama of Gujarat, which seems to be the lineal descendant of an ancient pri-

native drama. The Bhāva is usually performed in open spaces in streets and such other public places as court-yards of temples and the like. No stage is required, no scenery, only a poor curtain, occasionally held by two men at each end. It consists of monologues and dialogues supported by the chorus reciting songs referring to the incidents represented, in singing which the actors also join."<sup>3</sup>

In both cases we notice that the dramatic performance is supported by explanations given by the manager or by the chorus, a state of things which is quite familiar to most of us from the present day stage of the juggler, the clown or the buffoon. It is a characteristic feature of the low class popular stage and is certainly an inheritance from the oldest times.

It would be easy to show that such popular performances in modern India show many traces of the influence of the classical Indian drama. No body would, however, now a days think of considering them as a modern development derived from the classical stage. On the contrary, they take us back to a primitive theatre which was in its turn one of the chief sources from which the classical theatre has sprung. The case is exactly analogous to what we observe with regard to the modern Indo-Aryan vernaculars in their relation to Sanskrit. They have assimilated numerous elements of the classical language of high literature, but they are not the daughters of Sanskrit. They are derived from those old forms of speech which are the source of Sanskrit as well, they are nieces and not daughters of the literary language of the Brahmins.

The popular representations of the present day accordingly point to the existence of an ancient popular theatre. And it is possible to prove that the Kṛṣṇa legend played a prominent rôle in the repertoire of this theatre at a very early date. That is shown by the existence of a Kṛṣṇa play amongst the dramas commonly ascribed to Bhāsa.

I am aware of the fact that Professor Barnett,<sup>4</sup> has tried to show that these plays can hardly be ascribed to Bhāsa. He bases his conclusions on the alleged fact that the Mattavilāsa, a prahasana of the Pallava King Mahendravarman (A.D. 620) shows exactly the same features as the plays attributed to Bhāsa, except that the author is named in the prelude. It opens with the stage direction, "after the nāndī the stage manager

<sup>2</sup> Dinesh Chandra Sen, *History of Bengali Language and Literature*, Calcutta, 1911, pp. 724 ff.

<sup>3</sup> See Ridgeway, pp. 199 ff., after D. R. Bhandarkar.

<sup>4</sup> *JR* 18, 1919, pp. 233 ff., *Bulletin of the School of Oriental Studies, London Institution*, Vol. I,

enters,' and the latter recites the introductory verse, the prelude is styled *sthapanā*, and there are several traces of likeness in style. As Mahendravikramavarman lived in the seventh century and Kālidāsa probably was about a hundred years earlier, these features in the plays of "Bhāsa" are therefore no evidence for a date earlier than that of Kālidāsa, and we are fully justified in holding that both the Mattavilāsa and the plays of 'Bhāsa' are products of a south eastern school of drama that had not accepted the rules of technique which later became universal (probably through the increasing influence of Kālidāsa and his school), and that the works of "Bhāsa" are really anonymous products of some humble poet of the seventh century, who did not introduce his name into his preludes because it carried no weight. Hence it is perhaps not unreasonable to conjecture that the king Rājasmha mentioned in the final verses of the plays of "Bhāsa" is the Pāṇḍya Tēi Mūlan Rājasmha I (ca. A.D. 675).<sup>5</sup>

These arguments have failed to convince me. We know from the prose portion of the Sāhityadarpana VI, 25 that there was no consensus of opinion about what should be understood under the term *nandī*. One author (*kaśīd*) was of opinion that it should be applied to the introductory stanza with which most Indian dramas open. Others, and apparently the majority, held that the *nandī* did not form part of the actual play but belonged to the *pūrvavāṇya*, which was not the work of the author of the individual play. We are further informed that old manuscripts of the Vikramorvasi arranged the opening of the drama in the same way as in 'Bhāsa's' plays. I understand the passage so that the Vikramorvasi is only given as an instance of this practice of old manuscripts. And we know from the critical apparatus to Hillebrandt's edition of the Mudrārākṣasa that one of the very best manuscripts of Viśākhadatta's drama places the words *nandiyante tataḥ prarūṣati sūtra dhvāḥ* before the introductory verse. It is not improbable that the usual opening of most Sanskrit plays is frequently due to a remodelling under the influence of the opinion of the theoretician mentioned in the Sāhityadarpana as *kaśīd*, and that the manuscripts of "Bhāsa's" plays, of the Mattavilāsa and one of the Mudrārākṣasa manuscripts, have preserved the older arrangement which

was once also found in manuscripts of the Vikramorvasi. It is impossible to base any conclusions on such a state of things, the less so because even "Bhāsa" is not quite consistent in this respect, no mention whatever of the *nandī* being met with in the Madhvanavyāyoga.

Now I am able to attach any importance to the use of the term *sthapanā* instead of *prastāvanā* in the Mattavilāsa and in 'Bhāsa's' plays. In the first place, "Bhāsa" is not consistent in his choice of this term. In one of the manuscripts of the Pratimāyāugandharāyana we read *ānuḥkha* instead, and in Karmabhāra the common term *prastāvanā*, which is also alluded to in Dutaghatotkaca, is used. On the other hand, the term *sthapanā* occurs in Kulasekharaśarmā's Subhadrādhanañjaya and Tuptatīsamvarana. No chronological inferences can be drawn from such a state of things.

With regard to the likeness of style, I can certainly see that there is some resemblance between the Mattavilāsa and "Bhāsa's" plays. And one might urge that the *umattaka* scene is of the same kind as the third act of Pratimāyāugandharāyana. But there are also many details in which "Bhāsa" makes a decidedly older impression than Mahendravikramavarman, and the points of resemblance may very well be accidental, or they may be the result of an imitation of "Bhāsa's" plays. The third act of the Pratimāyāugandharāyana has up to modern times been especially in great favour in Southern India.<sup>6</sup>

The arguments in favour of Professor Barnett's view are therefore, in my opinion, not conclusive. On the other hand, the non-mentioning of the author's name in the opening of "Bhāsa's" plays and the fact which Professor Barnett does not seem to doubt, that the Carudatta is the source of the first four acts of the Mucchakrikāḥ make it impossible to assign so late a date to "Bhāsa's" plays as suggested by Professor Barnett, and I am still of opinion that they are in fact the work of the famous Bhāsa.

At all events, we may safely ascribe the Bālacarita to an early date and make use of it in examining the question about old Kṛṣṇa plays on the popular stage of India.

The Bālacarita is a peculiar play, and it seems to be intimately connected with the popular stage.

<sup>5</sup> In my *Indian Drama*, paragraph 71 there is a misprint, the fifth act being mentioned instead of the third. Cf. the introduction to the Pratimānātaka, p. xl. When I wrote my *Indian Drama*, I did not know the Mattavilāsa.

<sup>6</sup> In paragraph 75 of my *Indian Drama* I have through an oversight stated that Dandin, Kāvya-darśa 2, 226 quotes the stanza *umpatīva tamo 'ig ni* from the Mucchakrikā. He does not, of course, mention his source.

The various apparitions seen by Kamsa in his dream were perhaps represented in the pantomimic way of the ancient nāṭas, just as is perhaps the case with the Apabhramsa verses of the Urvashi. The chief contents are the feats of Kṛṣṇa during his sojourn among the cowherds, ending with the slaying of Kamsa.

It is quite certain that these tales and legends must have been quite popular and well known when the *Balacanda* was written and I have little doubt that Bhāsa has transplanted them from the popular stage to the higher play.

The Kṛṣṇa play did not, however, get a firm footing on the higher stage until much later. Bhāsa did not find successors before those days when the later development of Hinduism and especially of the religion of Bhakti had set in, and the *Gopālakeśvarendrikā* belongs to this later phase of the development. The popular Kṛṣṇa drama had no doubt flourished the whole time, its firm establishment on the higher theatre, on the other hand, is comparatively late.

The *Gopālakeśvarendrikā* is, as has already been stated, written in Sanskrit, and it does not, accordingly, belong to the popular stage. On the other hand, it differs in some important details from all other known Sanskrit plays.

It is called a *nāṭaka*. It is not however a *nāṭaka* in the more specialised sense of this word. The term has, as in several other instances, been used to denote a play in general. It is not possible to register it under any of the various types of drama described by Bharata and his successors.

The division into acts is apparently incomplete. After the end of the second act there is no further mention of the beginning or end of any act. The end of the third and the beginning of the fourth act seem to be missing. At the end of what the editor takes to be the fourth act we only read *utīrṇānti*, whereupon a *prastāvanā* introduces the last, probably fifth act at the end of which the sūtradhārā again makes his appearance and puts an end to the performance with the formula *atmanātmastaruna*, which we know from the beginning of so many plays, declaring that it will not be possible to give a further representation of the *līlā* of *bhagavat*, because nobody could do so satisfactorily. Then the actors leave the stage, and finally a blessing and a stanza giving the name of the poet are added, whereupon the colophon follows.

A similar arrangement is not found in any other Sanskrit play. There are however also other peculiarities.

The term *prastāvanā* is not used in the same way as in other dramas. It seems to denote the open-

ing of the first act, after the dialogue between the sūtradhārā and the nāṭi, and also the beginning of the third act. In this second place, the passage that follows immediately after the words *tataḥ prastāvanā* does not consist of dialogues or monologues but contains a description of the persons present on the stage. A similar description should perhaps be supplied after the same words at the beginning of the first act.

Then, however, the question presents itself, who can possibly be the speaker of such a *prastāvanā* or introductory description, which does not belong to the actual play of the actors. And the same question must be asked with reference to several other passages partly in prose, partly in verse, which do not contain any dialogue or monologue, but explain the situation or describe the attitude of the persons represented. Such passages are of frequent occurrence and form a peculiar feature of our play.

In one place such a description is put into the mouth of a person called *sūcaka*, and we naturally infer that he is the speaker of all such narrative or descriptive passages. Dr Caland refers us for the explanation of the word *sūcaka* to Hemacandra *Adhīdhānacintāmaṇi* 330, (cf. *Yādatapraśāsa*, ed. Oppert p. 141, l. 136) and states that *sūcaka* is here given as a synonym of *sūtradhārā*. Strictly speaking that is not however the case. Hemacandra simply informs us that the *sūcaka*, the "indicator" in dramatical terminology, carries the designation *sūtradhārā*. That is to say, that *sūcaka* is the wider, better known term, and it is perhaps allowable to infer that it belongs to the terminology of the popular theatre. In the classical drama the *sūcaka*, who is there called *sūtradhārā* does not "indicate" or "describe" in the same way as in the *Gopālakeśvarendrikā*. We shall have to ask ourselves if we find any indications that he does or did, so in the popular play of the vulgar stage. In that case we should naturally infer that the *Gopālakeśvarendrikā* represents an attempt at applying peculiarities of the popular stage to the classical drama.

The editor is inclined to think so. He ably discusses the problems raised by the said peculiarity of our play, and suggests more than one explanation in addition to the supposition that we are face to face with a feature of the popular stage. I shall say a few words on these suggestions, which Dr Caland himself does not think to be the solution of the difficulty.

We might he says, think of a *chāyā nāṭaka*, a shadow play, where the dialogue and everything else is spoken by the manager, or in certain cases by the *sūcaka*. Against such an explanation he rightly

urges that the actors are sometimes said to enter after pushing aside the curtain

Another possibility which he mentions, is that the play was a reading drama not destined for the stage at all, but only meant to be recited or studied in writing. Against this, however, it is sufficient to refer the student to the introduction, where the *natā* speaks of *natānāṭya* and of *abhinayapradarsana*, and where we hear of the *śamaja*, before which the play is going to be represented.

We are therefore apparently forced to look for an explanation in the usages of the popular theatre and that is also the view which Dr. Caland favours. He compares the Kṛṣṇa plays at Mathurā described by Mr. Growse which I have mentioned above.

I agree with him that we shall have to look in that direction, but I do not think that we have to do with a kind of dumb show, accompanied by recitation by the *succala*.

So far as I can see the play, is a new instance of the tendency which I think we can follow all through the history of the Indian drama, to draw on the rich treasure of popular performances for enlarging the scope of the high class drama. In a similar way this drama itself came into existence, and later on we can over and over again observe how dramatisal peculiarities were transferred from the village stage to the learned theatre, so that new dramatisal types arose and got a firm footing. In this way the shadow play has obtained its place in higher literature, and in this way we must account for the numerous *uparūpakas* and secondary species. The theoretical treatises of dramaturgy have always exercised a strong controlling influence on development, but they are in their turn based on the existing literature and had to be enlarged when new dramatic types came into existence. Bharata himself could do nothing more than put together the old rules about the arts of the stage and register and describe the various kinds of dramas existing at his time, even if they were only represented by a single specimen, as in the case of the *Samavakāra*. And his successors have followed in his footsteps.

It is just the same thing which we observe in India's religious history. Local and popular cults are raised to the rank of Brahmanical religion. Śiva has some of his roots in conceptions which were not from the beginning Aryan. Buddhism

and Jainism gradually came under the influence of Brahmanical thought. Some of the most prominent reformers of modern Hinduism were Brahmins, and so forth. The Brahmins are of course the guardians of old traditions and they have often been described as reactionary enemies of progress and development. That is however, only one side of their physiognomy. At all times they have also been the pioneers who have assimilated new ideas and even elements of foreign civilisations, melted them together with the traditional lore, and finally given them that Indian stamp which has the effect that the whole Indian civilisation, in spite of all differences, imparts an impression of unity and harmony.

In the case of the drama we know that the oldest playwright whose works have come down to us, and the first author of a theoretical treatise on dramatisal art were Brahmins and poets filled with Brahmanical spirit have over and over again assimilated more and more of popular dramatic genres and raised them to the rank of high literature.

The *Gopālakelīcandrikā* is a new instance. It is a new transplanting of the popular plays of the Kṛṣṇa worshippers to the higher stage, and it has transferred the activity of the describing and explaining singer or manager into the technique of the classical theatre.

That is the chief interest that attaches itself to Rāmākṣma's play. We may some day find other plays of the same kind as the *Gopālakelīcandrikā*. It is, however, just as possible that it represents a solitary attempt and never found successors. The discovery of this novel species shows that the development of the classical Indian drama was continued up to comparatively modern times, and if Sanskrit should ever again become the language of the highest civilisation in India, there is no doubt that this development will continue. We already possess an adaptation of Shakespeare in an Indian Sanskrit play. We may some day find Indian plays in imitation of Goethe or Ibsen. But we may rest assured that India will eventually remodel all such adaptations in her own spirit. The great importance of India in the history of human civilisation does not only rest with the original productions of the Indian mind, but also with its genius for assimilating new and foreign elements and giving them a truly Indian stamp.

STEN KONOW

- Chandrabhāgā**—1 The Chinab—the Acesines of the Greeks, or rather the united streams of the Jhelum and the Chinab. It has its source in a lake called Lohitya-sarovara (*Kālikā P*, ch 82), in Lahoul, south of Ladakh, or Middle Tibet. 2 The river Bhīmā, a branch of the Kṛishnā.
- Chandradityapura**—Chamdor in the Nasik district, it was the capital of Dīdhaprahāra, a king of the Yādava dynasty (Dr Bhandarkar's *Hist of the Dekkan*, Sec XIV).
- Chandragiri**—Near Belgola, not far from Seringapatam, sacred to the Jainas. The ancient name of the place was Deya Durga (*JASB*, 1838, p 520). See **Arbuda**.
- Chandrapura**—Chāndā in the Central Provinces it was the capital of king Hamsadhvaja (Rice's *Mysore Inscriptions Introd* XXIX), but in the *Jaimini-Bhārata* (ch 17), Hamsadhvaja is said to have been king of Champaka-nagarī. Chandrapura or Chandravatī or Chandanāvati was two Yojanas or two days' journey from Kuntalakapura or Kautalakapura (*Jaimini-Bhārata*, ch 53). See **Kuntalakapura**.
- Chandrapurī**—1 Same as *Chandwar* (*Vardha P*, ch 122). 2 Same as *Chandrikāpurī* and *Chandripura*, the name of Srāvastī or Sahet-mahet in the Gonda district in Oudh.
- Chandraṣekhara**—See **Chattala**.
- Chandra tirtha**—See **Kaveri**.
- Chandravati**—Chanderi in the Lalitpur district, Central India, Sandravatis of the Greeks, and Chandbari of the *Prithvirāj Rāso*. It was the capital of Śisupala, king of Chedi (P Mukherji's *Lalitpur*).
- Chandravati**—1 The river Chāndan or Andhelā which falls into the Ganges, near Champānagar in the district of Bhagalpur. It is the Andomatis of Arrian. See **Andha**. 2 Jhalrapattan in Rajputana (Tod's *Rajasthan*, II, p 1602). 3 Near Abu (*Bomb Gaz*, Vol I, Pt I, p. 185).
- Chandrika**—The river Chandrabhāgā (Chenab).
- Chandrikāpurī**—Śrāvastī or Sahet-mahet in the district of Gonda in Oudh it was the birth-place of Sambhavanātha, the third Tīrthankara, and of Chandraprabhānātha, the eighth Tīrthankara of the Jainas. There is a Jaina temple dedicated to Sobhānātha, which name is a corruption of Sambhavanātha (see **Srāvastī**).
- Chandripura**—Same as **Chandrikāpurī**.
- Chandwar**—Firozabad, near Agra, where in 1193 A D Shahabuddin Ghorī defeated Jaya Chandra, king of Kanauj (Thornton's *Gazetteer*). Chandwar is evidently a contraction of Chandrapura (*Vardha P*, ch 122).
- Charanādri**—Chunar in the district of Mirzapur (*Saktisangama Tantra*, vii). The hill fort of Chunar was at one time considered one of the most impregnable forts in India. It was built by the Pāla Rājās, who reigned over Bengal and Behar from the middle of the eighth to the twelfth century of the Christian era. According to Buchanan (*Martin's Eastern India*) some of the Pāla Rājās lived there, which implies that it was a place of much importance at that period. The portion of the fort, which is called Bhatrihari's palace, is the place where he performed asceticism. The tradition is that Bhatrihari after eating the immortal fruit travelled to various places and halted at Sehwan, Bhartewar, Chunar, Benares and other places (*JASB*, 1837, p 852). Bhatrihari was the author of a celebrated work called *Bhatrihari-Sāstra* and of the *Vairāgya-sataka*. For the story of his birth, see **Prabandha-chintāmaṇi** (Tawney's trans.) p 198. He entered seven times a Buddhist monastery as a priest and seven times returned to the laity and became Upasaka. He died in 651-652 A D (I-tsing's *Record of the Buddhist Religion* by Takakusu, p 180 and General Introduction, p LVII). The fort is said to have been protected by the

goddess Gangâ Devī all the day, except in the first *pahar* of the morning, when it was taken by the English. It contains a state-prison where Trimbakji Danglia, the minister of Baji Rao who was the adoptive father of Nana Saheb, was kept confined till his death (Heber's *Journal*, Vol. I). The fort was strengthened by Sultan Mahmud before his descent on Benares in 1017, in 1575, it held out against the Mughal army for six months and in 1764 it was taken by the English.

**Charitrapura**—Puri in Orissa (Cunningham's *Anc Geo*, p 510, *R W C*, II, 205).

**Charmanvatī**—The river Chambal in Rajputana. It has its source in a very elevated point of the Vindhya amongst a cluster of hills called Janapava. It has three co-equal sources from the same cluster, the Chambal, Chambela and Gambhīrā. The river is said to have been formed by the "juice of skin" (blood) of the cows sacrificed at the Yajña of Rantideva (*Mbh*, Drona P, ch 67, *Meghadūta*, Pt I, v 46).

**Chattala**—Chittagong (*Tantrachudāman*, ch. 51). The temple of Bhavāni on the Chandrasekhara hill near Sītākunda is one of the 52 Pīthas, where a portion of Sati's right hand is said to have fallen. The *Bārāhi Tantra* (ch 31) contains some account of the Chandrasekhara hill as a place of pilgrimage.

**Chatushpītha-parvata**—The Assia range, one mile to the south of Jajpur in the district of Katak in Orissa. Udaya giri is a spur of this range, five miles from Bhuvanēśvara, containing many Buddhist caves and sculptures of ancient date. The range is also called Khanda-giri and Alti-giri (*JASB*, Vol. XXXIX).

**Chausath-jogini**—Same as *Bhṛigu-tīrtha*.

**Chaya**—Porebunder in Guzerat a famous port at the commencement of the Christian era.

**Chedi**—Bundelkhand and a part of the Central Provinces. It was bounded on the west by the Kalī-Sindh and on the east by the Tonse. It is the Cheti of the Buddhists. Tod (*Rājasthān*, I, 43 note) identifies Chedi with Chanderi (Chandīavati or Sandīavatis of the Greeks), a town in Bundelkhand, which is said to have been the capital of Śiśupāla, who was killed by Kṛishna (see also *JASB*, Vols. XV and LXXI, p 101). It is 18 miles west of Lalitpur the ruins of old Chanderi, however, are 8 miles north-west of the modern town (*JASB*, 1902, p 108 note). Chanderi has been described in the *Ain-i Akbari* as a very large ancient city containing a fort. According to Dr Fulner (*M A I*), General Cunningham, (*Arch S Rep*, IX, 106) and Dr Bühler (*Vikramanka charita*, xviii 95), however, Dāhala Mandala or Bundelkhand was the ancient Chedi, Dāhala being on the Narbada. In the *Skanda P*, Revā-khanda, ch 56, Mandala is said to be another name for Chedi. Mandala is the Mandala of Ptolemy, a territory situated in that upland region where the Sona and the Narmadā have their sources (McChindle's *Ptolemy*, p 168). Kālāñjara was the capital of Chedi under the Gupta kings, and Suktimatī its capital at the time of the *Mahābhārata*. Chedi was also called Tripurī from its capital now called Tewar, six miles from Jabbalpur (*Epigraphia Indica*, Vol I, pp 220, 253, and *Hemakosha*). Tewar (Teor) was the capital of Dāhala (Alberuni's *India*, Vol I, p 202). The *Anargharāghava* (Act VII, 115), says that Māhishamatī was the capital of Chedima at the time of the Kalachuris. See *Suktimatī*.

**Chela-gangā**—The Kāverī (*Harivamsa*, ch 136).

**Chera**—It comprised the present kingdom of Mysore, Coimbatore, Salem, South Malabar, Travancore and Cochin. Chera is a corruption of Kerala. The period from the third to the seventh century A D appears to have been the most flourishing in the history of this kingdom. In Asoka's Edicts, it is called Keralaputra. Its ancient capital was

Skandapura situated at a short distance to the west of Guzzelhat Pass (*JRAS*, 1846, p 11) in the Coimbatore district According to Ptolemy, who lived in the second century A D, its capital was Karoura or Karur, called also Vanji, situated near Cranganore on the left bank of the Amarâvatî, a tributary of Kâveri, its larger capital was Tâlkâd (Dr. Burnell's *South Indian Palæography*, p 33) Tâlkâd or Dalavanapura is situated on the left or north bank of the Kâveri, 28 miles south-west of Mysore city, and about 30 miles east of Seringapatam its ruins are even now called Takâd It was the capital of the Gangâ Vamâsis from the third to the ninth century A. D., and then of the Cholas and Hoysala Ballalas who, however, removed the capital from Tâlkâd to Dvââvatî or Dorasamudra, now called Halebid, in the Hassan district of Mysore in the 10th century It was taken by the Râjâ of Mysore in 1634 For an account of the Chera kings, see *Ind Ant*, I, 360, *J R A S*, 1846, pp 1-29

**Cheta-** It is the same as *Chetiya* or *Chetiyagiri* (*Vessantara-Jâtaka* in the *Jâtakas* vi, 266, of Spence Hardy's *M B*, 119)

**Cheti-** Same as **Chedi** Its capital was Sotthivatî (*Jâtakas*, iii, 272). See **Suktimatî**

**Chetiya-giri**—Besnagar, three miles to the north of Bhilsa in the kingdom of Bhopal, where Asoka married Devî By her he had twin sons, Ujjenia and Mahinda, and afterwards a daughter Sanghamittâ It was the capital of the country called Dakkhinagiri (Turnour's *Mahâvamsa*, ch XIII) which is perhaps a corruption of Daśârna Dr Rhys Davids identifies it with Sanchi and Bidisâ, but these two places are very close to Besnagar According to General Maisey also, Chetiya-giri is Sanchi "with its numerous Chetiyas or stûpas" about 5 miles south-west of Bhilsa (Maisey's *Sanchi and its Remains*, pp 3, 5) It was also called Chetiya and Chetiyanagera or Chaitya-giri. It is situated at Trivenî or Triple Junction of the rivers Betwa, Bes (or Besali) and Gangâ, of which the last is believed to flow underground (Cunningham's *Bhilsa Topes*, p 364) See **Bessanagera**

**Chhatravatî**—See **Ahicchhatra**

**Chhutudri**—The river Chukki in the Panjab which joins the Bias it is not the Satadru or Satlej

**Chidambaram**—Same as Chittambalam (*Devî-Bhâgavata*, vii, 38) Southern India possesses five *Bhautika* or elementary images of Mahâdeva, namely, the *Kshuti* or earth image at Kâñchîpura, *Âp* or water image at Jambukesvara, *Tega* or fire image at Arunâchala, *Marut* or wind image at Kâlahastî, and *Vyoma* or sky image at Chidambaram (Dr Oppert's *On the Original Inhabitants of Bhâratavarsha or India*, pp 379, 380) Siva has eight images of which five are elementary (*Linga P*, Uttara, ch 12)

**China**—1 China It is mentioned in the *Mahâbhârata* (*Sabhâ P*, ch 51) and *Manu* (ch. X, 41k 44) In the mediæval period, it was called Mahâchîna The great wall of China was built by Che Hwang-te in 214 B C During the reign of the Emperor Ming-te, Kâśyapamîtaga and Dharmaraksha were the first Indian Buddhists who went to China (67 A. D.) In the fourth century A D, the Buddhist religion spread among the Chinese, and the first Buddhist Pagoda was built at Nanking by the Emperor Hiau Twu in 381 A D. (Edkin's *Chinese Buddhism*, ch vi) 2. Anam (*Sâhitya-Parîkshâ-Patrikâ*, 1321 B S, p 63)

**Chintâpurî**—A celebrated place of pilgrimage on a range of hills of the same name, in Hoshiarpur district, Panjab, containing a temple of Chhinnamasta whose picture is placed behind a Pinaka-mûrti or conical image The temple is on the summit of a hillock.

**Chitābhumi**—Baidyanāth or Deoghar in the Santal Pargana, containing the temple of Baidyanātha, one of the twelve Great Lingas of Mahādeva (*Śiva P*, Bk I, chs 38, 55) The Mahādeva there is said to have been established by Rāvana The place contains also the temple of the goddess Pārvatī, the consort of the god Baidyanātha It is said to be one of the fifty-two Pīthas (*Hārḍapītha*), as Sati's heart fell at this place In the *Uttara Purāna* cited by Francklin in his *Site of Ancient Palibothra*, p 21, Baidyanātha is called Pampāpuri or Palu-gāon, which is perhaps a corruption of Parālipura or Parali-grāma of the *Siva Purāna* For a description of the temples of Baidyanātha or Deoghar, see *JASB*, 1883, p 164—'On the temples of Deoghar' by Dr. R L Mitra' In the *Mahā-Liṅgeśvara Tantra* in the 'Hundred Names of Śiva', it is mentioned that Baidyanātha and Vakresvara Mahādevas are situated in Jh rakham'a, Siddhinātha and Tārakesvara Mahādevas in Rōḍa, Ghanteśvara Mahādeva on the banks of the river Ratnākara (now called Kānā-nadī in the district of Hooghly), and Kapālesvara Mahādeva on the banks of the Bhāgīrathī Rāvana, while he was carrying Mahādeva from Kailāsa felt a very uneasy sensation when he came to Haritakivana, the ancient name of Baidyanātha, as Vaiṣṇava, the god of the waters had entered his belly In order to relieve himself, he placed the god in the hand of Vishnu disguised as a Brahman, and retired to the north-eastern corner of Deoghar called Hārīajudī (a corruption of Haritakī-vana) to relieve himself, and the result was the Karmanāsā rivulet flowing by the north of Hārīajudī In the meantime, Vishnu put down Mahādeva at Deoghar and disappeared (*Śiva P*, Baidyanātha-Māhāt, ch 4) The Trikūta hill, 6 miles to the east of Baidyanātha, contains a spring of water The Tapovana hill where Rāvana performed asceticism (*Śiva P*, Bk I, ch. 55, *Bṛhat Śiva P*, II, 20) and which is about the same distance, contains a natural cave

**Chitrakūta**—Kāmpānath-giri in Bundelkhand it is an isolated hill on a river called the Paisunī (Payasvinī) or Mandiknī, where Rāma dwelt for some time during his exile (*Rāmāyana*, Ayodh K, ch 55) It is about four miles from the Chitrakut station of the G I P Railway

**Chitrakūtā**—Same as **Payasvinī** (2) the river Paisunī (*Vāmana P*, ch 13, v 26)

**Chitrarathā**—The river Chitrarathī, a tributary of the Northern Pennar (*Mbh* Bhīshma, ch 9)

**Chitropalā**—The river Mahānadi in Orissa below its junction with the Pyṇi (*Mbh*, Bhīshma, ch 9 and *Asia Res*, Vol XV, *Brahma P*, ch 46) But it appears to be the Chittutola (Chitrotpalā), a branch of the Mahānadi (see Hamilton's *Gazetteer*, s v Mahanuddy)

**Chitrotpalā**—Same as *Chitropalā* (*Mārkaṇḍeya P*, ch 57, *Arch S Rep*, vii, 155, xvii, 70) The river Mahānadi in Orissa It was crossed over by Chaitanya after leaving Puri on his way to Bengal (*Chaitanya-charitāmṛta*, Pt II, ch 16)

**Chittambalam**—Chidamvaram in south Arcot district, about one hundred and fifty miles south of Madras, and seven miles from the coast It contains the celebrated temple of Kanakasabhāpati, the name of a Mahādeva The celebrated Sankarāchāryya is said to have been born at Chidamvaram (Ānanda Giri's *Śankaravijaya*) and he died at Kāñchipura at the age of thirty-two According to another account, he is said to have been born at a village called Kalatī on the Pūrnā in Kanara (see *Kerala*) and to have died at Kedārnath in Garwal It is now certain that Sankara was born at Kalatī or Kaladī in Kerala during the reign of Rājāśekhara (Mādhavāchāryya's *Śankaravijaya*)

**Choaspes**—The Kunar or Kamah river which joins the Kopaen (modern Kabul river) at some distance below Jalalabad. But according to Prof Lassen, Choaspes or Euaspla is the Seosha (of Elphinstone's map) which falls into the Kabul river (*JASB*, IX, 1840, p 472).

**Choes**—According to Lassen, Choes of Arrian. It is the Kamah river which falls into the Kabul river (*JASB*, 1840, p 472).

**Chola**—The Coromandel Coast bounded on the north by the river Pennar or the southern Pinâkinî river, and on the west by Coorg, including the country of Tanjore, i.e. from Nellore to Pudukottai. Its capitals were Urayur on the Kâveri (the Orthoura of Ptolemy—the royal city of Sornagos) near Trichinopoly in the second century A D, and Kâñchipura, Combaconum and Tanjore (Tanjepur) in the eleventh century (*Epigraphia Indica*, Vol III, p 283). Chola was also called Drâvida (*Padma P*, Âdikhanda, ch 6), and is said to have derived its name from Chola, king of Kâñchipura (*Ibid*, Uttara Kh, ch 74). The Chola kingdom merged as a marriage-dowry into the Pânlya kingdom and continued so for 570 years (Wilson's *Mackenzie Collection*, Intro, p 51).

**Chora**—Same as Chola. In the Asoka Inscription at Gurnar, Chola is mentioned as Choda (*JASB*, 1848, p 169).

**Chyavana-asrama**—1. Chausâ in the district of Shahabad in the province of Bengal the hermitage of Rishi Chyavana (*Skanda P*, Avantî Kh, ch 57). 2. The hermitage of the Rishi was also situated on the Satpura mountains, near the river Payoshni or modern Pûrnâ (*Padma P*, Pâtâla Kh, ch 8). 3. Dhosi, six miles south of Narnol in the Jaipur territory, where the Rishi's eyes are said to have been pierced by a princess of Anupadesa, whom he afterwards married. 4. Chulanla on the Ganges in the Rai Bareilly district it was the abode of the Rishi who was restored to youth by the twin Aśvinî-kumâras.

**Dâhala**—Same as Chedi (Dr Buhler's *Vikramânka-charita Introduction*).

**Dâkinî**—Bhîma-sankara at the source of the Bhîmâ, north-west of Poona (Dr. Oppert's *On the Original Inhabitants of Bhâratavarsha or India*, p 379, Fergusson's *Cave Temples of India*, p 367). The temple of Mahâdeva Bhîma-sankara is a celebrated place of pilgrimage, and the god is one of the twelve Great Lingas of Mahâdeva (*Śiva P*, Pt I, chs 38, 40, Fergusson's *Cave Temples of India*, p 367). In the *Śiva Purâna* Dâkinî is said to be situated on the Western Ghats (Sahyâdri). See **Amaresvara**.

**Dakshina-Gangâ**—1. The river Godâvarî (*Revâ Mâhât*, ch 3). 2. In the *Nr̥simha P*, ch 66, the Kâveri is called the Dakshina-Gangâ. 3. The Nerbada is called the Dakshina-Gangâ in the *Skanda P*, (*Revâ Khanda*, ch 4). 4. The Tungabhadra is called the Dakshina-Gangâ in Bilhana's *Vikramânkadevacharita*.

**Dakshinagiri**—1. Dakkhinagiri of the *Mahāvamsa* (ch xiii) its capital was Chetiya (see **Chetiya-giri**). Daśârṇa of Kâlidâsa is evidently a corruption of Dakshina-giri. See **Dasarṇa**. 2. The kingdom of Bhopal. 3. The name of a village in Ekanâlâ in Magadha, not yet identified, in this place Buddha delivered the *Kâsibharadvâja-Sutta*.

**Dakshina-Kedâra**—Bahgâmi in Mysore. It contains a celebrated temple dedicated to Kedâranâtha. Bahgâmi is also called Ballipura and Balligamve (Rice's *Mysore Inscriptions*, pp 90, 94, 102).

**Dakshina-Kosala**—See **Kosala-Dakshina**.

**Dakshina-Mathurâ**—Madura on the river Kritamâlâ in the province of Madras (*Chaitanya-Chaitâmrila*, Madhya, ch 9). It was also called Mathurâ and Minâkshî. It was the

capital of the ancient kingdom of Pândya or Pându. It is one of the 52 Pîthās where Sati's eyes are said to have fallen (*Bhāgavata*, X 79 and *Mahāvamsa*, ch 7). It was called Dakshina-Mathurā in contradistinction to Uttara-Mathurā or Mathurā of the United Provinces (Upham's *Rājārātnākari*). Madura was a province of the kingdom of Vijayanagar till the middle of the sixteenth century when Viśvanātha, the founder of the Nayak dynasty, became its independent ruler, and Trimula, the most powerful monarch of the line, reigned from 1623 to 1639. The great temple of Mīnākshī with its thousand-pillared hall was built by Arya Nayak in 1550.

**Dakṣiṇā-Patha**—The Deccan the name was applied to that portion of the Indian Peninsula lying to the south of the Narbada. It is the Dakṣiṇabades of the Greeks (*Matsya P.* ch 114 and Dr Bhandarkar's *Early History of the Dekkan*, Sec I, Rājasekhara's *Bālarāmāyana*, Act VI, Apte's *Rājasekhara his Life and Writings*, p 21). The name was originally confined to a remote settlement of the Aryans on the Upper Godāvarī (*Vinaya Pithaka*, I, 195, 196, II, 298).

**Dakṣiṇa-Pinākini**—Same as Pāpaghni.

**Dakṣiṇa-Prayāga**—Trivenī on the north of Hūgli in Bengal (*Bṛhat-Dharma Purāna Pūrva Kh.*, ch VI, *JASB*, Vol VI, 1910, p 613).

**Dakṣiṇa-Sindhu**—The river Kali-Sindh, a tributary of the Chambal (*Mbh.*, Vana P. ch 82). It is the Sindhu of the *Meṃhadūta* (Pt I, ch 30).

**Dakṣiṇātya**—The Deccan that part of India which lies to the south of the Vindhya range (*Rāmāyana*, Bāla K., ch 13). See *Mahārāshtra*.

**Dakṣiṇa-Badarikāśrama**—Mailkote, twelve miles to the north of Seringapatam in Mysore, where the principal Math of Rāmānuja, the founder of the Śrī sect of Vaiṣṇavas is situated. It is also called Yādava-giri (see *Yādava-giri*).

**Dalabhya-Āśrama**—Dalmau on the Ganges in the Rai Bareilly District (*JASB* Vol LXIX, p 84).

**Dāmalipta**—Is a corruption of Tāmralipta. It was the capital of Sumha (*Hema-kosha*). See *Sumha*.

**Damila**—Same as Kerala the Malabar coast (*Akitta-Jātaka* in the *Jātakas*, IV, 150), or South Malabar (Burnell's *South Indian Paeolography*, p 51). It is the Limurike of Ptolemy which, according to Dr Caldwell, was a mistake for Damir-ike (see McCrindle's *Ptolemy*, p 49), "ike" in Tamil meaning a country. It was near Nāga-dvīpa or Ceylon, and a Damila dynasty reigned there. Dhātusena (459-477 A.D.), defeated the foreign usurpers and restored the national dynasty (*Mahāvamsa* ch 38, *S.B.E.*, X Intr XV). This shows that Damila was close to Ceylon.

**Damodara**—The river Dāmudā in Bengal (*K. Ch.*).

**Dandaka**—Same as *Dandakāranya* (*Brahma P.*, ch 27).

**Dandakāranya**—Same as *Mahārāshtra* (*Rāmāyana*, Āranya, ch I, and Dr Bhandarkar's *Early History of the Dekkan*, Sec II) including Nagpur. Rāmachandra lived here for a long time. According to the *Rāmāyana*, it was situated between the Vindhya and the Saibala mountains a part of it was called Janasthāna (Uttara K., ch 81, *Uttara-Rāmacharita*, Act II). According to Mr Pargiter, Dandakāranya comprised all the forests from Bundelkhand to the river Krishnā (*The Geography of Rāma's Exile in J.R.A.S.*, 1894, p 242). Bhavabhūti places it to the west of Janasthāna (*Uttara Rāmacharita*, Act I).

**Daapura**—Same as *Udandapura*.

**Dantapura**—The ancient capital of Kalinga (*Dāthadhātuvamsa*, Turnour's *Account of the Tooth-relic in Ceylon*—*JASB*, 1837, p. 860). According to some writers, it is the same as Puri (Jagannātha) in Orissa, which, they say, was the place where Buddha's tooth was kept and afterwards removed to Ceylon. The left canine tooth of Buddha is said to have been brought and enshrined by Brahmadatta, King of Kalinga, shortly after the death of the former. According to the *Dāthāvamsa*, the tooth was taken from the funeral pile of Buddha by Khema, one of his disciples, who gave it to Brahmadatta, and was kept and worshipped in a temple at Dantapura for many generations. The tooth was taken to Pātaliputra in the fourth century A. D., by Guhasiva, king of Kalinga. The tooth is said to have worked many miracles at Pātaliputra to confound the Nigranthis or Jainas at whose instigation it was ordered to be taken there. Rājā Pāndu got the tooth from Dantapura (*JASB*, 1837, pp. 868, 1059). It was brought back to Dantapura by king Guhasiva and placed in its old temple. After the death of Guhasiva in battle with the nephews of Kṣhadrhāra, a northern king, who had attacked Dantapura for plundering the tooth, it was removed to Ceylon by his daughter, Hemamālā and her husband Dantakumāra, a prince of Ujjain and sister's son of Guhasiva, in the reign of Kirttisiri Meghavarna (A. D. 298–326) who guarded the relic at Anurādhapura. see **Anurādhāpura** (Tennent's *Ceylon*, Turnour's *Tooth-relic of Ceylon*, *Dāthāvamsa* translated by Mutu Coomara Swami, and Turnour's *Dāthadhātuvamsa* in *JASB*, 1837, p. 866). It is now kept at Kandy near Ardhanaipura in the Mahigawa temple. For the procession of the tooth-relic at Kandy, see *Mahāvamsa*, ch. 85. It has been variously identified with Danton in the district of Midnapore and with Rājmahendri on the Godāvarī. But it is now settled that the ancient Dantapura is Puri in Orissa and this identification is confirmed by the tradition that after Krishna was killed by Jarā, his bones were collected and kept in a box till king Indradyumna was directed by Vishnu "to form the image of Jagannātha and put into its belly these bones of Krishna" (Garrett's *Classical Dictionary of India* under *Jagannātha*, Ward's *History of the Hindoos*, I, 206).

**Dantura** It is evidently a corruption of Dantapura. see **Dantapura**. (*Bṛihat-samhitā*, xiv, 6.)

**Darada** Dardistan, north of Kāśmīra on the upper bank of the Indus. Its capital was Daratpuri, which has been identified by Dr. Stein with Gurez (*Mārkaṇḍeya P.*, ch. 57). It was a part of the ancient country of Udyāna (see Monier Williams' *Buddhism*). Dr. Stein says "Then {Daradas'} seats, which do not seem to have changed since the time of Herodotus, extend from Chitral and Yasin across the Indus regions of Gilgit, Chilas and Bunji to the Kishangangā valley in the immediate north of Kasmir" (Dr. Stein's *Rājatarangini*, Vol. I, p. 47).

**Darbhavatī** Dabhoi in Guzerat, thirty-eight miles north-east of Bharoch and twenty miles south-east of Baroda (Burgess's *Antiquities of Kathiawad and Kachh*, p. 218, and *Ep. Ind.*, Vol. I, p. 20). Fuhrer (*M. A. I.*) identifies Darbhavatī with Dībhāi, twenty-six miles south-west of Bulandshahar. Dībhāi was the Radoph of the Greeks.

**Darddura**—The Nilgiri hills in the Madras Presidency (*Raghuvamsa* IV, *Bṛhatsamhitā*, ch. 14, *JRAS*, 1894, p. 262). In some editions of the *Raghuvamsa* it is mentioned as *Darddara*. Same as *Durddura*.

**Darsanapura**—Dasa on the river Banas in Guzerat (*Bṛhajjyotishārnava*).

**Dāru-vana**—See **Chamatkārapura** (*Kārma P.*, II, chs. 37, 38). Same as **Deva-dāru-vana**.

Dāru or Dārūkā-vana, which contains the temple of Nāgeśa, one of the twelve Great *Īngas* of Mahādeva (*Siva P.*, I, 38) has been identified with Aundha in the Nizam's

territory (*Arch S Lists, Nizam's Territory*, xxxi, 21, 79,) but the *Śiva P*, (I, 56) places Dârukâ-vana close to the Western Ocean

**Dârukâ-vana**—See **Dâru-vana**

**Darva**—The country of the Dâivas, a tribe living with the Abhisâras between the Vitastâ and the Chandrabhâgâ (*Mahabhârata*, Vana, ch 51, Dr Stein's *Râjataranginî*, Vol I, p 32, Vol II, p 432)

**Dârvabhisâra**—The whole tract of the lower and middle hills between the Vitastâ and the Chandrabhâgâ, it included the hill state of Râjapuri, it was subject to Kâsmîra (Dr Stein *Râjataranginî*, I, 32) See **Darva**

**Dasanagara**—Same as **Dasapura**

**Dasapura**—Mandasor in Malwa (*Brihat-Samhitâ* ch 14, *Meghadûta*, Pt I, slk 48) For an explanation how Dasapura was changed into Mandasor, see Dr Fleet's note in the *Corp Ins Ind*, Vol III, p 79 It is called Dasor by the people of the neighbouring villages

**Dasarha**—Dwarka Guzerat (*Mbh*, Vana P, chs 12 and 13)

**Dasârna**—The name means "ten forts, *rna* = a fort" 1 The *Mahâbhârata* mentions two countries by the name of Dasârna, one on the west, conquered by Nakula (*Sabhâ P* ch 32) and the other on the east, conquered by Bhîma (*Sabhâ P*, ch 30) Eastern Malwa, including the kingdom of Bhopal, was Western Dasârna, the capital of which was Vidîsâ or Bhîlsa (Dr Bhandarkar's *History of the Dehkan*, sec III) It is mentioned in Kâlidâsa's *Meghadûta* (t I, vs 25, 26) Its capital at the time of Asoka was Chaitiyagiri or Chetiyagiri Eastern Dasârna (the Dosarene of the *Periplus*) formed a part of the Chhattisgadhi ("thirty-six forts") district in the Central Provinces (Prof Wilson's *Vishnu P*, Hall's ed, Vol II, p 160 note 3) including the Native State of Patna (*JASB*, 1905, pp 7, 14) 2 The river Dasan which rises in Bhopal and falls into the Betwa (*Mârkan-deya P*, ch 57), Garrett identifies the river with "Dhosaun" in Bundelkhand (Garrett's *Classical Dictionary*) It is the Dosarian of Ptolemy

**Dâseraka**—Malwa (see *Trikândasêsha*)

**Dehali**—See **Indraprastha**.

**Devabandara**—Diu in Guzerat In the 7th century A D, the ancestors of the Parsis of Bombay left Persia on account of oppression and resided for some time in Diu before they finally settled in the island of Sanjan on the Western Coast of India in the early part of the 8th century A D. (*Bomb Gaz*, IX, Pt II, pp 183 ff, XIV, pp 506—536, *Journal of the Bom Br of the R A S*, I, p 170)

**Devadâruvana**—Same as **Dâruvana**, where Luga worship was first established It was situated on the Ganges near Kedar in Garwal (*Kûrma P*, Pt II, chs 37, 38. *Śiva P*, Bk IV, ch 13, v 16, *Râmâyana*, Kishk, ch 43) Badarikâśrama was situated in this Vana (Ānanda Bhatta's *Ballâla-charita*, II, 7)

**Devagada**—Same as **Dharagada**.

**Devagiri**—1 Dowlatabad in the Nizam's territory It is mentioned in the *Śiva P* (*Jñâna Samhitâ*, ch 58) See **Mahârâshtra** and **Sivâlaya**. 2 Part of the Aravali range 3 A hill situated near the Chambal between Ujjain and Mandasor (*Meghadûta*, Pt I) It has been identified by Prof Wilson with Devagara situated in the centre of the province of Malwa on the south of the Chambal

**Devakûṭa**—Śrîpâda Adam's Peak in Ceylon (Turnour's *Mahâvamsa*). See **Sumana kûṭa**

**Devala**—Tatta in Sindh.
